NOTES OF THE WEEK.

A year has now passed since THE NEAR EAST was started on its present lines. Intended primarily for the benefit of Turkey, Egypt, and adjoining countries, it has seen its circulation during this short period extend all over the world. Interest in the Near East is no longer confined to the United Kingdom and the Continent of Europe, for our subscribers are now to be found in British dominions in both hemispheres; in the United States of America, where many Armenians and Greeks have settled; and in India, whose Moslem population is, not unnaturally, as Lord Hardinge has said quite lately, and the Aga Khan tells us so forcibly this week, in the deepest sympathy with the troubles of their co-religionists abroad. In thanking residents of the Near East for all the help they have given during the past year, we should like to remind them that, although London happens to be the most convenient centre for publication, it is of the first importance that THE NEAR EAST should faithfully represent the views and feelings of those actually on the spot, as opposed to those living in England or elsewhere, who are merely interested spectators. Consequently, we take this opportunity to ask all our friends in the Near East to continue to help us as often as they can by making contributions in some form or other to the columns of this journal, and thus to give us always the right atmosphere. We desire the co-operation of everybody. Only in this way can THE NEAR EAST become what it aspires to be — an instructive and useful link between East and West. Owing to the increase of advertisements, it will be necessary very soon to modify slightly the external appearance of THE NEAR EAST, but the features that have contributed to its success will be maintained, and, with the support of our readers, will show steady improvement.

We print this week letters from prominent statesmen and journalists, whose interests have been closely associated with the Near East, all of which testify to the utility of this journal. We take this opportunity of thanking them for their gratifying appreciation of the manner in which THE NEAR EAST, to use Lord Curzon's words, "has during the year of its existence discussed the momentous problems embraced under its title."

There has been some delay in giving effect to the Porte's decision to reopen the Dardanelles, and the work was only begun on Tuesday last. The weather was unfavourable at first, but since Saturday it is possible that the Turkish Government has decided to proceed slowly in the clearing of the channel owing to the renewed activity of the Italian fleet in the Ægean Sea. It is inevitable that the Italians should seek to interpret the reopening of the Dardanelles as a serious diplomatic defeat for Turkey; but this attitude, although mischievous, is not likely to deceive either Turkey or the neutral Powers. The Italian contentions that "Turkey may defend herself in the Dardanelles as she likes, but not with means that disturb or render impossible international commerce," and that "while requiring the Porte to keep the Straits open Europe cannot without a breach of neutrality lay down the condition that Italy should guarantee their inviolability" will not find acceptance outside Italy. Throughout Europe the consensus of opinion appears to be that the Turkish Government has acted wisely in acceding to the request to reopen the Dardanelles, but that it was well within its right and adopted a perfectly natural course in closing them.

The closing of the Dardanelles was the subject of an interesting discussion in the House of Lords last week. In reply to a question, Viscount Morley, while withholding the details of the transactions between Great Britain and the Governments of Italy and Turkey, elaborated "the full duties of a firmly neutral Power" which had been "thoroughly and assiduously followed" by the Cabinet. His defence, unfortunately, confirms the belief that obsession by a rigid interpretation of the duties of neutrality or preoccupation in other directions caused the British Government to be left out of any considerations that may have led to the reopening of the Straits. In any technical *impasse* Great Britain ought to have been the first to come to the assistance of one or other of the belligerents. Lord Morley made an admirable statement of the rights of Italy and Turkey respectively to conduct the war as seemed good to them, and pointed out how the Porte's treaty obligations to keep open the Dardanelles to commerce could not override the dictates of self-preservation. But he did not meet the contention underlying every discussion of the bombardment and closing of the Dardanelles, that such an eventuality ought to have been anticipated by the Powers, especially by Great Britain, with her predominant maritime commitments, and guarded against in the interests of international commerce. The point was well put by Lord Lansdowne, who said:—"It seems to me that just as public opinion in any country

Digitized by Google

1830-1/2

would be slow to tolerate arrangements under which a local trade dispute might have the effect of paralysing the whole industrial life of the country, so public opinion amongst the great nations would be slow to tolerate a state of things under which a local conflict involving only two Powers would be allowed to create such serious detriment and disturbance to the whole trading community of the world." When Lord Lansdowne added that he understood from Lord Morley's speech that British diplomacy was being directed to obtain the recognition of that principle, it is to be feared that he read into Lord Morley's speech more than the actual words can carry. From the recorded text we are led to infer, on the contrary, that no steps have yet been taken to meet the possibility of a recurrence of the predicament in which the Dardanelles incident plunged Europe. How vital the question is to British trade may be gauged from the illuminating article on the Closing of the Dardanelles which appears on another page. There can be no doubt of the necessity of a recognition of the principle laid down by Lord Lansdowne, and we should be glad to think that Great Britain was taking a leading part in securing that recognition.

Further action was taken by Italy in the Ægean Sea on Saturday, May 4, when the Italian forces occupied the island of Rhodes. At dawn a junction was effected between the ships under Admiral Viale and a convoy with troops under General Ameglio, and while the fleet was summoning the Turkish Governor in the town of Rhodes at the extreme north of the island to surrender, the troops were landed at Kalithea Bay, a few miles down the east coast. No opposition appears to have been encountered during the disembarkation. The Governor resigned under protest, and the Italian flag was hoisted over the town during Sunday. Meanwhile the garrison, for which the Governor disclaimed any responsibility, had withdrawn to the heights above the town but in falling back contrived to give battle to the Italian troops as they advanced from the bay to Rhodes. Some of the Turkish soldiers were taken prisoners, and the remainder are supposed to have suffered heavy losses in their retreat. As in the case of the bombardment of the Dardanelles, the occupation of Rhodes has little immediate effect upon the course of the war. The possibility of the seizure of these islands has been long expected, even by Turkey. They are little more than nominal appendages of the Turkish Empire, for their population is almost entirely Greek, and they offer little scope even to the Turkish tax-collector. On the other hand, the Italian Government may argue that the occupation of these islands serves a double purpose. By drawing a cordon of naval bases across the southern end of the Ægean Sea the Italians will cut off the African seaboard from all communication with Turkey. In the second place, the possession of these islands may stand Italy in good stead when terms of peace have to be considered.

It would appear that the Italian plan of campaign is now directed towards the starving of the Turkish and Arab forces in Africa into submission. While the fleet is seizing strategic positions for the stoppage of the contraband trade, the Italian army of occupation is completing the chain of posts along the seaboard of Libya. Its latest success is the capture of Lebda, a small village two or three miles east of Homs, which has hitherto been in the undisputed possession of the Turks. Lebda is on the site of the ancient seaport of Leptis Magna, and it is significant of the slow progress made by the Italian arms that a position of no little importance within gunfire of Homs should have been left unmolested so long after the occupation of the latter post last October. With it the Turks have lost an important point of communication with the sea, and its importance to them may be judged from the fact that their losses are said to have been 300 killed in addition to other casualties, while the Italians found it necessary to send out a force from the Mergheb heights, south-west of Homs, which they seized on February 27, in order to prevent reinforcements reaching Lebda from the main body of the enemy in the neighbourhood. Time must show whether starvation will accomplish what shells failed to effect. Discussing the Future of the Levant in this issue, Sir Adam Block writes of the new forces at work in the government of Turkey. In another direction a change is noticeable. Formerly, when the attitude of Turkey turned on the measure of security felt by Abdul Hamid in Yildiz Kiosk, a naval demonstration or the landing of troops on an island could be counted upon to secure the objects that the aggressors had in view. To-day, Young Turkey seems to have acquired the sense of national respect that knows nothing of the personal fears of a despot, and Italy is proving by bitter experience that it has created a fresh obstacle to be overcome by those who claim a reversion of the Sick Man's inheritance.

The Cretan difficulty has not yet found its solution. While eighteen of the Deputies appointed to the Greek Chamber are detained on foreign men-of-war in Suda Bay, some twenty-two others are already in Athens, and there is some ground for the appeal said to have been made by the Greek Government to the Powers to release their captives. It is urged that popular feeling, both in Crete and in Greece, can only be still further excited by their prolonged detention, and that for all the purposes of the islanders in their attempt to force their representation on the Greek Chamber a sufficient number of Deputies has contrived to reach the capital. These latter, indeed, have so far secured recognition that they have been allotted places at the Cathedral celebrations in honour of King George's name-day—not with the Greek members of Parliament, it is true, but in another part of the building by themselves. The Cretan Deputies afterwards drove in procession through the streets of Athens amid enthusiastic applause from the crowd. Their reception, however, does not necessarily imply any strong popular feeling in favour of their admittance to the Chamber. This question, fortunately, has not to be decided by the mere *mot d'ordre* of the Government. The amended Constitution provides that nearly all newly elected Deputies before entering the Chamber must have their powers verified by a court convened *ad hoc* after each General Election. As the Cretan Deputies have not been elected according to the provisions of the Greek electoral law, they will not be able to receive the necessary warrant permitting them to take their seats. Nevertheless, the embarrassment of the Greek Government can only be increased by a continuation of the present anomalous state of affairs, and it becomes more and more imperative that the four Powers should find a definite solution of a situation for which they are in some degree responsible.

In the brief summary of the Egyptian Judicial Adviser's Report that we published last week reference was made to the close connection between the amount of work transacted by the courts and the degree of prosperity enjoyed by the country at large. It is a reflection of this relationship that the year in which the cotton crop realised £E33,840,000, or £E5,700,000 in excess of the previous record, should have seen a notable diminution in the civil work of both native and mixed tribunals. Commercial cases in the latter showed a decrease of over 20 per cent., while there was a similar decrease in the number of bankruptcies. The sensational failures recorded during the latter months of 1911 might seem to challenge the accuracy of the deductions regarding the economic situation of Egypt; but the official inquiries have shown conclusively that these failures were the long-delayed but inevitable result of unsound method of business initiated even before the financial crisis of 1907. Their effect may be reflected in the quotations of Egyptian securities, but their practical results in the country itself have been inconsiderable. Prospects for the immediate future, it is generally acknowledged, are very hopeful. The material well-being of the country is being maintained in every direction, and the confidence in the financial policy of the Government, which is still indulging in heavy but wise outlays on reproductive enterprises, ought to enable the foundations of a really great future for Egypt to be laid firm and deep during the next few years.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 4.

There is no necessity to look a gift horse in the mouth and inquire what were the motives that impelled the Sublime Porte to open the mine-free channel in the Dardanelles. A desire to stand well with the Powers and a natural fear of inflicting too great commercial losses on Russia and Bulgaria, the bad effect caused by M. Sazonoff's references to Turkey in the Duma, and a gradual realisation of the fact that the Italian fleet had no desire or intention of forcing the Dardanelles at the moment of its melodramatic appearance, combined with the representations of the Ambassadors to produce the result which Europe so ardently desired. Turkey has not lost by yielding to the friendly pressure put upon her by the European Governments. On the contrary, she has gained the recognition, or, better, the renewal of their recognition, of her right to close the Dardanelles in case of danger to her capital. Under these circumstances it does not very much matter whether the Italian Admiral had any intention of forcing the Straits or not.

Turkey and Russia.

I have already referred to M. Sazonoff's speech and the impression it has produced among the Turks. The references contained therein to the social and cultural needs of the Eastern Christians and the necessity for the new régime to take the aspirations of these elements into account has caused the *Tanin* to rage furiously, as it did when the British Press referred with some warmth to Young Turk policy in High Albania and the fruits thereof. But in official circles the complimentary references to Italy have caused most alarm, and the belief which persists, in spite of a multitude of *démentis* from St. Petersburg, that Russia has some secret understanding with Italy for common action in the Near East, is obviously entertained in high political quarters. It may therefore be understood that Count Berchtold's recent statement as to Austro-Hungarian policy in the Near East and in Europe generally has been received with the liveliest satisfaction here.

As for the Eastern frontiers, the Turco-Persian Boundary Commission has held several sittings, and, according to such information as has been published, has made some progress in settling various points at issue; but the Turkish Press still reports concentrations of Russian troops on the frontier, and the Russian military authorities are still believed to look with much suspicion on the presence of the Turks in the Urmiah region. Still, nothing seems to have occurred that justifies extreme nervousness on the part of the Turks, whose anxiety is probably due in reality to the perception of the fact that they will ultimately be obliged to withdraw from the not unfertile Persian districts which they have seized and virtually annexed, despite the faint and plaintive protests of Teheran.

The British Naval Mission.

Admiral Williams left on Tuesday with most of his staff for London, his contract having expired. He had a good send-off, and in a brief speech which he delivered at the Sirkedji Station before leaving spoke hopefully of the progress made and to be made by the Ottoman navy. Despite considerable difficulties, the British officers attached to the Turkish fleet have rendered great services in improving its *morale* and organisation, although the outbreak of war between Turkey and Italy has naturally circumscribed their activity.

Shipping Disasters.

Two painful disasters have occurred in the course of the last week—the sinking by a mine of the Hadji Daud s.s. "Texas" off Smyrna and the destruction in the Dardanelles of the tug "Semendar," with four officers and some twenty soldiers, sailors, and crew on board. The loss of life at Smyrna amounted to sixty-eight persons. There seems to be no reason whatever to believe that the "Texas" was, as has been asserted by some of the survivors, struck by a shell from the forts, which undoubtedly fired across her bows to warn her off the mine field. No very definite information as to the cause of the Dardanelles disaster has been received.

The Elections.

The elections are not yet over, owing to the rebellious spirit displayed by many of the Albanian and some of the Anatolian electors, who, to the Committee's surprise, insist on voting for candidates of their own choice. Kaiseri, the birthplace of the late Zeki Bey, has apparently succeeded in electing Opposition candidates; Konia still stands out for its favourite Conservative Hodja, Zein-ul-Abeddin; while Dibra insists on Basri Bey or no other being elected. At Berat Ismail Kemal has not been re-elected, the Government having prevented him from landing at Avlona, or having issued orders to the local authorities to arrest him should he land; but the Albanian Nationalists have, according to the latest news, got in their two candidates, Sureya Bey Flora and Sami Bey Vrionis. According to the latest news, the Catholics of Skodra Province were still without a candidate or the hope of electing one, which is certainly strange, considering that they form a large majority of the inhabitants of that province. Hadji Adil Bey is now at Dibra with the Reform Commission, and will proceed thence to Monastir. He is mentioned by part of the Press as a likely Committee candidate for the post of Speaker of the Turkish Chamber of Deputies. He will thus have travelled in Albania and Macedonia to little purpose if his policy is reversed by a new Minister who lacks his experience.

Much alarm has recently been manifested by the Patriarchates as to the future policy of the Young Turks. A recent interview between the Greek and Armenian Patriarchs has caused much comment, both having referred with considerable bitterness to the conditions under which military service was enforced on Christians who are the sole support of their families, and to the exclusion of the clergy from the Provincial Councils, which will take effect when the new law is brought into operation. The Œcumenical Patriarch further expressed the opinion that the Committee Government proposed to deprive the Patriarchs of their ancient privileges and introduce legislation making them mere State officials, appointed or dismissed by Imperial *iradé*. The Armenian Patriarch's comment: "They must know that we are not Sheikhs-ul-Islam," foreshadows resistance on his part. And if the Armenians resist, what will the Greeks and Exarchist Bulgars not do?

THE POWER OF ISLAM.

Speaking on Wednesday at the Royal Society of Arts on Northern Nigeria, Mr. E. D. Morel referred to the power of Islam. It was useless, he said, to ignore this force, which had, on the whole, greatly raised the standard of the races among whom it had become implanted. It had largely assisted in moulding in the heart of negro Africa a civilisation, a system of civil government, of jurisprudence, and of ethics immeasurably superior to that which surrounded it in the non-Islamised pagan belts, and which it was in the essential interests of the people should be maintained and strengthened by the British rule. The power of Islam was founded upon the Koran, and the Koran was at once the Constitution, the Charter, and the Bill of Rights. It was often overlooked that Islam was not only a religion but a social system; that to attack the religion was to attack the fabric upon which society reposed, and that to attack the fabric was to attack the religion.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 1.

The Khedive.

In accordance with his usual custom, the Khedive, who, when not paying frequent visits to his numerous properties, has spent the winter at the Palace of Koubbeh, left Cairo on Monday for his summer residence at Montazah, near Alexandria. Before his departure His Highness held the usual farewell reception at Abdin Palace. Lord Kitchener, together with the other foreign Agents, was present at the ceremony, the British Agent taking the place among his diplomatic colleagues which falls to him as the latest comer in Cairo. Contrary to the custom followed in past years, the British Agency is not moving into summer quarters at Ramleh at present, but will remain here probably until early in July. The Khedive, it is expected, will leave Egypt about the middle of this month for Constantinople and a tour in Europe, in the course of which His Highness will probably visit London.

Increase of Crime.

The annual report of the Judicial Adviser for 1911, which has just been published, contains several points of interest. To begin with, as the statistics of crime indicate, and as Sir Malcolm McIlwraith states, the effect of the Relegation Law of 1909 appears to have been but momentary, in so far as putting a check upon the commission of crimes is concerned. By this law, the introduction of which aroused considerable criticism, the authorities, as will be remembered, are empowered to place under police supervision of varying strictness persons of bad character. As the result of this measure, the number of crimes committed during 1910 fell to 3,371, as compared with 3,828 in 1909. During last year the figures rose again to 3,874, a number slightly in excess even of those for two years ago before the Relegation Law had been put into force. The increase as compared with 1910 has been under nearly every heading of crime, and fairly evenly distributed throughout the country. The number of murders and attempted murders (824 and 560 respectively) has risen by 99, and of robbery and attempted robbery by 68. In serious misdemeanours the upward movement which has been noticeable since 1907 is still maintained, the figures showing an increase, of which more than half is accounted for by "thefts," of 5,085. This rise of criminality is a matter of serious import. Two question at once present themselves, to which, as perhaps being outside the province of such a document, the report gives no hint of an answer. The first is whether, in view of the evident inefficacy of the Relegation Law, it is intended to repeal this measure; and secondly, whether any other kind of deterrent legislation is contemplated.

The Nationalist Trial.

The Abaza-Zagloul case, to which reference was made in my letter of last week, has been postponed until May 13, so that those who are expecting "revelations" will have to possess their souls in patience for another fortnight. The Nationalist trial, however, began and ended yesterday morning. As was expected, Farid Bey did not return from Constantinople to meet the charge brought against him, nor is it likely that the taste of prison which he had a short while ago will make him anxious to give himself up to the authorities to undergo the term of a year's imprisonment with hard labour to which he was sentenced. Aly Bey Fahmy Kamel and Ismail Effendi Hafiz, the directors of the *Lewa* and the *Alam* respectively, who were charged with complicity, inasmuch as they had published Farid's speech in their journals, were each sentenced to three months' imprisonment. The punishment meted out to these three exponents of the Nationalist idea is not such as to encourage others to follow in their footsteps, although those who criticise the sentence passed on Farid should not forget that it was not his first offence of the kind. To be a martyr for one's principles is doubtless a noble impulse, but to sit comfortably in Constantinople with his former henchman, Sheikh Shawish, for company, is probably more to Farid's liking. It, therefore, seems as though the Nationalist party were in a fair way to be deprived, for a term of years at all events, of the services of its "President for life." Nor is the attempt on the part of Sheikh Shawish to evade the Press Law by removing to the capital of the Turkish Empire, and from there fulminating against the Egyptian Government, meeting with success. Shortly after his arrival in Constantinople, the former editor of the *Alam* started an Arabic newspaper, *Al Hilal El Osmani*, copies of which were sent over here, and were bought up so rapidly that they are said to have fetched a shilling apiece. But the life of Sheikh Shawish's journal in Egypt has been a short one, since, in consequence of the character of its articles, which are "such as to lead public opinion astray, and to disturb the public peace," the Minister of the Interior has prohibited its admission into the country.

Strike at Al Azhar.

At the close of last week disturbances took place among the students of Al Azhar University, some of whom, in order to vent their grievances, went on strike and did their best to prevent their teachers giving their lessons. Such disturbances are nothing new in this the greatest Moslem Uuniversity in the world. On this occasion the cause appears to have been dissatisfaction with the system of examinations which was introduced when the administration of the institution underwent reform some few years ago. The interest of the incident does not lie, however, in the fact that disturbances took place, but in the manner in which they were quelled. One of the privileges enjoyed by the Azhar students is exemption from military service—a privilege which may perhaps account, in part, for the number of those who desire to become "learned men." Once dismissed, however, this privilege lapses. The authorities, therefore, sent as many of the ringleaders as they could lay hands upon away from the University, and these turbulent spirits are now expending their surplus energy in the strenuous work of the barrack square.

SPORTS IN ALEXANDRIA.

(From Our Own Correspondent.)

Alexandria, May 3.

A huge stadium of iron and stonework has been constructed at Alexandria on a plot of land set aside for that purpose by the municipality. The Philaton Sporting Society has spent £E8,000 in building the stadium of 10,000 seats. The beginning of the month will witness a series of sporting events, both athletic and gymnastic, in which Egyptian and Greek clubs will take part. The Greek cruiser "Averoff" and a flotilla of torpedo boats are expected from Athens in connection with the fêtes, and a number of visitors are to arrive from various towns and cities.

The Alexandria Municipality has asked the International Olympic Committee to designate Alexandria for the Sixth Olympic Meeting, to be held in 1916. Four have already been held—in Athens in 1896, in Paris in 1900, in St. Louis in 1904, and in London in 1908; the fifth is being held this summer in Stockholm.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 3 mai.

La capture des deputes cretois.

Après la venue des premiers dix-sept députés crétois arrivés ici sans encombre, on était loin de s'attendre à l'incident survenu au second groupe de dix-neuf députés qui à leur départ de la Canée ont été capturés par la flotte internationale. Il est vrai que ceux du premier échelon sont partis sans bruit, en simples particuliers, alors que les autres se sont embarqués ostensiblement et ont été l'objet de la part de leurs compatriotes d'ovations chaleureuses et de bruyantes manifestations, ce qui rendait publiquement manifeste le but de leur départ pour la Grèce. Tout cela s'étant passé sous les yeux des consuls des puissances protectrices, dont quelques-uns, comme celui d'Angleterre, se trouvaient présents, constituait une provocation contre les puissances, qui tout dernièrement encore faisaient connaître aux Crétois par leur note du 17 avril qu'elles entendaient " maintenir le *status quo* dans l'île et que l'augmentation de l'escadre internationale a eu lieu pour bien manifester aux Crétois la volonté des puissances à cet égard." Voila dans quelles conditions les puissances ont dû intervenir et empêcher le départ de ces députés, sinon, si elles les laissaient faire, elles auraient eu l'air d'approuver et de reconnaître tacitement cet acte révolutionnaire. Dans cet ordre d'idées on conviendra que les Crétois ont voulu aller eux-mêmes au devant du nouveau camouflet qu'ils ont reçu des puissances. C'est ainsi que dès que le bateau grec " Péloponissos " s'est mis en route, avec les dix-neuf députés à bord, le croiseur "Minerva" leur fit signe de rebrousser chemin. Sur le refus du commandant de se conformer à cet ordre, le croiseur lui tira un coup de canon à blanc qui l'obligea à s'obtempérer à son ordre et à se rendre à la baie de la Sude où se trouvent les autres navires de l'escadre internationale. Peu après un officier anglais, entouré de marins anglais, français et russes en armes, est monté à bord du " Péloponissos " et a invité les députés à le suivre auprès du commodore anglais. Six des députés étant restés cachés sur le bateau, l'officier, après avoir conduit les treize autres, revint au " Péloponissos " et, le révolver en main, leur fit connaître qu'il userait de la force s'ils refusassent d'obéir; alors ils ont renoncé à toute résistance et ont suivi l'officier. Sept ont été gardés à bord du croiseur anglais, six à bord d'une croiseur russe et les autres sur le croiseur français. Leur capture a produit une grande effervescence en Crète et le gouvernement crétois a adressé une protestation aux consuls que ces derniers lui ont retournée, parce que cette communication était encore écrite sur des feuilles de papier portant l'entête de " Royaume de Grèce." De plus un meeting très nombreux a eu lieu à Candie dans le même but de protester. D'autre part le gouvernement hellénique a instamment prié les ministres des quatre puissances protectrices à Athènes de faire mettre en liberté ces députés. Un télégramme reçu de la Canée dit que le gouvernement crétois espère qu'ils seront élargis dans la journée. Cela cependant ne concorde point avec quelques autres renseignements de bonne source et d'après lesquels il serait, au contraire, question de les déporter sur le territoire de l'une des puissances protectrices.

Sur les soixante-neuf députés désignés pour venir à Athènes il en reste encore une trentaine que le " Péloponissos " allait prendre à Retimo et à Candie lorsqu'il a été capturé. Ces derniers attendront, affirme-t-on, que les autres dix-neuf soient relâchés pour venir avec eux, par petits groupes, à Athènes. Reste à voir si leurs projets pourront être réalisés.

Les députés qui sont ici, une vingtaine environ, ont envoyé, dès leur arrivée, une délégation de cinq d'entre eux chez leur compatriote M. Vénizélos, qui S'est efforcée de les convaincre de l'inopportunité du mouvement révolutionnaire et de leur venue à Athènes et a fait tout son possible pour les amener à retourner en Crète. Mais ses efforts n'ont abouti à rien. Le lendemain les Crétois ont visité le maire, M. Mercouris, M. Mavromichalis et d'autres politiciens pour solliciter leur appui, mais il ne paraît pas qu'ils aient reçu beaucoup d'encouragement, du moins pour le moment. Pourtant ils paraissent décidés à persister dans leurs résolutions et ils disent qu'ils attendront ici jusqu'à l'ouverture du parlement afin d'y entrer et qu'ils ne s'en iront que lorsque la chambre tout entière leur aura déclaré ouvertement qu'elle ne les veut pas.

La presse ministérielle ne fait que prêcher aux Crétois le retour à la sagesse et à la légalité. Le *Patris* leur fait justement observer que, si par leurs agissements inopportuns ils provoquent, comme tout porte à le croire, la réoccupation de l'île, les puissances seront ainsi dispensées de leur promesse, donnée lors du retrait de leurs troupes, d'examiner avec bienveillance, au moment opportun, le désir des Crétois de s'unir à la Grèce. L'autre organe du gouvernement, *l'Hestia*, supplie les plus sages et les mieux avisés des hommes politiques de l'île de trouver le plus tôt possible une issue pour sortir de l'impasse où ils se sont mis par leur mouvement intempestif. Le dit journal conseille comme le meilleur moyen à cet effet que le vétéran M. Michélidakis qui, après avoir joué le rôle de Nestor dans son pays, a été le promoteur de l'état révolutionnaire actuel et qui, voyant maintenant que cela n'a pas de chance de réussite, s'est retiré à Candie, revienne à la Canée, et convoquant l'assemblée, use de toute son influence personnelle pour l'amener à revenir sur ses décisions et notamment sur celle ayant trait à l'envoi de députés à Athènes. Cela fait qu'il procède à la formation d'un cabinet composé de tous les partis et qu'il en accepte la présidence, mettant de côté toute considération de parti, pour mettre fin à l'état quasi anarchique dans lequel se trouve l'île. Mais il est peu probable que ces bons conseils seront suivis.

Bien que l'on ne puisse de bonne foi contester aux Crétois les justes titres qu'ils ont acquis par leurs sacrifices héroïques, il n'en est pas moins inconcevable de les voir persister jusqu'à ce point, et quelques soupçons ont déjà été exprimés à ce sujet faisant allusion à des instigations étrangères. Pourtant rien que les dernières déclarations de M. Sazonoff suffiraient pour leur prouver l'impossibilité d'obtenir en ce moment un changement du *status quo*.

Heureusement à Athènes cela commence à être compris, même par l'opposition. Le pays qui, pour la question crétoise, a essuyé tant de revers et s'est imposé de durs sacrifices qui lui ont créé une situation économique peu enviable, ayant maintenant confié la direction de ses destinées à un homme d'état crétois expert dans cette question, comme à un docteur spécialiste pour traiter un mal qui l'accable depuis si longtemps, se sent maintenant rassuré et voit avec regret l'attitude de récalcitrante des compatriotes de M. Vénizélos à ses sages conseils pour les ramener dans la bonne voie.

M. Venizelos chez le Kaiser.

M. Vénizélos s'est rendu à Corfou où il a reçu un accueil non moins chaleureux qu'en Thessalie. Une foule très nombreuse se trouvait au débarcadère à son arrivée et la police eut grand peine à empêcher le peuple de dételer les chevaux de la voiture du président du conseil pour la traîner à bras. Ces manifestations chaleureuses faites à M. Vénizélos dans la province même de M. Théotokis est un signe caractéristique de la déchéance du parti de ce dernier.

Le même jour de son arrivée à Corfou M. Vénizélos a été invité par le kaiser à un déjeuner où assistaient aussi le prince Constantin et la princesse Sophie. L'empereur a retenu M. Vénizélos pendant trois heures et lui a remis les insignes du Grand Cordon de l'Aigle rouge. La présence de la princesse Sophie au déjeuner ainsi que la décoration décernée à M. Vénizélos, venant quelques jours après les observations et admonestations sévère mais franches qui ont été adressées par la presse ministérielle à la princesse, ont été très commentées. La presse d'opposition voit dans cette visite un revirement de la politique anglophile qu'elle se plait à attribuer à M. Vénizélos.

Les manœuvres de l'armee.

Les grandes manœuvres auxquelles prendront part deux divisions, celle d'Athènes et celle de Larissa, auront lieu aux environs de Thèbes entre le 26 mai et le 1 juin. Le 2 juin les troupes, qui s'élèveront à 43.000 hommes environ, seront passées en revue par le roi. Les aéroplanes commandés en France et qui d'ici-là seront livrés au gouvernement grec, feront leur première apparition dansces manœuvres.

Des manœuvres navales, qui dureront pendant quelques mois, commenceront aussi prochainement entre Volo et Aghia Marina (escale de Lamia) sous la direction de l'amiral Tufnell.

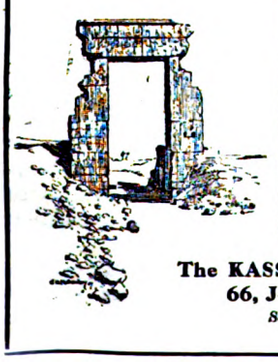
ARMENIAN LETTER.

(From Our Special Correspondent.)

Constantinople, May 3.

It is much to be regretted that a feeling of discontent against the Government is growing among the communities. Contrary to all expectations that after a four years' experience in power the Committee of Union and Progress would change their policy, the old questions are coming to the front again to-day to disturb the peace of the subject races. The general feeling among the people is that the Committee have decided to hamper the social progress of the Christian in order to give the Turk a chance to get on an equal footing.



Christian Communities' Committee.

During the week the Greek Patriarch paid a visit to the Armenian Patriarch just after the Bulgarian Exarch had left Koum Kapou Patriarchate. After a short consultation, the Patriarchs decided to form a Mixed Committee, representative of all Christian communities, to prepare a scheme of joint action for the maintenance of their mutual rights. Yesterday the Armenian National Council selected two delegates to the Mixed Committee, who will join the Greek and Bulgarian representatives for a final discussion on all disputed questions pending between the Government and the communities.

In the meantime the educational matter has been taken into consideration, and it has been decided to prepare a list of all the Armenian schools and teachers and present it, with the elementary and secondary school programmes, directly to the Minister of Education, thus putting an end, it is hoped, to the Turkish school inspectors' direct interference with the schools. The Greek Patriarchate will be informed of this action and asked to prepare its *takrir* after the same fashion.

The Armenian Deputies.

The elections are almost over, but we have not heard the end of them yet. The Committee had promised some twenty deputies for the Armenians, but only eight have been elected, of whom four are members of the Committee of Union and Progress and four members of the Dashnakist party. Armenian quarters like Bitlis, Diarbekir, Cilicia, and Cæsaria will have no representatives in the Chamber; and the Patriarchate is in possession of ample evidence to prove that thousands of Armenians were deprived of their electoral rights. Ahmed Nassim Bey, the newly-elected deputy for Constantinople and an influential member of the Committee, went to the Armenian Patriarchate yesterday and had a lengthy interview with Mgr. Arsharouni. In response to the Patriarch's protest Nassim Bey claimed that, contrary to the wishes of the Committee to elect at least fifteen Armenian deputies, the inhabitants of some vilayets had gone against their instructions. He said that he can prove his statements by producing copies of letters and telegrams which were sent from headquarters to the branch committees. Mgr. Arsharouni demanded that the Committee should repair their mistake before it was too late: otherwise, with the consent of the National Council, he would declare officially that Armenian members elected for the Ottoman Parliament are not representative of the Armenian nation.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, April 30.

The general situation remains unchanged. The recent action of the Italian fleet in these waters has left the Turks quite unmoved. The attack on Samos and the bombardment of the outer forts at the Dardanelles are considered more in the light of vexatory measures than effective operations, and it is pretty certain that so far as the Turks are concerned neither harm nor inconvenience has resulted. The determination to resist *à outrance* is gaining ground among all sections of the population, and this feeling is doubtless in great measure due to the apparent helplessness of the Italians, to their inability to penetrate into the hinterland of Tripoli or to extend hostilities to the Asiatic coast.

Accession Day.

The 27th inst., being the anniversary of the Sultan's accession, was kept as a general holiday. The banks were closed and business was practically suspended. The Governor-General held the usual reception at the Konak, receiving the visits of the foreign Consuls, the ecclesiastical authorities, and all the notables of the various communities. The Union and Progress Committee was very much to the fore on the occasion, its members being fresh from the triumph of the elections.

Amateur Theatricals.

An amateur variety performance is to be given at the end of the week at the Theatre de Smyrne by members of the British colony on behalf of the Sailors' Home, the Victoria Relief Fund, and the poor-box of the British Seamen's Hospital, all deserving institutions worthy of every support. Although the theatre can accommodate over 900, every seat has been booked in advance, which augurs well for the financial result of the performance.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, May 3.

The Reopening of the Dardanelles.

The report that the Turkish Government had decided upon the immediate reopening of the Dardanelles was received here with feelings of relief. Not only have commercial interests suffered to a great extent since the closing of the Straits, but Roumania feared that a continued tension might create trouble in the Balkans into which she would unwillingly be drawn. Roumania strongly desires peace, but would regard very unfavourably any aggrandisement of her southern neighbour, for a powerful Bulgaria would be a menace to her, especially to her province of Dabrodja, the peasant population of which is mainly Bulgarian. She herself would stand to gain nothing from an upheaval in the Balkan peninsula, as her aspirations lie in other directions. Her "unredeemed" lands, Transylvania, Bucovina, Bessarabia, are held by strong Powers, and there can be no hope of reclaiming them at present.

The Tramways Question.

Following the advice of the new Home Minister, the Municipal Council of Bucharest have decided unanimously to institute proceedings against the Bucharest Tramway Company in the courts. The suit will be followed anxiously by all political parties.

Municipal Theatre Sold by Auction.

The novelty of a municipal theatre being sold by auction was witnessed last week at Craiova, one of the most prosperous towns of Wallachia. The theatre was sold by order of the Court to pay a debt which the town had contracted towards the Crédit Foncier, and which was not met when due. A representative of the Ministry of Education was present at the auction, and secured the theatre for the Government by bidding a few hundred francs more than the amount due by the town to the bank.

The National Insurance Law.

The application of the new National Insurance Law —for Roumania also has been blessed with such a measure—is meeting with great opposition on the part of the working classes. At Ploeshti the workmen of forty factories struck and refused to pay their contributions. They contend that the pension which they will receive on attaining the age of sixty will be of small profit to them, whereas at present the new taxes weigh heavily upon them and only help to support an army of useless officials. They ask that the new law be suspended for further consideration.

LADY STRANGFORD HOSPITAL, PORT SAID.

Mr. W. J. Chrystal, of Glasgow, is appealing for donations towards the rebuilding of the Lady Strangford Hospital at Port Said. In a circular which he has issued Mr. Chrystal encloses a copy of a letter from Lord Kitchener, who writes:—

"During my recent visit to Port Said, on the occasion of their Majesties' return from India, I made an inspection of the Lady Strangford Hospital, opened in 1886, for British seamen needing medical or surgical aid. At a later date its benefits were further extended to seamen of all nations, and in urgent cases to passengers as well. The structure, which accommodates forty patients, is of wood, roofed with iron, and was designed merely as a temporary hospital. It has now stood for over twenty-five years, and at the present time shows such signs of decay that the committee is taking steps towards building a hospital of a permanent character, and one better suited to the growing needs of Port Said.

"My visit to the hospital convinced me that such action on the part of the committee was imperative, and I am fully prepared to support in every way the efforts now being made to raise the necessary funds.

"It is well known that the amount of shipping passing through the canal increases every year. In 1908 the number of vessels was 3,795; in 1909, 4,239; in 1910, 4,533; and in 1911, 4,969—and more than 60 per cent. of this traffic is British. The number of seamen requiring attention at the hospital increases accordingly. The object of the hospital is to provide for the sick and injured who have to be landed at Port Said.

"Towards the £8,000 required a private donation of £500 has been promised, and it is hoped that others will follow this lead and enable the committee to commence at once the erection of the new hospital."

Mr. Chrystal says: "I have been fortunate in securing the assistance of Mr. Francis Henderson, of the Anchor Line, and Dean of Guild of the City of Glasgow, to help me in obtaining donations from the shipowners in Liverpool here."

FUTURE OF THE LEVANT.

Sir Adam Block and the Young Turks.

The Near East is rendering most valuable assistance to the trade of the United Kingdom. The information furnished by evidently competent writers regarding the new economic era in Turkey is worth the closest attention of all those interested in our relations with Eastern Mediterranean countries.

As soon as it is possible to find a solution for the unfortunate war with Turkey—a war forced upon Turkey by no fault of her own—there is every likelihood that the desire of the "Young Turks," as they are called, to educate the people to the necessity of developing the country on Western lines, will have its effect. Great Britain seems to find some difficulty in understanding that the unchanging East is changing, and that those who are responsible for the government of Turkey are the very antithesis of those who governed (save the mark!) of yore.

They are reformers—with much to learn and liable to error, but still reformers—imbued with modern ideas and resolutely determined to make an earnest effort to save the country from disintegration. Whether they will succeeed or not depends much, no doubt, on the even respect they show to the various sects and races of the Empire, but also on the sympathy and encouragement that cannot fail to be accorded to them by those who are interested in the maintenance of Turkey, especially in the United Kingdom, if the British public is kept regularly informed as to their acts and aspirations, and can be persuaded to abandon the prejudices kept alive in many instances by want of accurate knowledge and to understand that the "impossible Turk" is not so impossible after all, but is an ordinary human being, with faults and virtues like any other hitherto more fortunate inhabitant of the globe.

Adam Block.

Constantinople, May 4.

THE TRANS-PERSIAN RAILWAY SCHEME.

Reuter's Agency learns that during the past few weeks important progress has been made in connection with the preliminary stages of the proposed Trans-Persian Railway. As a result of a series of conferences which have taken place in Paris between the international groups, the Statutes of the Société d'Etudes, which is to deal with the question of the necessary surveys for the line, the possibilities and costs of the undertaking, the concession from the Persian Government, and other matters, have been formulated.

The Société d'Etudes will comprise three groups—British, French, and Russian, each of which will provide 750,000 frs. (£30,000), or a total of 2,250,000 frs., towards the preliminary expenses. The Council of Administration will have twenty-four members—eight British and a similar number of French and Russians. There will also be a Committee of Direction composed of twelve members selected from the Council of Administration.

It is understood that Sir William Garstin will be vice-president, and that the British group will include representatives of Messrs. Baring, Parr's Bank, the Imperial Bank of Persia, Messrs. E. D. Sassoon, and Messrs. Forbes, Forbes, Campbell, and Co., the Indian merchants.

RUSSO-TURKISH RELATIONS.

Under date of the 5th inst. our Odessa correspondent writes:—M. Kokovtseff, the Premier, and M. Sazonoff, Minister for Foreign Affairs, arrive to-day at Livadia. M. Sazonoff is accompanied by the chief of the Turkish Department of the Russian Foreign Ministry, a fact which is generally interpreted as indicating an Imperial audience of unusual importance with regard to Russo-Turkish relations.

THE RED SEA BLOCKADE.

SOME PERSONAL EXPERIENCES.

The "Woodcock," a sturdy boat of some 1,300 tons, ever ready to go anywhere and carry anything that trade along the Arabian coast might impose upon her, was waiting for us at Aden.

The first-class passenger list consisted of our party—that is, the other two and myself—and the Professor. With the exception of the Captain, Mate, and Engineer, the crew, who were very numerous, and most of the remaining passengers, were Parsees. The Professor's destination was the Farsan Islands; ours was Salif. As the "Woodcock" had once before been held up and relieved of her cargo by the Italians, our chief preoccupation was speculating as to when and where we should fall in with the Italian warships.

Sheikh Said and Mokha.

The morning after our departure from Aden we had ample time to examine Sheikh Said through our glasses. This unfortunate spot seems to invoke the special attention of the Italians, having been used as a target at least four times. The old Turkish fort is situated at the head of the promontory off which lies Perim; its military value is practically nil; and by a little judicious placing of the attacking ship it is possible to bombard it to one's heart's content without fear of any return of fire. Later in the day we passed Mokha, since blockaded. This town, by the way, is not in a flourishing condition. Its population is considerably less than formerly, and it is no longer the centre of the coffee trade, though its name still clings to that article.

During the night we saw the searchlights of the Italian ship blockading Hodeidah, but it was not till morning that we expected to fall in with our friend the enemy. The Italian destroyer was, it appeared, like Quilp's dog, sometimes on the right hand, sometimes on the left, preparing for a spring; or, in other words, sometimes watching the northern, sometimes the southern channel between Camaran Island and the mainland. However, on reaching Camaran at 7 a.m. we were still unmolested, and we reached Salif in safety an hour later. We heard on shore that the "Bersagliere" had gone across to Massowa for provisions, but was expected back shortly. This statement altered some of our plans. The Captain and the Professor decided to profit by the absence of the Italian ship to push on to the Farsan islands without waiting to discharge the cargo at Salif, intending to do so on their return some three or four days later. The Professor had informed the Italian authorities of his intention of going to Farsan, but had received a very non-committal reply. This change of plans, natural enough under the circumstances, was the cause of all the subsequent trouble.

The "Woodcock" Captured.

Only five hours out of Salif the "Woodcock" met the Italian warship. The "Woodcock" was, of course, full of cargo, chiefly rice and flour; she was going north; and she was not very far from Lohaya, where there is a considerable force of Turkish troops, to whom flour and rice would doubtless not have come amiss. So evidently argued the Italian commander, and without more ado ship, cargo, Professor, and all were carried off to Massowa. Protests have, of course, been made by Messrs. Cowasjee, Dinshaw, of Aden, the owners, but on our subsequent departure from that port, as far as was then known, the Mate and Engineer were consoling themselves to the strains of their banjo and mandoline, and the Professor was probably making himself familiar with the mineralogy of the Abyssinian coast.

So much for the "Woodcock." But her capture left us in the lurch. No other boat was running then, and, to make matters worse, the blockade of Camaran, Salif, and other ports was declared a few days later, our destroyer friend coming in one evening close enough to the shore for us to throw stones on board. This was not our first view of the Italian naval forces in the Red Sea; a few days previously we had been honoured by the presence of three at one time, a small cruiser and two destroyers, and we had also the pleasure of seeing one of them in action. A sambuk crossing from the mainland to Camaran attracted their attention, and after firing a shot a brilliant capture was effected by a launch from one of the ships, and the prize was towed back in triumph.

Salif's Experiences.

Salif itself has undergone its baptism of fire. A small brick and stone blockhouse on the neck of land commanding the approaches to Salif on the land side, erected to protect the salt works from attacks by Arab robbers, attracted the notice of the Italian destroyer, which steamed close up to the shore and opened fire at about 1,200 yards range. One shot out of some thirty hit the blockhouse, without, however, doing more than dislodging a few stones and bricks and wounding a soldier. This blockhouse has no military value, and the company of soldiers who protect the village made no return fire. It was subsequently ascertained that it was the presence of these soldiers in the neighbourhood of the blockhouse that had caused the Italians to fire. The Arabs were a little inclined to be nervous at first, but the subsequent appearance of the Italian boats caused little more than a grin on their faces.

Salif itself is a very interesting spot. The rock-salt quarries there are worked by the Ottoman Public Debt Administration. The layer of salt extends some 250 miles up and down the coast and thirty miles inland, while the quarries are worked to a depth of 100 ft. There is an Arab village of wooden huts with palm leaf thatch, but that is all; the rest is desert, waterless, treeless, and without vegetables; and, with the exception of sheep, fowls, and fish, everything has to be brought from a considerable distance. Such was the place from which our retreat had apparently been cut off by the capture of the "Woodcock." While we much enjoyed the company and hospitality of the English manager of the works, once our task was done our chief desire was to get away. This we were able to do, after the blockade had been established, on board a trusty ship laden with salt for Calcutta. We three signed on as stokers at 1s. a month, which I am sorry to say we did not earn, and we found it convenient to desert, by careful prearrangement, at Aden.

Some Reflections.

Once at Aden our personal experiences of the operations came to an end, but a few more words of a more general nature may not be out of place. The Italian operations in the Red Sea are causing more annoyance to British trade than real injury to Turkey. The effect on the Turks and Arabs is very slight—at all events, at present. It means going without certain commodities and a delay in receiving letters, no great hardship for a frugal and patient race. It is the foreign merchants that suffer. Previous to the blockade of Salif freights between that port and Aden had risen from 6 rupees to 33 rupees per ton, and passenger rates had advanced in proportion. Before the Italian operations the forces of Said Idriss had practically been crushed, and while he is doubtless receiving money from the Italians, it is doubtful if he gets men, the result of his joining the enemy having been to unite the Yemen against him.

The Italians have at present six ships in the Red Sea, five of which are blockading the ports of Kunfida, Lohaya, Salif, Camaran, Hodeidah, and Mokha. Their operations appear to be more vexatory than anything else, and they do not afford any occasion for distinguished naval action. It is not probable that these operations will in any way influence the issue of the war, and Italy need not have anxieties about any Turkish attack on the Abyssinian coast, for such an operation would be altogether out of the question.

THE TRANS-PERSIAN RAILWAY.

Some Considerations For and Against.

BY GEORGE LLOYD, M.P.

Industrial struggles at home and an especially dangerous situation in the Near East have caused public attention to drift away from Central Asia and its problems. Even the bombardment of the Imaum Riza Mosque at Meshed Ali by Russian guns has passed with little comment. Yet developments are on foot in Persia, fraught with large consequences to India, of which public opinion should not be too slow in taking account.

Such a one is the proposed Trans-Persian Railway, a line designed to connect Europe and India via Russia and Persia. So far no definite plans have been made, no *tracée* determined, no final scheme submitted; but the project has made sufficient headway amongst Russian, French, and British financiers to warrant its discussion in general terms, as to how far such a line is likely to benefit or damage Anglo-Indian trade, how far it could be adapted to our schemes of Indian policy and defence, and how far it could effectively be assisted or resisted.

The events of the last few years have done much to change considerations of British policy in the Middle East—influences that yesterday pressed weightily on Indian policy have in some respects been modified and relieved, while at other points new influences are alive that compel new caution. But two formulæ of necessity remain unchanged for us: (1) our necessity for an independent and, as far as possible, a strong Persia, and (2) our necessity for uninterrupted and unweakened sea communication between England and India.

At the present moment these formulæ are still existing and to a large degree observed. Persia, although much weakened by her attempts to graft Western methods of government on Eastern habits, still retains her independence; the arid spaces and roadless areas of Southern Persia still form a great barrier to any military progress towards the Indian frontier; we still hold the sea roads between Europe and the Indian peninsula. Clearly, then, the introduction of a railway from Russia into Central and Southern Persia, providing communications over which we could not hope to exert more than partial control, which would weaken the desert rampart, and which might menace the independence of, and must increase European influence in, Persia itself, is not a scheme which England would, *primâ facie*, be likely to initiate; for, in so far as strategic conditions are concerned, any addition to, or alteration of, the present communications between Europe and India must be more to our detriment than to our benefit.

Commercially, too, so long as no railways exist in Persia Anglo-Indian trade is reasonably well equipped for competing with European rivals. Our shipping supremacy in the Persian Gulf, our Tigris steamers, our mountain roads provide us with a usually effective, if somewhat hazardous, means of commercial penetration into Persian markets.

Such, briefly, are the considerations that furnish the case against railways between Europe and India, and if factors in world policy remained constant, would in themselves be decisive in forming our conclusions in regard to the Trans-Persian project.

But such is not the case; great changes are taking place both in regard to our relations with Russia and in our relations with India. We may not wish to alter either the commercial or the strategic *status quo* in Persia; but it is possible that we may have this forced upon us by big movements in either country, which movements, together with the peculiar terms of the Anglo-Russian Treaty and the inclusion of our Central Persian markets in the Russian zone, may make it more dangerous to resist the change than to accept and adapt it to our needs.

It is true, and happily true, that the good relations that now exist between Russia and England have tempered the hostility and suspicion which the mere mention of such a project would certainly have provoked in England and India ten years ago. We have to recognise a new situation, a better one and possibly a durably better one, yet this cannot be used as an argument to bolster up any project which is detrimental to British interests; for to embark uneasily on such a scheme would be but to introduce a new source of friction and to impair rather than to cement friendly relations between Russia and England.

The question arises, can India be permanently isolated from direct railway communication with Europe, and if she can, is it desirable for her that this should happen? The answer is probably in the negative. The political development and productive expansion that is taking place in India makes such isolation impossible for any length of time. The very pressure of opinion from within will force the question to be raised over and over again until the question becomes a fact, and whilst it may possibly be delayed, it cannot be frustrated.

Our hand may be forced in other ways. The unfortunate terms—unfortunate in their local aspect—of the Anglo-Russian Treaty, by which the important markets of Kermanshah, Ispahan, Yezd, and Kerman were all excluded from the British zone, have an important bearing on this question. There is much evidence to show that Russia intends in the near future to build a railway from the north as far as Ispahan. Would our refusal to co-operate in the full Trans-Persian scheme hinder her from building, at any rate, so far?

It is possible that it would not. In view of the hastening influence of the Potsdam agreement, Russia might decide to go to Paris for her money and proceed to build within the limits of her zone. Such a contingency and its effects on British trade in Persia have to be considered. Moscow cotton goods, assisted not only by the railway but by the special export railway rates on purely Russian lines, would compete formidably with British and Indian textiles. Faced with this new and formidable competition, our Persian trade, Baghdad transit trade, and the Gulf shipping that depends on them, might decline, and we might be compelled in self-defence to build a corresponding railway from India to Central Persia to restore our trade position in the threatened markets.

Until, however, these contingencies arise we are more concerned with examining the possible effect which the railway might have on the independence of Persia itself. Were Persia able to finance and control the railway herself independently of other Powers, a break of gauge and ordinary safeguards would suffice her purpose.

But an international scheme financed by foreign money is another thing. It may fairly be argued that railway development may be the means of infusing new life to an exhausted and disjointed Persia. But this life may not be Persian life, nor its activities under Persian control. We are not entirely convinced by "gauge-breaking" arguments. They have their importance, and considerable importance, but it is rather in connection with the protection than the construction of the line that difficulties are apt to arise; for where international capital is concerned in the construction of a trunk railway through a disordered country international interests will demand international police; and the present day still affords examples of the effect of these upon the country through which the railway passes!

At present three countries alone are interested in the financial studies of the Trans-Persian railway project, and these three are members of the Triple Entente. But in matters of finance it is not always easy to fix limitations to the interests involved. Both in London and in Paris, and especially the latter, the interests of issuing houses extend far beyond the limitations of political interests. How far can British interests in Persia be reconciled to the introduction of fresh influences in Central Persia without causing diplomatic difficulties of grave importance? These and such considerations have all to be reckoned with and carefully weighed before the scheme is finally formulated. It suffices for the moment to realise that a project of first importance has been launched and for England to consider whether her interests, European as well as Asiatic, are best served by early co-operation or by alternative schemes of railway development in the Middle East.

LETTERS TO THE EDITOR.

"NEAR EAST" ANNIVERSARY NUMBER.

To the Editor of THE NEAR EAST.

Sir,—I should like to take the opportunity of THE NEAR EAST completing its first anniversary to offer you my sincere congratulations. I always read the paper with the greatest interest, and I consider that it fulfils a want that has long been felt. I earnestly hope that it may continue to prosper.—Very sincerely yours,

CROMER.

36, Wimpole Street, W.,
April 29, 1912.

The Trans-Persian Railway.

To the Editor of THE NEAR EAST.

Sir,—I have been much struck with the well-informed able, and impartial manner in which THE NEAR EAST has during the year of its existence discussed the momentous problems embraced under its title. One of these questions will soon come to the front, and will deserve the close attention of all patriotic Englishmen. I refer to the projected scheme of the Trans-Persian Railway. People in England seem to be either unconscious of the existence of such a project or indifferent to its nature. And yet it may have vital consequences, not merely for Persia, but for British dominion in Asia. I counsel everyone to follow the development of the matter closely in the pages of THE NEAR EAST.

CURZON OF KEDLESTON.

1, Carlton House Terrace, S.W.,
April 28, 1912.

Near Eastern Affairs.

To the Editor of THE NEAR EAST.

Sir,—I am very glad to hear that THE NEAR EAST is going so well, as indeed it deserves to. I may say that I have done my best to call attention to it, for I think there was great need of a paper of high literary quality dealing, with such intimate knowledge as THE NEAR EAST exhibits, with the affairs of these countries.

MILNER.

47, Duke Street, St. James's, S.W.,
April 30, 1912.

Turkey and the Persian Frontier.

To the Editor of THE NEAR EAST.

Sir,—A friend writes to me from Persia:—

It is curious how little attention has been given throughout the various phases of the Persian imbroglio to the systematic encroachments of Turkey on the Western borders of Persia. For several years past Turkish troops have been steadily pushed into and remain to the present day in occupation of large tracts of territory which Persia had held for the last fifty years and has always claimed and still claims to be an integral part of the Shah's dominions. Yet the most eloquent champions of the integrity and independence of Persia never have a word to say about the high-handed action of Turkey, though it goes some way to explain the high-handed action of Russia, who regards the Turkish occupation of important strategical points on Persian territory in the vicinity of her own frontier as no less prejudicial to her own than to Persian interests. The Russian Government has indeed clearly intimated that the withdrawal of Russian troops from Tabriz cannot take place until the question of the Turco-Persian frontier in that region has been satisfactorily settled.

There is, I think, good reason to believe that this question is playing at the present moment an even more important part in the international situation. It is true that Turkey has at last agreed to refer it to The Hague Tribunal. But Turkish military action does not appear to have been even now altogether suspended in the debatable territory. Anyhow, it can, I fear, only be regarded as a sign of that lack of real statesmanship which the Young Turks, in spite of their great qualities and good intentions, have so frequently shown that they have failed to realise the danger of estranging Russia at an undeniably critical juncture for the sake of wringing very questionable, or at least quite secondary, advantages out of the weakness of Persia in a remote corner of the Ottoman Empire. Had Turkey adopted at an earlier period a more conciliatory attitude in regard to this question, it is quite possible that M. Tcharikoff would never have been recalled from Constantinople, and that the friendly policy which he had initiated would not have suffered so unfavourable a change as recent developments betray.—Yours obediently,

London, May 3. VALENTINE CHIROL.

East and West.

To the Editor of THE NEAR EAST.

Sir,—Now that THE NEAR EAST has nearly completed its first year of life I should like to tell you that I have read the successive numbers with great interest and pleasure.

The paper is evidently written with a sincere desire to be of use in throwing more light upon the common interests of East and West; and I think it should do real good, both in this country and elsewhere. I have been struck by the variety and accuracy of its information and by its fairness of tone. With regard to Persia in particular, its news, and as a rule its opinions, seem to me remarkably sound.

I wish the paper all success.—Yours very truly,

H. M. DURAND.

Mohammedans in India.

To the Editor of THE NEAR EAST.

Sir,—I must send you a few lines to congratulate you on the first anniversary of THE NEAR EAST.

It is a most useful paper, full of information, which, without its assistance, it would entail much trouble to search for; and dealing, as it does, with the affairs of Mohammedan countries, it will, I hope, be read with great interest by the educated Mohammedan communities in India.

I wish THE NEAR EAST a successful career.—Believe me, yours very truly,

34, Tite Street, Chelsea, MINTO.
May 4, 1912.

Moslem Unity.

To the Editor of THE NEAR EAST.

Sir,—Few people, even the best-informed in Europe, realise the deep and sincere sympathy that attaches Moslems together all over the world. Islam has been in practice the only moral force that has united in practical, social, and daily life men of different colours and states of civilisation, from the best Persian and Turkish and Arab and Indian to the negro. This power has an obverse side, and that obverse side is that whatever affects Moslem sentiment in one part of the world is immediately felt in another. Lately I realised this more than ever. The undoing of the partition and the change of capital was hardly ever referred to in private conversation by Indian Moslems except those who were directly interested in the matter, while a wail of mourning and sorrow was the only sentiment of men, women, and children of all ranks in India over Tripoli and Persia and Morocco. These were my own personal and direct experiences.

Hotel Ritz, Place Vendome, Paris. AGA KHAN.

Importance of Accurate Information.

To the Editor of THE NEAR EAST.

Sir,—On the occasion of the first anniversary of THE NEAR EAST under its new management allow me to congratulate you on the results which have already been obtained, and at the same time to express my good wishes for the future. Questions relating to the Near East are specially subject to distortion in consequence of prejudiced or erroneous information. This unfortunate tendency adds particular importance to the objects you have set before you—which I take to be the collection of full and accurate information regarding Near Eastern affairs in the widest sense of the term, and the expression of unprejudiced views upon them. In attaining these objects your journal ought to command an increasing audience, and in course of time to exercise a valuable influence in promoting good relations, political, financial and commercial, between the countries concerned.—Yours very faithfully, H. BABINGTON-SMITH.

News of the Levant.

To the Editor of THE NEAR EAST.

Sir,—Allow me to congratulate THE NEAR EAST on its first birthday. I have watched the paper during the past year with great interest, and I have no hesitation in saying that it not only fills a place that was empty before, but that it fills it exceedingly efficiently. There is nothing more difficult than to find out what is really going on in the Near East and the Levant, and there is also in many times and seasons nothing more important. This information THE NEAR EAST supplies to us. Before its appearance there was no newspaper in which the news of the Near East was focussed. I hope the paper will have a long and useful career, and continue to maintain in the future, as it has done in the past, the high and honourable traditions of English journalism. J. ST. LOE STRACHEY.

The *Spectator* Office,
1, Wellington Street, Strand, W.C.

The Situation in Persia.

To the Editor of THE NEAR EAST.

Sir,—THE NEAR EAST is about to enter upon the second year of its existence, and I venture to write you a line of congratulation on the success you have already achieved and of good wishes for your future. The purpose of THE NEAR EAST is to provide the reading public with reliable information concerning the countries to which that name applies; and at no time has there been a greater need of such information than there is to-day. The situation in Persia alone is one which is full of menace to British interests. The problem created by the continued inability of the Persian Government to control the forces of disorder which are laying waste the country calls for examination from various points of view.

First there is the point of view of the British and Indian trader. For long these gentlemen have seen their caravans robbed and their businesses disorganised, and they have received little enough redress for their grievances, for political considerations have deterred us from taking the only steps which could be immediately effective—viz., active intervention. The Anglo-Russian Convention of 1907, which governs our policy towards Persia, requires co-operation between ourselves and Russia, and involves general support on our part of action taken by Russia to safeguard her interests in northern Persia. The action taken by Russia during the past year, including the despatch of large numbers of troops to different centres in northern Persia, has undoubtedly awakened fears in the minds of the Mohammedans of India as to her intentions, and some dissatisfaction has manifested itself among them at our acquiescence in such proceedings. When this is borne in mind, the disinclination of the British Government to take drastic steps—such as the policing of the trade routes in southern Persia—becomes intelligible, since intervention on our part in southern Persia would clearly invite similar action on the part of Russia in the north, and would disable us from addressing counsels of moderation to St. Petersburg.

Whence it comes about that British and Indian traders suffer, if not in silence, at any rate unconsoled.

I am not here attacking British policy. It may be open to attack, and it may be susceptible of defence. I am merely emphasising the delicacy of the situation, and the great importance, consequently, of some source to which those whose pleasure or duty it may be to keep themselves *au fait* with the problem as it develops may turn for accurate and up-to-date information. It is your ambition to provide such a source, and it is because I am convinced of the excellence of such an ambition that I venture to send you these few words of encouragement and congratulation.—Yours faithfully,

RONALDSHAY,
Chairman of Central Asian Society.

The Balkan Committee.

To the Editor of THE NEAR EAST.

Sir,—I gladly avail myself of the opportunity of saying that I find THE NEAR EAST both interesting and useful—all the more so because of the wide sphere covered by the news and articles in its pages.

If I do not agree with all the views expressed in the articles which deal with the subject in which I am most interested, I am glad to recognise the fair spirit in which they are written, and to thank you for the great contribution that THE NEAR EAST makes to the diffusion of sound knowledge which makes the surest ground for sound policy.—Yours sincerely,

NOEL BUXTON
President of the Balkan Committee.
Queen Anne's Chambers, Westminster,
London, S.W.

From London to Calcutta.

To the Editor of THE NEAR EAST.

Sir,—THE NEAR EAST is doing a great work—moderate — well informed — cautious — unbiassed — patriotic—businesslike. It supplies a want that no student did not feel and that few expected would be fulfilled.

The world that lies between London and Calcutta is of infinite interest to the English—in war or in peace our communications must run across that region by land, sea, or canal.

Like the cunning guide of the desert, you sit on the threshold of our khan in London, ready to guide the merchant's caravan, the statesman's runners, or the Emir's warriors safely through the perils of the unknown way.

I trust you may prosper and prosecute the splendid work you have so successfully begun.—Yours,

MARK SYKES.

50, South Audley Street, W.,
May 4, 1912.

British Interests in the East.

To the Editor of THE NEAR EAST.

Sir,—Travellers and students of foreign politics and business men have in this country long been looking for some sign of awakening on the part of the nation to the magnitude of their task in the East, its heavy responsibilities, and the great perils with which in latter days it has been beset. They looked in vain, while newcomers in Europe and on the extremities of Asia seemed to be taking up the task which had fallen from our feeble hands. Quite possibly the hands may only have appeared feeble; something which was not visible may have kept them tied. That would form an interesting subject for inquiry. But, whatever may have been the causes, the effect produced was one of abdication. The voice of England was heard in lisping accents or not at all.

Two national uprisings—one in Turkey, the other in Persia—occurred while we were still under the influence of this paralysis. In both these countries our own stake is demonstrably large; and if in previous periods our horse may have refused to run, it was hands he now required and no longer the spur. New impulses were coursing in his veins. If he was still the "wrong horse," he was certainly a different horse, and an encouraging feature was this, that he showed a marked preference to be guided by us rather than by others. Both in Turkey and in Persia the men of the new movements turned towards England for inspiration, for counsel, for assistance.

It would be invidious, and it may be still premature, to attempt to apportion the blame for the subsequent failure between those men and ourselves. What is certain is that the occasion came—the occasion for more hopeful relations; that it arose, that it did not materialise, and that it is fast slipping away. There is an old Persian proverb that three things never return: the spent arrow, the spoken word, and the lost opportunity. Let us hope that the situation is still not past retrieving, and that between them and us a new era is still to dawn.

It is under the influence of such thoughts that one turns with feelings of satisfaction and of expectancy to the celebration by THE NEAR EAST of its anniversary. Few young newspapers have stepped so quickly into public recognition, regard, and appreciation. That alone is a hopeful sign. It has focussed and brought to bear upon the questions of the day the knowledge, the experience, and the in-

Digitized by Google

formed opinions which were either lying idle in the breasts of scattered Englishmen well acquainted with these questions, or were being dissipated in the columns of the Press as a whole. It has shown us what a wealth of such material we possess, commensurate with the extent and variety of our interests in the countries west of India. If, in addition to these achievements, it may in the future supply the need of a newspaper, representative of British opinion, circulating in Turkey, and even in Persia, among the educated classes, it will have established a further claim upon our gratitude. British policy and British motives are so continually misrepresented in local newspapers inspired by foreigners that the need is real, and it is urgent for an authoritative exposition, circulating locally, of the true character of this policy or motives from time to time.

Quite recently there has arisen in this country a remarkable revival of interest in Eastern questions. Persia has been mainly responsible for this revival, and it is surprising how quickly has spread knowledge of the Persian problem in certain quarters of the Press. The core of the problem in Persia is much the same as in the case of Turkey. Centuries of despotism have left the people without natural leaders of capacity or experience. The despots once removed, a disintegrating process ensues, and certain foreign interests are well served by this process. It is in the interests of the British Empire, on the other hand, to see this process arrested. It is not an easy task; but neither is it an impossible one. Without undue interference in the internal affairs of these countries it should be feasible for our representatives to keep in close touch with the new men, to endeavour to lead their impulses into practicable channels, and to save them from foreign humiliations. Out of such relations would spring confidence in themselves and in us. Nor could we, responsible as we are to so many millions of Mohammedans, be denied the right of offering counsel and assistance of this nature. The right becomes a duty from our own point of view when we consider the momentous nature of the changes that are taking place. May it not be by our fault that the course of these changes be turned awry and lose the name of action?—Yours respectfully, H. F. B. Lynch.

An Imperialist Organ.

To the Editor of The Near East.

Sir,—Not a week passes by that I do not most fully realiso what a valuable addition your paper has become to my library table.

I ordered its transmission to me from London to Cairo during my recent visit to Egypt.

No British Imperialist can afford to be without it. Once upon a time our knowledge of events in the Near East was derivable solely from sporadic telegrams, more or less condensed, in the leading London journals.

Thanks to your enterprising paper, no Briton now has any excuse for being ignorant of current events in the most historical portion of the world.—I am, dear Sir, faithfully yours,

F. Scaramanga Ralli.

2, Lygon Place, Grosvenor Gardens, S.W.,
May 7, 1912.

The War and Egypt.

To the Editor of The Near East.

Sir,—During a recent visit to Egypt I was concerned to learn from authoritative sources that the failure of the Italians to make successful war in Tripoli was having a very far-reaching effect in Egypt and the Egyptian Sudan. The fact that the Arabs of the desert are able to drive a disciplined army of Europeans back to the shelter of their naval batteries is discussed by dragomans, donkey boys, husbandmen, soldiers, and clerics from the steps of Shepheard's Hotel to the upper reaches of the Nile. It should be remembered that for the most part the Arabs who discuss these details do not readily distinguish between the nationalities of Europe. To them the Crescent is rising superior to the Cross. As far as British prestige in Egypt and the Sudan is concerned this is not a small matter. As it is, our military position in Egypt is grotesquely inadequate to meet any substantial emergency, if we estimate that emergency on the basis of the total number of rifles that are available in native hands. It is now understood that Italy proposes no further move into the Tripolitaine until October next. From the Italian point of view this is doubtless wise, but for those nations which, like ourselves, are influenced by this unfortunate hysteria that has seized upon Italy the prolongation of what in Egypt is believed to be Moslem success is a matter of real and earnest moment. It would be well if people in this country realised this, and that the evil effects of the Italians' inability to carry out a colonial war would have been more drastically brought home to the British public if it had not been our good fortune to have Lord Kitchener at the British Agency. At this juncture in Egyptian history the effect of Lord Kitchener's presence has been equal to that of a division of British infantry.—I am, Sir, your faithfully.

London, May 8. Lionel James.

Italian "Victories."

To the Editor of The Near East.

Sir,—The papers of May 4 contained triumphant accounts (emanating from Rome) of the capture of Lebda, the birthplace of Septimius Severus, in which 300 of the enemy were said to have been killed and the captured city at once fortified.

This reads no doubt extremely well, but how many readers really know what it means. The little town of Khoms, of perhaps 600 inhabitants, lies seventy miles east of Tripoli Town. It was occupied quite early in the war by the Italians. The site of Lebda is two miles east on the sea, and consists of various ancient ruins, columns, and fragments protruding from a waste of drifting sand. The ground is, in fact, so full of ruined masonry that it cannot be cultivated, and even Arabs will not live there. The desert has, in fact, reclaimed it. It is this choice bit of Tripoli that Italy with its troops two miles away, its gunboats, and its airships has at last conquered. Mergub, on the other hand, which was occupied a couple of months ago, is a strong point 500 feet above sea level, and three and a-half miles west of Khoms.

Sepping Wright's despatch (about same date), describing the Italian airship attack, shows also that the Italians are still kept out of Zenzur oasis, twelve miles west of Tripoli Town, on the coast. This has, I believe, been reported as captured several times. Mergub and Ain Zara, respectively three and a-half and six miles from the coast, are, as far as I know, the furthest points inland to which the Italians have so far penetrated.—Yours obediently,

Staplehurst, May 5. H. S. Cowper.

The Political Crisis in Cyprus.

To the Editor of The Near East.

Sir,—With reference to the political crisis now existing in Cyprus, as I am a native of that island I wish to ask you the favour to allow me some space in the columns of your valued paper, so that I may state the actual facts that brought about the present regrettable state of affairs there.

In December last the Greek members of the Legislative Council of Cyprus addressed, through the medium of the High Commissioner, a petition to the Secretary of State for the Colonies in London, in which they pointed out the necessity for introducing some political and financial reforms in their island. In due course the Colonial Secretary, replying to that petition through the High Commissioner by a letter dated March 27 last, informed the petitioners that the reforms suggested did not meet with his approval.

The reply of the Colonial Secretary being considered very unsatisfactory by the Greek members of the Council, they resigned in a body after handing a written protest to the High Commissioner against such reply.

The resignation of the Greek members, depriving the Legislative Council of half of its members, made a very painful impression in Cyprus, and created unrest, especially amongst the Greek inhabitants, who form four-fifths of the population of the isle.

While far from wishing to comment upon this refusal of the Colonial Secretary to accede to the reforms propounded in the petition, I venture to submit that a re-

Digitized by Google

consideration of his decision to the effect of granting some of the just and most needful demands of the population of Cyprus will go a long way to smooth the present unpleasant situation there.—Yours truly,

D. Th. Stavrinides.

28, Dorset Square, N.W., May 8, 1912.

LES EFFETS NEFASTES DU RADICALISME EN SERBIE.

A Monsieur le Rédacteur du Near East, Londres.

La dernière assemblée (Skoupchtina) nationale serbe, élue en mai-juin 1908, a, on peut le dire, accompli sa période constitutionnelle de quatre années, chose fort rare en Serbie où, à cause du désordre qu'en matière politique le radicalisme y a introduit, les élections législatives sont très fréquentes. Les élections pour la nouvelle Skoupchtina qui viennent d'avoir lieu (au courant du mois d'avril 1912) ont été spécialement significatives pour les mœurs politiques en Serbie, et nous allons le montrer en quelques lignes.

Ce qui caractérise, en premier lieu, ces élections, effectuées sous le ministère radical de M. le docteur M. Milovanovitch, c'est l'indiscipline dans les différents partis politiques, indiscipline qui a fait surtout son apparition au sein du parti gouvernemental: les ordres et les conseils des comités dirigeants les partis ne furent, dans plus d'un collége électoral, ni écoutés ni suivis, le prestige même des chefs des partis fut à maintes reprises méconnu, fait qu'il n'est pas difficile d'expliquer. En effet les radicaux avaient, du temps des Obrénovitchs où ils se trouvaient en opposition, trop longtemps lutté contre les pouvoirs publics même—en 1883 ils étaient allés jusqu'à susciter un soulèvement dans la Serbie de l'est, soulèvement qui fut rigoureusement réprimé par le roi Milan—pour que les idées de l'autorité et de l'obéissance que les membres de l'état doivent à celle-ci n'en souffrissent pas énormement.

La propagande presqu'anarchiste du radicalisme serbe, issu du nihilisme russe, sous l'influence duquel les premiers apôtres radicaux serbes s'etaient formés, n'a failli, naturellement, d'entrainer des conséquences fâcheuses pour les rapports intérieurs entre les adhérents du parti radical lui-même: on s'en est spécialement aperçu lors des élections pour la nouvelle Skoupchtina dans lesquelles, comme nous l'avons dit, les pouvoirs constitués de ce parti ressentirent á leurs propres dépens les fautes de la campagne antérieure des radicaux, campagne dirigée contre la dynastie des Obrénovitchs et les organes publics. C'est le cas de répéter la sage maxime française qu'on ne viole pas impunément les principes. Ajoutons encore une autre cause de cette indiscipline dans les partis; on doit la rechercher dans le dogme égalitaire de la démocratie radicale: puisque nous sommes tous égaux, comment peut-on exiger, que,dans un parti, les uns commandent aux autres? Car, qui dit commandement dit supérieur et inférieur, ce que dit inégalité.

Faut-il insister sur les effets fâcheux de l'indiscipline dans les partis? Quand ce sont les partis qui gouvernent l'état—système qui, pour être moderne n'en est pas moins, en général, fort prejudiciable—il faut que ces partis soient bien disciplinés et dressés. Comment, en effet, peut gouverner, c'est-à-dire maintenir, en premier lieu, l'ordre dans l'état, un groupe d'hommes qui est lui-même en désordre, en anarchie? Le désordre assurant l'ordre; c'est une *contradictio in adiecto*. Il y a plus: les partis doivent même, pour être capables de conduire l'état, être soumis, dans leur organisation intérieur, à un pouvoir absolu. On pourrait objecter que c'est un paradoxe que les partis dont le gouvernement est fondé pour rendre impossible l'absolutisme dans l'état doivent, eux, subir l'absolutisme dans leurs rapports intérieurs: l'absolutisme qui rend impossible l'absolutisme; l'absolutisme se combattant lui-même! Il n'y a pourtant ici rien d'illogique ni de paradoxal. Il faut de l'absolutisme dans les partis pour que ceux-ci soient une force organisée, sans quoi ils seraient hors d'état de gouverner, et il ne reste encore qu'à prendre des mesures nécessaires à l'effet d'empêcher que le parti, ainsi organisé et qui gouverne, ne devienne lui-même un maitre absolu. Cette dernière éventualité est possible, et, malheureusement, elle se réalise très souvent, puisque tout pouvoir, voire les partis, peuvent abuser de leur force. Mais cela n'affaiblit point l'affirmation que les partis, pour constituer une force bien organisée apte à gouverner, sont obligés d'avoir recours à une discipline d'autorité; certes, comme nous venons de le dire, le parti qui gouverne peut être tenté de se comporter en roi absolu; mais il est également incontestable qu'à défaut d'une pareille organisation, les partis sont incapables de gouverner, et, sans doute, il vaut mieux un pouvoir absolu qu'aucun, c'est-à-dire il vaut mieux un pouvoir absolu que l'anarchie.

En second lieu, ce qui caractérise encore ces élections c'est la difficulté qu'eurent les comités des partis de placer les candidats qui ne sortaient pas directement du peuple, c'est-à-dire de placer les intellectuels. Les électeurs, dont l'énorme majorité sont des paysans, disaient la Skoupchtina est une assemblée du *peuple*—c'est écrit dans la constitution—et alors il faut qu'on y laisse entrer le peuple, c'est-à-dire les paysans. Que viennent faire ici ceux qui ne sont pas du peuple, pourquoi veulent-ils forcer la porte d'une assemblée qui n'est pas la leur? Et si la constitution n'avait pas imposé un certain nombre de candidats *qualifiés* (personnes ayant le diplôme d'une faculté ou d'une autre école qui a le rang d'une faculté) —deux par liste départementale—la Serbie aurait eu une assemblée composée presqu'exclusivement de paysans. Ici, aussi, les radicaux doivent faire leur *Peccavi*. Ils reconnaissent bien qu'un parlement ne saurait se passer d'intellectuels—ils l'ont reconnu par l'institution des candidats qualifiés—mais tout en reconnaissant ils ont laissé aux paysans d'envoyer les intellectuels à la Skoupchtina, aux paysans qui s'y prêtent de très mauvaise grâce, en prenant, pour la plupart, comme candidats qualifiés des personnalités locales dont la mentalité ne va pas trop au-dessus de celle de leurs électeurs. Les radicaux reconnaissent qu'il est nécessaire d'avoir, en premier lieu, des intellectuels au parlement, et ils abandonnent ensuite leur nomination au bon vouloir des paysans, au bon vouloir de ceux qui non seulement ne sont pas convaincus de cette nécessité, mais encore sont en général fort mal disposés envers tous ceux qui ne sont pas des paysans. Au lieu de procéder ainsi, les radicaux auraient dû recourir à un sénat dont les membres, du moins leur majorité, ne devraient pas leur mandat aux paysans; mais les radicaux, craignant que le sénat ne se montrât hostile à leurs doctrines, repoussèrent l'idée des deux chambres lors de la réforme constitutionnelle entreprise après l'assassinat du roi Alexandre. Ils voient à présent qu'ils ont commis ainsi une faute. Et en général la raison politique viennent trop tard aux radicaux; ils ressemblent, en cela, à ces plantes dont les fleurs se font longtemps attendre.

La troisième caractéristique des élections serbes du mois courant est que ces élections n'ont donné aucun résultat: le gouvernement n'a obtenu, sur 166 mandats, que 84; donc, nous pouvons parfaitement le dire, la moitié. Consulté, le peuple a dit oui et non. C'est-à-dire, il n'a dit rien. Le peuple serbe n'est pas un sphinx, puisqu'il a parlé, mais il peut être comparée au sphinx, attendu que ce qu'il a dit equivaut au silence. Le peuple serbe est un être qui connaît l'art de parler et de ne rien dire, c'est un sphinx qui, tout en parlant, garde le silence, ou qui, tout en gardant le silence, parle.

Du reste, il n'en a pu être autrement. Une tête, un cerveau peut savoir ce qu'il veut, peut avoir un système politique. Le peuple, comme tel, n'a ni une seule tête ni un seul cerveau, et par conséquent, si on lui demande à formuler un système politique, il n'en est pas capable. Ce qu'il peut c'est d'appuyer un système qu'une tête, un cerveau lui sert et d'en juger ensuite les effets et les resultats, c'est-à-dire d'en constater le *succès* ou *l'insuccès*.

Quoi qu'il en soit sur ce point la Serbie, sous le régime des radicaux, donne l'exemple d'un pays qui n'est gouverné par personne; celui qui, d'après les radicaux, doit gouverner, c'est-à-dire le peuple, ne le sait pas, et celui qui, d'après la constitution, a le devoir de le faire, c'est-à-dire le roi, les radicaux l'en empêche. Ils ne disent pas seulement que le roi règne mais ne gouverne pas, mais ils soutiennent que le roi ne règne même pas. Tels sont les résultats déplorables du radicalisme serbe qui, à cette heure difficile où la Serbie devrait être unie et recueillie, en fait un bateau sans pilote.

NEAR EAST IN PARLIAMENT.

Viscount Morley on Government Policy.

On Thursday last, in the House of Lords, Lord Newton asked the Government whether they had addressed any representation to the Italian Government with reference to the closing of the Dardanelles. In support of his question, Lord Newton stated that we had given most unmistakable evidence of our friendliness to the Italians, and, in view of what we had done in this respect, he thought we were entitled to ask that the war should not be conducted in a way which had become almost intolerable, as far as we were concerned, but that it should be localised as much as possible in accordance with the original intention.

Lord Nunburnholme, in asking why His Majesty's Government did not take steps to ensure the free passage of British ships through the Dardanelles, referred to the very serious loss which was being caused to the trade and commerce of the whole of Europe. We were still a great naval nation, said his lordship, and he thought we ought to make some show of protecting ourselves in this matter and give proof that there was some use of being a predominant Naval Power.

Viscount Morley, answering for the Government, denied that it had been indifferent to the disastrous state of things existing in the Dardanelles. He realised that we were "suffering huge damage," but he thought that it was not necessary to go further into the details of the transactions between Great Britain and the Governments of Turkey and Italy. Prompt and friendly steps were immediately taken after the closing of the Dardanelles to call the attention of both Governments to the mischief which is being done to our interests. On May 1 the Porte informed the Ambassador that it had been decided upon to open the Dardanelles under the same conditions as existed before its closing, namely, that vessels must pass with pilots. The opening will take place as soon as ever the mines can be removed, but the Ottoman Government maintains its absolute right to close the Dardanelles completely in case, and as soon as, the necessity should arise.

Beyond the above statement of facts Viscount Morley would say nothing anent the Government's negotiations, because it would have been impracticable and impossible to do so. Nor could he be expected to follow a criticism of something that Austria-Hungary is supposed to have done, what the relations are between Austria-Hungary and Russia and Italy, what promise or undertaking has been given by Italy to Austria, and so on. The noble lord (Lord Nunburnholme), having assumed that there has been an undertaking by Austria-Hungary to Italy and vice versâ, asked why we did not approach Italy to exact from her the same kind of undertaking in our own regard that he assumes she has given to Austria-Hungary. That was not at all a reasonable position to take up. Then he said plainly that we ought to protest to Italy that we cannot endure these roving operations of war. He wondered that he, with his diplomatic experience, thought it possible for a Government that is firmly neutral to say to either of the two belligerent Powers, "You shall not carry on the war in the way you are doing."

Lord Newton: I am sorry to interrupt the noble viscount, but that is precisely what the Austrian Government has done.

Viscount Morley: It is what the noble lord says Austria has done, but I submit that nothing could be more inexpedient than that we should in this House assume that the Austrian Government has done that or that, and on the basis of that assumption we are to be catechised and interrogated as to whether we will not undertake the same step. Could we in reason be asked to say either to Turkey or Italy, "We will prescribe to you the limits within which you shall carry on your military operations"? If they came into the Thames then we should have something to say. But to say that Turkey is not to defend herself and that Italy is not to follow her own plans of military operations is to go beyond anything that in international law or diplomatic usage has ever been conceived. When the correspondence and telegrams are, in the fulness of time, published in a Blue Book, the House and the country will find that we have thoroughly and assiduously followed the full duties of a firmly neutral Power between these two belligerents. We have done full justice to the Turkish case. The Turkish Government have a right to take all legitimate means for the defence of their own territory. No treaty can oblige Turkey when her actual and immediate safety is concerned to open the passage giving free access to the destruction, if necessary, of her own capital. Another point. We hold a completely equal balance. With regard to the Turkish case, when their military authorities tell them that to abandon the defence of the mines would be an equivalent to a reduction of their power of defence by about 50 per cent., such a consideration a neutral Government like ourselves is bound to take into account. I will say this. Neither the noble lord nor anybody in the House will deny the obligation by which Turkey is bound to open the Straits under the Treaty of Paris, 1856, the Treaty of London, 1871, the abortive Treaty of San Stefano, and the Treaty of 1878. She is bound to keep the Straits open for neutral commerce unless some immediate and direct necessity for her own safety should arise. We have held that in full regard. But now I think we might say that, while the principle that the Straits are to be kept open to commerce unless danger is actual or imminent imposes an obligation on Turkey from the point of view of international morality, it carries with it the corresponding expediency that that principle should not be strained and overstrained in case of war by other parties to it. Scorning the imputation that neither the Italian nor the Turkish Government were averse to inflicting severe inconvenience on neutrals on the chance of hastening the effective intervention of those neutrals in bringing to an end what is an extraordinarily obscure and ambiguous military issue, Viscount Morley insisted that we cannot compel either Italy or Turkey to forego their full belligerent rights. He added the consideration that "it would be a very great mistake if in our natural impatience with such transactions as have recently taken place in the Dardanelles we were to leave out of sight the wider elements that affect both the Turkish and Italian cases and our attitude with regard to these cases. It would be a great mistake if we left out of sight with regard to Turkey the enormous Mahommedan interests with which we are concerned. With regard to Italy, on the other hand, it would certainly be an immense mistake if we were to forget our friendship with Italy in the past, and, more than that, if we were to forget our concern in her position and relations as a Mediterranean Power in a very easily imaginable future."

The Earl of Cromer said that it would have been a departure to have shown any special friendliness either to Italy or Turkey. The neutrality of Egypt was not due so much to friendliness to Italy as to a regard for the interests of Egypt itself. It would have been disastrous if we had been dragged into this quarrel with which we had no concern. If the idea got abroad in Egypt that we were not acting in Egyptian but Italian interests it might do harm.

The Marquis of Lansdowne, for the Opposition, admitted that he had heard Viscount Morley's statement on the whole with considerable satisfaction, because it showed that he and his colleagues fully realised the great gravity of the situation which had arisen in the Eastern Mediterranean. Referring to a telegram from Constantinople to the *Times*, stating that Turkey would reopen the Straits as soon as Italy gave pledges not to repeat her attack on the Dardanelles, he asked "whether there was any truth in that statement, because obviously it would be a very serious limitation to the Turkish announcement, and one which might make it much less satisfactory."

Viscount Morley: That assertion is quite inconsistent with the words used to our Ambassador yesterday or the day before.

The Marquis of Lansdowne admitted that it was hardly the occasion for dwelling upon the larger aspects of the case, but the real question was "the extent to which a belligerent Power, controlling narrow waters which form a great trade avenue for the commerce of the world, is justified in entirely closing such an avenue in order to facilitate the hostile operations in which that Power finds itself involved. It seems to me that public opinion amongst the great nations will be slow to tolerate a state of things under which a local conflict involving only two Powers will be allowed to create such serious detriment and disturbance to the whole trading community of the world." In conclusion, he stated that he entirely agreed with a policy which bore in mind on the one hand "the relations in which we stand to the Turkish Empire owing to the great number of His Majesty's Mohammedan subjects, and upon the other hand our old friendship with Italy."

Persian Unrest.

May 6.

Sir J. D. Rees asked the Under-Secretary for Foreign Affairs whether he was aware that the Viceroy of India on March 25 stated in council that in the south of Persia anarchy reigned supreme, the Persian Government having neither power nor authority, while order in the Gulf ports was maintained solely by the British East India Squadron in the Gulf; that British and Indian trade interests had suffered severe losses; that no caravans could proceed in safety up the main trade routes; that Indian troops had been landed at Lingah to protect British and Indian lives and property, and escorts had been strengthened at Bushire, Shiraz, and Ispahan; that the Central India Horse were attacked by Persian troops; that our Resident at Bushire was negotiating directly with the tribes for securing the safety of British and Indian Caravans; and whether, in view of the collapse of the Parliamentary experiment in Persia, he would now consider the advisability of securing the integrity and independence of that Kingdom by policing the ports on the northern shores of the Gulf by and with the aid of Indian officers and Indian troops and police.

Mr. Acland, who replied, said: I have seen the newspaper reports of the speech in question. Since March 25, however, there has been some change in the situation, and it has been found possible to withdraw His Majesty's forces from Lingah. As regards the second part of the question, I would refer the hon. member to the answer returned to his question on the 25th ult.

May 7.

Mr. Philip Morrell having asked the Foreign Secretary whether he can say what is the nature of the proposals that are now being made for the building of a railway through Persia from Russia into India; whether the project has received, either formally or informally, the sanction or assent of His Majesty's Government; whether a Société d'Etudes, representing Great Britain, France, and Russia, has been formed to promote it, and, if so, who are the representatives of this country in that society; and whether the House of Commons will have an early opportunity of discussing the project.

Sir E. Grey: As regards the first three points in the hon. member's question, I beg to refer him to the answer returned to the noble earl the member for the Hornsey Division of Middlesex on the 19th ult., which dealt with these points. As regards the fourth point, the Société d'Etudes has not been finally constituted. As regards the last point, there is at this stage no urgency; but the question can, of course, be raised on any ordinary opportunity.

Oriental Studies.

On Tuesday Mr. J. Pease, President of the Board of Education, presented a Bill to provide for the transfer to the Commissioners of Works of certain property of the London Institution for the purpose of a school of Oriental studies and for the dissolution of the Institution.

THE PRESS ON THE NEAR EAST.

A Naval View of the Mediterranean.

Writing upon "The Strategy of the Mediterranean" in the *Eye-Witness* of the 2nd inst., Lieutenant Alfred Dewar reminds us that in the last decade of the nineteenth century Germany, the United States, and Japan awoke to the possibilities of sea power. The rise of Japan has altered the balance of power in the Far East, and the growth of German naval strength has resulted in the British fleet being withdrawn from the Mediterranean nearer home. How does this affect our position in Egypt?

Now this movement westwards does not imperil Malta, Egypt, or the ocean highway so long as the ships can move eastwards again. But one thing is certain—they cannot be in the North Sea and "up the Straits" at the same time, and if they are already mortgaged to the demands of the former, the requirements of the latter can only be met with the help of France, whose interests are similarly imperilled.

A Problem of Logistics.

The writer points out, quite rightly, that Egypt is not the only question, that "bread is more important than Empire," that the Mediterranean is one of the great roads by which wheat finds its way to this country, and that "the prayer for bread, which, consciously or unconsciously, rises daily from the hearts of millions, is literally answered by the ships ploughing Mediterranean waters." But Egypt itself is a sufficiently important problem:—

With regard to our tenancy of Egypt, it is an axiom of strategy that any attempt to transport a large force oversea is hazardous in the extreme if the command of the area be in dispute, and it is in dispute so long as an opposing fleet is undefeated, or can reach the area before the invasionary attempt can be consummated. In the latter case it is said to exercise a potential control. But it exercises neither a potential nor any other sort of control if it cannot move to the sphere of operations for fear of uncovering some other area of equal or greater importance. A fleet held in the North Sea by the polar attraction of an enemy's fleet or through fear of invasion can exercise no decisive influence on Mediterranean strategy. . . . The Egyptian problem is one of logistics. To Egypt from Gibraltar is 1,815 miles (almost five days at sixteen knots); from the Adriatic 1,175 miles (or three days). To transport 30,000 men would require some forty transports, and to land them in about three days—an impracticable operation with an undefeated fleet able to move eastwards. But if it could not move eastwards, if it was tied to the North Sea, the Mediterranean equation would be altered qualitatively and quantitatively, and could only be solved with the help of France. . . .

A force of armoured cruisers and destroyers sufficient to deal with a fleet of transports must be maintained there, and a strong force of submarines must be stationed at Malta to render futile any attempt at a temporary blockade, which would in itself be an index of invasionary intention. But the ultimate arbiter of sea power is the battle-fleet, and unless a battle-fleet, ours or some other, were sooner or later visible on the western horizon the command of the Mediterranean and the great artery of the East would pass out of our hands.

NEAR EAST BOOKSHELF.

A HERCULEAN TASK.*

There are many cures for sea sickness, some of them used by Royalty, we are told, and others of more modest pretensions, but one and all are, in the words of the advertisement, infallible.

Personally, the reviewer has had no experience with any of the antidotes alluded to above, so that he cannot testify to their merits. It is true that well-meaning friends have time and again advised him to employ this or that remedy when he was about to set out on a sea voyage, the remedy generally consisting in a diet, such as stewed prunes, lemonade, or bicarbonate of soda, but no sooner was the deck reached, with its whiff of the salty brine, than admonitions and wise counsels flew overboard and were thought of no more.

But the reviewer does not wish to be selfish in his immunity from sea sickness. He remembers those who were considerate enough to advise him, and for their sakes, as well as for the welfare of those millions who, unfortunate in having been born "landlubbers" instead of hearty sailors, are apt when at sea to feel the demoralising and unbeautiful effects thereof, he will now publish what seems to be an infallible remedy. The only stipulation is that the subject must know French, or at least have a smattering of that fair language. The rest is easy.

"Au mois d'avril 1909, je faisais la traversée de la Manche. J'allais en Italie. Le détroit était un peu houleux, et voulant m'empêcher de penser au mal de mer, je me mis à traduire en vers français ce que je pouvais me rappeler du célèbre poème de FitzGerald."

The prose of it all! Let others by all means imitate, since they wish to enjoy the soothing balm of forgetfulness, the example set by Mr. Hallard. But let their imitation cease when port is reached, and the fruits of their travail—sheets of scribbled paper—flutter in the wind on their way to the lapping waters. A sojourn at Como ("où j'étais réduit à l'inaction physique par une attaque d'influenza") is not necessarily indicated excepting in the case of those who have, with greater love than wisdom, pocketed their translations with the intention of improving on them subsequently.

The prose of it all! Mr. Hallard's object in translating FitzGerald's "Omar" has been to "faire connaître d'avantage en Europe le célèbre poème." Time alone will show whether his efforts have been successful. Personally we doubt it. A French translation ought to be undertaken by a Frenchman who does not run the risk "de pécher contre le génie de la langue," and not by an Englishman who translates the "jug of wine" as "de bon vieux vin dans une cruche," and the "look at the blowing rose" as "mais vois donc cette rose ouverte à la lumière." Harsh, bold, *cru*, prosaic—would that the leaflets had gone overboard at Calais! Imagine a German translating Heine's "Du bist wie eine Blume" into English prose, a Frenchman rendering Ronsard's "Où sont les neiges d'antan?" into our idiom, or a Spaniard some of the delicate blooms of Becquer—and you have some idea of the fruitless task undertaken by Mr. Hallard. Had his love for FitzGerald's Omar been greater, his ambition to give the French "une traduction barbare," devoid of the subtle fragrance of Oriental mysticism with which the original is imbued, would have been smaller. But was his love great? "Aurait-on quelque peu surfait le mérite—pourtant si grand—de ce petit poème? Je le craindrais un peu."

So will the Frenchman who reads about the "bon vieux vin dans une cruche," and the famous line—

"Oh, prends l'argent comptant, laisse aller la créance."

*"Omar Kheyyam." Traduit en vers français d'après la célèbre version anglaise de FitzGerald. Par J. H. Hallard. (Rivington. 2s. 6d. net.)

CURRENT COMMENTS.

On April 19 the Khedive presided at the consecration of the Rifai Musjid, an edifice worthy of that neighbouring masterpiece of Saracenic art, the Musjid of Sultan Hassan. Its history is pregnant with suggestions for the western mind. In 1869 Princess Kochiar, mother of the Khedive Ismail, resolved to build a tomb to match that of Sultan Hassan, on a site then occupied by the oratory of a mediæval saint named Sheikh Ali el Rifai. Her architect, Hussein Pasha, entered into his august mistress's views with enthusiasm, and work was begun on an enormous scale. But after the walls had risen to a height of 6 ft. the then Khedive found that it would cost at least £500,000 to complete the structure, and reluctantly suspended operations. They were afterwards resumed fitfully by the Ministry of Public Works, and the unfinished musjid served as a burial place for Princess Kochiar and her son Ismail.

***

Seven years ago the present Khedive cast about him for means of completing the Rifai Musjid, which had fallen into ruin. He was fortunate in selecting an architect of genius, for Herz Bey knows all that is worth knowing of Saracenic art. Working on a plan left by his predecessor, he has succeeded in erecting a musjid as glorious as that of Sultan Hassan. The cost from first to last has been £532,000 sterling, much of which was spent in variegated marbles from Greece, Italy, and the Pyrenees, besides red and grey granite imported from Germany, but probably the product of our Aberdeenshire quarries.

***

Here, again, the West has much to learn from the East. It has been said with perfect truth that modern science, with all its transcendent power, is incapable of constructing a cathedral rivalling those which rose during the Age of Faith. Like the Rifai Musjid, Cologne Cathedral has been completed in our generation from plans left behind him by a thirteenth century architect; but this stupendous edifice leaves the spectator's soul quite unmoved. The Catholic Cathedral at Westminster, built within the last decade, has been likened to a pumping station, gas works, and cotton factory combined. Nor is the cause far to seek. The religious instinct which dealt with stone as a plastic material, and covered Europe with fanes which seem to point the way heavenwards, has been well-nigh suppressed by commercialism.

***

The ideals of the West are power, comfort, and luxury; its god is mammon. On the other hand, a religious Renascence has dawned in the East, and among its firstfruits is a revival of Saracenic architecture, hitherto the wonder and despair of the modern mind.

***

A correspondent of the *Egyptian Gazette* informs the world that he travelled some weeks ago by sea from Alexandria to Beirut with the Emir Abdallah, son of the Sherif of Mecca, who had been the Khedive's guest at Cairo. It transpired, in the course of conversation, that the Emir was by no means impressed by the lions of Cairo; nor is this fact in any wise remarkable. Every true follower of the Prophet looks askance at evidences of "material civilisation" to which Europeans attach exaggerated importance.

***

The demonstration recently made by some Italian warships at the entrance of the Dardanelles recalls an incident which has not been adequately recorded in the annals of the British Navy. We allude to the feat performed by a small squadron under Vice-Admiral Sir John Duckworth, in twice forcing the narrow passage which connects South-eastern Europe with the Mediterranean.

***

Englishmen have a tendency to dwell with fond insistence on their victories, and to forget defeats. This attitude is somewhat illogical; for all students of history know that chance plays an enormous part in the operations of war by land or sea. "Malicious fate doth oft devise To beat the brave and fool the wise." It is the spirit with which a battle is fought which really matters; success and failure are on the lap of the gods. The stubborn gallantry and heart-whole self-devotion of our splendid infantry were as conspicuous at Fontenoy as at Waterloo. Some reference to events in the Near East 105 years ago seems to be opportune at a time when the naval strength of Italy has found the Dardanelles too hard a nut to crack.

***

In the spring of 1807 Turkey had succumbed to the spell cast on Continental Europe by Napoleon. She had entered into close diplomatic relations with the great Emperor, and had employed French engineers to bring the defences of Constantinople up to date. Nay, she had abruptly dismissed the English ambassador, and was, therefore, in a state of war with the island empire. Our ministry rightly considered this unholy alliance fatal to British interests in the Mediterranean, and sent orders to Admiral Duckworth, then serving in these waters under Lord Collingwood, to "provide for the ambassador's safety, and dictate conditions to Turkey under the walls of Constantinople." But the Admiralty's instructions were ambiguous and disheartening in their tenour. James, the historian of the British Navy, albeit that he was bitterly hostile to Duckworth, admits that they were full of "buts" and "ifs," which were enough to puzzle the acutest intellect.

***

The Vice-Admiral belonged to Nelson's school, though he was far from being as popular with subordinates and colleagues as that unrivalled captain. His watchword was obedience to the call of duty at any cost. He found Mr. Arbuthnot, the British representative, in safety on the island of Tenedos: but the rest of the programme had to be fulfilled. On February 17, 1807, he led six vessels of the line and a small complement of frigates into the Dardanelles. Favoured by strong southerly winds they silenced the castles of Sestos and Abydos, and burnt several Turkish frigates which lay in fancied safety under their guns. On February 20 the intrepid squadron cast anchor within eight miles of Constantinople, whose domes and minarets were plainly visible from their quarter-decks. Alas, the wind veered round to the north and a strong current from that quarter forbade Duckworth's nearer approach to his goal.

***

Nothing daunted, he began negotiating with the Sublime Porte in view of compelling it to abandon the French alliance. But Ottoman diplomats are the subtlest of their class. Well aware that, at eight miles' distance, they had nothing to fear from the English ships, they lured Duckworth by pretended concessions, until their French friends had rendered the Dardanelles defences almost impregnable. Then they abruptly broke off *pourparlers* with the intruders. Duckworth now found himself in a veritable death-trap; there was nothing for it but to beat a speedy retreat. On March 3 he reluctantly gave the signal to repass the Dardanelles, and ran the gauntlet of a plunging fire from both sides of the Straits.

***

The tightest corner was a point at which this natural canal is barely a mile in width, and is defended by the castles of Europe and Asia, constructed by Mohammed the Conqueror to defend the approaches to his new capital. The first is a heart-shaped fortress, with a lofty keep of similar form, armed with brass cannon of a calibre exceeding two feet. On the Asiatic side stands an equally massive construction, mounting guns of a size utterly unknown in Western Europe. Here the British squadron came under a cross fire of projectiles which caused great loss of life, although they failed to sink a single ship. The "Endymion," of 50 guns, Captain Hon. T. Bladen Capell, was struck by two stone shot weighing 800 lbs. apiece, and other vessels suffered almost as severely. It is on record that an Irish seaman was observed by his captain looking out of an enormous hole made on the upper gun deck of his ship, and in reply to a query why he chose such an exposed position, he said, "Sure, sorr, this is the safest part of the deck—it isn't loikely that another of these rocks will hit us exactly in the same place!"

***

After escaping almost by a miracle from risks which can be appreciated only by tourists who have traversed that *lusus naturæ*, the Dardanelles Duckworth returned to Malta with his squadron still afloat, though sorely battered. He had to face the usual storm of obloquy which descends on men who fail, and is all the fiercer when its victim has mastered "the gentle art of making enemies," as poor Whistler put it. But he had a doughty champion in Collingwood, who silenced popular clamour by declaring that Vice-Admiral Duckworth had done all that mortal man could have effected under the conditions which he encountered.

***

Regarding his exploit dispassionately, at a time when personal animosity has long been silenced by the grave, one is inclined to endorse the judgment of Nelson's right-hand man. If steam as a propelling force had been available in 1807; if Duckworth's ships had been protected by coats of steel; if the southerly wind which carried them through the Straits had persisted for 24 hours, he might have cast anchor within 200 yards of the Old Seraglio, and brought his enterprise to a triumphant conclusion. The forces of nature fought against him: and those of science were still in their infancy. Nelson himself would have been baffled by the crisis which Duckworth and his gallant seamen had to face.

***

"After a Thousand Years" is the title of a "miniature grand opera," which is now occupying the boards of the Tivoli Theatre. The book is supplied by Col. J. B. Lightfoot, author of "The Gentleman in White," and the music by Mr. S. H. Clutsam, who has contrived, within the limitations imposed on a music-hall performance, to produce a score that is reminiscent of Verdi, who, in one of his most notable works, also sought inspiration in Egypt. This "potted" opera deals with the amours of an "Olympian god," and revolves round the fate of an Egyptian princess, whose mad jealousy is her undoing. In its limited scope it provides the composer with an opportunity of furnishing us with a score that has a melodious inspiration and Oriental significance. While the band obviously does its best with the music, there is no doubt that the latter would receive greater justice at the hands of a fuller orchestra. The acting and singing are unusually good. Miss Muriel Terry appears to advantage in the rôle of Pharaoh's daughter, and Mr. Frederick Ranalow is a very effective Usuf, the Olympian god. The mounting of the piece is excellent, and the unusual "turn" should attract large houses to the Tivoli.

PERSONAL & SOCIAL

The new Roumanian Minister was received by Sir Edward Grey at the Foreign Office on Tuesday.

The Princess von Hatzfeldt has returned to Berlin from Cairo.

Lord Lamington arrived at Teheran at the beginning of the week and is staying at the British Legation.

The Earl of Minto left London for Minto House, Hawick, on Monday.

The German Emperor has conferred the Grand Cordon of the Order of the Red Eagle on M. Venizelos, the Greek Premier.

Lady Maxwell has arrived at 90, Eaton Square, which she has taken for the season. Major-General Sir John Maxwell will join her on his return from Egypt shortly. As a Court will be held on May 20, Lady Maxwell has postponed her dance to June 10.

Mme. Vagliano has arrived at 28, Hill Street, Mayfair, from the Continent.

Mrs. Myles Kennedy and Miss Marguèrite Kennedy have returned to Stone Cross, Ulverston, from the Sudan.

M. Boppe, Councillor of the French Embassy in Constantinople, and Mme. Boppe have arrived in London.

M. Paul Deschanel and Mme. Deschanel, who are touring in the Balkan States, have arrived in Belgrade, where a dinner was given in their honour by the Prime Minister, M. Milovanovitch.

Mr. and Mrs. Leo Weinthal left England last Saturday on board the "Balmoral Castle" for an extended tour in South Africa.

Lord and Lady Hylton have gone to Constantinople on a visit to Sir Gerald Lowther, the British Ambassador.

Mr. W. J. Norcop, H.M. Vice-Consul at Braila, left his post on the 3rd inst. on leave, which he will spend in this country.

Lady Lowther, wife of the British Ambassador in Constantinople, founded last Friday a society for the Prevention of Cruelty to Animals. Hilmi Pasha is president, while Mahmud Shevket Pasha and the Foreign Minister, Assim Bey, are among the members of the committee. A warm welcome has been given to the society by all sections of the Press.

Mr. and Mrs. George Royle left Cairo at the end of last month for Port Said, where they intend remaining for about a month.

Dr. and Mrs. Waklyn have left Egypt for good, and will now reside permanently in England. Dr. Waklyn has been resident physician at Mena House Hotel for thirteen winters, during which time he and his wife have made many friends.

Our Roumanian correspondent writes that King Carol has derived great benefit from the mountain air of Sinaia, and that his Majesty's health is now quite satisfactory. Their Majesties will extend their stay in the country, and shortly after returning to Bucharest the Queen will pay a fortnight's visit to Constantza, the fashionable Black Sea bathing resort.

The engagement is announced of Mr. Otto Lindermann, brother of Mr. Hugo Lindermann, of Alexandria, to Miss Germaine Merkle, the youngest sister of Mrs. Hugo Lindermann.

The engagement is announced of Walter Innes, of Suez, Egypt, fourth son of Deputy Surgeon-General Innes, M.D., of Charmouth, Dorset, and Annie Jean, third daughter of Colonel E. W. Creswell, (late) R.E., of Cobham, Surrey.

A marriage has been arranged and will probably take place in October between Mr. Cyril Barker, son of the late Henry Barker and Mrs. Barker, of Alexandria, and Miss Gabriella Fenderl, daughter of Mr. and Mrs. Paul Fenderl, of Ramleh.

The marriage of James Bey, eldest son of his Excellency Elias Pasha, and Mabel Cecily, youngest daughter of the late Hon. William Lowther, took place very quietly at Marylebone Parish Church last Friday morning. The bride was given away by her brother, the Speaker. Owing to mourning in the bride's family the ceremony was very quiet, only a few intimate friends and relatives being present.

The marriage of Mr. Kenneth Ian Macpherson, Argyll and Sutherland Highlanders, eldest son of Sir John Molesworth Macpherson, C.S.I., of Creag-Dhu, Onich, Inverness-shire, and Lady Macpherson, with the Marchesa De Piro took place at Casa Inguanez, Notabile, Malta, on the 1st inst., very quietly, owing to the bride's family mourning. His Excellency the Governor and Lady Rundle and some of the nearest relatives attended the ceremony.

The German Emperor last Saturday assisted personally at some archæological excavations conducted in the gardens of "Mon Repos," the King of Greece's villa in Corfu. The King and Queen and Crown Prince and Princess of Greece were present at the operations, which have resulted in the unearthing of a small temple of the fifth or sixth century B.C. of the Doric order.

The *Egyptian Gazette* reports that the health of the last of the widows of the Khedive Ismail Pasha, Princess Emina Hanem Ismail, is giving rise to considerable anxiety among her entourage, and that for some time past her Highness has had physicians in attendance on her night and day.

The marriage arranged between Captain Frederick E. Johnson, Army Service Corps, son of his Excellency E. A. Johnson Pasha, of Edermine, Enniscorthy, Ireland, and Miss Evelyn Alison Cheape Crosthwaite, youngest daughter of Sir Charles Crosthwaite, K.C.S.I., of Long Acre, Shamley Green, Surrey, and of the late Lady Crosthwaite, will take place at Shamley Green in the middle of June.

The announcement that Captain Sidney M. Toppin, R.G.A., has been seconded for service with the Egyptian Army appears in the *Gazette*.

Major Pringle has been appointed Inspector-General of Egyptian Government stores.

Captain G. H. Rees, Royal Army Medical Corps, on arrival in Ireland from Egypt on the 19th inst., is to take up duty in the Belfast District.

Veterinary Captain C. H. Hylton-Jolliffe, 1st Life Guards, has been appointed for duty with the Egyptian Army.

Colonel E. W. Newland, from Command Paymaster at Malta, has been ordered to Exeter.

Amongst Army Service Corps officers posted are: Captain E. J. McAllister, No. 70 Company at Malta, to Dundalk, and Lieut. and Quartermaster W. W. Barron, from Malta to Devonport.

Major A. C. Daly, 2nd Battalion West Yorkshire Regiment, has been placed under orders to embark for Malta about the 18th inst. to join his unit.

Captain W. R. S. Ford, 2nd Battalion Gloucestershire Regiment, will embark for Malta on the 18th inst.

The Khedive has conferred the 3rd Class of the Order of the Medjidieh on Major J. F. Bernard, A.O.D., Army of Occupation, Cairo, in recognition of valuable services rendered by him. The thanks of the Egyptian Government have also been conveyed to Major Bernard by the Prime Minister.

The Khedive has bestowed the Osmanieh, third class, upon El Kaimakam H. M. Hutchinson Bey, D.S.O., who has been struck off the strength of the Egyptian Army.

Mr. Alan Henderson Gardiner, D.Litt., of Queen's College, Oxford, has been appointed Reader in Egyptology in the Manchester University. Dr. Gardiner is Laycock Student in Egyptology at Worcester College, and was awarded the degree of D.Litt. for his researches in Ancient Egyptian philology.

A feature of the celebrations held at Malta in honour of the anniversary of the King's accession was the trooping of the regimental colours by the 2nd Battalion West Yorkshire Regiment in the presence of General Sir Leslie Rundle, the Governor and Commander-in-Chief. Salutes were fired at noon by the warships and the shore batteries, the ships in harbour were dressed with flags and bunting, and on shore flags were flying everywhere.

Prof. Flinders Petrie's course on "Recent Discoveries in Egypt," to be delivered at University College, will begin on Thursday, May 16 (at 2.30).

Reshid Bey, Legal Adviser to the Ottoman Government, who was recently in London in connection with the Baghdad Railway negotiations, has returned to Constantinople, where he has submitted a report to the Government.

The death occurred last Saturday, at his London residence, 16, Bruton Street, of Mr. H. Maurice Oppenheim, who was formerly a partner in the firm of Alberti, Pinto, Oppenheim and Co., bankers, of Paris, and was for some time in Cairo as the representative of the firm. During his connection with Egypt Mr. Oppenheim was instrumental with the late Mr. Frederick Greenwood in advising the British Government in buying Suez Canal shares.

The Paris correspondent of the *Times* announces that the death of Prince George Romanowski, fifth Duke of Leuchtenberg, took place at his residence on the 3rd inst. In 1883 his Highness married Princess Anastasia of Montenegro, whom he divorced in 1906.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

MARRIAGE.

MacLaren—Cadogan.—On April 27, at All Saints Church, Ramleh, near Alexandria, Egypt, Geoffrey, fourth son of the late James MacLaren, of Manchester, and Mrs. E. Rowley, of Dover, to Lily, widow of the late Victor H. A. Cadogan.

DEATH.

Sassoon.—On May 1, at her London house, 62, Mortimer Street, W., Laura Grace (Mrs. Staunton), wife of Isaac Sassoon, of 22, St. Alban's Road, Harlesden, N.W.

THE REFORM OF THE GREEK ARMY.

It is a curious historical coincidence that the last two decades have witnessed a considerable decline in military enthusiasm in many European countries. The South African War showed how much was lacking in British organisation owing to official apathy; Greece and Russia learnt the same lesson in their respective wars, and even France, whose army had always been her chief joy and pride, discovered that the great mystery which must for ever shroud the Dreyfus case had left a wound which it has taken years to heal. It was the irony of fate that what is known as Dreyfusism should under the plea of pacificism create anti-militarism. The Socialists seized their chance and scored a great, though temporary, success; and yet it is an ex-Socialist, M. Millerand, the present Minister of War, who is responsible for the revival of patriotism and military zeal. The army is restored to its position of favourite; crowds follow the tattoos through the streets on a Saturday night; and France is once more to be reckoned with as a military Power. But she has done more than merely rehabilitate herself; she has plucked another nation from the morass of inefficiency and neglect in which she was floundering herself but a few months ago. The bitter disasters of '97 seem to have left little impression on those responsible for the organisation of the Greek army. Despite the serious depletion among the male peasantry owing to the constant flood of emigration, nearly 40,000 of the conscripts called out for military service from 1900 to 1903 were allowed to return to their homes without being drilled. Discipline became slack, and the army generally was in almost as poor a plight as in that fatal year when the deluded Chauvinists shouted "To Constantinople." The brief rule of the Military League did nothing, was of too self-seeking a character to attempt to effect any drastic improvements, and it has been left for M. Venizelos to add to the great services which he has already rendered his country by persuading his colleagues to arrange for the dispatch of some French officers who could be entrusted with the task of reorganisation. A group of officers was lent by the French Government, under the command of General Eydoux; while at the same time arrangements were made with the British Admiralty for the loan of some naval officers to perform a similar duty in the Greek fleet.

The greatest praise is due to General Eydoux and his staff for the prompt way in which they started on their work. His first objective was the development and enlargement of the number of men liable for service, and the old system of allowing a considerable proportion of the conscripts to be released from any immediate training will never be renewed. But he was not content with passive acceptance of these old evils, and he has now called out over 11,000 of these who were not utilised in 1903 to go through a three months' course of service this summer. Similar steps will be adopted next year with regard to others who have escaped in the same way more lately. The impossibility of turning out an artilleryman or a cavalryman with a proper knowledge of his duties in such a short space necessitates the vast majority of these men being drafted into the infantry, and, unfortunately, it is the infantry which is notoriously ill-officered, but doubtless the keenness of the junior French instructors will soon effect an improvement in this branch. It has also been stated that a certain proportion of the territorial force (which practically corresponds with the German Landwehr) will be called out either this year or in 1913. The defective organisation, which has been so marked throughout the Greek Army during the last few years, has made it impossible for General Eydoux to arrive at even an approximate estimate of the number of men now in Greece who would be rallied under arms by this system; but it is hoped that this summons will enable the Ministry of War to obtain roughly some idea as to registration, while it will facilitate the task of appointing the non-commissioned officers under this system. It should, moreover, facilitate the appointment of a large number of reserve officers, so that the total fighting effective of the Greek Army should easily exceed 130,000 men. In addition to this new activity in the enrolment of troops, the whole system of training has been modernised. The old theory of marching up and down the barrack yard has been abolished, and the troops are being initiated into manœuvres in the open field. They are being taught to skirmish, to advance in extended formation; and, as Europe has already learnt from the work of the Greek bands in Macedonia, the Greek private is naturally adapted to that kind of fighting. At the same time, moreover, the scientific side of warfare has not been neglected. Nine field and mountain batteries have already been ordered. Aeroplanes, a field telegraph installation, and all the apparatus necessary for wireless telegraphy have been purchased and shipped to Greece; while the arsenals have been replenished with provisions, spare uniforms, and all munitions of war. The keenness which is so marked a feature in French military circles to-day has been transmitted by the new instructors to their pupils, and the thoroughness of the reforms has made the Greek Army, small though it may be in numbers, a live factor in Near Eastern politics. The interest shown by the other Balkan States is sufficient proof of this. Servia, Bulgaria, and Roumania have but recently despatched their military attachés at Constantinople on the task of reporting on the new changes. Russia and Turkey prefer to have a permanent military representative at Athens.

Fears may be expressed perhaps that this revival of military morale may lead the Greeks into the adoption of a policy which the national trait of over-confidence is always apt to encourage. Is there any likelihood of a return of that Jingoism which was fostered with such fatal results by M. Delyannis? The satisfactory verdict on M. Venizelos' policy, as shown by the Greek elections, is sufficient answer to such doubts as long as he remains in office, and it is a comforting sign that there seems to be no signs of the popular confidence waning. It may well be that the knowledge of the existence of a reasonably powerful army may serve to steady the national nerves at a crisis instead of encouraging the Government to listen to hysterical advice; and the repeated assurances by the Premier that his chief object is to maintain the *status quo*, backed up by his strong conduct in connection with the Cretan deputies, are a hopeful augury for the future.

A REINFORCEMENT.*

BY RUDYARD KIPLING.

The dhow thrust her snout round the rocky cape and lurched easily into the next bay. She had come, by Allah's guidance, her skipper's hereditary instincts and the strength of her own double skin, from Jask viâ Muscat, a many days ago. In due season if Allah saw fit, she would reach her various destinations up the Red Sea. Meantime, she sidled along the south end of the great Arabian desert—that most utterly empty land—precisely as she had done every year of the last seven and thirty. That there was no officially recognised port for a few hundred miles before her and behind did not trouble her. She preferred the near bleak outlines and strange-coloured hills to the uncharted middle blue of the Indian Ocean, and, so far from avoiding that coast, edged in with the contempt born of two generations' familiarity. Navigation, as her skipper understood it, did not begin till much nearer Aden.

Her crew sprawled on the high poop making up rope from piles of raw bast, or searching their blue and white garments; for an old dhow is a nest of life. The rudely-battened hold between the poop and foc'sle deck was empty, except for a layer of bales of dates, these last punched and trodden hard as concrete by the unshod hoofs of horses that had made one of her recent cargoes. A score of very lean and very bright-eyed men lay among the bales, their heads pillowed on little gay-coloured bundles. Some of them had thrust faded sprigs of mignonette or a bunch of roses behind their ears. Others bent earnestly over ancient weapons which they whetted with small pieces of pumice, first on one side then on the other, with many squintings and balancings, and as they worked they chewed dry leaves, camel-fashion. All bore themselves with the dignity of a thousand Mohammedan years. A few planks laid on cross-beams served the crew as a fore-and-aft gangway above them. The great lateen sail, full of holes and ridged with tautened rope at every cloth, made the wind trill and drum down the long hollow of it. The spliced and dancing yard, the forward-raking mast, the halliard running through its tremendous three and four-sheave wooden blocks, the salted and sun-roughened decks and gunnels, the scrape of pumice stone on metal, each added its own note to the ship-music which, heard through shut eyes, resembled a barbaric native band coming and going round distant street corners. The under-note of all was the rend and tear of the waves before the long grab-bow that lunged through them like a well-employed knife.

The wind dropped a little with the sun, and the dhow changed tack to avoid some long spine of a reef. The skipper, calling on many saints, put the helm hard up and wore round, letting the sail all fly out forward in such confusion as a man might try to imitate by clawing a wet shirt off over his head. With a surge and a jar the yard came over the masthead, while the sheet, thoughtfully spliced into the clew of the sail to prevent it getting adrift, whipped air and ocean, till some one caught it and hauled it in. Round flew the dhow's high stern, and before a stray shark could well make up his mind what was happening, the wind had her on the other quarter, and she stood away for the night.

Dawn, white and breathless, saw her loafing in a long slant shoreward once more, her crew and passengers busy at morning prayers, while she, for all her airs of loose-ended sloth, slung them along at something close upon eight knots. She seemed to be interested in a tiny patch of cultivation beneath the flank of a huge slope where men with camels waited. And so she went on her unhurried ways.

A week later, a double-awninged steam-launch raced out from under the lee of a promontory, and bade her lie to. In other days, with other cargoes, she would, on such a wind, have taken her foot in her hand and removed herself, for all launches are an abomination to all dhows. This time she waited her pursuer with a clean conscience, and a hold full (her skipper said so) of pilgrims for Jeddah.

"No guns—no slave, sar, this time. Mine *all* firsh-class passenger, sar," he cried, proudly.

The launch's officer was a little disappointed. The most tender imagination could not conceive those shining-eyed loungers, on the date-bags, unarmed though they were, as being taken anywhere against their large and silent wills.

"I see," he said, at last. "Where did you pick them up, Ishmail?"

The skipper pointed largely over the quarter towards desolate Hadramaut.

"There, sir," said he. "Kishin, Sihut, Mukalla—all those places, sar. They very good pilgrims, sar. You want any frankincense, sar? Any real attar of roses? You got any newspapers, sar? Very long time out, sar. No news at all. Any Aden papers? Bombay papers? Angleesch papers?"

A bundle of old journals was hove aboard. The skipper acknowledged it with a handful of dried *khat* leaves, which, being chewed, miraculously relieve weariness; and, when the launch retired, spread the latest paper on the tiller and translated extracts in a loud voice to his passengers among the date bales.

"But," a voice called up, "is it written there what is the price of the guns in the place to which we go; or is that all a fable of Tasm?"

"The price is nothing," the skipper returned. "It is no more than half an hour's risk of a life—such a risk as we who use the sea accept daily. And the reward is that with two guns or three a man becomes a chief in his own country. Now we will pump again. She does not leak. She has never leaked, but, lying on this tack, she admits as it were a few drops of wetness."

"She leaks: she leaks continually. She is older than Add. It is no concern of an unmixed Arab of the Arabs to do women's work." This was a passenger whom they had picked up not five days before from a white-walled town in the crack of a dry foot-hill.

"There is no impediment," said the skipper. "But if through lack of pumping she admits too much water, she will descend into the sea among hungry fish, and thus those who cannot swim will not only lose the cheap rifles which await them, and the maids and the camels which await the possessors of weapons, but also their certainty of Paradise. Myself, I am old and have seen Mecca, and do not desire women. *My* salvation is assured. But *you* are young."

. . . . . .

Two, or it may have been three weeks later, the dhow lay in soft moonlight off the jetty of a most insignificant village far up the Red Sea. Her sides were scraped and gashed with coral; she leaked noticeably from collisions with the reefs and shoals of that infamous and at present unlighted stretch of water. It would cost at least twenty-two rupees for overhaul and refit, but the skipper, counting his passage-monies, did not grudge it. She had dropped many of her passengers at various places on the way. This was only the last and most luxurious batch of millionaires.

"Up and out, brothers," said the skipper. "Here begins the little land journey."

"Is it far?" a man inquired, and bandaged a boil on his knee which had been a little chafed by the voyage.

"God is good! Perhaps a month. Perhaps two. But the rifles are certain, and so are the plentiful strings of ammunition."

Man after man yawned, shook himself, gathered up his bundle and stepped out on the warm beach. When all were assembled someone asked: "By which road do we go?"

Voices round them in the shadow of huts laughed encouragingly. "There is but one road!" they cried. "It cannot be missed. Hold that star in the north-west till daybreak. Afterwards, any babe will show!"

"We wait, then. We have come from far off. It is a strange country to cross at night."

They sat down where they were and rubbed their stiff limbs, till an old, old man among them began to recite the Suratu'n Nasr or Chapter of Help from the Koran.

* Copyrighted in the United States of America by Rudyard Kipling.

Digitized by Google

Then the dawn broke, and it was time for morning prayer, in which, after pointing them towards Mecca across the pale sea, the dhow's skipper joined.

A man with some most desirable planks of teak, a piece of sheet-lead, copper nails, and two pots of real paint squatted by his side ready to open trade on the last word of the Supplication.

. . . . "By no means can aught befall us except what God has destined for us," the skipper concluded, and in the same breath, "Seeing that that stuff has, of course, been robbed from a steamboat——"

"It went ashore, Hajji. At great risk was it recovered from out of the jaws of sharks. Do not cheapen the life of a man," the dealer snapped.

They rolled up their prayer-mats and settled to business.

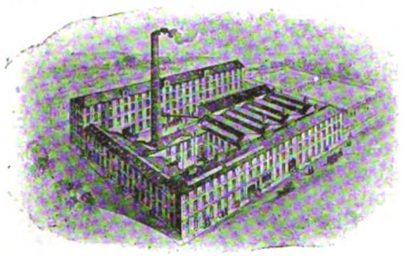
"We go," said the oldest of the passengers, presently.

"In peace and health, and with the blessing of God," the skipper answered, over his shoulder.

The little company moved off as the low sun stung them on the neck and ear.

"Good!" said one of them, breathing deeply and staring around. "Here is land—hills, sand, rock, camels, and goats. All one with our own place! God is great."

They melted into the dancing haze with a swift motion almost like that of trout turned down into waters which exactly suit their needs.



In time, in due time, they hoped to reach a place called Tripoli, where, they understood, breech-loading rifles were to be had for the taking.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

16 and 17, Devonshire Square,
London, E.C.

The present anniversary number of THE NEAR EAST, bristling, so to speak, with greetings from many of Britain's leaders of men, offers me a unique opportunity in which to point out the significance of the commercial and financial section of the journal, and modestly to chronicle some of our achievements during the past short year.

***

In the first place, be it remarked that we have no other object in publishing week after week trade and finance notes from countries in the Near East than to give an impulse to British trade, and to "scent" openings for British enterprise. In this respect we are thoroughly patriotic, and if at times we are bitter, it is due to the fact that cases illustrative of British inactivity as opposed to the energy and activity displayed by our trade rivals are brought forcibly to our notice. For those other firms—enterprising, go-ahead, and up to date—we can only find words of encouragement and praise.

***

It is our ambition to see British trade increase in the Near East. Returns show that, when all is said and done, we more than hold our own wherever the British article is placed on the market under favourable conditions. But we can still do more, and it is the value—nay, necessity—of this *more* which we wish to insist upon, bringing continually to the notice of our exporters in "Openings for Business," "Engineering Notes," etc., in these self-same columns and in others scattered throughout these pages. Fortunately, we have the co-operation of able correspondents and contributors (of whom more anon)—men who live out in the Near East, are acquainted with local conditions and requirements, and who can and do speak from first-hand knowledge.

***

But, as there are two sides to every question, so also must there be two currents in every movement, the *va-et-vient*, as it were, or the coming and going regulating exports and imports, supply and demand. Thanks to our increasing circulation, both here and in the Near East, we are able in this section of the paper not only to point out to the exporter where there is a demand for his articles, but also to draw the foreign importer's attention to the British source whence he can draw his supply. We can justly pride ourselves in this connection on the success which has crowned our first efforts in bringing purchaser and consumer together. As THE NEAR EAST grows, and its influence waxes—as they are bound to month by month—so will the effects of our patriotic endeavours augment and increase.

***

Speaking of correspondents and contributors reminds me of two articles, both from Constantinople, which appear in this issue of THE NEAR EAST. One is the weekly feature, namely, the "Constantinople Business Letter," written by an expert with access for his information to exceptionally high quarters. His reference this week to Sir Adam Block's speech at the annual meeting of the British Chamber of Commerce at Constantinople, ought to be read carefully by all who have British interests in Turkey at heart. Since writing the above, however, Sir Adam Block has himself written to THE NEAR EAST, and has again insisted, in an eloquent passage, on the necessity for British public opinion to assert itself.

***

The second article to which I wish to refer is that specially written for THE NEAR EAST by a well-known and highly esteemed member of the British colony at Constantinople on the "Trade Effects of the Closing of the Dardanelles." The view expressed therein, namely, that steps should be taken by the Powers to prevent a recurrence of the events of the past few weeks, is one that is generally held by all acquainted with international trade relations, and one that I must most emphatically endorse. Where there's a will, etc., but methinks this "will" can only be engendered by the weight of public pressure being brought to bear on officialdom. In other words, the advice proffered by Sir Adam Block must be followed by Britain as a nation.

***

I believe that in the ordinary course of events the result of the adjudication by the Ottoman Government of the Mesopotamia irrigation works ought to have been made known by now. At any rate it cannot be long retarded, in spite of Turkish procrastination, and I have been informed that in all probability the result will be known this week, most likely on Saturday.

***

It would be utterly useless to weigh the chances of success possessed by either of the two tenderers, Messrs. Sir John Jackson and Messrs. S. Pearson and Co., as all will depend on the *cahiers* submitted by both competitors. Even the circumstance that Messrs. Pearson have underbid their rivals—as reported last week exclusively by THE NEAR EAST'S Constantinople correspondent—is not a point in favour of, or against the chances of either party. So many conditions, alternatives, and stipulations are involved that no one detail can be regarded as an indication as to the issue.

***

The latest news to hand gives credence to an impression gaining ground in well-informed circles that the adjudication will be cancelled and a new one opened, probably with more concise and explicit specifications.

***

Mr. Stainton's letter to the *Times* on Wednesday makes us realise how fast the earth is shrinking. "A party," he writes, "left London for Persia by the 8.35 p.m. train on Saturday, April 20, and arrived at Baku at 10.20 p.m. on Thursday, the 25th, and at Anzalee at 6 a.m. on Saturday, the 27th—that is, within six and a-half days from London!" At that rate of progress the "within a week to India" prophesied by "Asiaticus" in the *Pall Mall Gazette* is a matter of years, and not decades. Other signs of the times are the Pekin to Paris air race and Mr. John's discovery of a practicable route for the Trans-Persian railway along the coast of Mekran—the famous old trade route of the days of Alexander—from Karachi to Chahbar.

***

The Ailsa Craig Motor Company of Chiswick have received an order from the Sudan Government for a 35-h.p. four-cylinder petrol motor for a motor-boat. It is really surprising that the Nile in the Sudan, and the Nile and its canals in Egypt, have not offered in the past a better market for British motor-boats. But to those who read the signs of the times it would appear that an impulse is to be given to motor traffic in Egypt's waterway.

***

According to the *Truth*, of Jerusalem, the making of a harbour at Jaffa, to which I have frequently referred, is already decided. The sum necessary for its construction will be about 65,000,000 francs, which amount has been already fully subscribed by several financial companies and private individuals. It seems that the administration of the Jaffa-Jerusalem Railway has acquired a large share in the enterprise.

***

Mr. Odell, of North Carolina, is touring the Near East as the special agent of the Department of Commerce and Labour, Washington. He speaks hopefully of the Near Eastern market, and proposes, among other things, the creation of commercial museums in Bucharest, Sofia, and Belgrade. This would be an improvement on "sending out catalogs in the English (?) language, which are seldom understood." He argues further that "the system of appointing exclusive agents in Constantinople for all of the Balkans is most unwise." After having pushed further afield, to Cairo and Khartum, Mr. Odell will, I think, come to the conclusion already arrived at by so many British firms, namely, that one agent for Egypt and the Sudan is in many cases no longer a feasible arrangement.

***

"The publication in the Greek *Government Gazette* of invitations for tenders for supplies is made at such short notice," writes the British Consul at Piræus, Mr. C. J. Cooke, in a report to be shortly issued, "that there is, in the majority of cases, no time for British manufacturers, not already represented on the spot, to compete." Could this not be remedied in some way—by friendly representation to the Greek Government, for instance? I draw the attention of the authorities to this matter, believing it to be of easy rectification.

***

It is being urged in the *British Manufacturer* that, in spite of the fact that the United Kingdom buys yearly three-quarters of the Jaffa orange crop, the material used by the cultivator in packing his oranges is imported from all countries excepting England: wood from Austria-Hungary, hoops from Turkey, wrapping paper and nails from the Continent. According to the British Vice-Consul at Jaffa, Mr. Piani, British manufacturers could easily obtain a share of the business, especially as regards wrapping paper and nails. Those interested should apply to the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, E.C.

***

Owing to pressure on space, my reply to "British Merchant's" letter in last week's issue will have to be held over until next week. In the meantime I emphatically repudiate the imputation that I was, or aimed at being, personal in my remarks.

COMMENTATOR.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - -	**£1,500,000.**
Paid up Capital - -	**500,000.**
Reserve - - - - -	**640,000.**

The Bank undertakes every description of Banking Business on most favourable conditions.

BANK OF ATHENS.

(Incorporated in Greece.)
CAPITAL FULLY PAID - - Dr60,000,000
RESERVE FUNDS - - Dr10,480,000
Head Office: ATHENS.
London Office: 22, Fenchurch Street, E.C.
Branches:

GREECE: Piræus, Patras, Syra, Calamata, Tripolitza, Volo, Larissa, Agrinion and Carditza.
CRETE: Canea, Candia and Rethymo.
TURKEY: Constantinople (Galata, with Agency at Stamboul), Samsoun, Trebizonde, Kerassunde, Bafra, Mersina, Smyrna, Adana, Tarsus, Salonica, Serres, Cavalla, Xanthi, Janina, and Chio.
EGYPT: Alexandria (with agency in the quarter of Midan), Cairo (with agency in the quarter of Mousky), Zagazig, Mansourah, Mit Ghamr, Tantah and Beni Souef.
SUDAN: Khartum & Port Sudan. CYPRUS: Limassol.
HAMBURG: Domhof, Mönckebergstrasse 18.

Special facilities for Banking, Exchange and Commercial Business of every description with Greece, Egypt, Turkey, Crete, Cyprus and the Levant generally. Most favourable rates for Deposits, Collections, Cable Transfers, &c., on application.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - -	**£850,000**
RESERVE - - - - -	**£210,000**
Reserve Liability of Shareholders -	**£1,000,000**

London Office: 25, Abchurch Lane, E.C.
Chief Office in Persia: Teheran.

Branches at Ahwaz, Bushire, Hamadan, Isfahan, Kazvin, Kerman, Kermanshah, Meshed, Mohammerah, Nasratabad, Resht, Shiraz, Tabriz and Yezd.

The Bank is prepared to transact Banking business of every description in and connected with Persia; and in London grants Drafts, Telegraphic Transfers, and Letters of Credit, and negotiates or collects Bills on Persia.

IONIAN BANK, LIMITED.

INCORPORATED 1839.

SUBSCRIBED CAPITAL - - -	**£600,000**
PAID-UP CAPITAL - - - -	**485,580**
RESERVE FUND - - - -	**65,000**

Head Office—LONDON.

BRANCHES—

Athens, Patras, Corfu, Cephalonia, Zante, Piræus, Tripolitza, and Nauplia, in Greece; and at Alexandria, Tantah, Fayoum, Minieh, and Mansourah, in Egypt.

Every description of Banking Business undertaken on most favourable terms.

NATIONAL BANK OF EGYPT.

Paid-up Capital - £3,000,000 (in 300,000 Shares of £10 each, fully paid). **Reserve Fund - £1,500,000**

Governor—F. T. ROWLATT, ESQ. **Head Office**—CAIRO.

London Committee—HON. HUGO BARING, SIR CARL MEYER, HON. ALGERNON MILLS, HON. SIDNEY PEEL.

London Agency—4 and 5, KING WILLIAM STREET, E.C.

Manager—J. T. BEATY-POWNALL, ESQ.
Asst.-Manager.—A. F. GILLBEE, ESQ.

Branches in all Principal Towns in Egypt and the Soudan.

Deposits received for a fixed term. Current Accounts opened. The Purchase and Sale of every kind of Stock and Shares undertaken. Bills discounted. Every kind of Banking Business transacted. Full information can be obtained at any of the Offices of the Bank.

THE CLOSING OF THE DARDANELLES.

Its Effects on Trade.

A well-informed correspondent, who wishes to remain anonymous, writes from Constantinople under date of May 3:—

It is, for all practical purposes, the first time that British and foreign shipping trade interests have been brought face to face with the consequences of the peculiar conditions which in time of war govern the navigation of the Bosphorus and Dardanelles, the highways between the Black Sea and the rest of the world, and practically the only channel through which the important cereal crops of Russia, Roumania, and Bulgaria can find an outlet. In time of peace the passage is free, subject to certain formalities, but in time of war the Turkish Government has the right to protect its interests by closing both Straits to navigation. That is what has recently occurred, and though the official closure has lasted only fourteen days, it has brought home most forcibly the extreme seriousness of the resulting conditions. Russian and British interests have perhaps suffered most, but in a more or less degree every country in Europe has felt the effects of the stoppage of one of the chief sources, at this time of the year especially, of the supply of wheat, maize, and barley.

Roughly speaking, some 150 loaded steamers have been anchored north of the Dardanelles, for all or part of the past fifteen days, besides probably 50 more awaiting the opening in the Black Sea ports. Putting the value of the 150 vessels at an average of £25,000, and their cargo at £25,000 more, we arrive at a capital sum of about £7,500,000 immobilised. The daily loss to each steamer may be calculated at £35 on the average, and the shippers or buyers of the cargoes are losers not only in interest but in many other ways, such as by loss of markets, claims for non-fulfilment of term-sales, or cancelment thereof by buyers, etc. Moreover, a large number of steamers have been awaiting the reopening of the Straits to permit of their proceeding to Russian and Roumanian or Bulgarian ports in fulfilment of their charter-parties, and they also are equally affected by the long detention, by the expiry of their cancelling date, etc.

Indirect Losses.

Such are the direct losses on steamers and cargo actually awaiting the reopening of the Straits, but the indirect losses being incurred by grain shippers in the Black Sea are equally serious, and the dislocation of trade has naturally been felt by buyers in Europe, who have found themselves unable to meet their home engagements for deliveries of grain, etc. In this way the European area affected by the closure becomes more and more extended. As for the services of the regular steamship lines, French, Russian, German, British and others, they have been completely interrupted, and some vessels have actually taken advantage of their right to discharge their cargo, destined for Constantinople, at Salonika or other ports, leaving consignees to take delivery there and incur the expense of either temporary storage in those towns or of bringing the goods by rail to Constantinople. Another serious result of detention which might give rise to heavy claims is the heating of the maize owing to the extended sojourn in the holds—a large percentage of the cargoes waiting here consisting of this cereal.

Questions Involved.

Numerous delicate questions have arisen in connection with charters and grain contracts, such as the right of buyers or of sellers to cancel sales made for April or other shipment, the right of charterers and owners of steamers to annul charters once the cancelling date has lapsed, as well as other similar contingencies created by the closure. Moreover, another debated point is the extent of the liability of underwriters who have covered against war risks. It must not be forgotten that, technically, the Dardanelles were not blockaded, and liability for detention and its consequences incurred by steamers and cargoes can be disputed. The Maritime Chamber of Constantinople have taken legal opinion as to whether steamers in durance here can claim damages from either of the belligerents. The authority consulted states that the question is too complex to permit of even a guarded opinion. He recommends that, as a precautionary measure, formal protest should be addressed both to the Ottoman and to the Italian Governments.

From the above it will be seen that the effects of the closure have been very far-reaching, and this first experience of the disastrous conditions now prevailing ought to serve as a pretext for the Powers more directly interested definitely to prevent the possibility of their recurrence. Herein lies the danger for Turkey, and doubtless it was the realisation of this that prompted the decision taken last night to allow the reopening of navigation.

Measures Against Accident.

Measures are now being planned with the object of minimising the possibility of accidents of all sorts, whether on departure of the large fleet collected here or on arrival at the Dardanelles. No steamers will be allowed to come up the Straits until all the homeward bound vessels have steamed through. As this will probably take three days, and the removal of the floating mines will take another three or four days, southward bound steamers will not be able to enter the Dardanelles within the next six or seven days.

In spite of rumours to the contrary the authorities are confident that they have under control and can remove all mines which to-day obstruct the free passage of the channel. Captains, on the other hand, are naturally nervous, and there is an openly declared objection to being the first to negotiate the passage, the loss of the "Texas," which touched a mine when leaving Smyrna, and the similar disaster which has overtaken a tug in the Dardanelles, having created considerable alarm.

The precautions taken will probably render the passage quite as safe as it was prior to the Italian attack, but underwriters will no doubt demand for some time to come a stiff premium for war cover on steamers and cargo passing through.

PATRAS CONSULAR REPORT.

The *Board of Trade Journal* reproduces the following from the report, shortly to be issued, of the British Consul at Patras, Mr. F. B. Wood, I.S.O., on the trade of that district, comprising the Morea and the provinces of Ætolia and Acarnania:—

"There are five agencies at Patras representing foreign firms which together sell on an average 4,000 to 5,000 sewing machines annually on the deferred payment system. The enormous increase in this business is due to the greatly improved conditions of the lower and middle classes.

"It is proposed to extend the present railway line of North-Western Greece, which starts from Krioneri on the northern side of the Gulf of Corinth, opposite Patras, passing through Missolonghi with Agrinion as a terminus, to the town of Arta on the Turkish frontier; but it has not yet been decided from which point of the line the proposed extension will start."

OTTOMAN FINANCES.

Treasury Bills Placed.

In our issue of April 19 we distinctly stated that "all prophetic utterances implying the raising of loans by Turkey at the present moment were premature," and, in spite of the sensational reports, distorted beyond recognition, that have appeared within the past week, and which originated in a misleading message from Constantinople, we see no reason to retract one word from our previous statement.

The facts of the case, despoiled of their sensationalism, are that the Ottoman Government has come to an agreement with the Imperial Ottoman Bank, whereby the latter obtains the option, for one year, or until April 14 next, on a loan at 4 per cent. of £T10,000,000, guaranteed on the unpledged 8 per cent. Customs dues for five vilayets—Beirut, Salonika, Smyrna, Trebizond, and either Erzerum or Aleppo. Further, we gather that it will be issued in two divisions or parts, of, approximately, four and six million pounds each.

The word "option" clearly indicates that the loan itself has not advanced beyond the embryonic stage. Consequently there can be no question of other conditions and stipulations beyond those mentioned above, and no question of either price or time of issue. On the other hand, it can safely be assumed that much will depend on the future course of events in connection with the war.

The option contract has been duly and definitely signed in Constantinople by the representatives of the Ottoman Government and the Imperial Ottoman Bank.

In respect of the above option the Imperial Ottoman Bank has undertaken to make the Ottoman Government certain advances, amounting to 35,000,000 frs., or, approximately, £1,400,000, against Treasury Bills at 6½ per cent. We have it from the most reliable source that these bills have already been placed. They were, as a matter of fact, placed on Wednesday.

Finally, it may be stated that part of the advance referred to, amounting to about £900,000, reverts to the Imperial Ottoman Bank in payment of a previous advance made last January by the bank to the Ottoman Government.

In conclusion, we can point out that the above is a trustworthy exposition of the facts connected with the recent misreported financial operations undertaken by the Ottoman Government. They show clearly that we were accurate in our information when, three weeks ago, we asserted that no loan was in immediate contemplation. On the other hand, it can be assumed that when (and if) the loan materialises it will be devoted partly to cover this year's budgetary deficit, and partly to the furtherance of the great public works projects that are now occupying the attention of the Ottoman Government.

MOTOR-LAUNCH FOR THE SUDAN.

The contract for the machinery of a new medical service boat for the Sudan Government has, says the *Times* Engineering Supplement, been placed with the Ailsa Craig Motor Company, of Chiswick. The vessel is 30 ft. long, 8 ft. wide, and 1 ft. 6 ins. in draft, and the installation will consist of a 35 h.p. Ailsa Craig four-cylinder petrol motor, with reversing gear and clutch operated by one lever. Owing to the sandy nature of the surrounding country all the working parts of the motor are entirely enclosed, and a special water strainer and settling reservoir are provided so that the sand may be excluded from the water cooling system.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, May 3.

The British Chamber of Commerce.

The annual general meeting of the British Chamber of Commerce of Turkey took place on Monday, April 29, when the president, Sir Adam Block, made some interesting remarks regarding the situation created by the closing of the Dardanelles, to which I think it would be well if prominence were given in the Home Press.

Sir Adam prefaced his remarks by stating that, in view of the information contained in the annual report of the chamber and in its quarterly journal, the old custom of an address by the president was more honoured in the breach than in the observance, and he would confine himself to a few observations which he intended should be as brief as possible. He stated that H.E. the Ambassador had authorised him to say that he took the keenest interest in the work the chamber was doing, and in everything that affected British trade, and was always ready to listen to the chamber's requests and to forward its interests to the best of his ability. Sir Adam stated that it was sometimes thought that the sole object of a chamber of commerce was to protect the individual interests of its members, but while that was no doubt one of its first duties, it was by no means the limit of its attributions. The essential object of the British Chamber of Commerce of Turkey was to promote and extend Great Britain's trade with Turkey. The individual interests of members must be sunk in the more general interests of the country to which we had the honour to belong.

Turkey's Economic Development.

Continuing, Sir Adam referred to the economic development of Turkey, and to the increased demand for Western products, to the improvement in this country's finances, to the record trade returns, to the increased railway receipts, the undoubted existence of more gold in the country, and the many projects for public works of every kind which were under consideration. He stated that it was the duty of the chamber to keep the merchant, the capitalist, the constructor, and the manufacturer in the United Kingdom alive to the fact that there are openings in this country, that there are going to be more, and that they must bestir themselves to profit thereby.

Sir Adam deplored the pessimistic expressions heard in many quarters with regard to the future of Turkey, with regard to the new régime and to the present situation, with regard to Turkish trade and the possibilities of development. This pessimism he attributed to the ignorance of the real nature of the changes that are taking place in the social as well as the political conditions of this country. He gave it as his opinion that those who govern this country to-day are honestly anxious to develop the resources which Turkey undoubtedly possesses, and that by that internal development would be constituted a market for Western goods just as advantageous as the market of any other nation whose development has been arrested for any cause whatsoever.

Great Britain's Trade Interests.

Sir Adam showed by statistics that the volume of Great Britain's trade was undoubtedly increasing, but that, nevertheless, the latest available figures obtainable for the five principal exporting countries to Turkey clearly demonstrated that Great Britain's share in Turkey's imports for 1910 had decreased by 2½ per cent., as had that of France by almost 1½ per cent., whereas Austria-Hungary's had increased by 1½ per cent., Italy's by 1 per cent., and Germany by about ¾ per cent.

Necessity for Action.

The President alluded to the War and the latest phases of Italian aggression. So long as the losses of the war were confined to the belligerents and only indirectly affected our trade we, as neutrals, were unable to enter a protest; but with the recent action of Italy in the Ægean and the bombardment of the forts of the Dardanelles, the war was brought much nearer home, and neutrals were suffering even more than the belligerents. Great Britain, with her preponderant shipping and commercial interests, was suffering more than any other country. The present phase of the war absolutely paralysed British trade in the Red Sea and in the N.E. corner of the Ægean, and if it continued indefinitely there was a very dark period before us. The President concluded with the remark that all those who were of his opinion should in their correspondence with the United Kingdom make the situation clear. It is this closing statement which I think justifies me in reporting at this length Sir Adam's remarks to the chamber. With the sixty or more British ships bottled up in these waters, shipowners and insurance companies are losing some £10,000 daily, and our trade exchanges with Turkey have suffered to the extent of some £35,000 each day since the closing of the Dardanelles. It is necessary that the public at home should be enlightened as to the damage caused to our trade in the Near East, with Turkey as well as with the Black Sea ports, and for public opinion to assert itself and make its wishes felt.

The Opening of the Dardanelles.

Reference was made in my last letter (April 26) to the serious risks of collision with the crowded state of the roadsteads since the closing of the Dardanelles, not only when ships were taking up an anchorage, but more especially when the exodus began with the reopening of the straits. Already there has been a slight brush between a British and foreign steamer, fortunately with insignificant damage to either. The Government have now decided that the channel previously left free for passage through the Dardanelles is to be cleared of mines, which it is expected will be accomplished early next week, and a movement is already on foot to regulate officially the departure of all ships now lying here in the sequence of their arrival in these waters. Only a certain number of steamers will be allowed to leave at certain fixed intervals, in order to avoid crowding and the great risk of collision at Nagara, in the Dardanelles, where ships have to await the pilot tug, and which is an open anchorage with space to accommodate less than half a dozen steamers at a time.

Electric Railway.

The concession for an electric railway from Galata to Roumeli-Fener, at the mouth of the Black Sea, mentioned in my letter of April 19, has just been promulgated in favour of the Lenz group. The concession is for a period of seventy-five years.

Reuter is informed that reports emanating from Vienna to the effect that Bulgaria is about to embark on a policy of adventure are unfounded, as is also the statement that Bulgaria is making military preparations on the Turkish frontier. There is nothing to cause uneasiness in Turco-Bulgarian relations.

Mr. John C. Maltass has composed a march for the Cypriote community in Egypt. According to one account, it has a fine swing, added to which is a fresh and vivid harmony varied with a particularly pleasing trio.

NEWS FROM ALL SOURCES.

Grey cloth imported from Italy into the United Kingdom and subjected to further processes of manufacture (*i.e.*, printing, dyeing, bleaching, and finishing) in this country, is not, after having undergone such further processes, regarded by the Turkish Customs Administration as an article of Italian origin, subject to a duty of 100 per cent. *ad valorem*.

The Suez Oil Company, Limited, has signed an agreement with Mr. John Josh whereby the latter takes entire charge of the company's drilling operations adjoining Jemsah headland. Mr. Josh was the driller who took charge of the drilling operation for the Red Sea Oilfields and Egyptian Oil Trust until these companies were acquired by the Shell Transport Company.

The death is announced from Tripoli of Mr. Vittorio Almagia, who was for some years at Alexandria with his brother Edward, and others, in connection with the construction of the new quay by his firm. The deceased at the time of his death was directing the construction of the new harbour works at Tripoli. He had recently paid a visit to Egypt in connection with the harbour works at Port Said, which the firm of Almagia has in hand.

The salary of the Marquis Theodoli, representative of the Italian bondholders on the Council of the Ottoman Public Debt, has been stopped by order of the Turkish Government as from March 14. The Porte does not object to the presence of an Italian delegate on the Council, but is strongly opposed to the return of the Marquis Theodoli. This was communicated to the interested parties in Rome, who, however, replied by re-electing the Marquis Theodoli. There the question remains for the present.

Speaking on Tuesday at the Royal Society of Arts on "Colonial Vine Culture," Mr. Alan H. Burgoyne, M.P., referred to Cyprus, and stated that viticulture was progressing steadily, but he could give no figures of recent date.

The Foreign Office has received from the British Ambassador at Constantinople a communication, stating that, in accordance with the principle laid down by the last International Telegraph Conference at Lisbon, the Ottoman Government has decided, in view of the existing circumstances, to prohibit the use of wireless telegraphy by ships in the port of Constantinople.

Earl Curzon of Kedleston presided at a meeting of the general committee of the British Empire League, held at the House of Lords on Wednesday, to make arrangements for the reception to Sir Henniker Heaton to be held in the Guildhall.

The Teheran correspondent of the *Times* reports that two hundred armed Afghans have crossed the Persian border near Yezdun, and that a larger incursion is said to be preparing.

Reuter's Bucharest correspondent reports that last week the Roumanian frontier guard on the shores of the Black Sea near the Russian border seized the fishing gear of some Russian fishermen. The fishermen appealed for the assistance of Russian troops, who crossed the frontier and seized the confiscated gear by force. Shots were exchanged between the Roumanian and the Russian troops, and one Roumanian was fatally wounded, while another was severely wounded.

In the British Consular Court, Alexandria, an application was recently made for a grant of administration by a creditor of the estate of the late Colonel J. P. R. Gordon, who died in 1910, but whose property in Egypt has not yet been distributed. Mr. J. P. Foster, for the widow of the deceased, asked that letters of administration should be granted to her instead of the creditor. After discussion the matter was adjourned.

An Arab woman (whose name is given as "Mrs. Hadijah Ben Ahmed Caroubi), who on April 2 took lodgings in Gray's Inn Road, has disappeared somewhat mysteriously, leaving four children behind her. On April 19 she "started on a journey," and nothing has been seen or heard of her since.

Openings for Business.

TRADE PROSPECTS IN GREECE.

Openings for British Enterprise.

(From Our Own Correspondent.)

Athens, April 24.

The return to power by an overwhelming majority of the Venizelos party in the Greek Chamber of Deputies is calculated to exercise a beneficial effect upon trade prospects in Greece. A stable Government inspires confidence in foreign as well as in home commercial circles, and Mr. Venizelos has already done much to purify the hitherto corrupt state of affairs which caused foreign manufacturers of the more conservative class to hesitate about having dealings of any kind with Greece. There is more to be done, but progress, to effect a permanent result, must necessarily be gradual..

Bills of Exchange.

The passage, during the last session, of a law on bills of exchange has put a stop to a great deal of the chicanery that formerly entailed serious loss of time and legal expenses on incautious manufacturers. Before this law came into operation, a tradesman could file half-a-dozen defences to an action arising out of a protested bill; and, though judgment was bound to go against him in the end, he could spin the matter out for two years or more while each defence was being dealt with in turn. This is no longer possible. There is at present absolutely no legal defence admissible in the case of a duly accepted bill which is legally protested within twenty-four hours after maturity. Within three days the debtor can be declared bankrupt, and no excuse will avail him. This proves a great deterrent to shifty dealings; for in many cases, previously to the passage of the new law, drafts were allowed to go to protest simply because the drawee did not find it convenient to pay on due date, although he had no intention of becoming bankrupt.

Government Contracts.

The appointment of foreign commissions for the re-organisation of the Army and Navy is having a purifying influence upon Government contracts connected with those services, though there is still much left to be desired in other quarters. A French officer has recently taken charge of the infantry supply department of the War Office, and is in a fair way to rout completely the "ring" of Jewish commission agents which has, up till now, practically controlled the Army supplies, greatly to the advantage of its members and supporters, and to the detriment of the public service. Up till quite lately, the procedure of these gentry was to offer to supply goods made to Government specifications at a price against which no honest manufacturer could compete; they would then supply an inferior article, and trust to their skill in handling the committee appointed to pass the contract to get the goods accepted. There is now no longer any fear of these tactics being adopted in this particular department, and British manufacturers of such articles as cotton and woollen khaki cloth, cotton material for blouses and shirtings, army blankets and textiles in general, may be quite sure of a fair chance in any contract for which tenders are invited. Another most beneficial innovation in this branch of the service is that ample time will in future be given for the submission of tenders. Hitherto, the "ring" has been able to manage matters in such a way that although its members knew exactly what orders were to be given out some months beforehand, the official publication was delayed until so late that there was no time left for outsiders to submit tenders. This is now all done away with, so far as the infantry supplies are concerned, and the very fact of a tender being submitted by a member of the "ring" will militate strongly against the chances of success of the manufacturing firm for which that member acts as agent.

Wanted—Board of Trade Action.

The "ring" is still strong in other Government departments, and enjoys as much as ever the support of subordinate officials whose salaries are inadequate to meet their requirements. The Ministers of the Government are not to blame for this state of affairs, for it is extremely difficult to eradicate a firmly-established system at one stroke. Mr. Venizelos does his best, but his orders fall on unwilling ears, and he has so much to do that he cannot attend to everything. The members of the British Legation at Athens do all they possibly can to mend matters in the interests of British commerce, but they can, after all, only make representations to the Greek Ministers, who promise but cannot perform. If the Board of Trade would appoint a commercial agent at Athens, much might be done; for such an official would be in a position to go straight to the root of the evil, dealing with the chiefs of the departments themselves. The latter would listen to him because they would know that their conduct, if brought to the knowledge of the responsible Minister, would probably lead to their dismissal. Information that is now purposely withheld would be forthcoming where British trade was concerned, and ambiguous passages in Government specifications, worded especially to confuse competitors not in the secret, would have to be elucidated in one interview, instead of, as now, passing through so many stages that the explanation is not extracted until too late to be of any service.

Encouraging Foreign Trade.

The Venizelos Government has, nevertheless, done much, and promises to do more in the way of encouraging honest foreign trade and enterprise in Greece, and there is distinct evidence of a moral tone in business affairs generally that augurs well for the future. If British manufacturers can be induced to place confidence in the stability of the present administration and make a serious bid for the trade, they could, with little difficulty, firmly establish themselves upon the Greek market.

TRADE IN ROUMANIA.

Trade conditions in Roumania, according to the *Oesterreichisch-ungarische Konsular-Korrespondez*, Vienna, are very satisfactory, the sale of manufactured articles and linen having considerably increased. Among the articles most in demand are cheap garments for the peasantry, tourist shirts in cotton and wool, ties and hosiery of every description. About three-fourths of the hard felt hats are imported from Great Britain. For those in soft felt, Italy appears to head the list of importing countries.

HARBOUR WORKS IN TURKEY.

The Turkish Government is understood to be turning its attention to the improvement of a number of ports and the opening of several new ones. Beyond the surveying of the Turkish ports of Samsun and Trebizonde being conducted, as we have had occasion to point out previously, by the National Bank of Turkey, it is intended to construct on the Black Sea ports at Heraclea and Ineboli. On the Ægean Sea a large harbour will be built at Dedeagatch, the plans of which are in the hands of the Council of State; also a small port at Cavalla. The enlarging of the port of Salonika is also in order to meet its ever-increasing commerce. "Two ports on the Adriatic Sea are also projected," says the *Journal of Commerce*, "but their positions have not yet been fixed upon; also two ports on the Syrian coast, to be chosen from either Jaffa, Haifa, or Tripoli." To the above we can add that Jaffa will be the first Syrian port to come under consideration, Haifa and Tripoli following at a later date.

PRISONS IN BULGARIA.

The *Zentral-Anzeiger fuer des oeffentliche Lieferungswesen*, Vienna, states that the Bulgarian legislative authorities recently voted a sum of £104,000 for the purpose of erecting prisons at Rustchuk, Varna, Plevna, Stara Zagora, Vratza, and Küstendil. The erection of those buildings will be begun next year, and it is expected that they will be completed in 1917.

TENDERS INVITED.

EGYPT.

Corrugated Iron Roof.—Tenders invited by the Administration of Ports and Lights for the re-roofing of a store with corrugated iron. Specification (P.T. 20) from the Secretariat. Deposit, £E50. Date, July 1 (noon).

Supply of Brass Condenser Tubes.—Tenders, in sealed envelopes, will be received at the office of the Director, Coast Guard Stores, Arsenal, Alexandria, for the supply of brass condenser tubes. Specification at the said office. All tenders must be submitted on stamped paper, addressed to the Director, Coast Guard Stores, Arsenal, Alexandria, and marked on the envelope "Tender for the supply of brass condenser tubes." Provisional deposit as indicated in the conditions of tender. Date, June 5 (noon).

Supply of Quarry Leather.—Tenders invited at Financial Secretary's office for the supply of 1,700 okes of quarry leather (plus 25 per cent. of this quantity if required) to Citadel Stores, Cairo, for War Office. Date, May 27 (11 a.m.).

Tenders for the Covering of Roofs.—Tenders invited at the Prisons Department, Cairo, for the covering of certain roofs at the Reformatory, Tanta and Delta Barrage prisons, with bituminous waterproof sheeting. Conditions at the drawing office of the department. Tenders (on stamped paper of 30 milliemes) to be addressed to the Inspector-General of Prisons, Cairo, and marked in left hand corner, "Tender for the covering of roofs." Date, May 20 (noon).

Water and Electric Light Works.—The Municipalities and Local Commissions Department of the Ministry of the Interior invites tenders for the supply and fixing of materials, etc., requisite for the installation of a water supply and lighting of Belbeis:—(1) Buildings for electricity station and for water works; (2) steel reservoir on steel frame; (3) electric motors, pumps, pipes, etc.; (4) pipes and fittings. Specifications, etc., price P.T. 50, from the offices of the Ministry of the Interior (Municipal and Local Commissions Department). Tenders (on stamped paper of P.T.3) to the director of said department. 2 per cent. deposit. Date, May 27 (noon).

GREECE.

Supply of Tents.—Tenders invited for the supply of 10,000 small tents, in two lots of 5,000 each. Deposit of £80 required for each lot. Apply, Ministère de la Guerre (Section du Matériel), Athens. Date, June 5 (10 a.m.).

Supply of Haversacks.—Tenders invited for the supply of 20.000 haversacks, in two lots of 10,000 each. Deposit of £40 for each lot. Apply as above. Date, June 3 (10 a.m.).

Supply of Cotton Cloth.—Tenders invited for the supply of 100,000 metres of cotton cloth for linings, in ten lots of 10,000 metres each. Deposit of £8 for each lot. Apply as above. Date, June 7 (10 a.m.).

Supply of Uniform Cloth, Khaki, etc.—Tenders invited for the supply of 97,200 metres of uniform cloth, khaki, etc., in eleven lots. Deposit of £40 for each lot. Apply as above. Date, June 12 (10 a.m.).

ROUMANIA.

Supply of Coal.—Tenders invited at the Ministry of Public Works, Bucharest, for the supply of 2,500 tons of coal. Date, May 15.

CYPRUS.

Mail Steamship Service.—Tenders are invited by the Government of Cyprus for a weekly mail steamship service between Cyprus and Egypt during a period of not less than three years from October 15, 1912. Tenders will be received by the Chief Secretary to the Government, Cyprus. Date, July 1.

OPEN-AIR SANATORIA.

The *Zentral-Anzeiger fuer des oeffentliche Lieferungswesen*, Vienna, states that Mr. S. Haimovichi, of Bucharest, has formed a company, with a capital of £152,000, to be increased to £200,000, for the purpose of constructing and working two open-air sanatoria in a place called Cury-Yalova, which can be reached in two hours from Constantinople.

Engineering Notes.

ATHENS WATERWORKS.

The English and German Schemes.

The question of the water supply of Athens has become very interesting owing to the difference of opinion between eminent English and German engineers. As we have stated in recent issues of THE NEAR EAST three schemes had been submitted to the Greek Government: one by an English syndicate proposing that the spring waters of the Lake Stymphalia should be brought into Athens by gravitation through steel pipes, a distance of 87.95 miles; the second by the National Bank of Greece, based on a survey made by Dr. Kitschener, a Vienna engineer, proposing that the same spring waters be brought into Athens through an open conduit; and the third proposing the sources of the Melas river and open conduits. The municipal authorities of Athens—being directly concerned in the matter—thought it advisable to ask expert opinion, and selected Herr Herzberg, an eminent Berlin engineer, to act as referee.

German Engineer's Opinion.

Herr Herzberg, after investigating the question on the spot, made a report which, while condemning, yet also praises the English scheme. "I cannot refuse," he says, "my appreciation of the English project as it purports to make possible the supply of water to Athens by pipes under pressure without pumps, but only by the difference of elevation at which the sources are situated, and this, undoubtedly, is a great advantage over the other schemes." Herr Herzberg adds, however, that he "would not have the courage to affirm that such a conduit of steel pipes would remain intact and safe for 100 years." He thinks that "rusting would take place and go through the steel, then the exterior cover of cement would not be sufficient to prevent the exit of water."

"Undoubtedly," Herr Herzberg says, "a built conduit, well constructed, presents for continuous resistance after whole centuries greater safety than steel pipes. *I know of no waterworks of any town where steel pipes are used for a length of 140 kilometres.* I would not therefore recommend to the municipal authorities of Athens that Athens should be the *first town* to construct such works, as it is a question which will cost (as verbally was communicated to me) a sum of £300,000. I wish, however, to emphasise that the position and combination of the reservoir in the towns of Athens and Piræus as proposed by the English scheme seems to me *particularly clever*." Herr Herzberg thinks also that the source of Kyonia in Stymphalia, whence the English Syndicate proposes to take the water, cannot yield the needed quantity for the supply of Athens.

English Engineer's Opinion.

Sir Alexander Binnie, past president Inst.C.E., and for some years engineer-in-chief to the London County Council, to whom this English scheme was submitted five or six years ago, after a very careful examination of same, has stated that "the source of supply is undoubtedly of the best possible character. 1. It is spring water of such purity as to render filtration totally unnecessary. 2. Its volume appears to be such as to enable a gravitation supply to be afforded throughout both Athens and Piræus without the necessity of the introduction of steam pumping, with its consequent annual expense and possibility of breakdown. This latter point cannot be valued too lightly when the distance of Athens from a coal-field is taken into account. "I notice," Sir Alexander Binnie added, "that in the first instance you propose to deal with the Kyonia spring only; but I agree with you that it would be wise to acquire the right at any time to purchase all the springs in the same neighbourhood at Dousia, Kastainia, and Buzi."

Advantages of Steel Pipes.

And now for the use of steel pipes. Sir Alexander Binnie said: "The mode of conducting the water into Athens and the Piræus by means of steel pipes with Ferguson lock-bar joints, with the necessary break pressure tanks, I think, the *best* that can be adopted *It is a system which has been fully tried over a length of* 250 *miles at Coolgarlie, in South Australia, which, after some years' experience, has given the utmost satisfaction.*" Sir Alexander added that "with this experience of water works construction of over 40 years, he is certain that the scheme is a sound one, well thought out, and one that presents all the features of a successful future." Yet six years after this report of the eminent English engineer, Herr Herzberg admits that no waterworks of any town is known to him, "either by experience or by literature," made from steel pipes, and having a length of 140 kilometres! It is probable that Herr Herzberg has not heard of the 250 miles at Coolgarlie, or of other waterworks in England, where steel pipes have been used; but there are some on the Continent, and some, we are told, in Germany.

A Special Interview.

Owing to the interest that this question of the Athens water supply is creating, we called upon Sir Alexander Binnie. He was much surprised to hear of the opinion that Herr Herzberg expressed in his report. He told us that for many years and at various times he has been asked and has given his opinion of the water supply of Athens; and certainly he thinks that the scheme of the English syndicate is the best. "At the present time," Sir Alexander said, "I am constructing the waterworks for Birkenhead, bringing the water from a distance of 47 miles through cast-iron pipes, and where there is pressure I am using steel pipes." The mode of conducting the water into Athens by open conduit Sir Alexander thinks quite unsuitable.

Another Referee.

The municipal authorities of Athens are satisfied with the German engineer's expert opinion; and now the Government, on their part, have submitted the same schemes to another referee, whom they selected in the person of Dr. Kitschener, the Austrian engineer, who made the survey and suggested the scheme proposed by the National Bank of Greece! It is not expected that he will express an opinion against his own scheme In the meantime, if the municipal authorities of Athens follow Herr Herzberg's advice, they will support the scheme of bringing the water from the river Melas by open conduit. This river, deriving its name from the colour of its waters (black river), issues from two caves, or Katavothras, and flows into the Copais lake. It is close to the ancient Orchomenus and 90 kilometres, in a straight line, from Athens. This river is 96 metres above sea level, or about the same level as the ground on which the Royal palace stands. We do not know what line the conduit follows in the scheme; but, considering that between the river and Athens there are two mountains, Cetheron and Parnis, the whole length of the conduit could not be less than 120 kilometres, with a good number of tunnels and aqueducts. As to quality of water, the Melas river cannot be compared with the pure mountain spring waters of Stymphalia. All modern towns that are near rivers are anxious to get their supply of pure water from springs in the mountains, except, perhaps, Marseilles, which, being under special disadvantages, spent nearly three million pounds for an ample but cloudy supply of water. An eminent French hydraulic engineer, referring in one of his books to the waterworks at Marseilles, says: "En un mot la grand ville de Marseille est a la fois dotée du plus beau canal et de la plus vilaine eau qui existent." Let us hope that Athens, after all this trouble about its water, will be luckier than Marseilles.

Produce Markets.

LONDON, May 9.

A moderate amount of activity has been displayed in the markets during this week. Sugar is lower. Coffee steady. Currants firm. Sultanas dearer. Linseed about steady. Oils a little dearer. Petroleum oil lower.

Sugar.

Beet sugar is 1d. lower; Refined 3d. to 9d. per cwt. The market is quiet anticipating events. Much has been made of the dry weather of late, but conditions on the Continent have been very favourable for field work; the sowings are almost finished. The comparative steadiness of the beet market is due chiefly to the dry weather prevailing. Of course, if the dry weather continues the outlook will become serious, for warm rains are needed.

Closing rates of Beet sugar, 88 per cent. :— May, 13s. 6¾d.; June, 13s. 7d.; July, 13s. 8d.; August, 13s. 8¾d.; September, 13s. 2¼d. October-December, 11s. 6¼d. f.o.b. Hamburg.

Refined.—English, Tate's No. 1 cubes, spot, at 23s. 6d.; May-August, 23s. 6d.; September-October, 22s. 9d. French, Say's cubes, May, 20s. 4½d.; December-January, 17s. 10½d. f.o.b. Paris. Dutch cubes, May, 19s. 3d. f.o.b. Amsterdam. German and Austrian cubes, 19s. 3d. f.o.b. Hamburg.

Coffee.

There is an improved demand, with steady prices. East Indian, small to mid., 76s. to 82s.; good mid. to bold, 85s. to 90s. Mocha, 80s. to 85s. Costa Rica, low to ordinary, 76s. to 80s. Other Central American sorts, low to fine ordinary, 73s. to 76s. Mexican, 77s. to 88s. Brazil, 68s. to 86s.

Currants.

The market is firm, with bags, Provincial kind, offering 26s. 9d. to 27s.; also quarter cases at 27s. 3d. to 27s. 6d. Gulf and Patras have been sold at 28s. 6d. to 30s., and Vostizza, 31s. 6d. to 34s. Siftings, in request, at 23s. 6d. to 29s.

Sultanas.

There is a good demand, and Smyrna fruit is dearer, boxes of darkish fruit offering 43s. to 44s., and fine 53s. to 55s. Choice are dearer at 65s. to 67s. Greeks are unchanged at 60s. to 65s. Large business has been done in Persian fruit at 42s. to 44s.; also bags, Samarkand, 43s. to 45s.

Figs.

Prices are unaltered, but the tendency is higher values for bags, Naturals.

Dates.

Tafilat, 28s. to 40s.: Persian Sish, 12s. to 13s.; Khadrowie, 17s. 6d.; Hallowie, 18s. 6d.; Egyptian, none.

Seeds.

Linseed, Calcutta, per 410 lbs., 68s. to 69s.; Cotton Seed, per ton, Egyptian, £9 2s. 6d.; Bombay, £7 5s. Canary Seed remains quiet.

Oils.

Linseed Oil, £39 10s. to £39s. 15s. Cotton oil, refined pale, £28 5s. to £28 10s. Olive oil, Spanish, £44; Levant. £42. Petroleum oil, Russian, 8½d. to 8¾d. per 8½ lbs.; Roumanian or Galician, 8d. per 8½ lbs.

Oil Cakes.

Linseed oilcakes, London made, per ton, £10 to £10 5s.; Russian, £10. Cotton, Egyptian, £5 10s. to £5 12s. 6d. Decorticated, £7 17s. 6d. to £8.

Gum.

Animi, Zanzibar, washed, £12 to £16; bean and pea, £3 10s. to £9 10s. Benjamin Siam £7 to £35. Arabic, East India, £1 13s. to £2 5s.; Gamboge, £1 12s. to £13. Kowrie, common, 50s. to 72s.; Scraped, 95s. to 245s.; selected, 275s. to 340s. Olibanum, drop, 35s. to 50s.

for sale of produce from
GREECE, TURKEY, PERSIA, and EGYPT.
Cable Address: EMBROS, HAMBURG.

NEAR EAST MARKETS.

Special Weekly Reports.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Mitylene. April 20.

During the past week 466 barrels of oil, valued at £T2,800, and 373 sacks of soap, at £T750, were exported.

The importers of cotton goods (T cloths, shirtings, cabots, and prints) and cloths have a normally replenished stock and expect to do a good trade after harvest-time, that is, during the coming summer.

April 27.

Complete stagnation of the market exists here as a result of recent happenings.

There is no exportation whatsoever.

Baghdad. April 18.

All commercial relations with Persia have been interrupted. The Constitutionals are recruiting soldiers to fight Salar-ed-Dowla.

Merchants at Hamadan have profited by reduced stocks and sold their merchandise at a profit of 15 to 20 per cent.

In Baghdad, on the other hand, the arrivals of goods with destination to Persia have obliged them to leave their merchandise in the Customs houses.

Lack of rain in the neighbourhood has compromised the barley crop, and now threatens that of wheat.

Basrah. April 12.

There is a decided improvement in the market, especially in colonial produce. Imports of cotton goods do not, however, come up to general expectations.

The tendency of the market is towards a rise in the price of cereals. 10,000 to 11,000 tons of cereals were bought during the last fortnight at £T9½ the togar of wheat, £T7⅛ that of paddy, and £T7¼ that of barley.

12,000 to 13,000 tons of cereals were shipped to London during the same period.

Weather conditions are favourable to the crops.

Smyrna. Received May 9.

Good crop reports have brought the opium prices down 35 per cent. since last week. 57 couffes at PT160 the cheki have been sold. 1,157 couffes have been received as against 458 couffes for the same period last year.

Crop news are favourable, excepting from a few restricted regions where locusts have appeared in great quantities.

The season for the important purchases of Manchester winter goods is in full swing. Unfortunately, in spite of the considerable stocks, the sales do not come up to one-half of those effectuated last year at the same time.

Jaffa. April 28.

The prices of wheat and sesame are rising, the latter owing to the diminishing stocks. Otherwise, there are no new features to be reported.

Mersina. April 20.

The demand from Turkey in Europe, Bulgaria, and Asia Minor ports for cotton goods is noticeable.

Constantinople. April 27.

Wheat has been steady with a tendency to rise. The bakers have demanded to be allowed to increase the price of bread 5 paras per kilo.

The high sugar prices have suffered a drop owing to the rumour that the Dardanelles were to be re-opened.

OPIUM MARKET.

Messrs. Barker Bros., Smyrna, report as follows for the week ending April 26, 1912:— Only 3 cases of common current qualities changed hands this week at 17s. to 18s., c.i.f., as to quality. We have had very abnormal cold weather, and in the high lands rain is much needed for the poppy plantations. Our holders continue to maintain a very firm position, and we do not think to-day anything under 20s. will tempt them to part with any of their stocks of extra selected Carahissar. The idea now prevalent regarding the crop is that we shall scarcely have an outturn of over 6,000 cases, including Salonika. The arrivals to date amount to 1,164 cases, against 4,491 at corresponding period last year.

PERSIAN AND TURKISH PRODUCE.

Monthly Report.

Ammoniacum.—Good pale free drop is worth 70s. Good pale free and blocky, 65s. to 67s. 6d. per cwt.; inferior blocky, 50s. to 55s. Stocks are very small, but sales are of a retail character.

Gum Arabic.—Insoluble Persian.—There is some inquiry, but so far little doing. Bushire sorts value 23s., Shiraz 24s. per cwt. Egyptian.—Soudan dearer on account of "bear" covering on the other side; 39s. to 40s. c.i.f. is now being asked, but buyers here do not respond yet. Good white selected is selling slowly at 47s. 6d. to 50s.

Assafœtida (Hilteet).—Low qualities up to 90s. value have been cleared. The better qualities are slow of sale.

Carpets.—Sales were small last month and demand poor, especially for medium sorts, whilst good and fine pieces are scarce and would meet a ready sale.

Colocynth.—Demand is restricted, although stocks small. Values are 4d. to 6½d., according to quality.

Galls.—Blues ex stores are quoted 49s. to 50s. and c.i.f. 47s., but there is no business. Greens 43s. c.i.f. and whites 41s. c.i.f. without buyers.

Gum Mastic.—Demand slow and stocks small. Value 2s. to 2s. 2d. per lb.

Gum Tragacanth.—Stocks increasing and larger than of late years. Values are decreasing in consequence, and buyers are holding off in anticipation of lower prices, which may come down considerably.

Ivory.—Market good, with advanced prices.

Opium.—Fine druggist is obtainable here at 23s., but soft shipping kinds are very scarce and firmly held. In Smyrna the demand has been better, but here sales are very small. For Persian there is no demand; some on the way are being offered at 22s. 6d. without finding buyers.

Scammony Roots.—No stock, and offers wanted of a few tons, for which 35s. c.i.f. might be paid.

Seeds.—Fennel, quiet and nominally worth 17s. to 20s.

Senna.—Alexandrie, good leaf in demand at 7d. to 7½d., but inferior difficult to sell. Fine pods at 8d. per lb., inferior 7d. Broken leaf slow, but siftings in demand at 2½d.

Wax.—In demand and dearer. Abyssinian and Egyptian £6 17s. 6d. to £7 2s. 6d. per cwt.

WOOL SALES.

The results of the last low wool sales in London were as follows:—

Three thousand one hundred and thirty-two bales of Baghdad wool were offered, and 2,668 were sold at steady prices. The selection, however, being balance of the clip, and mostly of poor quality, could not command full prices. New clip, clean and free from pieces, should be worth 7½d. for white per lb.

Eight hundred and sixty-six bales of Awassi and Karadi were offered, and 606 were sold, the white at 7½d. to 9½d. per lb., according to quality and condition.

Two hundred and three bales of Madras were offered and sold at steady prices. Good white fetched 5d. to 5½d. per lb., black 2½d. to 3d.

Seventy-three bales of Syrian were offered and sold at 5½d. per lb. for white (unwashed).

Two hundred and forty-six bales of Van Mohair were offered and 73 sold. The demand continues restricted, but sellers are firm.

The Colonial wool sales were concluded on the 4th inst., 253,000 bales being sold out of 273,000 bales offered. Prices were firm throughout to 5 per cent. dearer, as compared with previous sales on March 29.

Australian merino combing is unchanged, firm.

Australian merino clothing is unchanged to ¼d. dearer.

Australian crossbred combing is ¼d. dearer.

Australian crossbred clothing is unchanged to ¼d. dearer.

His Majesty the King of Greece has honoured an English firm—Messrs. Lever Brothers, Limited—with a Royal warrant of appointment as soapmakers to His Hellenic Majesty.

NEAR EASTERN CROPS.

(From Our Own Correspondent.)

Smyrna. May 1.

Sultanas.—The production of last season, it is now ascertained, has amounted to about 24,000 tons. The entire quantity has been exported, and no stock is now left in the country. The season, on the whole, has proved unprofitable for exporters who were heavily caught in their forward commitments.

The outlook for the coming summer is, on the whole, more favourable. The vines, favoured by the mild weather in the earlier part of the year, blossomed under satisfactory conditions and developed a splendid show of fruit. The weather the past three weeks, however, has been very unsettled, heavy falls of rain have been followed by sharp falls in the temperature, and on two occasions during the past fortnight frost was recorded. Considerable damage was caused in all districts, and it is now beyond doubt that on the average 25 per cent. of the fruit has been killed. The first estimates of the production, which stood at about 40,000 tons, have been successively reduced, and the present forecast is about 30,000 to 33,000 tons.

Figs.—The prospects for the coming season are favourable. Last year's production returned 93,000 loads, and the estimate for the coming summer is about 110 to 115,000 loads.

Grain Crops.—The outlook for all cereal and grain crops has been vastly improved by the continuous rains which fell throughout the past month. The weather is still overcast and further showers are likely. Reports from all districts are favourable.

Olive Oil.—The yield this past winter is proving exceptionally good, both as regards quality and quantity. The total quantity likely to be obtained as soon as milling operations are over, is estimated at about 60,000 to 65,000 tons, practically double last year's result. Home consumption is absorbing unprecedentedly large quantities of the liquid, and large shipments are being made to Syria, to the Black Sea, and to other neighbouring markets.

The prospects for next winter are very unfavourable, and it is believed that there will be practically no crop of olives to reckon with. This is now stimulating speculative demand, and efforts will be made to carry as much stock as possible into next year.

Bulgaria.

The French Vice-Consul at Rustchuk states that the prospects for all cereals—corn, barley, oats, rye, and colza—are very good in Northern Bulgaria. The autumn sowings, in general, look very well, and a very abundant harvest, like that of last year, is anticipated if the climatic conditions remain favourable. The sowing of maize has already commenced, and this is one of the most important crops in the region. There is only very little of last year's stock available for sale. Maize was sold during the opening of the Danube season. The various cereals of the Danube season were disposed of at the following prices: Corn, 19.50 frs.; rye, 16 frs.; maize, 14.50 frs. per 100 kilogs. As regards barley and oats, there was no export of these products, the stocks being almost exhausted.

EGYPTIAN COTTON MARKET.

Messrs. Reynolds and Gibson telegraph that cotton rules the situation. The extreme fluctuations create a nervous feeling, and the confidence displayed in a higher level of values is not sufficient to bring into the market speculative buyers prepared to add to their already expansive commitments. As has often been stated, the trade as a whole can well withstand a few weeks' quietude, but margins soon slip away when the ball is not kept rolling. The Board of Trade returns, although behind those of last month, make a satisfactory showing, and the distribution for May will again be large. Cloth.—Manufacturers who can give reasonable delivery find no lack of buyers, but the looms are mostly engaged for months ahead. Egyptian spinnings are slow to improve.

Shipping Intelligence.

THE LOSS OF THE "TEXAS."

[From Our Own Correspondent.]

Smyrna, April 30.

Yesterday, at about 6.20 p.m., took place one of the worst disasters in the history of Smyrna. The steamer "Texas," of the American Archipelago Steamship Company, formerly the Hadji Daoud Ottoman Steamship Company, left Smyrna at 5.30 p.m. for Mitylene, Salonika, and Dedeagatch. The mine-strewn passage at the castle guarding the Bay is usually navigated by two or three Ottoman pilot boats, but yesterday only one appears to have been working. On the approach of the "Texas" near the castle the pilot boat was showing the way to the "Montana," another steamer of the same company. According to the regulations, the "Texas" should have awaited the return of the pilot boat and then in its turn have been piloted out of the zone of mines. Unfortunately, the captain considered that it was safe enough to follow at some distance in what he thought was the proper track. What actually then took place has not yet been cleared up. The result, however, was, unfortunately, too clear. A terrible explosion took place, and the ship was blown to pieces, only some sixty persons being picked up alive, out of a total of about one hundred and fifty passengers and crew.

The official report of the authorities states that the "Texas" arrived at the fort twenty minutes after the "Montana," and continued on its way without paying any attention to the signals of the pilot boat. The captain of the latter, seeing the danger the "Texas" was running, signalled to the fort to fire the regulation number of shots. A blank shot was accordingly fired, followed by another half-a-minute later, and then by five shots with ball. On the seventh shot the "Texas" stopped, but then renewed its way ahead for a few yards, when the explosion took place. The defence mines are placed so as to leave a narrow open channel in zig-zag fashion, allowing only one ship to pass at a time, and the "Texas" probably ran on a mine forming one of the elbows of the track. The version of the steamship company is considerably different, and avers that the "Texas" was only 200 yards behind the "Montana," and that it had traversed three-quarters of the track when two blank shots were fired from the batteries at St. George's, followed by shots with ball. This order to stop was obeyed at once, but the impetus of the ship carried it a short distance after the engines had ceased to work. It was then that a shot from the batteries struck the "Texas" nearly amidships, and caused the fatal explosion.

The captain was badly wounded, and was removed to the Greek Hospital, but many of the other officers and members of the crew were killed. It is hoped that the hull of the ship is sufficiently intact to permit of an examination with a view to establishing the real cause of the explosion.

Referring to the sinking of the "Texas," the Greek Consul at Smyrna reports that the captain of a Messageries steamer is said to have stated that he would resign rather than take his ship to Smyrna.

The *Messager d'Athens* learns that the Turkish authorities refused to allow the American Consul to approach the scene of the disaster, and to have the wreck of the "Texas" examined by divers.

A semi-official (?) denial is given to the report that the captain of the "Texas" stated before the disaster that he wished to ascertain whether mines had really been placed in the Gulf of Smyrna. It is added that the American Government will insist on a thorough examination of the lost vessel by divers.

KHEDIVIAL STEAMER CAPTURED.

According to a telegram from Salonika, the steamer "Thasar," of the Khedivial Company, has been seized by the Italians off the island of Rhodes.

BRAILA NOTES.

The Dardanelles Trouble.

(From Our Own Correspondent.)

Braila, May 3.

Owing to the closing of the Dardanelles business has been practically at a standstill; only yesterday morning, on receipt of the news that the Turkish Government have decided upon the immediate reopening of the Straits, have shippers shown any inclination to engage tonnage. A certain amount of cargo has accumulated during the past fortnight, and there was a fair inquiry, but steamers could not take full advantage of it, as they are all anxious to complete loading and sail as soon as possible. A report reached here that the Dardanelles would only be reopened for a few days to allow loaded steamers to pass, and although this is not probable, steamers did not want to take any risks after their recent experience. The rates paid were 13s. 6d. for either Antwerp or Rotterdam, but to-day there is already a better feeling, and 6d. more is obtainable. There is no anxiety to charter fresh tonnage in London until more reliable news is to hand regarding Turkey's and Italy's intentions; for the present charterers are doing their utmost to complete the loading of steamers at present in port.

Owners and Charterers.

A certain amount of litigation is anticipated between steamship owners and charterers as to whether the time during which the Dardanelles were closed are to count as lay days or not. Blockade is one of the exceptions provided for in charter parties and berth contracts, yet Braila was not blockaded, nor were the Dardanelles blockaded by an enemy, but simply closed to navigation by Turkey herself. In reality, however, all the Black Sea ports had their communications by sea with the rest of the world just as effectively cut off as if surrounded and blockaded by an enemy. No shipper would risk loading a maize cargo with the possibility of an indefinite detention at Constantinople, and the withdrawal of grain credits by the banks made business extremely difficult. Shipping contracts provide for arbitration in case of dispute, but we suppose the point will ultimately be decided by the courts, as it appears too delicate for an ordinary commercial arbitrator to solve, and is, furthermore, without precedent.

NEW ODESSA-LONDON-HULL LINE.

(From Our Own Correspondents.)

Odessa, May 5.

The project for the establishment of a regular line of steamers between Odessa and Nicolaieff and Hull and London was yesterday formally authorised by the Ministry of Trade and Industry, and four steamers will be forthwith placed on the new international route. As previously stated, in these columns, the *raison d'être* of this new steamship departure is primarily the export of Russian sugar to the United Kingdom. The liners are each subsidised with 50,000 roubles per annum for a period of five years, the trips must not occupy more than fourteen days, and the liners must have passenger accommodation.

Austria and the Dardanelles.

A correspondent, writing to the *Leicester Mail*, from Constantinople, says:—"The Austrian ships held up here have received orders to proceed direct to Fiume, irrespective of their chartered destination, as soon as the Straits are opened. Nearly all the Austrian mercantile marine are subsidised, and can be used for war purposes, the ships being painted grey, like the fleet.

Near East Oil Notes.

Proposed Roumanian Publicity Department.

M. Alexandre Stefanesco, a well-known oil-producer from Campina, has written a long letter to the president of the Union of Roumanian Oil Producers, in which he describes in very lively style his visit abroad. The object of his letter is to urge upon the Union of Producers the formation of a publicity department. As M. Stefanesco very properly points out, no one knows anything about Roumania or its oil. Indeed, as he says, some people mix up Bucharest with Boukhara, and other people think that the capital of Roumania is in Roumelia, and many people do not know whether it is in Bulgaria or Turkey. M. Stefanesco said that one banker in Paris asked him if he had come via San Francisco or New York! As an oil country, even in Holland, Roumania, according to M. Stefanesco, appears to be very little known, and he relates how he tried to interest the capitalists of Amsterdam in an oil proposition in Moreni. But these gentlemen replied that it did not please them as Moreni was worked out! And this reply was given by a banker who was declared to be the only person in Amsterdam who thoroughly understood Roumanian oil! The result of M. Stefanesco's tour was to leave on his mind the feeling that something must be done to advertise Roumania in all the important financial centres. The idea is to subscribe 20,000 francs and open offices where every detail in connection with Roumanian oil can be studied. These offices will be run in connection with the Union, and they should also be offices where business in oil can be done, and each office should get a commission of 12 per cent. on whatever business is arranged. In this way the offices might be self-supporting. There is no doubt that this is a very good idea, and it is a great pity that it has not been carried out before. What M. Stefanesco says is perfectly true. The writer of these lines has been on various occasions through the Roumanian oildfields, and also through those of Galicia, but he is often quite unable to obtain any information with regard to the oil fields of either country. Promoters and financiers are continually asking him whether he knows the production of a certain district, or whether he knows who certain wells belong to, and although he prides himself upon knowing more about the oil regions of the Near East than most journalists, he is continually at a loss for a reply to these questions. If Roumania desires the participation in her schemes of British and Continental financiers, she should arrange all the publicity possible. THE NEAR EAST would gladly open an information bureau if the Union of Oil Producers would send them the necessary documents. Pictures of oil wells, a careful geological survey of the country, complete figures as to production of the different districts, are absolutely necessary. The latest information as to the production of various wells is also of importance. There are a hundred and one things that the investor in Roumanian oil desires to know, none of which can be obtained in London. Ploesti, Bustenari, Moreni, Campani, and all the other oil regions of Roumania are mere names to the British public. We, therefore, heartily support the efforts of M. Stefanesco, and we sincerely hope that he will be successful in his attempt to start a publicity bureau.

Standard and Shell—Peace.

It is generally understood that the fight between the Standard and the Shell has come to an end. It is known that the Shell had begun to sell benzine in the United States, and was backing some important companies in California. Now it is stated that the Standard have registered a company with a capital of twenty-five million florins, of which the two managing directors are both Standard oil men. Mr. Westerman, president of the Rotterdam Bank, is on the board. The Dutch Colonial Petroleum Company has obtained important concessions, and it is understood that as a member of the board of the Handels Maatschappy is on the board of the new company, this means that the war is at an end, and the two huge combinations will work in unison. The registration of this company is probably a definite assurance that the fighting has been finished. This will be interesting news to our readers in the Near East, for, although the Standard Oil did not do much business in Russia, it was very strong in both Roumania and Galicia, and has been a constant source of trouble to the oil producers and the Governments of those countries.

Moreni Pipeline and Transport.

The Moreni Pipeline and Transport held their statutory meeting on the 6th, and the chairman stated that practically one-third of the line from Ploesti to Moreni had been finished, and the company was busy connecting up all the refineries to the Ploesti depôt. This work is probably now finished, and the pipeline itself should be ready for work some time in June. Many thousands of tons of oil have been lost at Moreni for want of pipeline capacity and transportation. Mr. Rutherford declared that his company would be tapping the largest oil area in Roumania, and Mr. Barnett, who is also well known as an oil man, said that the pipeline would serve the two most interesting oilfields of Roumania—those of Moreni and Filipest de Padure.

Oil Trust of Galicia—Improved Prospects.

The Oil Trust of Galicia held a meeting the other day, and Mr. Alfred Hicks told the shareholders that the more they investigated into the late management the worse it was found to have been. Two thousand pounds a year were paid for office accommodation, and the company's accountants reported that Mr. Maisel and the Johanna Syndicate owed the company approximately over £100,000. The company's solicitors have now taken an action against Mr. Maisel for the return of certain shares. Amalgamation is talked about. The reconstruction appears to have gone through satisfactorily, and the position of the Oil Trust of Galicia is better than it has been at any other time in its most unfortunate existence.

The Ural Caspian Lands.

We have kept our readers well informed with regard to the position of the Ural Caspian, and we have no hesitation in saying that we think this will eventually become one of the most important oil companies of the Near East. But we cannot follow a well-known stockbroker's circular, in which it is argued that, as the company owns 2,133,120 acres, therefore the shares are worth £21 6s. 8d. each, taking the value of the land at £5 an acre. The market values the property to-day at about 15s. an acre. It must be understood that proved oil land is, of course, worth a very large sum per acre. Spies land at Grosny, for instance, is worth about £2,000 an acre, and good land in Baku is, of course, equally valuable. But a great deal of the Ural Caspian property has no oil upon it at all. There are two parallel oil belts in the territory, and no doubt those belts are worth a great deal more than £5 an acre, and when completely prospected will probably prove large enough for many of the companies. Nobels are drilling in Ural Caspian land, and their gusher at Doss Sor will yield a royalty to the Ural Caspian. The well No. 2 at Makat, which was alluded to in a cable issued the other day, is at the extreme end of one of the oil belts which run between Eskine and Makat, a distance of nearly sixty miles. Doss Sor lies about midway between these two places. The oil wells at both Eskine and Makat are shallow wells, whilst the wells at Doss Sor would appear to have struck a different horizon, and certainly one that is much more prolific. Whether the same horizon will be found throughout the whole of the belt cannot at present be known. No doubt the Ural Caspian will deepen its No. 2 well and hope to obtain as good results as have been obtained at Doss Sor.

Premier Oil and Pipeline.

The Premier Oil and Pipeline Company has about 80 acres at Tustanowici, 1,200 acres at Jasienca, and 3,000 acres in Perehinsko, with the rights of selection over a further 80,000 acres. It owns 16 producing wells, and is drilling 16 further wells. The wells are now producing 14,000 tons of oil a month, and, at the price now being paid by the Union of Crude Oil Producers, the company is making a profit of about £1 per ton. In 1910 the Premier Oil and Pipeline Company paid 10 per cent. on its capital of £953,000, and in 1911 it paid three quarterly dividends at the rate of 10 per cent. on August 15, November 15, and February 15, 1912, whilst in a circular, dated the 16th ult., the directors declared another interim dividend at the rate of 10 per cent., payable on May 15. The financial year will not be closed until June 30, in consequence of the properties taken over from the Triumph Oil and Transport Company not having been working for the benefit of the Premier until June last year. The company appears to have some very valuable land at Perehinsko. In its No. 1 well oil of very fine quality has been pumped, and this oil is stated to be worth nearly double as much as Boryslaw oil.

OIL OUTPUTS.

Anglo-Roumanian Petroleum.—Production (the week ended 4th inst.), 238 tons.

Bana Moreni.—Week ended 4th inst. : Well No. 12, total depth 840 ft.

Roumanian Consolidated.—Boring report (week ended 4th inst.) : Campina—Well No. 1, total depth 731 ft.; well No. 2, total depth 650 ft. Chiciura—Well No. 1, total depth 744 ft. Toncesti—Well No. 1, total depth 312 ft. Aggregate drilled during week, 138 ft.

Moreni (Roumania).—Week ended 4th inst. : Moreni—Well No. 5, total depth 869 ft.; well No. 6, total depth 889 ft.; production for week, 500 tons; well No. 7, total depth 456 ft. Filipesti de Padure—Well No. 1, total depth 197 ft. Aggregate drilled during week, 165 ft. Total production to date, 6,283 tons. Delivered to purchasers, 5,812 tons.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912).

SETTLING DAYS.

CONSOLS.
Monday, June 3.

STOCKS AND SHARES.

In Mining Shares the next carry-over is May 28.

Continuation Days.	Ticket Days.	Pay Days.
Mon., May 13.	Tues., May 14.	Wed., May 15.
Wed. May 29.	Thurs., May 30.	Fri., May 31.

LONDON, May 9.

The settlement in mines begins to-day, and as the whole of the nineteen-day account has been devoted to liquidation, new business will be upon much sounder basis. The Stock Exchange remains confident, for the investment demand has been steady, and the only shares that have fallen have been those carried for speculators. It would, perhaps, be too sanguine to expect much of a rise during the next fortnight, but we anticipate good markets throughout June.

Money Easier.

Money should gradually become easier, and, as a consequence, gilt-edged stocks should improve in value. The banks are pulled in two opposite directions. On the one hand they desire dear money in order to increase their profits; on the other hand they hope for a rise in all gilt-edged securities, as they would then increase their secret reserves and strengthen their financial position. But they cannot have it both ways.

The Foreign Market.

It must be admitted that the Foreign Market in London does not hold the position it should, considering that London is the only free-money market in the world. The dealers have hardly paid expenses during the past month. Bulgarians remain steady at 89½. The market in this security is confined almost exclusively to Paris. On the 15th the fate of China will be decided in London. In the meantime the banks hold up all quotations in the firm belief that China will come to her senses and agree to all the terms of the Six Powers. Egyptian Unified look cheap, for they are now quoted ex coupon. Greek Fours remain dull at 54½. The fall during the account is therefore ¾. But it must be remembered that this time last year the bonds stood at 51¼. Hungarian 4 per cent. Rentes at 91½ show practically no change, although there is talk of the Credit Lyonnais making a loan of 100,000,000 crowns to the City of Budapest. Italians are now 93. Some bold speculators have probably been selling short, and as the Government persists in supporting its own securities, the bear account tends to keep the price of this bond firm, much firmer than it should be, considering the slow progress made by Italy in her fight with Turkey. Turkish Unified, which made up at 88¼, have been done as high as 89½ on the assertion that the Imperial Ottoman Bank had arranged to issue a loan of ten millions. It is now understood that this well-known bank has not formally concluded arrangements for issuing the loan, but has merely taken an option, and in the meantime is temporarily financing Turkey on the basis of Treasury bills. As we have pointed out on many previous occasions, the financiers in London and on the Continent would appear to have a better opinion of Turkey than they have of Italy, for whilst Italians were quoted 102 this time last year and have fallen 10 points, Turkish were quoted 92 a year ago and have, therefore, only fallen 2½ points. Sentiment appears to exercise a good deal more influence on finance than is generally supposed.

Miscellaneous.

The Home Railway market remains flat. The depression is partly due to a fear of further labour troubles and partly to the stale bulls, who are always trying to extricate themselves. There has been a genuine shake-out in Yankees, due partly to the Government crop report and partly to the atrociously bad Steel figures. The market looks like recovering itself under the lead of copper shares. Rubber shares, in spite of the energy displayed by certain brokers, remain unfashionable, and the same may be said of Kaffirs and Rhodesians, in which there has been no business of any moment.

Oils Steady.

There has been a steady business in oil shares, which have kept strong. It has now been definitely shown that the Shell and the Standard have come to terms, and although there is a big bull account in Shells, there is still good buying. Urals, after having sagged a little, firmed up on news of further wells having been brought into production. The dividend on Maikop Victorys was liked, and a further 1s. 6d. a share distribution is talked about.

The Egyptian Market.

Some of the dealers in the Egyptian market think that the market is bottomed. The failure of Messrs. B. Tilche and Sons, of Alexandria, with liabilities amounting to £520,000, was not expected. These continual failures must, of course, have a tendency to depress the Egyptian share market. We do not know exactly what securities are held by the firm, but some stock will certainly come on the market. There are still some large blocks of Salt and Sodas to be sold, and there have been sellers during the week of about a thousand New Egyptians, which, however, have been taken at the market price. Beheras have been flat. It would seem that the big trust companies, who bought the blocks disposed of in the Zervudachi liquidation, have satisfied their appetite for this security, and as there are still a few small parcels to sell, the price sticks.

Sidi Salem.

Sidi Salem has issued its report, which is distinctly satisfactory. It has at last come to terms with the Behera Company, and will in future pay the parent concern £10,000 a year. This arrangement will save the company nearly £20,000, and as another £20,000 is to be carried forward as a final payment without interest, the Sidi Salem will save no less than £4,546 in interest for 1912, £3,500 in 1913, and so on in gradually decreasing amounts. This is a very satisfactory arrangement for the Sidi Salem, and puts its debt upon a basis that should cause no further anxiety to the company, for its rents for the past year have amounted to £7,858, or an increase of £783 over last year, and no less than £1,434 over 1909. Next year's rents will show a still further increase, as all new leases show an average increase in rental of from 50 per cent. to 60 per cent. The total sales of land up to December 31 amount to 2,848 feddans, which were sold at an average price of £44 per acre, and showed a profit on the price at which the land was valued of £13,997. The company continues to develop its estates, and during the year has ploughed 2,500 feddans and levelled about 1,500 feddans. New canals and drains have been made, and the irrigation facilities have been greatly improved. On the principal canals, sakias and archimedian screws have been erected with the idea of still further improving the irrigation. Thus gradually Sidi Salem is working itself into a fine position. It owns large estates, which it is bringing into cultivation and selling and renting without difficulty. Therefore we think that at the present price of 25s. for the £4 share the market under-estimates the possibilities of Sidi Salem.

FINANCE ITEMS.

The Council of Foreign Bondholders has received from the Council of Administration of the Ottoman Public Debt at Constantinople a statement showing that the complete receipts in respect of December amounted to £T438,449 as against £T604,721.

Messrs. N. M. Rothschild and Sons announce that a drawing of Egyptian State Domain Mortgage Bonds, amounting to £159,240 nominal capital, will take place this month in accordance with the terms of the general bond of this loan.

Hussein Djahid, deputy for Constantinople and editor of the *Tanin*, has been re-elected practically unanimously as delegate on the Ottoman Bondholders' Council of the Public Debt. This result was quite expected, notwithstanding the efforts which were made in favour of other candidates.—Reuter.

NEW COMPANIES.

Fersan Islands Oil Company.

On May 2 a company under the above title was registered with a capital of £120,000 in £1 shares. The objects are stated to be to acquire, hold, deal in, work, and turn to account any petroleum or oil-bearing lands in Turkey, the Turkish Dominions, Egypt, or elsewhere, and to adopt an agreement with the Eastern Petroleum Co., Limited. The first directors are B. V. Vieira, A. H. W. Laye, and M. H. Maxwell, and the offices are at 71, Finsbury Pavement, E.C.

Oil and Drilling Trust of Roumania.

On May 2 a company under the above title was registered, with a capital of £116,250 (110,000 £1 preferred 10 per cent. participating, and 5,000 1s. deferred). The objects are stated to be to acquire lands, mines, bituminous, oil, and other properties, pipelines, reservoirs, pumping stations, refineries, distilleries, and rights in any part of the world; to sink wells, make borings, or otherwise search or prospect for, work, explore, develop, and turn to account petroleum, oil, and minerals, and to adopt an agreement with I. T. T. Lincoln. First directors (not less than three nor more than seven) to be appointed by signatories. Qualification, £200; remuneration, £20 each per annum (£300 for the chairman) and a percentage of the profits. The offices are at Finsbury Court, Finsbury Pavement, E.C.

Anglo-Anatolian Trading Co.

A private company has been registered in London under the above title, with a capital of £30,000 in £1 shares. The objects of the company are stated to be to carry on the business of merchants, manufacturers, shippers, producers, brokers, financiers, etc., and to acquire the businesses carried on at Smyrna, Adana, and Denek-Mada, all in Asia Minor, by Kerope Topalian.

New Sudan Company.

An Egyptian company has been formed, under the title of the Société Immobilière et Agricole du Soudan, having a capital of £40,000 in £4 shares, which has been subscribed by the following gentlemen in the proportions named:—Basile Thomaidis, 250; Basile Stamatopoulo, 250; Spiro Franghiscato, 100; Kyriacouli P. Mavromichali, 100; Georges Baizis, 100; Nikitas Minglis, 100; Anastase Venieris, 100. The objects of the company are stated to be "the acquisition, exploitation, and re-sale of rural properties, as well as general undertakings, in Egypt as well as the Sudan. The company may undertake generally any industries which might contribute to the objects of the company."

An Egyptian Promotion.

Under the auspices of the Crédit Hypothécaire, Agricole et Urbain d'Egypte, there has been formed at Brussels a company styled the Crédit Foncier du Canada. The capital of the company is two million francs, divided into 4,000 ordinary shares of 500 frs., of which 3,640 are held by the Crédit Hypothécaire, Agricole et Urbain d'Egypte.

MESSRS. TILCHE'S FAILURE.

Reuter's correspondent in Alexandria has cabled to the effect that Messrs. B. Tilche and Sons have deposited their balance-sheet, showing liabilities to be £520,000 and assets £350,000.

The firm in question is private and of long standing, and its difficulties have come as a surprise to the commercial community. As far as we have been able to gather, three important banks—the National Bank of Egypt, the Anglo-Egyptian, and the Imperial Ottoman Bank—are creditors for small amounts, but they are fully secured against any loss. Other banking establishments in London are not so favourably placed, and it is rumoured that one especially has been hard hit.

It is not expected that the failure will have any great effect in Alexandria. It was rumoured that one or two firms would, as a result, go under, but these rumours are unwarranted, and well-informed circles, whilst deploring the circumstance, see no cause for undue pessimism.

The Finances of Servia.

DAWN OF A PROSPEROUS ERA.

(From Our Own Correspondent.)

Belgrade, May 1.

The little kingdom of Servia, which, after long struggles to free itself from subjection to the Porte, was thirty years ago recognised as an independent kingdom, has, thanks to the resources of the country, successfully emerged from her financial difficulties and happily entered upon an era of prosperity. Although the State comprises only three million inhabitants, its revenue, which in 1881 was 23,419,835 frs., has rapidly increased. It amounted in 1910 to 116,581,133 frs., and in 1911 exceeded one hundred and twenty million francs.

Increased Expenditure.

Unfortunately, the expenditure through uncontrollable circumstances has also grown enormously, war, one of the causes, being an expensive luxury where it is not indispensable and none the less costly when freedom and existence are at stake. The first loan that Servia made, viz., in 1867, was 2,350,000 frs., obtained from Russia at 6 per cent. interest; since then many and frequent State loans have been effected, and to-day the debts of the Servian State amount to 659,056,000 frs.

The continually augmenting debt of the Servian State, it cannot be denied, is a heavy burden on the country. The sum required this year for the payment of interest and sinking fund on the State loans amounts to 32,304,500 frs., about nine millions more than the State's entire revenue in 1881.

But not only war expenses conduced to this rapid growth of the State debts. In the early years of the young kingdom, from 1881 to 1896, the financial management was bad, the budgetary policy was unsatisfactory, each year produced a deficit, and the floating debt soon assumed large proportions. The revenue system was systematically estimated considerably higher than was actually realised. In the first nine years there was a deficiency in round numbers of seventy million francs, and from 1881 to 1896 the deficiency amounted to 123,539,984 frs. To add to these yearly deficits, there were a growing expenditure for the Ministry of War and a lamentable expenditure in the unnecessary increase of pensions for State officials dismissed whilst in the vigour of health each time there was a change of Government. The amount paid for pensions in 1881 was 463,435 frs.; in 1891 it had increased to 1,913,443 frs.; in 1901 to 2,982,487 frs.; and in 1907 it reached the high figure of 4,481,197 frs.

Ministry of War's Budget.

The increase in the expenditure for the Ministry of War, caused by an augmented active army and corps of officers, and higher pay for officers and non-commissioned officers, was considerable. These expenses were: In 1881, 9,724,271 frs.; in 1901, 17,513,852 frs.; and in 1907 they had risen to no less a sum than 20,408,855 frs.

To defray war charges, to pay off floating debts for these chronic budgetary deficits, to cover the expenditure for pensions and armaments, to meet the growing disbursements required for the Army, and to provide for the building of railways, the Government was compelled at stated intervals to have recourse to important State loans, all bearing 5 per cent. interest.

1895 Loan Conversion.

Finally, in 1895, the Servian Government, finding itself in financial difficulties, effected, as a substitute for the several previous loans, one unified, consolidated conversion loan amounting to 355,292,000 frs. at 4 per cent. interest. By this transaction the annual payments for interest on loans were reduced by one-fifth, and, further, as the total amount of the loans converted was only 310,543,755 frs., there was a surplus of 44,748,245 frs. left to the State, which was intended to redeem the Russian loan and the Salt loan, not included in the conversion, and to pay off the floating debt. The issue price was at par for the whole amount of the converted debt, and the surplus was issued at intervals at 66 to 75.

As a guarantee for the payment of the Unified loan, the revenues assigned were hypothecated, and the State is bound to pay the collected revenues to the Monopoly Administration specially created for this purpose, and on whose board there are representatives of the foreign creditors.

Last Year's Budget Surplus.

After this period the Budget estimates were more reliable, and from 1897 the actual revenues varied very little from the estimates. However, still further State loans were effected, and the yearly expenditure continued to increase immensely, yet since 1904 there has not been any more floating debts necessitating the use of Treasury Bills. Indeed, so great is the improvement in the management of Servian finances, as shown by the balance-sheet for the year 1911 of the Monopoly Administration just published, that after payment of 32,403,100 frs. for interest and sinking fund on the State loans for the year 1911 there remained a considerable surplus, which was paid over to the Ministry of Finance.

The Monopoly receipts for 1911 had been estimated in the Budget at 37,701,048 frs., whilst the actual revenue was 42,133,617 frs., and this amount, it should be observed, is five million francs in excess of the Monopoly revenue of the preceding year.

Revenue Equal to Demand.

The revenue of the country is equal to the demands on it. The State's revenue keeps pace with the continually increasing expenditure; and, in fact, the total receipts in late years generally show a larger revenue than the budgetary estimates, whilst the expenditure does not exceed the estimates. In 1910 the State accounts showed total receipts of 116,581,133 frs., and a total expenditure of 111,633,528 frs., giving a surplus for that year of 4,947,605 frs.

Improved Credit.

As the financial position of Servia improves so does her credit, and so does the value of her obligations increase. In 1896 the 4 per cent. (four per cent.) Unified loan was quoted on the Paris Bourse at 68 to 69 frs., in 1902 at 72 to 73, in 1905 at 79 to 80, in 1906 at 82 to 83, in 1907 it had risen to 85, and in 1911 reached 93.

Another Conversion?

It is said that taking advantage of the high quotations of Servian "rentes," the Government intends making a consolidated conversion of the various loans that have been issued since the consolidated conversion loan of 1895. But will the premeditated forced conversion of these loans be a wise step? Is it prudent, and can such an operation be repeated with impunity?

These State loans are :—1. A loan in 1902 for 60 million francs at 5 per cent. interest. 2. A loan in 1906 for 95 million francs at 4½ per cent. interest. 3. A loan in 1909 for 150 million francs at 4½ per cent. interest.

Last year already the Government had entered into negotiations with a French syndicate for the purpose of carrying out this conversion, as the time was then considered favourable for such a project, but Servian "rentes" since then have fallen.

TRIESTE-ALEXANDRIA SERVICES.

The time-tables of the express service of the Austrian-Lloyd between Trieste and Alexandria, to which we have already referred, will be altered from June 7, 1912, as follows :—The s.s. "Wien," alternating with s.s. "Helouan," will leave Trieste every Friday (instead of Sunday), touch at Brindisi Saturday (instead of Monday), and arrive at Alexandria Monday (instead of Wednesday); returning they will leave Alexandria every Thursday (instead of Saturday), call at Brindisi Saturday (instead of Monday), and arrive at Trieste Sunday (instead of Tuesday). At the same time the steamers of the Syrian Line will leave Trieste every Sunday (instead of Friday), and return from Alexandria on Saturdays (instead of Tuesdays).

COMPANY NOTES.

Metropolitan Railway of Constantinople.

A general meeting of the members of the Metropolitan Railway of Constantinople, from Galata to Pera (in liquidation), was held last Friday, at the offices, Walbrook, for the purpose of having an account laid before the shareholders showing the manner in which the winding-up had been conducted.

Mr. John Paterson, the liquidator, presided, and said that when the liquidation commenced there was a cash balance in hand of £23,393. There was a certain amount of money deposited with the Turkish Government, and also the value of some land and shares in Constantinople concerns. He explained how all the money received had been dealt with. There was, he remarked, a small balance still due to the liquidator of £3 8s. 6d. The creditors had been paid in full £3,535, and the shareholders had had in all £151,247 returned to them, and also a large number of shares, viz., 70,808 fully paid of £1 each in the Constantinople Land and Building Company. The liquidation expenses had not been heavy. The cash returns to the shareholders had been a first one of £12 per share and a final one of 2s. per share. The liquidation of the company had not yielded, by some £3 odd, the full amount of £250 which was fixed as the liquidator's remuneration. He expressed his willingness to reply to any questions.

Nile Valley Gold Mining.

The following cable has been received from the manager on the mine, dated May 3 :—"The pay ore is as rich as ever on the north of the winze, 200 ft. level. The width of the lode is 3 ft." Office note.—This drive is the one referred to in the manager's report of March 15, and has, as he anticipated, reached the rich chute.

Alexandria Tramways.

The general meeting of the above company, held on May 1, adopted the agreement entered into with the Alexandria and Ramleh Railway Co., Limited, according to which the former cedes to the latter its concession for the unexpired period still to run of its rolling stock, etc., in consideration of an annual payment of 372,500 frs., all charges and expenses to be borne by the concessionaires.

Up to the present the Ramleh Railway worked the lines of the Alexandria Tramways, the working expenses being met by the latter. The new arrangement does not materially alter the existing state of affairs, as the Tramway Co., in fact, holds nearly the whole of the Ramleh Railway shares. A fresh issue of debentures is to be made to meet the expenses caused by the new arrangement.

Banque de Credit, Sofia.

The Banque de Crédit, in Sofia, founded by the Disconto-Gesellschaft and the banking establishment Bleichroeder, realised last year a gross profit of 446,364 frs. and a net profit of 226,038 frs., as against 339,898 frs. and 167,694 frs. in 1910. A dividend of 5 per cent., similar to that obtaining last year, has been declared.

Land and Mortgage of Egypt.

The debenture interest coupons of the Land and Mortgage Company of Egypt, and also the debenture bonds drawn for redemption, due 15th inst., will be paid by Messrs. Barclay and Co., Limited, 54, Lombard Street, E.C., on and after that date.

The Bank of Egypt.

The Court has appointed May 14, at the Chambers of the Registrar in Companies (Winding Up), Bankruptcy Buildings, to sanction a call on all the contributories of the Bank of Egypt, Limited. The Official Receiver and liquidator of the company proposes that such call shall be £12 10s. per share, payable by three instalments, on May 30, July 31, and September 30, 1912, respectively.

The Imperial Bank of Persia announces that the coupons due on the 15th inst. on the Persian Five per Cent. Sterling Loan will be paid at their offices or at Messrs. Glyn, Mills, Currie, and Company, 67, Lombard Street, E.C.

NOTES OF THE WEEK.

Interest in the Turco-Italian war is temporarily overshadowed by the news from Albania, where serious disturbances have broken out and the Turkish Government is confronted with the possibility of a widespread insurrection. Accurate information regarding the course of events is, however, difficult to obtain. For the moment it is clear that while a considerable number of tribesmen are "out," the movement still lacks organisation and cohesion. The Porte is hastening the despatch of reinforcements to the districts affected, among which has now to be included the Mirdite country. Three things have probably contributed to the recrudescence of unrest—the return of spring, reaction from the temporary effects of Hadji Adil Bey's mission, and the conduct of the recent elections, while excesses on the part of Turkish local officials may have fired the train of revolt in a given centre. It is natural that the measures adopted by the Government to eliminate the Opposition from the new Parliament should have caused widespread resentment, and the immunity generally enjoyed by Albania in this respect, with the resulting victory at the polls of the opponents of the Committee of Union and Progress, has only served to emphasise the unreal character of electoral results elsewhere. The effects of Hadji Adil's journey, moreover, however successful it may have appeared at the moment by reason of large doles of money and the promise of various concessions, would necessarily be temporary in the face of a stronger appeal to the primitive instincts of the Albanians. One or more of the defeated candidates at the recent elections are said to be at the head of the rebels, and it may be taken for granted that their efforts will be directed towards converting isolated risings into a general insurrection.

As far as can be gathered from the reports that have reached this country various incidents have served to bring the latent unrest to a head. On May 8 several Albanians succeeded in entering the artillery stables at Gusinje and made off with a few horses. They were pursued by troops, who were enticed into an ambush, but, while both sides suffered proportionately heavy losses, the Albanian band made good its escape. At Ipek the son of one of the most prominent inhabitants was kidnapped by an Albanian chief, and to relieve the tension in this neighbourhood reinforcements of troops were hurriedly concentrated, with orders to exterminate the strong bands that were known to have made the district their headquarters. In another centre a rising is said to have been brought about by the action of the Kaimakam of Djakova in destroying a whole village on account of differences of opinion in regard to the cutting of timber. Elsewhere recruiting for the new gendarmerie has been made a *casus belli*. Turkish official reports give a different version of these various incidents, but they admit that disturbances have taken place, and that troops are actively engaged in dealing with the insurrectionary bands. Regarding the ability of the army to stamp out any attempt at a general rising in Albania the Turkish Government refuses to harbour the least doubt, but uncertainty as to the attitude of neighbouring Powers makes it unwilling to detach any large body of troops for the suppression of the revolt. It is in the Government's favour that the outbreak or series of outbreaks has arisen from different causes, an indication that the Albanians are not actuated by any one deep-seated grievance, more definite than hostility to Turkish rule, that might drive the various tribes to make common cause against the enemy. To this extent the movement may be called artificial, although the distinction may not be important in the case of a people generally spoiling for a fight. But if the Albanians were amenable to reason, it could be pointed out that an organised rising against Turkish authority has less justification than usual at the present moment, when the Porte has shown unmistakable signs of a desire to pay some attention to the more pressing needs of the inhabitants of Albania and Macedonia. It is to be hoped, therefore, in the interest of this distracted territory, that the disturbances will subside quickly, in order that the Turkish Government may have no ground for postponing the immediate introduction of long-delayed reforms.

Simultaneously with the outbreak of trouble in Albania the revolutionary bands in Macedonia are beginning to show signs of fresh activity. The return to Bulgaria of the emissaries of the Macedonian Internal Organisation from their visit to the European capitals has been marked by the summoning of mass meetings in all the towns of the kingdom in favour of the autonomy of Macedonia. Stress is laid on the intolerable situation of the Bulgarians in the province, and resolutions are being passed urging the Sofia Government to work by all the means at its disposal for the enforcement of Article 23 of the Berlin Treaty, providing for

Digitized by Google

Macedonian autonomy. Meanwhile increasing numbers of revolutionary bands are making determined attempts to cross the frontier. The Turks, however, are on their guard. Frontier guards have been considerably augmented, ambuscades have been laid in the passes, and frequent patrols survey the line between the block-houses. In the interior of the province flying companies of gendarmes are in constant pursuit of the bands, and although honours in the engagements are often easy, the steady diminution of the numbers of the insurgents must tell, if reinforcements from outside can be kept from joining them. The cessation of this guerilla warfare is a necessary preliminary to the inauguration of real reform, and we can only hope that the Porte will contrive to give such practical earnest of its programme that the insurrectionary campaign will be induced to hold its hand until the intentions of the authorities have had time to materialise. As one hopeful sign in the situation may be mentioned the presence in Sofia of a Turkish Commission which, it is understood, has been sent to discuss the proposed junction of the Bulgarian and Macedonian railway systems. It is unnecessary to inquire into the actual circumstances that have led to this new move on the part of the Porte. The need of direct communication between Sofia and Salonika is obvious; but it was the policy of the old régime in Constantinople to veto the construction of the short line of forty miles from Kumanovo to the frontier, and the Young Turks have until the present moment persisted in the same attitude. Whether the Commission in Sofia indicates a change of front remains to be seen; but in the existing relations between the Bulgarians and Turks, however correct the attitude of the respective Governments may be, an interchange of views may be regarded as a favourable symptom, until it has been proved altogether abortive.

Disturbances in the Balkans can only increase the anxiety with which the Powers necessarily view the prolongation of hostilities between Italy and Turkey. On the other hand, the permanently critical nature of the situation in the Near East deprives the Governments interested of their last excuse for not being prepared for all eventualities, and there is reason to suppose that a somewhat clearer understanding now exists on this subject between the Chancelleries of Europe than was the case in the earlier stages of the war. Two incidents have recently served to quicken political speculation in regard to the Near East. The first was the despatch of a distinguished special mission by King Ferdinand and the Bulgarian Government to the Tsar at Livadia; the second was the transfer to London of Baron Marschall von Bieberstein, the ablest and most distinguished member of the German Diplomatic Service, from Constantinople, where he is succeeded by Baron von Wangenheim, now German Minister to Athens. In neither case is there reason to suppose that the events foreshadow any significant developments. The explanation given of the Bulgarian mission is that it is purely one of courtesy, charged with a personal message to the Tsar. In Constantinople Baron Marschall has occupied a unique position as the friend and counsellor of the Turkish Government. His withdrawal is open to the interpretation that the German Government attaches less importance to the personal equation in its dealings with the Porte, or that it is satisfied that its *rôle* in Constantinople is now so assured that it can be safely entrusted to less experienced hands.

The work of clearing the mines from the Dardanelles is nearing completion, and the Straits are expected to be open in a few days to international commerce. Owing to the number of vessels detained between the Black Sea and the Dardanelles, traffic will be confined for the first few days to outgoing ships. Meanwhile the Italians are completing their occupation of Turkish islands in the Ægean. With the seizure of Patmos, Leros, and Niseros, they have now established an effective cordon of posts along the coast of Asia Minor from Rhodes northwards to Samos. From the former island come reports of preparations for dredging the harbour, repairing fortifications, and laying tramway lines—indications apparently that a prolonged occupation is contemplated. Direct steamship communication between Italy and Rhodes viâ Stampalia has been inaugurated, and the first vessel left Brindisi conveying a number of Italian officials sent to organise the postal, tobacco, and other Government services in the occupied islands.

Persia's troubles are so numerous that the Government may well be allowed to plead its aims as a justification for the methods employed to attain them. The arbitrary arrest of a score of the prominent members of the Opposition has been explained as a step necessary to prevent the new Mejliss from adopting the same hostile attitude as its predecessor towards Russia and Great Britain. After the elections the alleged extremists, it is said, will be released, and will be free to go where they like. The desire thus shown by the Persian Government to placate its powerful friends deserves to be accompanied by a more rapid improvement in the general condition of the country. In the west, however, little or no headway is being made against the forces of Salar-ed-Dowleh. The report of a Government victory, if correct, had rapidly to be discounted by a rebel victory, as the result of which Prince Firman Firmah, Governor of Hamadan, is said to be in a critical position. Salar-ed-Dowleh, indeed, has requested the British Minister in Teheran to advise the Persian Government to put the issue to the test of an engagement some twelve miles outside Hamadan; otherwise, he says, he will not be responsible for the safety of the population of that town. But while the Government troops are unable to record any successes, Salar-ed-Dowleh's advance towards the capital makes little progress, and time would appear to favour his enemies. It is unfortunate, however, that the situation in Teheran is not more satisfactory. The Regent has declared himself unequal to his task, and is endeavouring to leave the country for Europe. His defection is liable still further to weaken the Government and to retard the settlement of the Persian problem.

The ALIGARH INSTITUTE GAZETTE
A High-class Urdu-English Weekly Journal.
Founded by the Old Sage of Aligarh, the late Sir Syed Ahmad, in 1866 A.D.
It is now the leading and officially recognised Organ of the M. A. O. College, Aligarh, All-India Muhammadan Educational Conference, and All-India Moslem Lea ue. on politics, education, and society. An excellent medium of advertisement on account of its large circulation amongst educated and enlightened class of Muhammadans, gentry and nobility in all provinces of India and places beyond India. Annual subscription, 4s. Agents securing advertisements have good offers.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 11.

A fresh chapter in the history of the Turco-Italian war has been opened by General di Ameglio's descent on Rhodes. Some 10,000 Italian troops poured into the island from the transports at the end of last week and captured the town of Rhodes. The garrison, which is not believed to exceed 1,500 men, took to the hills in the interior of the island after some apparently rather desultory fighting. The Government, however, thought fit to publish, or at least to encourage the publication by the Agence Ottomane, of a "message from Marmarice"—I had almost written Mars—which averred that the Italians had been overwhelmed, with the loss of hosts of slain and 1,000 prisoners, by the gallant defenders of the island. No confirmation whatever of this report has been received here. In fact, if Greek sources of information are at all trustworthy, the indications are all the other way; and there is now a tendency to criticise the authorities for raising false hopes by the dissemination of fictitious accounts of victories. No attack on any other islands has been reported, though there can be little doubt that the enemy will soon occupy Mitylene, Chios, Kos, and perhaps Lemnos.

Meanwhile the clearing of the Dardanelles is making slow progress owing to the bad weather which has lately prevailed. On Thursday about a mile of the mined channel was swept, one mine exploding harmlessly during the operation, when the wind got up and put an end to operations for the day. Full instructions concerning the departure of foreign shipping have been issued by the Prefect of the Port of Constantinople.

Affairs in Macedonia and Albania.

It is doubtless the reaction that followed the discovery that the victory at Rhodes was an invention which has caused the nervousness that has prevailed during the last two days concerning the state of affairs in Albania and Macedonia, and especially in the former region. It is certainly true that there have been disturbances in Albania of late. Collisions with the troops have occurred at Voysan, near Gusinye, in the Ipek district, in Lower Dibra—where the disturbances, which caused some loss of life, were not unconnected with the elections—and at Stok and Gamsetché, in the vilayet of Scutari-in-Albania. But these affairs have been paralleled over and over again in these districts, where lawlessness is endemic, and they do not seem to indicate more than its persistence. They are not now believed to portend any general outbreak, though the first reports of the local authorities were pessimistic; and they are not considered by the military authorities to necessitate any military movements on a large scale. Hadji Adil Bey and the other members of the Reform Commission have arrived safe and sound at Monastir. They were lucky to escape a powerful bomb which was awaiting them under a wooden bridge on the Ochrida Resné road, and would have caused great loss of life had not the authorities been warned in time. The bomb was discovered and removed without accident, and eight Bulgars who are believed to have been involved in the conspiracy, which was planned by a notorious band leader, were arrested.

The Chamber of Deputies.

The modifications of Article 35 of the Constitution have been approved by the Council of Ministers, and will be submitted to Parliament in the course of the next few days. The official (Committee) party will certainly obtain the necessary majority of two-thirds, and nothing need be apprehended from the cautious Senate. Article 35 carried, the Chamber will pass the Budget, discuss, and perhaps pass, certain demands for extraordinary credits, and then be prorogued. At present some 180 members have arrived here, of whom about 75 per cent. are members of the Committee of Union and Progress.

Rumours have been current here of late that Hadji Adil Bey, on his return from his adventurous journey, would be appointed, *nolens volens*, to the Speakership. The idea was certainly discussed by a strong section of the Young Turks, but it has encountered great opposition. It certainly seems strange to deprive the one Minister who knows something about the condition of the two most important parts of the Empire—Macedonia and Albania, to wit—from personal experience, and not from hearsay or from possibly inaccurate official reports, of his portfolio at the moment when he has a chance of making good use of his recent advantages. It is now, however, believed that Halil Bey, a former Minister of Interior and head of the Committee party in Parliament, will be appointed President of the Chamber.

As for Cabinet changes, such rumours abound, but seem to be premature. The Young Turks will continue to make use of Said Pasha for just as long as they want him, not for a day longer. When he retires on account of old age, ill-health, or the displeasure of his employers he will probably be succeeded by another "elder statesman." Personal jealousies are unlikely to permit a Young Turk to be selected by his colleagues of the Committee to fill the highest post under the Khalif.

The German Ambassador.

There is as yet no confirmation of the report that Baron Marschall von Bieberstein will shortly leave the German Embassy at Constantinople to become German Ambassador to the Court of St. James. Still, the news is believed to be well founded, though the Kaiser will have the last word to say on the matter on Monday next, and that last word may not be what the public and the Press agencies expect. Baron Marschall's departure will be much regretted here, both by Turks and Europeans; for whatever may be said of some aspects of German policy, none could fail to admire the patience, shrewdness, and cool "horse sense" of the Teutonic counterpart of the great British Ambassadors of the past. The Turkish Press has thus far abstained from much reasoned comment on the news; but a certain nervousness lest England and Germany be reconciled on the Turk's back occasionally penetrates its rather vague curiosity on the causes of the Baron's transfer.

BOMBARDMENT OF RHODES.

(From Our Own Correspondent.)

Smyrna, May 7.

The Italians, apparently searching for new worlds to conquer, appeared off the island of Rhodes yesterday, cut the cable, and proceeded to bombard the ruins of the ancient forts. As these were quite unfortified it was an easy matter to destroy what the ravages of time and the builder had left. Rhodes being the headquarters of the Archipelago Vilayet, with a Governor's residence, a force of about a thousand soldiers is stationed there under Abdullah Bey. There are also 200 gendarmes well armed and efficient. This force, with the addition of about 500 armed inhabitants, has taken to the hills behind the town, with the few small cannon in their possession, and it is expected that they will give a good account of themselves.

After bombarding the forts the Italians landed soldiers and occupied the town, but not without loss, the official report from the Turkish commander giving the Italian losses as two officers and several marines killed and one officer captured.

Rhodes was selected as a suitable place of retirement for several of the old Ministers of Abdul Hamid, and amongst others there are Marshal Zekki Pasha, ex-Grand Master of Artillery, one of the ablest men of the old régime; Hassan Rahmi Pasha, ex-Minister of Marine; and Ahmed Ratib Pasha, ex-Governor of the Yemen, one of the richest of Hamid's servants.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 8.

So far as can be judged from the opinions expressed in the vernacular Press, the occupation of Rhodes by the Italians appears to have disturbed the Egyptians as little as did the attack upon the forts at the mouth of the Dardanelles; while the declaration of the Porte, as reported by the telegraph agencies, that the occupation of the island would have no influence upon the result of the war has been greeted with lively satisfaction by native journals. Similarly, the report that the Ottoman Government, in reply to the representations of certain Powers, had stated that the question of opening or keeping closed the Dardanelles was a question for Turkey to decide, coupling with this declaration another to the effect that the Government was determined to pursue the war without regard to the consequences, has called forth the admiration of the *Moayad*. Such a line of policy, the journal observes, comes most opportunely, and is calculated to safeguard the prestige of the Turkish Government in the eyes of Turkish subjects. The experiences of this war, the writer continues, should show to Turkish statesmen that it is useless to reckon upon shadows for support; they must depend upon themselves. If the Ottoman Government, the article concludes, desires to win and to hold the hearts of all Ottomans and Moslems she must continue to pursue the energetic policy of which the declaration quoted is an earnest for the future.

The War and Local Feeling.

While it is of interest to note expressions of opinion such as that contained in the *Moayad*, it would seem, so far as can be judged, that general interest in the war among Egyptians has died down considerably. One reason for this attitude is doubtless the incapacity of the Egyptian to maintain for long a sustained interest in anything. But, in addition, whatever the facts may be, all the news received by the native Press indicates successes on the part of the Turks, so that there is no reason for dissatisfaction with the course of events. Quite apart, however, from the effect of the continuation of hostilities upon Turkey's co-religionists here, the prolongation of the war affects this country in other ways. Thus, in order to carry out the stringent measures for the preservation of Egypt's neutrality and for the prevention of contraband running into Cyrenaica, large numbers of police and coastguards have had to be diverted from their usual duties and placed upon the special work of watching the western frontier. Among the men thus employed are a number of police, recruited among the Sudanese, who are usually occupied in patrolling the edge of the cultivation in order to prevent the commission of crimes by the Bedouin—a task in which they have proved themselves to be thoroughly efficient. Since the enforcement of the measures alluded to it has been necessary to take these men off their usual "beat," substituting for them Egyptian policemen. Unfortunately the latter do not instil the same fear into the breasts of intending malefactors, and it is more than probable that the large number of crimes which have been committed during recent months is due, in part at all events, to the absence of this force. In this connection it may be observed that the Government is fully alive to the seriousness of the situation as regards the increase of crime, to which attention was called by the Judicial Adviser in his annual report, and the question of the measures to be adopted in order to check it is being carefully considered.

Alexandria Municipality Inquiry.

As will be remembered, a Special Commission was appointed several weeks ago to inquire into the affairs of the Alexandria Municipality, in consequence of the lurid light which was thrown upon the municipal affairs of the city in the course of a libel action between a native journal and one of the municipal officials. This Commission has now ended its inquiry. Nothing has so far been made public, and to expect that the contents of the report of the proceedings, which would doubtless provide much instructive reading, will ever be accessible to any but the most privileged persons is too much to hope for. The number of persons—about fifteen—connected with the municipality who, as a result of the inquiry, have been suspended from their duties pending further action points, however, to the Commission's having found the affairs of the municipality to be in a very unsatisfactory state. The way in which Alexandria has managed its municipal business is, indeed, hardly calculated to tempt those in authority to accede to the pressing demands of those who desire to see a municipality granted to Cairo.

Exodus of Officials.

Only a few weeks have passed since the end of the regular tourist season—stray windfalls such as the personally conducted six hundred Americans who have taken possession of Cairo during the last three days do not count—and already the summer exodus of Egyptians and British officials is beginning. So far as temperature is concerned, nothing, however, could be more agreeable than the weather that Cairo is now enjoying. With a few exceptions the hot "khamseen" has been, up to the present, noticeably absent, and the heat of the sun continues to be tempered by a cool northerly breeze. In addition to a number of other prominent persons who have sailed for Europe during the last fortnight, General Sir John Maxwell left to-day for London, whither Lady Maxwell preceded him a week or so ago.

THE SCHOOL OF ORIENTAL STUDIES.

The text of the London Institution (Transfer) Bill has been issued. It is entitled "A Bill to provide for the transfer to the Commissioners of Works of certain property of the London Institution for the purposes of a School of Oriental Studies, and for the dissolution of the Institution, and for purposes in connection therewith."

It is proposed in the Bill that the property of the Institution shall vest in the Commissioners. There will be paid to the Institution, in consideration for the vesting of the property in the Commissioners, £12,000 out of moneys provided by Parliament. The books and manuscripts retained by the Institution are to be transferred to such public institutions as may be determined by the committee of management. As soon as the disposition of property has been made, the Institution will be dissolved, and the charter of the Institution revoked.

A HINT FOR THE ITALIANS.

Mr. Rudyard Kipling's sketch, "A Reinforcement," which appeared in last week's Near East, no doubt helped many readers to realise what an irresistible bait a modern rifle is to the Arab. Commenting on the difficulties that the Italians are experiencing in the suppression of gun-running into Tripoli, a writer in the *Manchester Guardian* observes:—"The Italian troops are quite incapable of coping with the hundreds of thousands of modern rifles that the cry of Moslemism can now, thanks to the gun-runners, marshal against them. Without being self-complacent, we may say that we are the only people who deal with this very serious question properly. In the Sudan, for instance, every rifle has to be registered and stamped with its registered number. If a rifle is found that has no such number it is at once destroyed at the court of the nearest officer with magisterial powers."

ALLIANCE

ASSURANCE COMPANY, LIMITED.

Head Office: BARTHOLOMEW LANE, LONDON, E.C.

Assets Exceed £23,000,000

Chairman: The Right Hon. LORD ROTHSCHILD, G.C.V.O.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 10 mai.

L'action italienne dans l'Egee.

L'occupation de Rhodes par l'escadre italienne qui, à ce qu'il paraît, sera suivie par celle d'autres îles de l'archipel ne pouvait naturellement pas laisser indifférente l'opinion publique en Grèce. De vives inquiétudes ont été surtout exprimées relativement au sort qui attendrait les habitants de ces îles après la fin de la guerre. Toute la presse et les organes ministériels en première ligne s'attachent à faire ressortir qu'il serait injuste que l'Italie après avoir affranchi ces îles et s'en être servie pour ses propres fins, les laissât retomber sous le joug ottoman et exprime l'espoir que, en vertu du principe adopté et d'après lequel toute province turque habitée par des Chrétiens, une fois détachée de l'empire ottoman, ne peut plus y être réintégrée, ces îles qui sont presqu'entièrement habitées par une population grecque, devraient être proclamées autonomes, puisqu'il ne leur est pas permis d'espérer un rétablissement conforme à leurs aspirations nationales. Mais ni les déclarations de l'Italie, tendant à faire respecter l'intégrité de l'empire ottoman dans les Balcans, ni l'attitude des autres puissances envers la Turquie—attitude qui se manifeste assez nettement dans la question crétoise—ne sont malheureusement pas de nature à justifier de pareils espoirs. Tout porte à croire en effet que l'Italie, après avoir gardé ces îles pendant un laps de temps que l'intransigeance opiniâtre des Jeunes Turcs pourra allonger beaucoup, les rendra à la Turquie pour obtenir de celle-ci, en échange de leur évacuation, la reconnaissance de l'annexion de la Tripolitaine et de la Cyrenaïque. En effet il ne pourrait pas en être autrement et on a fini par le comprendre ces jours derniers à Athènes à la suite d'un télégramme de M. Bourchier au *Times* interprétant les vues de l'Italie à ce sujet. Il faut donc s'y résigner sans se livrer à des récriminations inutiles. Dans ces conditions les habitants de ces îles doivent faire bien attention de ne pas se laisser entraîner à des manifestations en faveur de l'Italie et garder strictement une attitude réservée et impartiale, car dans le cas contraire ils seront exposés à des représailles de la part des Turcs après le départ des Italiens. Des conseils dans ce sens auraient dû être adressés par le gouvernement hellénique par le moyen de ses consuls aux populations de ces îles.

Envisagée au point de vue plus général de l'influence qu'elle pourra avoir sur la paix dans les Balcans, l'action italienne dans l'Egée n'est pas sans inspirer de vives préoccupations dans les cercles compétents d'Athènes, sans parler de l'anxiété provenant des dommages considérables causés au commerce et à la navigation grecque par la fermeture prolongée des Dardanelles. En présence d'une situation aussi alarmante le gouvernement grec redouble ses efforts pour apaiser l'effervescence en Crète et écarter les dangers qui pourraient menacer la paix de ce côté.

Les deputes cretois.

Les vingt-cinq députés crétois qui se trouvent à Athènes ont tenu à assister lundi dernier au Te Deum qui a été célébré à la cathédrale à l'occasion de la fête onomastique du roi. Cette première apparition des représentants de Crète a émotionné la foule qui a salué leur passage par de vifs applaudissements. Quand ils sont arrivés à l'église on les a installés à la place réservée aux députés grecs, mais dès que le président du conseil est arrivé, il les a invités à changer de place et les a fait mettre de l'autre côté derrière les officiers, comme de simples particuliers. Cet incident a fait voir que M. Vénizélos s'en tient toujours à sa première résolution de ne pas les admettre dans le parlement. Quant aux autres députés qui sont encore détenus à bord des navires des puissances dans la baie de la Sude, on parle encore dans certains milieux de la possibilité de les déporter à l'étranger afin de prévenir les dangers d'une guerre avec la Turquie que leur obstination pourra engendrer. Mais d'autre part une telle mesure de rigueur pourrait bien faire naître des complications en Grèce et en Crète non moins graves que celles que les puissances cherchent à éviter par son adoption; M. Vénizélos étant un des principaux piliers sur lesquels repose la paix dans les Balcans, les puissances doivent le soutenir et non pas l'affaiblir en lui créant des embarras. Par bonheur, les opinions des puissances étant partagées du moins quant à présent, il y a tout lieu d'espérer qu'elles n'arriveront pas à une telle extrémité. Toujours est-il probable que les députés ne seront relâchés qu'après l'ouverture de la chambre, qui se réunira le 1 juin, lorsque la question de leur admission aura été tranchée et lorsque les députés crétois qui se trouvent à Athènes tenteront d'entrer à la chambre. Il paraît cependant que M. Vénizélos a toujours l'intention de convoquer quelques jours auparavant tous les représentants crétois qui seront en ce moment à Athènes et, après avoir expliqué minutieusment à ses compatriotes la situation diplomatique de la question et les dangers d'une réoccupation qui imposent à la Grèce une politique d'abstention, il tâchera de leur faire comprendre que s'il les admettait à la chambre, contrairement aux injonctions des puissances, la cause de l'union n'aurait rien à y gagner tandis que cet acte exposerait la Grèce à une guerre avec la Turquie, et par contre elle n'aurait rien à perdre s'ils se soumettaient au refus du gouvernement de les admettre sous un prétexte quelconque, tel que l'invalidation de leur mandat par la cour de cassation, sans le contraindre à user de la force contre eux. Si toutefois toutes ces admonestations restassent sans résultat, on affirme que M. Vénizélos provoquera un nouveau vote de la chambre approuvant sa politique et repoussant l'admission des Crétois. Peut-être cette mesure pourra-t-elle agir plus efficacement sur leur esprit et les amener à composition.

M. Theotokis et le Kaiser.

M. Théotokis qui séjourne toujours à Corfou et qui avait été décoré par le kaiser du Grand Cordon de l'Aigle Rouge quand il était au pouvoir, a été invité à son tour par sa majesté à dîner à l'Achillion quelques jours avant le départ de l'empereur. A l'issue de ce dîner il paraît que M. Théotokis, dans un cercle d'amis, a dit, entre autres choses, que "l'Angleterre convoite la Crète, ce qui n'empêche pourtant pas M. Vénizélos d'être anglophile de la tête aux pieds." Ces déclarations de M. Théotokis qui d'ailleurs s'accordent avec ses communications dont je rendais compte dans ma lettre du 25 janvier, n'ayant pas été démenties, ont été très commentées. Un journal ministériel attribue ces propos à l'influence du "champagne allemand" offert à M. Théotokis pendant le dîner.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, May 11.

One cannot doubt that the London Balkan Committee mean well, but it is a question whether their recent open letter to the Turkish Government and to leaders of the Union and Progress Party is not calculated to do more harm than good. At any rate, it has given considerable offence, and is unfavourably criticised by all our writers and speakers. Among others, Hussein Kiazim Bey, the Governor-General of this vilayet, has taken up the question very warmly. For one thing, he says the proposed scheme recalls very closely that which Hussein Hilmi Pasha, the late Inspector-General, was appointed to carry out in Macedonia, which would certainly have ended in the autonomy of that province, a result that, for Turkey, would be equivalent to its entire loss. Moreover, the renewing of that scheme would give rise to incessant struggles between the different races and creeds, and prove a calamity for the country itself. A local paper commenting on the letter says the curse of this country is that others meddle too much in our affairs, and that things would work infinitely more smoothly if outsiders would only leave us alone. The Balkan Committee will probably be indisposed to accept these views of the case; but of one thing they may be quite sure: no advice they give to the Turkish Government or to the Union and Progress Party will ever be listened to for one moment if it in any way suggests the interference of foreigners in the administration of this country. The Union and Progress Party contend that one of the fatal acts of the Old Régime was allowing foreign supervision, a state of things to which they will never again submit. The Balkan Committee will have to realise that unasked for "friendly" advice is never appreciated and is generally resented, and that if they really want to improve the condition of the people of Macedonia they will have to discover some other and more workable means.

Hussein Kiazim Bey Re-appointed.

Mention has just been made of our late Governor-General Hussein Kiazim Bey, who on his election as deputy for Magnesia resigned his post as Vali of this vilayet. Considerable pressure having since been brought to bear upon him to reconsider his decision, he has finally consented, and has been reappointed Vali of Salonika. This seems to have given very general satisfaction here, and as he is to arrive to-day a special excursion train with officials and others left this morning to meet and welcome him on his way.

Labour Unrest.

Under a Constitutional régime we are rapidly coming into line with Western methods. An interesting demonstration of this occurred in Xanthi a few days ago, brought about by some of the tobacco growers wanting to dismiss a number of their men for whom they had no work. This arbitrary action on the part of the growers being very naturally resented, a strike was organised, which developed into an attack on the tobacco warehouses and offices, a smashing of windows, and other expressions of dissatisfaction. The police and soldiers had at last to intervene, and the ringleaders were eventually arrested; but the news of this demonstration, the first of its kind in this country, has made a great impression in the district.

Under the old régime we knew nothing of the 1st of May as a day for Socialist idleness and posing, but during the last three years things have progressed considerably, and our boatmen, labourers, carters, etc., all kindly gave us notice in the local papers that they would not work on that day. In a most unconstitutional manner our authorities made it known to them that they were quite at liberty to remain idle, but there were to be no processions and demonstrations, so we were mercifully spared a good deal of noise, confusion, and discordant bands.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, May 11.

Two highly placed Albanians recently arrived in Servia with the ostensible object of making arrangements for the purchase of a large number of horses. The export of horses is, however, at present prohibited, and so they were accordingly informed. They then applied for a permit of transit for horses, which they intended buying in Hungary, and made no secret of the fact that these horses were not for the Turkish Army. From this and other information which has reached here it would appear that a revolt of some magnitude is being prepared.

War Minister's Resignation.

General Stepanovitch, War Minister, resigned a week ago, but his resignation has not yet been accepted. Lately, according to the Servian Press, a misunderstanding has arisen between him and the Crown, the Minister having sought to appoint certain officers as adjutants to the King without consulting his Majesty.

The Political Situation.

The position of the Cabinet is critical on account of the want of a working majority in the Skupschtina and the difficulty the Old Radicals are experiencing in reaching a compromise either with the Samostalni Radicals or with the Independent Dissident Radicals, and the War Minister's resignation aggravates the situation, the more so as some other disaffected Ministers threaten to follow suit. Under these circumstances, it is thought there will have to be a reconstruction of the whole Cabinet. Many of the leading members of the Old Radical party desire to have new elections, considering that to be the only feasible way out of the present difficulties, but it is hardly likely that the King will agree to new elections taking place so soon.

NOTES FROM ODESSA.

(From Our Own Correspondent.)

Odessa, May 12.

Russia and Bulgaria.

A Yalta correspondent informs me that the reception of the Bulgarian mission at Livadia was of a most cordial nature. Both the Premier, M. Kokovtseff, and the Minister for Foreign Affairs, M. Sasonoff, were guests of the Tsar when the mission from Sofia arrived, and there were several serious consultations under the presidency of his Majesty. Between Russia and Bulgaria there is now a perfect mutual understanding, arrived at in view of any possible eventualities or complications arising in the Near East.

A party of fifty Bulgarian students, accompanied by three professors and a couple of well-known Bulgarian political publicists, arrived here yesterday from Sofia. They have been graciously invited to extend their excursion to Yalta.

Russian Remounts for Turkish Cavalry.

There are now in South Russia six different parties of Turkish cavalry officers, accompanied by expert veterinary surgeons, purchasing horses for the Ottoman cavalry and artillery. The number of purchases to be made is said to be 18,000. This is a little more than three times the number of Russian horses annually bought for the Turkish cavalry.

The Dardanelles—A Rumour.

The local Press to-day gives currency to a report that the British Government has proposed to Russia, France, and Germany the proclamation of the absolute immunity of the Dardanelles as an international waterway from further aggression on the part of Italy, and that if the Rome Cabinet decline to agree to this joint declaration of the Powers, the latter shall assemble a composite fleet in the eastern part of the Ægean to enforce their mandate. There may or may not be foundation for this statement, but the idea is undoubtedly good, and it is to be regretted that it was not acted upon when the Powers were first informally advised of Italy's plan of bombarding the outer forts of the Dardanelles.

TEHERAN LETTER.

(From Our Own Correspondent.)

Teheran, April 29.

The Trouble at Shustar.

To those who have closely followed the course of events in the province of Arabistan during the last few years the news of the outbreak between the Arabs and the Bakhtiaris will occasion little surprise. Border disputes between the two parties have been almost continuous for a long time past, and, not unnaturally, strained relations have prevailed in consequence. The present dispute dates back some six years, and refers to certain properties in the neighbourhood of the ancient town of Shustar, to which both parties lay claim. Probably nowhere are land ownership disputes so complex as in this country. The retransfer of property confiscated by Government, the transfer of property by private treaty, effected, more often than not, by most loosely worded conveyances, and the absence of any fixed standard of measurement, are most fruitful causes of dispute. In such cases as these settlement can only be achieved by compromise, by bribery, or by a resort to force.

The Bakhtiaris have decided to assert their rights by force of arms, and have opened the campaign by occupying Shustar, which, by arrangement with the Central Government, is at present under the jurisdiction of the Sardar Arfa, the Sheikh of Mohammerah. The Bakhtiaris, though nothing like so numerous as the Arabs, have gained the initial advantage. Their present position is one most easy to defend, and correspondingly difficult to attack successfully, except by the employment of an overwhelming force. The defenders are armed for the most part with modern weapons; they are supported, too, by a Maxim battery. Of the numbers employed on either side we know but little here. At the outside the Bakhtiaris could not put into the field more than 3,000 men. The Sheikh's army numbers at a low estimate 25,000 men; but they are not well armed, they have not the prowess of the hillmen, neither have they been accustomed to street fighting. The final issues of the campaign may therefore be considered doubtful.

Attitude of the Kuhghelu.

What is most surprising to onlookers is that the Bakhtiaris should draw off a large portion of their fighting men from their own country at a time when the Kuhghelu have entered their territory from the south, and are now engaged in raiding their border villages. It is thought most probable that the latter will take advantage of the situation, and will raid the Ahwaz-Ispahan trade route—a most profitable incursion at the present time owing to the unusually large quantities of goods now in the course of transit. The Bakhtiaris are, however, fully alive to the possibilities in this direction, and have sent one of their chiefs down to Behbehan with the express purpose of stirring up dissensions in the Kuhghelu camp. His chances of success are considerably enhanced by the fact that he is related by marriage to one of the most powerful of the Kuhghelu chiefs. The outcome of this unhappy state of affairs is awaited by all with considerable anxiety. There is still some hope that actual fighting may be avoided. The Central Government has advised the Sheikh of Mohammerah to hold his hand for the time being, pending the result of negotiations here between the Government and the Bakhtiaris in Teheran. If no useful result be achieved at the conferences now being held, and actual fighting occurs, then great damage will be done to all British interests in that part of the country.

NOTES FROM BEYROUT.

(From an Occasional Correspondent.)

Beyrout, April 29.

Accession Day.

On the 27th we celebrated the accession of H.M. the Sultan. There was a review in the morning, and in the evening the garrison gave a display of fireworks, both of which were attended by all the Consuls and their staffs and a large concourse of the inhabitants. The Vali, Hazem Bey, as well as the commandant of the garrison, Hashem Pasha, received special marks of respect and esteem from the people, whose spokesman, Abdulkader Effendi El-Dana, made an appropriate speech, in Arabic, Turkish and French.

The Syrian Deputies.

This day the Austrian steamer "Maria Teresa" conveyed the last of the new Syrian Deputies to Mersina, whence they will take train to Constantinople. Their names are Mosbah Bey Moharram and Kiamil Bey Elassaad, both Deputies for Beyrout; Abdelwahed Effendi Haroon, Deputy for Latakia; and Tofan Effendi, Deputy for Nablous.

(From Our Own Correspondent.)

Beyrout, May 7.

The Damascus Fire.

It has been said that a celebrated clairvoyante predicted this year as "L'année noire," and the recent devastating fire at Damascus makes the prediction apply with special significance to Syria, where the financial crisis was already becoming acute, and emigration has led almost to the depopulation of the land. In a few hours one of the principal bazaars of Damascus, "Hamidieh Street," and two other streets were destroyed by the flames. Possibly the conflagration may prove a turning point in the civic history of Damascus. It is said now that the Vali has decided to have the roofing of streets removed, especially where timber enters into its composition. In this case the roofing evidently helped the rapid spread of the fire from one side of the street to the other, and the violent winds that prevailed at the time helped to aggravate matters. It is asserted that, even with the primitive fire-extinguishing appliances obtaining at Damascus, the fire might have been subdued if energetic action had been taken at the start. The fear of pillage seems to have paralysed the authorities, who, being handicapped by the absence of any efficient means, should not have dispensed with the assistance of the public. The *laisser aller* that characterises Eastern administration has here a flagrant illustration in the absence of any modern fire-extinguishing apparatus, and anything approximating the organisation of a modern fire brigade, in an old and important town like Damascus. The estimate of the loss varies between 20 and 40 million francs, of which only about £50,000 are covered by insurance. The property destroyed is said to be about twenty-five dwelling-houses and 426 shops, mostly well stocked with merchandise of some value. A firm is reported to have just failed with about £5,000 liabilities, and the failure is attributable to the fire.

Origin of the Outbreak.

The general belief is that the fire started in the sealed shop of an Italian who had been expelled after the bombardment. A band of robbers is said to have pierced the wall of this shop, and gradually extracted goods, until at last, seeing that the amount of goods taken would be likely to betray them, they set fire to the place, whence the flames spread to an adjoining printing press. Another version is that the fire originated in the printing press. Meantime the local authorities are busy making arrests and recovering looted goods, and displaying in general great energy.

LETTERS TO THE EDITOR.

THE "NEAR EAST'S" ANNIVERSARY.

To the Editor of THE NEAR EAST.

Sir,—As THE NEAR EAST is about to celebrate its first anniversary, I write to offer my hearty congratulations on its brief past and my best wishes for its long future.

Having been myself in various parts of South-Eastern Europe during the past twelve months, and had ample opportunity of testing the trustworthiness of the data given by your paper and the value of its comments, I felt agreeably surprised. And I now venture to say that if in the future promise is separated from achievement by no greater distance than in the past, THE NEAR EAST will richly deserve the success which it is certain to attain.—Yours sincerely,

E. J. DILLON.

Bolshaya, Konushennaya, 1, St. Petersburg,
May 5, 1912.

OUR POSITION IN THE MEDITERANEAN.

To the Editor of THE NEAR EAST.

Sir,—There never was an occasion when the Near East problems, with their vast possibilities affecting the balance of power and the transportation routes of the future, required all the prestige of Great Britain and the knowledge of her statesmen and the electorate to a greater degree than the present moment. I confess I am entirely at a loss to understand our policy of abandoning the Mediterranean to a cruiser squadron, unless we are to accept it as an acknowledgment that our naval strength has been so dangerously weakened that we can only provide for the defence of home waters. That we were leading up to such a dangerous state of affairs was my contention while I had the honour to be a member of Parliament from 1906 to 1910; and now I can only see ahead of us, in consequence of the weakening of the Navy, a dangerous paralysis to all our diplomacy affecting the Near East as well as the Far East, and with it heavy financial and commercial losses. The so-called "masterly concentration" of our naval forces, forced on us by our weakness, resembles nothing so much as the withdrawal of the Roman legions and their concentration before the fall of the Roman Empire.

While there is an absolute certainty that if the naval programmes had provided for a superiority over Germany of two to one in line-of-battle ships of modern type peace would also have been maintained, there is now a serious danger of war at any moment.

CARLYON BELLAIRS.

35, Wilton Place, S.W., May 14.

THE CRISIS IN CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—To the many congratulations you have deservedly received on the completion of the first anniversary of THE NEAR EAST allow me to add my own. These I sincerely offer to you, and I cordially wish a successful career to your paper, for it fulfils a long-felt want to all those who are interested in the Near East countries.

As one who has at heart the welfare of the people of the countries just mentioned, will you permit me some space in your paper for a few lines which I wish to write in respect of Cyprus, taking my motive therefor from a letter that appeared in your last issue in the matter of that same isle? Although I never had occasion to visit Cyprus, I am nevertheless in a position to know something of its internal affairs, and therefore I can point out a few of the reasons that provoked the present political anomaly in the island.

The occupation of Cyprus by Great Britain in 1878 was hailed as one of the cleverest political achievements of Lord Beaconsfield by the British Press, for it foresaw in the island a valuable station in the Mediterranean, which was destined to serve the strategical interests of Great Britain in the Near East. A few years later, however, the occupation of Egypt overshadowed to a great extent the strategical position of the fair isle of Venus. Though I am bound to confess that under the rule of Great Britain it has made considerable progress, it has not attained that degree of advancement which its inhabitants naturally expected.

In spite of the productiveness of its soil, Cyprus remained, and continues to remain, a poor island. This is chiefly attributed to the fact that a great portion of its yearly revenue, instead of being applied to its general advancement, is used partly to make up the sum of £92,000 annual tribute paid to Turkey, and partly for the formation of a reserve fund to fall back upon in case of failure of its crops. This reserve fund is kept in London, where the money is sent for that purpose.

As far as I know, this way of disposing of part of the yearly revenue constitutes one of the principal complaints of the Cypriots, who have repeatedly begged the British Government, through their successive High Commissioners, that any surplus money be used solely for the many needs of their land, and not for any other purpose. As regards the question of the tribute to Turkey, I know it is a difficult one to be disposed of by Great Britain alone, for it forms one of the conditions set down in the treaty of 1878. I would, however, hazard the opinion that it would be fair and just that the whole amount of the tribute should be contributed by Great Britain only; for, according to the letter of the treaty itself, it is clear that she is liable for the payment thereof, and not Cyprus. And we must not forget that the occupation of the isle was effected by Great Britain for her own strategical purposes.

Touching now the money accruing from the yearly revenues of Cyprus, and which is now lying in London, I do not see the reason why it should not—on the suggestion of the Government of Cyprus and with the consent of the Secretary of State for the Colonies—be applied to the construction of public works in the isle or to the relief of its pressing wants. Such a procedure, I am convinced, would, by solving in a great measure the financial question of Cyprus, put a stop to its present political crisis, the chief cause of which is to be sought in the poverty of the isle and of its inhabitants.—I remain, sir, yours faithfully,

L. HARRIS.

Coburg Hotel, Endsleigh Gardens, W.C.,
May 15, 1912.

A QUESTION OF TRANSLITERATION.

To the Editor of THE NEAR EAST.

Sir,—Will you permit me, in offering you my humble congratulations at the commencement of your second year of enlightenment and usefulness, also to offer for your consideration the suggestion that you should in future adopt a more correct and comprehensive system of transliteration for the Persian language, which you are so often called upon to employ, but which is seldom reproduced in an adequate manner. It is as easy to transliterate the language correctly as incorrectly, and an effort on your part to try and effect an improvement in this direction would only be in keeping with your efforts to offer the best there is to give in other directions.

You might make a start by adopting "Majles" in place of "Mejliss," which is as incongruous as "Mejisty" would be for "Majesty." As *definite combinations* of Persian characters indicate *definite sounds*, it is only sheer wickedness of pronunciation which adopts *incorrect* sounds. The Persian word quoted can *only* be *pronounced* "Majles" "Madge less").—Yours respectfully,

B. W. STAINTON.

Horndean, Hants,
May 11, 1912.

[We thank our correspondent both for his congratulations and for his suggestion. The question of the transliteration of Arabic, Persian, and Turkish names and words is admittedly a difficult one, and one upon which authorities differ widely; and without adopting an elaborate system of accents and diacritical points it would, we fear, be impossible to reach an entirely satisfactory solution of the difficulty. Without such signs, "Majles," for instance, might be pronounced "Mardjels," "Mardjlees," etc., etc. We have the whole question under consideration; but for the present at least we must, in doubtful cases, continue to use the spelling to which English readers have become accustomed.—Editor, NEAR EAST.]

THE PRESS ON THE NEAR EAST.

The Trans-Persian Railway.

Last Saturday's *Manchester Guardian* contained an article entitled "The Railway to India." After a most complimentary reference to THE NEAR EAST, which we highly appreciate, our contemporary observes that Mr. George Lloyd's article upon the Trans-Persian Railway "is almost the first discussion that we have seen (outside our own columns) of this revolution in our Indian frontier policy." Then, turning to Mr. Morrell's question on the subject in the House of Commons and Sir Edward Grey's answer thereto, the writer says:—

The answer, it seems to us, showed insufficient sense of the importance of the question or of the rights of Parliament. For the Government is not indifferent to the project, but has already discussed it in some detail with the Indian Government and possibly also with the promoters. It has given it sufficient encouragement to obtain for it the support of English capital, and Sir E. Grey as long ago as last February said that the Government was favourable in principle to the railway, provided certain conditions are observed. On the strength of these assurances a group of English, French, and Russian capitalists have subscribed £90,000 towards the expenses of a preliminary survey. We have no doubt that their report will be favourable to the construction of the line, and unless Parliament expresses a hostile opinion to the project before the survey is made and the report issued it will be told that the time is past for making objections in principle. Two more years of acquiescence and this country will be committed to a reversal of the established principles of Indian frontier defence, and to all that that momentous decision involves.

A Misleading Description.

The writer points out that the project is misleadingly described as one for building a railway across Persia, and, he thinks, "the misdescription is perhaps not undesigned":—

Persia is only the route. The primary object of the scheme is to establish railway communication between Russian and Indian territory. We have fought four wars in order to maintain strong independent States and impenetrable mountain passes and deserts between the Indian and Russian frontiers. No one ever suspected until a few months ago that this policy was in any sort of danger of being reversed, and it is surely by the strangest irony of fortune that a policy which all the military power and astute diplomacy of Russia has failed to break down should have been attacked with apparent success by a few international financiers meeting in Paris.

Why are we to expose the Indian frontier to a danger incomparably greater than any by which it has ever hitherto been threatened? No one can take the proposed railway very seriously as a commercial venture. A land Power like Russia may perhaps have something to gain by diverting the path of trade to the land, but a maritime Power like England has to lose. As to the argument that railways must be made sooner or later in Persia, and that we stand to gain by joining a movement that we cannot hope to defeat—

By what manner of right could Russia hope to continue her railway beyond Kerman, where it would enter the British sphere in Persia? Its further progress beyond that point would depend entirely on our consent. It would probably be in our commercial interest that the trans-Persian line should be connected with the sea, and so be available for the transit of goods imported by the Gulf, but here the commercial arguments for its continuation disappear. Our obvious policy if there are markets in the British sphere of Persia which are worth opening up would be to construct railways into the interior from the most suitable port. But this proposed railway, after striking the sea, is to run alongside the coast towards India; it cannot therefore open up our own sphere in Persia, it can only provide trunk communication between Russia and India. . . . If we have to gain anything at all from railways in Persia, the Baghdad Railway and some short lines from the coast would give us everything that our commerce could wish, and that without in any way compromising Indian defence.

NEAR EAST IN PARLIAMENT.

The Baghdad Railway. MAY 9.

Mr. R. M'Neill asked whether any agreement had been arrived at with the Ottoman Government with regard to any section of the Baghdad Railway or other matters relating to the Arabian shore of the Persian Gulf.

Sir E. Grey: The answer is in the negative; but negotiations are in progress on the subject.

England and Suda Bay. MAY 13.

Mr. Wedgwood asked whether the Foreign Secretary's attention had been called to a meeting of the Council of the Committee of Union and Progress at Constantinople on April 26, at which it was reported that the Committee's agent in England stated that if Russia managed to open the Dardanelles England would occupy Suda Bay; whether this supposed agent had had any official ground whatever for making such a statement; and whether the British Government would inform the Turkish Government that under no circumstances would they involve themselves in the liability and expense of occupying any such naval station.

Mr. Acland: The answer to the first question is in the negative. The answer to the second is that I am not aware of the existence of the individual referred to. If he does exist, there is no ground whatever for the statement ascribed to him. The answer to the third question is that it is contrary to practice for the Government to take official notice of unauthorised statements of this nature, to which no credence will be attached by responsible authorities. But if the hon. member is anxious lest we should have the design attributed to us in the question, I can assure him that Sir E. Grey has no intention whatever of entertaining it, and has never even thought of it.

Occupation of Rhodes. MAY 14.

Mr. King inquired the actual date on which the island of Rhodes was occupied by Italian troops; whether the Italian Government had given any intimation as to their future intentions with respect to the island; and whether it was the policy of the Government to protest against or permit the annexation of Rhodes by Italy.

Sir E. Grey: The answer to the first question is May 4; the answer to the second is in the negative; and to the third that the policy of His Majesty's Government is not to express an opinion with regard to an event that has not taken place, and that it is not consistent with neutrality to make protests against naval or military measures taken by either combatant unless they involve unjustifiable interference with our own interests.

Mr. King asked whether the protecting Powers of Crete were prepared to defend that island against an occupation of the island by Italian forces.

Sir E. Grey: There is no question of any attack being made upon Crete by Italian forces while the island is *en dépôt* with the protecting Powers.

The Mediterranean Fleet.

Sir E. Pole-Carew asked the Under-Secretary for War whether he was aware that it was proposed to move the base of the Mediterranean Fleet from Malta to Gibraltar; whether the garrisons of Malta, Cyprus, and Egypt would in consequence be increased; and, if so, by how many men and guns.

Colonel Seely replied that he was not in a position to make a statement on the subject, and, upon being pressed by Mr. Ashley, added: "It is very important that I should not make a statement."

The Trans-Persian Railway.

Mr. Morrell asked if the Secretary of State for Foreign Affairs would say when the proposal for forming a *société d'etudes* to promote a scheme for a trans-Persian railway first came before His Majesty's Government; whether any meetings of this society had yet been held; and when he expected to be in a position to make a statement or to lay papers, in order that the House might have full information on the subject.

Sir E. Grey said: The proposal in its present form first came before His Majesty's Government at the beginning of last year. The honourable gentleman is already aware from the reply returned to him on the 7th inst. that the society has not been definitely constituted, so that no meetings can have been held.

Replying to a supplementary question, Sir E. Grey said that when the question reached a further stage the Persian Government would be informed of the views of His Majesty's Government. From the beginning they had stipulated for certain conditions before giving support to any scheme.

THE BAGHDAD RAILWAY.

By E. Schaap, Late Special Correspondent for the "Times of India" in Baghdad.

The fact that Downing Street is discussing that vexed question the Baghdad Railway must cause those who have large commercial interests in Mesopotamia and Persia no little anxiety; for in the past both Liberal and Conservative Governments have displayed an utter lack of political prescience with reference to a subject fraught with such great moment to ourselves and to our Indian Empire. It would almost seem as if, for fear of offending the susceptibilities of our powerful neighbour, Germany, our statesmen preferred to fold their hands rather than cry a halt to Germany's ever-increasing activity in a zone particularly our own. The interest taken in this important question in this country has, on the whole, been lukewarm; one would almost say that our policy of drift could go no further, and that we have left our countrymen and trade in the Persian Gulf littoral to look after themselves. Hence the fears that beset the British traders in the land of the Caliphs. At present they are asking, "Are we going to be betrayed?"

The Baghdad Railway is no longer a scheme on paper, it is a *fait accompli*, and both at Aleppo and at Baghdad the active construction of the line is making good progress. So far we have not participated to the tune of a single penny in its construction, although at one time we were invited to take part in the scheme. We refused the invitation, and left Germany to exploit the concession alone. We might criticise the terms of the concession, but we could not prevent its being granted. That both Turkey and Germany acted within their rights none will deny, and we had no cause to complain. All this, however, is now ancient history.

Our Past Mistakes.

It would be idle to discuss here whether the Baghdad Railway will ever prove a remunerative concern or whether we did right in refusing to participate in the scheme. Admittedly we have made grave mistakes, and our diplomacy has failed; and Germany, by obtaining a concession so liberal in its terms in a country where the soil through which the railway will run has been found to contain iron, bitumen, sulphur, and petroleum, has scored a huge success. In a report which has not yet been published a German engineer, who recently travelled over the country to be traversed by the railway on behalf of the German Foreign Office, confirms the fact that the country on both sides of the railway is rich in natural resources, and that the petroleum fields will prove to be more extensive than those of Persia. In the light of present events it behoves us to be on our guard lest our trade in Mesopotamia and Persia be irretrievably ruined; for since the Russo-German Agreement was signed our commercial prospects in Mesopotamia and Southern Persia have taken a turn for the worse.

We are now informed that the Ottoman Government suggests that the capital for the construction of the Persian Gulf section to Basrah shall be provided in equal shares by Turkey, England, France, and Germany, each of these Powers contributing 25 per cent.; that the Basrah-Koweit section shall be undertaken jointly by Britain and Turkey without the intervention of other foreign capital; and, finally, that the semi-independent position of the Sheikh of Koweit shall be recognised, and that this potentate shall have hereditary rights conferred upon him. Proposals that seem more than innocent; in fact, quite attractive, for it would appear that no one's interests are menaced!

Baghdad Opinion.

These proposals are not new; they were put forward several times during 1911, and were condemned by all Englishmen who have large commercial interests at stake in Arabistan and Persia. During my sojourn in Baghdad I had several interviews with the proprietors and managers of the leading houses, and they were unanimously of the opinion that to accept the Baghdad-Basrah scheme on a 25 per cent. basis would mean that Germany would obtain a 50 per cent. share, for Turkey's share would be Germany's share. If the proposals were severely criticised when first mooted, now that the Russo-German Agreement has been signed there is every reason to reject the Porte's further offers firmly and at once.

We must take good care that the railway never comes further south than Basrah. Moreover, we must abstain from participating in it under the present terms, for by participation we shall gain nothing, either commercially or politically, whilst we have everything to lose. The present scheme, "equal shares," is German control writ large. Generally speaking, neither British nor Indian trade need fear competition in Mesopotamia. Baghdad has become the mart for the Persian transit trade. In fact, 65 per cent. of Baghdad's trade consists of goods in transit, mostly in British hands, upon which our German rivals have long cast envious eyes. It is certainly true that the opening of new lines of communication will develop the country generally and that this will affect our trade. This development will, however, be exceedingly slow, and it is to be doubted whether the present or even the next generation will reap any benefit thereby. The Baghdad railway is nothing more than a wild-cat scheme, by which posterity may perhaps gain, but which will be barren of results, so far as the present is concerned. A railway running through thinly populated districts in a country where immigration is not desired cannot hope to make good progress. Even if the Turk did not look askance at immigration, it would be difficult to find a class of immigrant physically or morally capable of settling in Mesopotamia. Whilst Turkey is in a parlous condition politically the Baghdad Railway will not attract people in any numbers, even if they are physically strong enough to work in a climate where the mean temperature throughout the summer is 118 degrees Fahrenheit.

What England Should Do.

We must oppose the Basra-Koweit line. We must prevent the Sheikh of Koweit—who is already a semi-independent ruler, whether the Turks care to recognise it or not—being made a tool of Turco-German intrigue. Since the signing of the Russo-German Agreement, which provides for the linking up of a proposed railway in Southern Persia with the Baghdad Railway, our position in the Persian Gulf littoral has weakened. Of recent years German diplomacy in Constantinople has reaped success after success, whilst we have made no progress at all. The completion of the final section of the much-discussed railway will set the crown on Germany's endeavour to capture British and Indian trade in a sphere where our commercial activities have never for one moment flagged. Unless we wish to see our trade dwindle to that of a third or fourth rate Power (and, thanks to our own apathy and German subsidies, dwindle it will) the time has now come for decisive action on our part. Our fellow-countrymen in Baghdad and Basrah are already asking whether their efforts in the past to maintain that high reputation which English goods have deservedly won are to be sacrificed owing to the supineness of our Government at home and its representatives abroad.

ZIONISM AS A PRACTICAL SOLUTION OF THE JEWISH QUESTION.

(By an Occasional Correspondent in Palestine.)

It is not possible that a subject so closely concerning the affairs of Palestine and Syria as Zionism can fail to interest many readers of The Near East. Whether called "Jewish Colonisation for the Ottoman Empire" or "Zionism" the subject is the same. In an article by Mr. N. Bentwich, under the former title, which appeared in Nos. 77 and 78, the question has received most sympathetic treatment by one who takes a very optimistic and idealistic view. It has, too, been treated from a point of view which is not usually considered, namely, the great benefits which the influx of a large number of Jews would have upon Palestine and Syria—not to mention adjacent lands. Whether the argument will prove convincing to the Turks—who, by the way, are apparently referred to as the "Children of Esau"—is more than doubtful. In spite of the writer's assurances and those of the leaders of the political Zionism of to-day, the fact remains that the establishment of an autonomous Jewish State was the avowed intention of the earlier leaders of the movement; it was this which led so many of the European Jews to take up the movement with enthusiasm, and it still is unquestionably at the back of the minds of the majority of the "Zionists" in the land to-day, though it is temporarily kept in the background until the present restrictions upon the immigration of Jews and the purchase of land by Jews are removed. It is well known that all foreign Jews landing in Palestine have to deposit their passports with the Custom House officials as a security that they will leave the country within a short time. Many are the subterfuges undertaken by European and American Jews to recover their passports or become otherwise registered as foreign subjects at the Consulates while continuing to reside in Palestine. It may be said without fear of contradiction that the last thing that a European or American Jew desires in taking up residence in Palestine is to become an Ottoman subject. It is true that many of the younger men have had to do so in order to hold land in their own right as colonists, but considerable numbers of these have escaped from the country in the last few months now that the new laws compel them or their children to become soldiers. It must be admitted that it is not so much dread of military life which causes this evasion of the law, but the very natural fear of being sent to fight, not for the defence of their homes, but in an alien cause in far distant lands like Yemen. Could it be possible for the Turkish Government to allow the Christians and Jews to fight only in the province of their adoption or birth, this difficulty would be surely overcome.

That the Jewish subjects of Turkey have been of great material benefit to the Empire is undeniable, but the great majority of such have been Sephardim Jews—descendants of those expelled from Spain by Ferdinand. Even in Spain they remained Orientals, and by long residence in Turkey they have become a thoroughly integral part of the land, speaking Turkish where that is the vernacular, and Arabic in Syria and Mesopotamia. In contrast with these the modern Zionist is an Occidental, a man by long residence in Northern or Central Europe unfitted for a semi-tropical climate, and he despises the language of the new land to which he comes. Of the immigrant Ashkenazim Jews scarcely one learns to read and write Arabic or Turkish, and very few speak but a smattering; all the energies of the movement are devoted to promoting the use among themselves of an alien tongue, Modern Hebrew. As an ideal it is as understandable as the encouragement of the use of Celtic languages by the "Nationalists" in Scotland, Ireland, and Wales, but it is no preparation whatever for practical life, especially when, unlike the conditions in Great Britain, it means entire neglect of the vernacular. A large proportion of the European Jews of Palestine know Yiddish and perhaps Russian, French, or German, while the younger generation, who are supposed to be brought up to make an Arabic-speaking land their home, are learning to speak an artificially modernised Hebrew, which is understood by but a very small proportion of the Jewish race as a whole and not at all outside. As a preparation for being prosperous citizens in the Ottoman Empire this is useless. Until the young Jews who are now growing up as Turkish subjects learn the vernacular they will never be successful settlers in the land, while if they desire any political influence it is essential that they acquire, like the leaders of the Sephardim, a thorough knowledge of Turkish. The fact is the "Zionists" must make up their minds what is to be their future ambition. If they are coming to the Orient, as the writer of the article referred to would have us believe, for the benefit of the Ottoman Empire, then they must learn to be good Ottoman subjects, and, as members of an intellectual race, acquire a thorough mastery of the language of the land; if, on the other hand, they are coming with national aspirations to Palestine, bringing their own culture and language to supplant or, at least, largely swamp out—in influence if not in numbers—the present inhabitants, and to set up an autonomous State, then, if such is their ambition, let practical people pause and recognise that such schemes are futile. While the spirit of Mr. Bentwich's article in The Near East would seem to support the former view, very much literature by other authors would show that the latter view is not without much ardent support. The present writer, who has made a considerable study of the subject on the spot, sees insuperable practical difficulties against any proposal to settle in Palestine any considerable section of the European Jews.

In the first place, Palestine is not a land in which Northern Europeans are suited to tillage of the soil or any other purely manual labour. The Jews of Russia, Austria, etc., have by a residence of many centuries in a European climate ceased to be a race suited for residence in a semi-tropical climate. Europeans can live in Palestine under conditions somewhat similar to that of the English in the healthier parts of India or East Africa. That is by leaving a great part of the actual manual labour to the native—the fellah—by living in houses well sheltered from the sun, protected from the ubiquitous mosquito, and located in situations carefully selected for their salubrity. All this needs the possession of moderate means. He may with constant care and the periodical use of quinine bring up a family of children in the land, but there will be, in the great majority of cases, a certain physical and moral deterioration from generation to generation, unless either the children go to Europe for education during the critical years (as is the case with most of the non-Jewish residents, including the German colonists) or unless the stock is constantly renewed by fresh comers from hardier climes. The long dry summer, the scorching sirocco, and the weary, drenching rains of winter are all extremely trying even to the hardy Syrian fellah; but, when, in addition to this, large parts of the land, the maritime plain, the Jordan valley through its whole length, and even Jerusalem itself, are riddled with malaria, it is evident that this is not a land for the settlement of thousands of poor Jewish families. Selected settlers of the more prosperous class, with careful previous training and with capital enough to develop a fairly large estate by the employment of native labour, may do well, and there is much room for such. But very few such settlers come.

The leaders of "Zionism" in Europe, however, appear to think that the plains and mountains of Palestine provide a land suitable for the poor, for agricultural labourers, for those who would in other lands do peasant work, and that in the cities the poorest classes can make a living and a home. No greater mistake could be made. A few of the larger colonies, after a relatively extravagant expenditure of capital, are providing for a diminished number of colonists a struggling existence. The whole appearance of most of these settlements has deteriorated from their ambitious beginnings, when they were under the fostering care of rich patrons. The settlers earn a scanty living, with the aid of native labour, but they complain bitterly of the difficulties raised against them on account of the propagation of political Zionism and of the over-taxation, from which they, as they have not become Turkish subjects, have now no redress; while now their condition is further straitened by their having to furnish recruits for the Turkish army. The sites of some of the colonies have been happily selected both for salubriousness and fertility, but many of the smaller ones, lying in the maritime plain and in the Jordan valley, are exceedingly unhealthy, and pernicious malarial fever and even the dreaded blackwater fever are by no means uncommon. This latter disease is almost, if not entirely, unknown among the indigenous inhabitants of Palestine, and its periodical visitations among the Jewish and German colonists betray at once their racial unsuitability for the lowlands. Indeed, the Jordan valley, on its whole length, is no home for Europeans.

The selection of sites for colonies has in too many cases been tragically unfortunate, and it is remarkable that almost all of them are in districts away from the ancient home of the race, the highlands of Judæa and Samaria. But even here health is not easily maintained. Jerusalem is notorious for its malaria. More quinine is probably consumed in Jerusalem, in proportion to the number of its inhabitants, than in any city in the world. Jewish settlers from Europe and America coming to this city in middle or after middle life are terribly disillusioned to find themselves suffering every summer with successive attacks of malaria. It is true that much might be done by an efficient public health service to mitigate these evils, but there seems but little prospect of such improvement under present conditions. The better-to-do immigrants move off again—in their hundreds to America in particular, but also

Digitized by Google

to the British colonies—but the poor must remain where, along with other Jewish immigrants from all over the Orient and from North Africa, they live in poverty and apathy. They occupy mostly poor little tenement dwellings, with little pretension to comfort and never to beauty, with no proper sanitary arrangements, and many with a chronic atmosphere of sewage hovering over them. Such families degenerate from generation to generation, and the only hope lies in getting the young men and women to emigrate to happier surroundings. Among all the thousands of Jewish houses erected to the north of Jerusalem there is scarcely a single Jewish building of any architectural pretensions; amid all the talk of "Zionism" the rich Jews of Europe have left the Jewish community of Jerusalem a by-word for poverty, a mass of pauperism now so great that there seems little hope of improvement.

It is not, however, on the city life that the present writer would dwell. Some of the Zionist leaders themselves recognise that the aggregation of Jews in the cities of Palestine is an evil, and they would discourage more from coming if they could. The difficulty is to make the immigrant and his children settle on the soil and take to agricultural life. Where the latter have once received a Western education they have no desire to do so. To meet this, an excellent policy is being followed by some—which ought to be extended—of bringing up orphans away from the city in the midst of agricultural surroundings. Everywhere, however, all schemes for the betterment of the conditions of the Jewish population of Palestine are met with the difficulty that the enterprising and well-educated, whether scholar, artisan, or agriculturalist, realises that better and more hopeful conditions exist in other lands. Not only is emigration to other lands a spontaneous thought that comes to such, but the heads of the colonies themselves all too often are the first to encourage one wishing to leave and discourage one wishing to settle. Mr. Bentwich remarks: "They have no predilection—far from it—for a Christian Government." This may be the attitude of one, like himself, living in England and viewing the Ottoman Empire from outside, but in the present writer's experience it is the very reverse of the truth, and, with the exception of the real Turkish Jews, to whom the Orient is their home, the greater number of Western Jews in Palestine would welcome any civilised Christian Government to-morrow, and the losing of their foreign protection is often the greatest sacrifice they make for Zionism.

There remains another aspect of the question. Many cherish the view that because Palestine was once—nearly 2,000 years ago—the home of the Hebrew race, that therefore it ought to-day to be, if not the home of all, at least the national centre, and be populated with Jews in something of their ancient numbers. Now, firstly, the race has changed. The Jew may be, as the writer says, "Oriental in spirit"—though that is only very partially true—but he is now no longer suited in physique to the Orient. Every race slowly acquires physical characteristics suited to its environment, and this is not the result of a few generations, but of centuries of natural weeding out of the unfit and of the increase of those in harmony with their environment. Now, the Russian and Polish Jew—who is the type of Jew most concerned in the "Zionist" movement—has become adapted to a Northern or Central European climate, and hence he flourishes there and in North America and in somewhat similar conditions in parts of South America, South Africa, and South Australia. The Yemen Jew, on the other hand, has for many centuries been accustomed to the climatic conditions of South Arabia, and cannot flourish in Palestine, where he dies sooner or later, in the majority of cases of some form of tuberculosis. Palestine is indeed too tropical for the former and too cold for the latter. All the Northern races which have attempted to plant themselves there have disappeared, either dying out or being absorbed. Probably the best hope of the Ashkenaz Jew determined to settle in Palestine would be for him to intermarry with the indigenous Jew; his children might then inherit some characters suited to the climatic conditions of the land. Secondly, the land is by no means derelict. In spite of the very great exodus of Moslems and Christians from Palestine and Syria (an emigration largely due to the scanty living to be derived from the soil), the parts of the land best suited to cultivation are already occupied. There is no ownerless land in Palestine. This has been long true of the west of the Jordan, but it is becoming increasingly true of the eastern plains, where the hardy Circassians in many tens of thousands have made splendid settlers in the richest situations, and have for ever secured these lands for Moslem domination.

The Circassians are in every way suited to the land, where they flourish and multiply, especially along the Hedjaz railway; they are born to the soil, and they work it to its utmost; they are natural soldiers, and they keep in check the rapacious Bedouin. But no Jewish colony planted in their neighbourhood could flourish; with all their rude virtues they are unsociable, fanatical, and thieving, and would never tolerate the semi-civilised and rather timid European Jew. Even west of the Jordan they have established colonies, and there are also several other races already planted here and there—Moslems, Bulgarians, Algerians, Turkomans, etc. Thirdly, the undeveloped parts of the land require a great expenditure of capital. This has been done by Baron E. de Rothschild in the neighbourhood of Bammaria-on-Carmel with considerable success. Deforestation has been going on in the land for centuries, but in an increasing ratio in the last few decades. Soon at the present rate of destruction no wild trees will exist, yet the mountains and hills to the west and most of the mountainous land to the east are capable of growing splendid timber—oaks, terebinths, and pines in particular—while in the plains the imported eucalyptus flourishes exceedingly. Afforestation is one of the greatest needs, but it requires much capital, and there can be but a slow return of profit. In other parts the hill sides have lost their productiveness through the decay of the ancient terraces and the washing away of the soil; in yet other situations, notably in the Jordan Valley, there is much room for great irrigation schemes. All this, however, needs capital, and for labour the indigenous inhabitants, under the direction of a few trained men, are far more suitable than foreign immigrants, untrained to manual labour and unacclimatised. And, lastly, though it is impossible here to do any justice to this very important fact, it is probable that, as Prof. Huntington has so ably argued in his recent book, "Palestine and its Transformation," the climate has very greatly changed, and that, do what he will, man cannot restore its past glory to Palestine until kind nature brings back a more even distribution of the seasons; if not a greater rainfall, at least one extended further into the dry season both in spring and autumn.

BARON MARSCHALL AND THE BAGHDAD RAILWAY.

The Paris correspondent of the *Standard* relates the following personal reminiscence of Baron Marschall, which will, we think, prove interesting to our readers, both in England and in Turkey:—

"It was at a time of acute tension over the question of the terminus of the Baghdad Railway, when the Turks declined to acknowledge the British protectorate over the Sheikh of Koweit. I met a German correspondent known to be more or less in the confidence of the Embassy, and he remarked that it might be easy to settle the dispute by arranging for an equal share of capital for England, France, Germany, and Turkey, and an equal distribution of the enormous contracts for work that would be necessary. So long as England and France were at variance with Germany on this point Turkey could and would raise difficulties, but if England were to come to terms with Germany, it would be impossible for the Ottoman Government to resist any longer on the question of Koweit. There were, of course, other details regarding the alternate presidency of a board representative of the four nations, and arbitration in cases of dispute, but these were the broad lines.

"Till then nobody believed Germany would admit England and France to equal participation in capital, much less in works, and I immediately called upon Baron Marschall, whom I found at his breakfast table, and asked him if he thought any such arrangement possible. After listening with apparent interest to a suggestion which certainly emanated from himself originally, he remarked with the humorous twinkle of his eye that was characteristic of satisfaction, 'Why do you not make the proposal to us?' The British Foreign Office, however, though it was made aware of this attitude, considered that proposals ought to come from Germany or had some other reason for not continuing on these lines, and the question has dragged on ever since."

NEAR EAST BOOKSHELF.

THE WORLD'S EARLY HISTORY.*

What Normand's "Histoire ancienne des peuples de l'Orient" has been to many a French boy and girl "The Empires of the Old World" may well prove to many an English boy and girl—and, mayhap, to not a few of their elders, too. That is to say, it may prove the golden key that unlocks for them some of the most fascinating pages of the world's history: the pages that tell of man's earliest steps along the path of progress, of his first essays in the arts of civilisation and government, and of his earliest attempts to solve questions that still puzzle him not a little after the lapse of long centuries. It is a sketch of the great kingdoms of the Near East in their early days—of lands and peoples whose civilisation and religious beliefs have moulded the civilisation and religions of the West, and through them have influenced profoundly the civilisation and—though to a lesser extent, perhaps—the religion of the Far East also. And as a sketch it is excellent.

In his preface the author expressly states that the book "is not a text-book for examinations, but a framework into which the fuller history of a 'period' may be inserted," and regarded in this light it is deserving of high praise. If we have a fault to find with the volume it is that rather too much space is devoted to Rome and Greece, which have, so to say, received their full share of attention in other class-books. In such a work they could not, of course, have been dropped entirely, but one feels that a few pages saved in drawing the portraits of certain old friends once more might have been spared to making clearer the picture of, say, such a remarkable character is Akenhaten—one of the most tragic and most noble figures in the history of Egypt, and one, surely, that would appeal strongly to the imagination of the youthful reader. Yet to find any portrait at all of Akenhaten in a book of this class is a matter for gratulation. So also is it to find the Babylonians treated as men and women who actually lived, rather than as mere pegs on which to hang more or less learned dissertations and a vast array of profitless theories.

But if we feel that events which took place on the banks of the Euphates, the Tigris, and the Nile are still seen through a mist and out of their true perspective as compared with those which occurred in Greece and Rome, we are none the less grateful to the author for his painstaking attempt to meet a want that has undoubtedly existed for some time. The publishers, too, are to be congratulated upon the manner in which they have done their share of the work. The book is well arranged, well printed, well illustrated, and provided with good chronological tables and maps and a useful index. It deserves to be, and we hope it will prove, extremely popular.

*"The Empires of the Old World: To the Fall of Rome." By M. Brampton, B.Th. (Blackie and Son. 3s. 6d. net.)

NEAR EAST BOOK NOTES.

We have received a copy of Part I. of the first volume of the *Agricultural Journal of Egypt*, which is published by the Department of Agriculture, Ministry of Public Works, and bids fair to be an extremely useful publication. Mr. G. C. Dudgeon, the Director-General of the Department, contributes the first paper, entitled "The Department of Agriculture and an Indication of some of the Agricultural Problems in Egypt." He is also responsible for two others—one upon the Soya Bean, and the other describing methods employed in fighting that active pest, the cotton boll-worm. "Rice Cultivation in the Delta" is the subject of a note by Mr. R. W. Brigstocke; Messrs. F. Hughes and H. C. Jeffereys contribute a "Report on the Manurial Trials on Cotton Carried Out on the State Domains, 1910"; Mr. A. T. McKillop deals with the subject of the distribution of cotton seed on credit to the small cultivators; and Ibrahim Eff. Faluny writes on "Cotton Cultivation in Upper Egypt." Part II. of Vol. i. has, we learn by a notice in the *Journal Officiel*, just been issued, and other numbers will be brought out as material accumulates. We congratulate the Department on its enterprise, and on the very promising start made by the new journal.

Many books have been written about Ancient Greece, but very few about the Greece of to-day. While the archæological and historical interests of the country have been dealt with over and over again in works, good, bad, and indifferent, its commercial, industrial, and financial interests have received but scant attention from the makers of books; and we know of no up-to-date work on the subject in English. Mr. Fisher Unwin promises us one next autumn, however. Its title will be "Greece of the Twentieth Century," and the fact that Mr. Percy F. Martin, F.R.G.S., is the author is a sufficient guarantee that it will be worth waiting for. Mr. Martin's chief objects are to set before the reader a picture of the country as it is, to give a reliable account of its commercial condition and the developments it is likely to witness, and to call attention to the opportunities it offers for investment and expansion. But the lighter side of modern Greek life will not be neglected, and the traveller and tourist, as well as the business man, would do well to bear the title of the volume in mind.

CURRENT COMMENTS.

The visit which, it is announced, the Khedive is to pay to London this summer is a welcome sign. Coupled with the fact that on the occasion of His Highness's departure from Cairo Lord Kitchener for the first time since his installation at Kasr-el-Doubara attended a reception, we may take it as an indication that the relations between Palace and Agency are at present of a friendly nature. There has been much talk of late of disaccord between the Khedive and the British Agent, and tongues have wagged eloquently over the pros and cons of the questions supposed to be at issue. It is patent to everyone that if Abbas II. were on markedly unfriendly terms with His Majesty's representative in Cairo his presence in his official capacity in London would not be tolerated by the Court of St. James. Since it is stated that His Highness is not visiting England incognito we may safely infer that the differences of opinion, whatever they were, no longer exist, and for that everyone who has the interests of Egypt at heart must be devoutly thankful. Strained relations between Abdin and Kasr-el-Doubara react on the country and lend encouragement to the agitating and discontented section of the community. The outward and visible sign of unity on all important matters of policy and administration afforded by the forthcoming visit of the Khedive to the King must undoubtedly tend to strengthen the hand of the Egyptian Government and its British advisers.

***

The decision of the Egyptian Government to prohibit the entry into the country of *Egypt*, the organ which Mr. Blunt publishes every month through the Egyptian Committee in London can have surprised few people. All those who have had that periodical at any time in their hands will bear us out when we say that no more exaggerated or distorted version of events in Egypt could be well conceived than that which it provides every four weeks for the delectation of its subscribers. Mr. Blunt has distinguished himself on more than one occasion by his antagonism to the policy of the British Government in Egypt; and the encouragement he has never ceased to give to the agitators and the pamphlets he has caused to be scattered broadcast over the country have rendered more difficult and more delicate than ever the task of the small band of Britishers who are responsible for the administration of Egypt.

***

This prohibition and the veto placed on the entry into Egypt of *Hilal-el-Osmani*, Sheikh Shawish's Constantinople journal, are but the natural consequences of the Egyptian Government's rigid enforcement of the Press Law. On the face of it, it is useless to endeavour to counteract the bad effects caused by the dissemination of false news or of seditious articles by merely suppressing or suspending the offending organs of the local Press or by prosecuting the proprietors or editors. If similarly toned publications are permitted to enter the country from abroad the evil still remains. There has been of late far too much evasion of the local laws, and the Egyptian Government is quite right in its attitude, and deserves every assistance from the Consular Corps.

***

Whether, however, the authorities will succeed in stopping the circulation of these foreign publications is another matter. It is, unfortunately for Egypt, one thing to forbid and quite another thing to carry into effect the prohibition. Only last year the Egyptian Government had an instance before it of this difficulty. Scurrilous attacks had been made for some time on the Khedive and his Ministers in a paper called the *Courrier d'Egypte*, which was published in Paris. Its entry into Egypt was promptly forbidden, and orders were issued to seize all copies. But the journal continued to make its way into the country, and inquiry elicited the fact that it was entering through the French Post Office in Alexandria. The Capitulations prevented interference by the Egyptian Government, and had it not been for the public-spirited attitude of the French Agent nothing could have been done to stop the entrance of that scurrilous journal. But the foreign Consuls in Egypt have not always been so willing to co-operate with the authorities, and it is because of obstacles which they from time to time tend to set up to the carrying out of the law that the abolition of the Capitulations is such a crying necessity for Egypt

***

The sentence of one year's imprisonment passed by default on Mohammed Bey Farid, the Nationalist leader, for his seditious speech delivered at the recent general meeting of the party, and the three months' imprisonment awarded to Aly Bey Kamel and Ismail Effendi Hafez, managers of the vernacular organs, *El Lewa* and *El Alam*, respectively, for publishing that speech, may be regarded as a sign of the times. All the discontent and sedition that have existed in Egypt have been worked up by the native Press. The average Egyptian is singularly swayed by the public utterances of the so-called political leaders and by the articles which appear in the opposition papers. And when he finds that the seditious attacks on the Government and high personalities are passed over by the powers that be, he is naturally led to believe that silence gives consent, and that those attacks are perfectly justified. Only those who have had any experience of Egyptian provincial life are able to realise the amount of mischief that the past policy of putting the blind eye to the telescope has done. The stringent enforcement of the Press Law which has been noticeable during the past six months by reason of the rigorous suppression and suspension of offending journals, is a feature that is having an eminently satisfactory effect. The putting into force of the articles of the Egyptian Code dealing with seditious utterances and the successful prosecution of Farid Bey are an outward and visible sign to the native "man in the street" that the old order hath changed, and so they place the *cachet* on the new state of affairs which has now been called into being. The Egyptian Government is to be commended on the firm attitude it has taken up.

***

Considering that usury is forbidden by the Koran, it is surely a remarkable thing that the legislation of a Moslem country like Egypt should contain no provision for penalising this practice. The project of a law, which the Council of Ministers has just approved, brings this lacuna home to us. Henceforward anyone lending money at an extortionate rate of interest will be subject to a fine not exceeding £E10, and if the offence is repeated within five years two years' imprisonment or a fine of £E100 can be inflicted. The new law strikes at an evil which is the bane of the fellaheen, and the Egyptian Ministry of Justice is quite right in attempting to protect the "fellah" from the abuse to which his ignorance subjects him. But, without wishing to throw cold water on the hopes of success which the promoters have centred in their project, we feel that it will not have a very wide-reaching effect. Whilst undoubtedly a number of Moslems, in defiance of the tenets of Islam, and many Copts lend money to their less opulent fellow-countrymen at unduly high rates of interest, the bulk of the money-lending business is in the hands of Greeks and other Levantine races. The keeper of the local "bakal" very often does a roaring trade in lending to the "fellah." To effectually protect the Egyptian peasant it will be necessary to get the law made applicable to all foreigners—a decidedly difficult matter. Until that is done, little relief will be afforded to the "fellah," and no obstacle will be set in the way of his stupid habit of borrowing money when he has a hoard in his garden, simply because he is afraid to appear rich to his neighbours. The effect of the new law will be, we fear, to drive the "fellah" into the clutches of the unscrupulous foreign moneylender.

***

Feminism is a world-force which seems destined to deflect the entire current of civilisation. It has invaded Turkey, which, under the Hamidian régime, was a stronghold of masculine domination. In a few years the veil will be as obsolete in Constantinople as is the crinoline in Western Europe. It is already falling into desuetude, though the *tchartchaf* is still sported by upper and middle-class women. During the recent elections it figured largely in the crowd which waited for results outside the municipality, and its wearers vied with their men folk in the interest they displayed in current politics.

***

A more significant revelation of the new leaven was given in the course of a lecture recently delivered at an American college by Halide Hanum, a lady who has won her spurs in the arena of literature. She is fifty years in advance of her English sisters, who are seeking emancipation by means of the obsolescent argument of force. Would that our Women's Social and Political Union had sat at her feet! Witness this eloquent peroration of her lecture: "It is motherhood which has made woman the fore-ordained dispenser of things of the soul. If she fails to give spiritual and intellectual light to her children, her neighbours, her country—nay, to the whole human race—it means that there is a missing element in that wonderful soul of hers. As in economics, goods which are not exchanged become valueless, so qualities of head and heart kept jealously for the sole benefit of their possessor are of no effect on civilisation. Woman is but the trustee of her spiritual and intellectual gifts. She is morally bound to pass them on; to shed on others the 'immortal light which beams in her soul by virtue of her unique capacity for motherhood.'" Halide Hanum spoke unveiled, but wearing the obligatory *tchartchaf*, and was heard with rapt attention by a Turkish audience. Such arguments are far more likely to advance the cause of feminism than the hammers and chunks of macadam employed by the W.S.P.U.

***

How highly the late Mr. Gladstone's name and memory are honoured in Bulgaria everyone knows who knows anything at all of King Ferdinand's country. Substantial proof of the feeling of admiration and affection felt by the Bulgarians for the great statesman was given upon the occasion of his hundredth birthday, when, in response to a request addressed by the Ministry of the Interior to the Communal Councils to vote credits for the purchase of a wreath to be laid upon his monument, the sum voted exceeded the amount required by over £300. This balance has been assigned by the Council of Ministers for the foundation of a "Gladstone" scholarship. The idea is distinctly a sensible one, and one, we venture to think, which would have appealed to Mr. Gladstone himself; and the Bulgarians are to be congratulated upon their method of disposing of the problem of what to do with the money.

PERSONAL & SOCIAL

Our Cairo correspondent cables that the Khedive will arrive at Windsor Castle on June 22 on a two days' visit to the King.

Sir Reginald Wingate is expected in Cairo early next month.

Sir Rudolf von Slatin Pasha will leave Egypt for Austria on Saturday.

Sir Henry and Miss Bax-Ironside have arrived at 6, Marble Arch, W., for the season from the British Legation, Sofia.

Major-General Sir John Maxwell, Commander-in-Chief of the Army of Occupation, left Egypt on the 8th inst. He will probably return about July 10, when Lord Kitchener is expected to go on leave.

Lord Edward Cecil, Under-Secretary of Finance, Egyptian Government, and Lady Cecil left Egypt on the 2nd inst. on board the N.D.L. "Prinz Heinrich."

Prince Ahmed Fuad left Athens for Alexandria last Friday.

Coles Pasha, Director-General of Prisons, Egyptian Government, will leave Egypt on July 10 on three months' leave, which he will spend in Europe.

Sir Paul Harvey, Financial Adviser to the Egyptian Government, returned to Cairo on the 4th inst. from a tour of inspection on the Red Sea littoral.

Lieutenant-General Sir Edward and Lady Hutton have returned to Field Place, Horsham, from Greece and Italy.

Sir Horatio and Lady Pinching left Egypt on the 8th inst.

Mr. Echlin, the British Vice-Consul at Port Sudan, and Mrs. Echlin, left on leave on the 1st inst. for England by the Khedivial boat "Menzaleh," viâ Suez.

Captain Draper, the Assistant Controller, Harbours and Lights Administration, Port Sudan, and Mrs. Draper, left on the 3rd inst. for England per s.s. "Traveller," on three months' leave.

Mrs. Theodore Ralli and Miss Ralli left for New York in the "Mauretania" last Saturday, and will not return to 2, Belgrave Place until the autumn. All letters will be forwarded.

Field-Marshal Lord Methuen, who has relinquished the command of the troops in South Africa, arrived at Southampton on Saturday morning in the Union-Castle liner "Walmer Castle" from the Cape. He will be present with his old regiment, the Scots Guards, when His Majesty the King presents colours to-day.

Lord and Lady Howard de Walden have been cruising in their yacht amongst the Greek islands. Lady Howard de Walden's mother, Mrs. Van Raalte, with her younger daughter, has gone to Bucharest for two or three weeks, during which time they will be entertained by the Queen of Roumania.

Prince Hatzfeldt-Wildenburg, who left Egypt last Saturday for Europe, has relinquished the post of German Agent and Consul-General in Cairo. Until the appointment and arrival of his successor, the affairs of the Agency will be in the charge of Baron von Richthofen. Before his departure for Alexandria, Prince Hatzfeldt-Wildenburg was entertained by the Khedive at a banquet in the Ras-el-Tin Palace.

The Khedivah Mother arrived in Constantinople from Cairo on the 9th inst

Colonel O. C. Wolley-Dod has been appointed to succeed Colonel H. O. D. Hickman as second in command at the Royal Military College. He served with the Nile Expedition, 1898, was at the Battle of Khartum, was mentioned in dispatches, and holds the Egyptian medal with clasp.

Mr. Goodman, principal inspector of the Public Health Department, Egyptian Government, is now in this country on leave.

Hussein Djahid, Deputy for Constantinople and editor of the *Tanin*, has been re-elected, practically unanimously, as delegate on the Ottoman Bondholders Council of the Public Debt.

Our Belgrade correspondent states that Prince Paul, King Peter's nephew, will in a few weeks pass his final scholastic examinations, and will then most likely continue his studies at the Oxford University.

As soon as the Cabinet difficulties are arranged King Peter will make a journey through the interior of Servia, visiting all the principal towns of his kingdom, and immediately afterwards will spend some time at the famous Servian watering resort Ribarska Bad.

The Persia Society announces that there will be no lecture to-day. The lecture announced to be given by Mr. H. F. B. Lynch on "Persia," is postponed until June 14, and the lecture announced for that date by the Right Hon. Syed Ameer Ali, is postponed until further notice.

The *Fremdenblatt* confirms the announcement that the King of Montenegro will visit the Emperor Francis Joseph early in June.

The King has been pleased to approve the appointment of Rear-Admiral Frederic E. E. Brock to be Admiral Superintendent at Gibraltar, in succession to Rear-Admiral Pelham.

The *Gazette* announces that the King has been pleased to appoint Arthur Bernard Geary, Esq., to be His Majesty's Vice-Consul at Alexandria; Horace Edward Wilkie Young, Esq., to be His Majesty's Vice-Consul at Cavalla; Charles Alexis Greig, Esq., to be His Majesty's Vice-Consul at Monastir; and William David Woodside Matthews, Esq., to be His Majesty's Vice-Consul at Adana.

On Sunday, in celebration of the name-day of King George of Greece, a Te Deum was sung at the Greek Church, Moscow Road, the Greek Minister and Mme. Gennadius, M. Vouros, Secretary of the Legation, the Greek Consul-General and Mrs. Stavridi, and a large congregation being present. After the service Admiral Tufnell, the Archimandrites of the Greek Church, Mr. and Mrs. Stavridi, the churchwardens, and the officials of the Greek community were entertained at luncheon at the Greek Legation. Later in the afternoon Mme. Gennadius held a largely-attended reception.

The death occurred in London, on the 8th inst., of Mr. William Royle, brother of Mr. George Royle and of Judge Royle, of Cairo.

Last Friday the cruiser "Dido," Capt. H. A. Adam, which has just made a trooping voyage to Muscat with new crews for the sloops "Alert" and "Odin," was transferred to the Third Fleet at Chatham, her crew being brought down to reduced nucleus crew complement.

The death has occurred in England of Mr. Henry Mansfield, father of Mr. Bernie Mansfield, editor of the *Egyptian Morning News*, at the age of seventy-four.

The many friends in Egypt of Mr. Percy Ebsworth, formerly of the Egyptian Customs Administration, Alexandria, will be interested to learn that in a recent shooting competition, held under the auspices of the Paignton Miniature Rifle Club, he proved that his hand has lost none of its cunning. In the 25 yards competition he scored 99, the highest notched, and in the 15 yards handicap he took fourth place.

The cruiser "Minerva" left Malta for England last Saturday after two years of almost continual service in Cretan waters. Admiral Sir Edmund Poë, Commander-in-Chief of the Mediterranean, went on board her to pay his farewells.

Mr. Raimondi has been promoted Chief Engineer of Bridges to the Egyptian State Railways, vice the late Mr. Husson.

Apropos of Lord Euston's death, it is of interest to recall that one of his nieces married in 1910 Mr. Charles Robertson, late of the Ministry of Education, Egypt.

The *Egyptian Gazette* states that the rumour printed in some Cairo papers that Harvey Pasha, Commandant of the Cairo Police, was contemplating retirement is untrue.

The *Gazette* announces that Lieut. E. M. Hutchinson has been seconded for service with the Egyptian Army.

The *Gazette* announces that Capt. M. B. Savage, S. Staffs. Regiment, has been seconded for service with the Egyptian Army.

Dr. Abdul Majid, Lecturer to the Colonial Office on Mohammedan Law, has been elected a member of the Old Bailey Bar, by a large majority, on the proposal of Sir Charles Mathews. He is an Indian Moslem, and is stated to be the first non-European admitted to the Old Bailey Bar.

Sir Charles Macara left England last Friday to attend important meetings of the International Cotton Federation in Salzburg, Austria, at which arrangements will be completed for a large delegation to visit Egypt in October in order to study the conditions of cotton-growing in that country. The delegation will meet Lord Kitchener.

An exhibition of water colours, The Near East, comprising views of Egypt, Turkey, Algeria, etc., by Major Evelyn L. Engleheart is now open at the Doré Galleries (35, New Bond Street).

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 3s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

HOUGH.—On May 10, 1912, at the British Vice-Consulate, Jaffa, to William and Margaret Hough—a son.

MARRIAGE.

ADAM—SPENCER.—On April 27, at St. Paul's Church, Nicosia, Cyprus, by the Rev. H. J. Smale, M.A., Reginald Adams, of the National Bank of Egypt, Asyut, to Florence Evelyn, third daughter of the late Archdeacon Spencer and Mrs. Spencer, of Nicosia.

DEATH.

ROYLE.—On the 8th inst., at his residence, William Royle, Esq., of 23, Brunswick Gardens, Kensington, and 7, Bloomsbury Square, W.C., in his 78th year.

THE TRANS-PERSIAN RAILWAY SCHEME.

In last week's issue of THE NEAR EAST reference was made to the Trans-Persian Railway scheme independently by such a shrewd and competent observer as Lord Curzon, and by Mr. George Lloyd, M.P., who is also well informed on Near Eastern and Middle Eastern subjects. The former spoke of the vital consequences, not merely for Persia, but for British dominion in Asia, that must attend the construction of such a line; while the latter discussed at some length the prospects that the project might be supposed to have of realisation. In the same issue we were able to record the actual progress that had been made up to that time in connection with the preliminary stages of the scheme, and in view of the fact that attention has once more been directed in Parliament to the proposed line, it may be well that, acting upon Lord Curzon's advice, the British public should devote more consideration than it has hitherto to this fateful enterprise. The matter is to be entrusted to an international Société d'Etudes, comprising British, French, and Russian groups, which is to deal with the necessary surveys for the line, the possibilities and costs of the undertaking, the concession from the Persian Government, and other matters. There will be, it is understood, a council of administration of twenty-four members, eight of each nationality, while twelve of these will form a committee of directors. The expenditure on the preliminary investigations, which is to be met in equal portions by the three groups, is expected to amount to £90,000. As the result of conferences that have recently been held in Paris the statutes of the Société d'Etudes are supposed to have been agreed upon, and it may be presumed that there will now be no further delay in the final constitution of this body. More than a year has passed since the British Government took official notice of the proposal "in its present form," but Sir Edward Grey assured the House of Commons last week that there was no urgency for a discussion of the project, as it was not yet far enough advanced. Although the Société d'Etudes may not have been constituted in its final form, it is evident that there is already some motive power behind the scheme, for according to a telegram from India an engineer has been at work on surveys for a line from Karachi to Gwadur in connection with the Trans-Persian Railway. Clearly the project is one to be no longer ignored, and it is essential that it should be discussed from every point of view, in order that the British public may not be committed to an undertaking of which it has not realised the full significance.

There are three main points of view from which the Trans-Persian railway scheme can be approached—the international or political, the commercial, and the financial. It may be regarded as an axiom that railways are beneficial to a country, and that their construction cannot be perpetually blocked from selfish motives. Persia stands to benefit greatly from a carefully considered scheme of railway construction, and it is natural that Persians and others with big interests in the land should wish to see its potentialities adequately exploited by such means. As it stands to-day, however, we may regard the Trans-Persian scheme as suspect to the Persians, for the reason that it has been planned, so far as is known, entirely outside the country. To India the proposal at once opens up the gravest questions. British interests demand that we should not unnecessarily weaken the defences of our Indian Empire, and if, from one cause or another, the plan of strategical defence has to be modified, we must see to it that other arrangements are made to place the land in a position as strong as that which it held before. To-day the barren, roadless stretches of south-eastern Persia are a formidable barrier to any military progress towards the Indian frontier. To throw across these the all-conquering steel track would remove at once our outer defences. It is impossible, therefore, that we should complacently build, or allow to be built, a railway line across Persia and imagine that our strategical position was as strong as it was before. On the other hand, commercial interests in India may demand more rapid communication with the Persian markets. So long as no railways exist in Persia Anglo-Indian trade labours under no disadvantages that do not apply equally to its rivals. There is, therefore, no need why the voice of commerce should be allowed to drown at once the warnings of military exigencies. Its insistency may be noted, but time must be allowed to devise a scheme that may meet the reasonable demands of trade without impairing the far more important interests of our Indian Empire as a whole. To Russia the project can only offer unqualified attractions. Her commercial gaze must ever be reaching beyond Teheran to Ispahan and Yezd; and if for the moment her military policy is fully occupied on the extreme west and east of the great Russian Empire it need not be supposed that India has been removed from Russian maps or that dreams are no longer dreamt in the Tsar's army. From the political point of view, then, we see that of the three nations primarily concerned—we may exclude France, whose interests merely as a party to the Société d'Etudes are different—one only has reason to hail the scheme with complete satisfaction. Commercially it can be argued that the interests of Persia, Great Britain, and Russia are identical, and that a project which will promote British and Russian trade in Persia will benefit Persia herself in a corresponding degree. This aspect of the proposed line, however, is closely connected with the third or financial point of view. Railways are built either for purely strategical purposes, when the question of a return on the outlay need not be taken into account, or as a business undertaking, when the potential profits of the enterprise have to be carefully considered. Persia has no need for strategical lines at present, nor is she in a position to guarantee any returns on a railway, however favourably situated in regard to the commerce of the country. Any guarantees that international financiers may require will add to the foreign indebtedness of the Persian Government. It is necessary, therefore, if Persian interests are to be considered, that railway construction should be indulged in as sparingly as possible, and only in districts where the success of the undertaking is assured.

The preliminary activities of the Société d'Etudes will not imply that the construction of a railway across Persia has already been taken in hand. Until this international body of financiers has divulged the results of its investigations we shall not expect to hear of any such line being built without some kind of guarantee. As this cannot be given by Persia, the intervention of the British and Russian Governments is predicated, and we may hope that due consideration will be paid to British Imperial interests. At the same time, Persia stands in need of railways; she is already promised connection with the Baghdad Railway at Khanikin, and it is reasonably certain that Russia will begin the construction of one or more lines in the north. Our interests demand that in that part of the country where we have not surrendered our freedom of action British trade should have the same facilities as its competitors entering Persia from the north or west. As we have pointed out before in these columns, the construction of a railway from Mohammareh, at the north of the Persian Gulf, through Shustar to Khurramabad, has been under contemplation; the line is urgently needed, for it would promote Persian trade as a whole and contribute to the settlement and well-being of the districts traversed. The same reasons that would prompt delay in any scheme for a Trans-Persian Railway, until the proposal in all its bearings has been adequately considered, urge the speedy construction of the Khurramabad line. While, therefore, the results of the investigations of the Société d'Etudes will be awaited with no little interest, we shall hope that a resolute effort will be made to launch a railway scheme in Persia to which no objection can be raised.

THE SANDJAK OF NOVI BAZAAR.

Politics in the Near East depend mainly upon race and geography. It is the object of this short article to show that a small geographical readjustment might have a far-reaching effect.

There are many who believe that the annexation of Bosnia and Herzegovina was not the goal of Austria's ambition, but rather the first step of a forward policy, whose ultimate objective was the port of Salonika. This supposition involves the occupation of the Turkish territory known as the Sandjak of Novi Bazaar, which lies between Servia and Montenegro, and, as an inevitable consequence, hostilities with the last two States. A glance at the map shows that the neighbours of the Austrian Empire are Montenegro and the Sandjak to the south, and Servia to the east. The two Slav States have nothing to hope from Vienna, and nothing to fear from Turkey. The only violent alteration in the map which is likely to occur is the further absorption by Austria of Ottoman territory, which Montenegro and Servia have coveted for many a long day. Austria is thus faced by three opponents, whom she cannot hope to reconcile, two of whom are sentimentally united and geographically divided by the third.

If Turkey decided to cede a strip of the Sandjak to Montenegro and Servia, the Austrian road to Salonika would be blocked by a Slavonic barrier, and an advance of the dual empire to the south could only mean the conquest of Servia and Montenegro. This in itself would not be difficult; but Servia occupies a large place in Russian affections, and the Royal Houses of Italy and Montenegro are connected. Great Britain and France were not benevolent spectators of Count Aerenthal's policy, and would be even less friendly to its continuation. Such a coalition of interests could, however, only come into existence at the price of voluntary cession of territory by the Porte.

The Turk's View.

The chief difficulty of the situation is that concession is not the order of the day in 1912. At home, we have Ulster ready to fight unless the Radical Government, which she abhors, maintains the Union; Ireland, muddled but determined, insisting on a hazy and stipendiary autonomy; while abroad, Crete threatens to embroil Europe unless she is allowed, for a time at least, to participate in the Greek Debt. Italy has annexed a desert that she is unable to conquer, and it is Turkey's implacable intention to wage a war that she cannot win. The Sovereign Peoples will not only have what they think they want, but they will have it in their own way. "Time's glory is to calm contending kings." Unfortunately, Time only adds to the irritation of the confused and contending democracies. In Great Britain the *status quo* is responsible for the *non possumus* attitude of the Unionist Party, and in Turkey the *non possumus* of the Committee is partly answerable for the tottering *status quo*. Stated roughly, the opinion of the average Turk is this:—"Europe wants my country. Russia is my nearest and most formidable neighbour. She waits the opportunity to strangle us. Austria with Germany behind her is greedy, but geographically less dangerous than Russia. The wool merchant and the wolf are unhappy alternatives for the lamb, but if it is only for his profit, the former is ready to safeguard the lamb's life, which the latter is not ready to do. It is better to sacrifice the wool than the life. The heir of to-morrow is less to be feared than the claimant of to-day. Austria and Italy may rob us of our provinces, but the shadow of Russia is over Constantinople."

A Cession of Territory?

These considerations and the axiom that territory can only be conceded through necessity and not for policy have largely influenced the actions of the Porte during the last three years. Has that necessity arisen? and, if such a cession of territory to unite Montenegro and Servia were decided upon, would the external advantages accruing from it counterbalance the internal shock to the prestige of the Committee? Let us very briefly examine this side of the question.

Austria-Hungary has annexed two great provinces, no doubt for the reasons which she gave at the time, possibly, also, because it brings her nearer to the Ægean. This annexation affected the Slavs almost as much as the Turks. Whoever her administrators in the Slavonic provinces may be, Austria is largely a Teutonic empire, and Servia and Montenegro, who desire to link hands, see that with the next Austrian advance they will be separated for ever. If Turkey ceded a portion of the Sandjak, the two Slav States would be joined. It is not in the scope of this article to consider how amicable their future relation would be. This policy would have the merit of making the Slavs the doorkeepers of the Ottoman Empire. It would have the disadvantage of being extremely provocative and of crystallising the opposition in definite camps, in which the protagonists would be Germany and Austria on the one side, Turkey, Servia, and Montenegro upon the other. Though the policy of the Grand Dukes might look coldly upon the ambitions of the two small States, the sympathy of the Russian people would go out to their "little brothers" of the Balkans; while an Austrian occupation of Montenegro might have the curious result of bringing about the recall of the Italian troops to insure the integrity of the Ottoman dominions in another part of the Empire. A combination of interest and sentimental liberalism would throw the weight of France and England into the scales against the Teuton Powers.

The quarrel in the past has been a quarrel between Austria and Turkey, between Mussulman and Christian, between Ottoman and Teuton. The conflict that would result from such a cession of territory by Turkey would be an opposition of Slav against Teuton, of Catholic against Orthodox, and the memories of Old Servia against the German policy of Vienna.

Great Britain and Turkey.

Finally, there are two other factors to be taken into consideration. Great Britain at the present moment stands in a very unsatisfactory position. Her diplomacy has rebuffed the Young Turks; her Press has unfavourably criticised Italy; and, in consequence, her Government is considered unfriendly to both belligerents.

New developments would call for a reconsideration of her attitude by Great Britain and a review of the changes that her interests demand. The factor which is not overlooked, but which is not sufficiently appreciated, is that a spirit of militarism exists in Turkey to-day unknown to the old régime. The Turk was always a fighter, never, perhaps, better than with his fez awry, calling upon the Name of God and snapping mouldy cartridges, out of which the contractor had made his profit. But the best primitive fighter is not equal to the modern soldier; and the Turk to-day is a splendid type of modern soldier. It is of the greatest importance to England, with her millions of Mussulman subjects, to revive her ancient friendship with the Turk.

This article is not an expression of the opinions of the writer, but a necessarily very rough sketch of friends of his of different races in Northern Turkey.

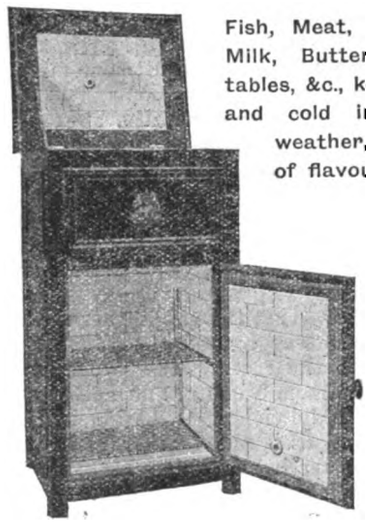
KENT'S
KNIFE CLEANING MACHINES

IMITATED BUT NEVER EQUALLED.

Unsolicited letters state that these machines have been IN USE WITHOUT REPAIR

59 years 1846/1905 in Sunderland,
55 years 1850/1905 in South Wales,
53 years 1853/1905 in Victoria, B.C.



The experience of 60 years enters into the construction of every machine. They save time and labour and do not injure the knives. Prices from 21s.

Over 300,000 in use throughout the world.

Prize Medallists in 1851 and still Supreme in 1912.

All three been in service a long time together.

Fish, Meat, Poultry, Game, Milk, Butter, Fruit, Vegetables, &c., kept dry, sweet, and cold in the hottest weather, without loss of flavour.

SINGLE.

Height, 42 inches.
Width, 22 "
Depth, 20 "

PRICE,
Complete with Wire Basket, Shelves, Pans, &c.,

£12 0 0

CRYSTOPAL CABINET ICE SAFE
LINED WITH OPAL TILES.
SUITABLE FOR MANSIONS.

SCIENTIFIC VENTILATION.—In the Kent Refrigerator the air enters at the top, is deprived of its humidity by the ice, purified and reduced to a low temperature, and then passed through the food chamber and out at the bottom.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

THE NEAR EAST's Oil Editor referred in last week's issue to the suggestion made by M. A. Stefanesco, a well-known Campina (Roumania) oil producer, to the effect that Roumania should organise a "publicity department" with a view to bringing the potentialities of the country to the notice of the foreigner. These potentialities, from M. Stefanesco's point of view, are mainly the oil-producing regions of Roumania, such as Ploesti, Moreni, etc., and as regards these THE NEAR EAST has offered to organise an information bureau if the necessary materials, documents, statistics, etc., are placed at its disposal. This is in accord with one of the objects of this journal—namely, to bring the Near East nearer to Great Britain, and to improve our knowledge—political and commercial—of the countries comprised within that area, their aims and ambitions, their life and their work. Similarly, we are succeeding in improving the commercial and financial relations between those countries and the British Isles.

***

However, beyond the potentialities of Roumania as seen through the spectacles of those interested in petroleum, are those other potentialities equally deserving of our attention and of the attention of British business men. They are not limited to Roumania, but extend throughout the Near East. They are little known to these fog-bound islands, and they stand likewise in need of publicity, of an information bureau that will direct attention to them, and open the eyes of business men to their importance in the general scheme of things. In this respect I make them the same offer that was made to the Union of Roumanian Oil Producers last week. All that is necessary is that we should be in receipt of facts and figures, of data concerning concessions that are available and tenders, of trade returns and trade possibilities, of financial investments and, in a word, of any matters of interest to the United Kingdom and conducive to improved relations between this country and those of the Near East.

***

There is an "apparent misapprehension existing among certain foreign merchants that the Sudan and Egypt are one and the same country, and that it is a simple matter for one agent to supervise business in the two countries. I have only to mention that the distance between Cairo and Khartum is 1,356 miles to show *the practical impossibility* of this, and beg to urge upon those firms doing business in the two countries the necessity of having an *agent in the Sudan* as well as in Egypt."—Mr. H. S. Job, president of the Sudan Chamber of Commerce.

***

The Riga-Kherson Shipway, to which our Odessa correspondent draws attention in the Engineering columns of THE NEAR EAST, is one that has always attracted, by its very boldness, the imaginative and speculative mind, but it is a long way from being realised, I think—as remote, in fact, as the Seine-Rhone Shipway. Nevertheless, it is worth while emphasising the point that our Odessa correspondent thinks the moment opportune for the old-time British syndicate to renew its attempt to obtain the concession for the construction of the canal. It is to be hoped, from an industrial standpoint, that its efforts, if made, will meet with success.

***

The Egyptian Department of Agriculture is losing no time in justifying its existence, and the pamphlet published in Arabic on the insect pests of the cotton plant for the use of Kuttabs will be a powerful factor in disseminating useful information amongst the fellaheen. It is written in dialogue form, the form most readily assimilated by youths, and pictures Hassan, the intelligent boy, destroying the superstitious and erroneous ideas of Mohammed, the son of an unprogressive farmer.

***

Our trade with Turkey, as has been pointed out in THE NEAR EAST, constituted a record last year, and, due allowance being made for the effects of the war, will, it is to be hoped, hold its own this year in order to create another record in 1913. Looking facts squarely in the face, it cannot be denied that the institution of banking facilities in the larger ports and towns of the Ottoman Empire has been principally conducive to the trade renaissance in the Near East, because it is well known that trade nowadays can only permeate where such facilities exist. In this respect the Imperial Ottoman Bank, with its Turkish branches continually being added to, has achieved results coincident with the increase of British trade, and the efforts of the London office and its Manchester branch to realise such results in conjunction with an organised commercial department must be taken into account when dealing with the renaissance alluded to. Not to do so is tantamount to the omission of one of the important factors in the commercial revival of the Ottoman Empire. I do not wish to be misunderstood: I do not detract from the value of the other factors, but I do consider that recognition must be paid where recognition is due, and this is a case where it is due.

***

"While it may be said that the moment is hardly propitious for the outlay of capital in a country (Turkey) which is in the throes of war, *there is no doubt that there will be a boom in trade* with the cessation of hostilities, and those who are *already on the spot* and have completed their organisation will be the ones *to reap the benefit.*"—(Report of the British Chamber of Commerce of Constantinople.)

***

"A British Merchant," writing from Smyrna a few weeks ago, reproves me for sneering "at British Consular work in order to crack up a brand-new U.S. service." The imputation is entirely unfounded, and what is more, cause and effect have been hopelessly confounded by the correspondent, considering that I referred to the "go" of the Americans in order to encourage Britishers to imitate, when advisable, America's consular system.

***

Our system, admittedly, stands in need of reform. This was understood some years ago, and an attempt made to rectify it. Though as a result of the campaign some minor improvements were introduced, the root of the evil remains the same. To lay the blame at the door of the British Government, as done by "A British Merchant," seems plausible, but does it bear scrutiny? It is rather our national indifference to things foreign, our conservatism in the face of changing circumstances, our blindness to the *mutatio rerum*, that make us abide by a system that is antiquated and bound in chains not only to a past, but also to the exigencies of tradition. The Americans and Germans are freer from these fetters, and they can, and do, forge ahead.

***

The nation itself, or rather that important section of it which lives by trade, must "wake up" and urge upon the Government (each nation has the Government it deserves) to take action. It is admitted that we should never have been faced with Home Rule in 1912 had not the present Government been compelled to "toe the line," and similarly the nation must, if it thinks that reform is necessary, oblige the Government to reform our Consular Service. The organisation of a Consular Reform League among British business men would be a first step, and a most welcome one, but, as stated, it must be created by the nation.

***

Is it significant of the times that, as reported on another page of THE NEAR EAST, Great Britain's imports into Egypt during March, 1912, should have substantially decreased as compared with 1911, whereas German imports into Egypt showed a substantial increase? Apropos, it is not generally known that German exports of electrical machinery to Egypt have increased 320 per cent. since 1907, whereas Great Britain's have only augmented 45 per cent. At the above rate of progression Great Britain will soon be ousted from her premier position within the next five years.

***

Eight tenders were received for the supply to the Egyptian State Railways of oak and pine sleepers, and the contract has been divided amongst Messrs. The Commercial and Estates Company of Egypt, William Christie and Co., Limited, of London, and Toussom Bey Alaily and Co., of Alexandria.

***

A petition has been addressed to Lord Kitchener by prominent proprietors and inhabitants of Shoubra, Cairo, for the removal or reconstruction of the bridge leading from the Cairo Station across the lines to the Shoubra quarter. According to the petitioners they have addressed the Government on the matter, but have received no satisfaction. I certainly agree with them that both the incline and the narrowness of the bridge are a source of danger, requiring some remedy. Whether that remedy will be as radical as proposed by the petitioners remains to be seen, but at any rate it is to be hoped that its result will be to render one of the ugliest of Cairo's bridges more æsthetic.

***

One of the remedies proposed is the suppression of the lines—consequently the disappearance of the bridge—by the removal of the Embaba Bridge and the railway workshops to the north of Cairo. This is a gigantic scheme, and though the latter part will perhaps be realised some day, it will hardly be undertaken with the sole object of eliminating the Shoubra Bridge. In the meantime some other means will have to be devised for facilitating traffic on the bridge, and perhaps some British engineer will come forward with an acceptable (and likewise artistic) scheme.

COMMENTATOR.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - - £1,500,000.
Paid up Capital - - 500,000.
Reserve - - - - - 640,000.

The Bank undertakes every description of Banking Business on most favourable conditions.

BANK OF ATHENS.

(Incorporated in Greece.)
CAPITAL FULLY PAID - - Dr60,000,000
RESERVE FUNDS - - Dr10,480,000
Head Office: ATHENS.
London Office: 22, Fenchurch Street, E.C.
Branches:

GREECE: Piræus, Patras, Syra, Calamata, Tripolitza, Volo, Larissa, Agrinion and Carditza.
CRETE: Canea, Candia and Rethymo.
TURKEY: Constantinople (Galata, with Agency at Stamboul), Samsoun, Trebizonde, Kerassunde, Bafra, Mersina, Smyrna, Adana, Tarsus, Salonica, Serres, Cavalla, Xanthi, Janina, and Chio.
EGYPT: Alexandria (with agency in the quarter of Midan), Cairo (with agency in the quarter of Mousky), Zagazig, Mansourah, Mit Ghamr, Tantah and Beni Souef.
SUDAN: Khartum & Port Sudan. CYPRUS: Limassol.
HAMBURG: Domhof, Mönckebergstrasse 13.

Special facilities for Banking, Exchange and Commercial Business of every description with Greece, Egypt, Turkey, Crete, Cyprus and the Levant generally. Most favourable rates for Deposits, Collections, Cable Transfers, &c., on application.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - - £850 000
RESERVE - - - - - £210,000
Reserve Liability of Shareholders - £1,000,000

London Office: 25, Abchurch Lane, E.C.
Chief Office in Persia: Teheran.

Branches at Ahwaz, Bushire, Hamadan, Isfahan, Kazvin, Kerman, Kermanshah, Meshed, Mohammerah, Nasratabad, Resht, Shiraz, Tabriz and Yezd.

The Bank is prepared to transact Banking business of every description in and connected with Persia; and in London grants Drafts, Telegraphic Transfers, and Letters of Credit, and negotiates or collects Bills on Persia.

IONIAN BANK, LIMITED.

INCORPORATED 1839.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, May 10.

The Opening of the Dardanelles.

While it was hoped that a passage in the Straits would be cleared by to-morrow (Saturday), in view of the strong winds recently prevailing there is every likelihood of still further delay before the channel can be declared open to shipping. In the meanwhile the harbour authorities have been busy in preparing a list of the ships waiting to pass out of the Dardanelles and the sequence of their sailing in accordance with the dates of their arrival at the Black Sea mouth of the Bosphorous, and instructions regarding their departure and passage of the Dardanelles have been issued. Each steamer has been given a sailing number, and vessels will leave in groups of four with intervals of half an hour between each group. There will be a stoppage of two hours after the departure of each twenty vessels, so that sixty vessels will pass out of the Straits each day between 8 a.m. and 6 p.m. A speed of 4½ knots is to be maintained between Constantinople and Gallipoli, so that the first group leaving Constantinople at 8 a.m. will arrive off Gallipoli at about daybreak the following day, and each steamer and group of steamers will pass through the Dardanelles in the order of sailing from Constantinople. A steam launch of the prefecture of the port will prevent steamers from getting under way before the time fixed for departure, and firmans (permits) to pass the Dardanelles will be received in order by a warship stationed off Gallipoli. There are now some 210 steamers awaiting passage outwards, of which just over a quarter are British. Upon the basis of the regulations outlined above, it will take four days for these vessels to pass the Dardanelles, and vessels beyond the Straits, estimated at 100, will not be allowed to enter until all those now detained have passed out. I understand that before any foreign steamers pass through the channel to be opened, a laden Turkish transport will be towed through to test the safety of the passage.

Who is to Pay the Piper?

With the prospect of the Dardanelles being shortly opened to imports, the local Chambers of Commerce are seriously considering the question of refused goods, of which agents are already having a foretaste. In some cases goods have been discharged at Dédéagatch, warehoused or sent by rail to Constantinople; in a few cases they have been discharged at the nearest port at the receivers' risks, and in a few others have been carried homewards to a Mediterannean port and then back to the Dardanelles. However, the questions of liability for increased freight and charges and late delivery of season goods are amongst those likely to give very serious trouble to shipper and agent alike. One large and respectable dealer, on being approached by a shipping company for definite instructions within twenty-four hours for the disposal of his goods, took his five bills of lading back to the manufacturer's agent and said that he was buying goods delivered at Constantinople, and refused to consider any responsibility until the goods reached here, and, further, that if they did not arrive in fifteen days, being summer goods, he would absolutely decline delivery. I fear many shippers will be between the devil and the deep sea; for if they take action against the consignee, it may be taken for a certainty that the verdicts will be given against them; while if they dispose of the goods by auction they will realise considerably less than the invoice value, as is always the case; and however objectionable the advice may be, and even open to abuse, leniency would appear to be the only alternative. In this case the necessity for absolutely reliable representatives, so often emphasised, is clearly evident. Woe betide the many manufacturers who are represented by tricky opportunists.

Treasury Receipts.

The Treasury receipts published for the eleven months ended January (old style) of the financial year 1327 (ended February 28, 1912 new style) give a total of £T25,629,078, as against £T23,668,590 for the same period of the previous year, being an increase of £T1,960.488 over the previous year. These receipts represent 99.73 per cent. of the budgetary prevision for the year 1327, while the receipts of the previous year at the same date represented 97.84 per cent. of the budgetary previsions for that year.

Railway Traffic Receipts.

The traffic receipts of the Anatolian Railway for the first fifteen weeks ended April 14, of the present year, on the Haidar Pasha-Angora line are 14,112 frs. per kilometre, as against 11,336 frs. for the same period of the previous year, and on the Eski Chehir-Konia line are 9,637 frs., as against 8,476 frs. for the corresponding date of the previous year.

The total receipts of the Oriental Railway for the seventeen weeks ended April 28 of the present year are 4,781.342 frs., as compared with 4,220,556 frs. for the corresponding period of the previous year.

Public Works in Mesopotamia.

It is stated that the Government has approved a project of the Governor of Baghdad for the construction of six large bridges in this province, three across the Euphrates, two across the Tigris, and one across the Dyala, at an estimated cost of £T500,000, to be raised by a loan on an appropriated annuity of £T40,000 for public works in Mesopotamia. The Ministry of Public Works has been invited to undertake the negotiation of a loan for the vilayet of Baghdad.

The Soma-Panderma Railway.

The construction of this branch-line, which is to connect Soma on the Smyrna-Cassaba line with Panderma in the Sea of Marmora, is being pushed on with activity. The first section of 35 kilometres from Soma to Karadjalar is to be inaugurated this week. It is expected that the next section to Balikeseer will be ready by the end of August, and the whole completed before the end of the present year.

TURCO-GERMAN TREATY.

The extension of the German treaty of commerce with Turkey of 1890, and of the annexed supplementary convention of 1907, for a period of two years, assures the continuance of the Customs duty of Turkey at the present rate until June 25, 1914, as provided for by the 1907 convention of the capitulatory Powers. By that convention the rate of the customs duty in Turkey was raised from 8 to 11 per cent. ad valorem, and the 3 per cent. increase was to remain in force until 1914. Germany, however, had a treaty of commerce with Turkey which was due to expire in 1912, and in accordance with certain provisions of that treaty, Germany did not sign the general convention of the Powers, but made a special convention with Turkey consenting to the increase of 3 per cent. in the Customs duties until March 13, 1912. By the present extension Germany agrees to the continuance of the 3 per cent. increase until 1914, writes Mr. Rockhill, the U.S. Ambassador in Constantinople, in the *Daily Consular Reports*, and unless Germany had made the present extension of her treaty the 3 per cent. increase in duties would no longer have been applicable to her imports.

CHAMBER OF COMMERCE REPORT.

We reproduce the following paragraphs from the annual report of the British Chamber of Commerce of Turkey, to which reference was made in last week's issue of The Near East.

Public Works.

There is an evident desire to undertake works of public utility, particularly in the construction of roads, railways, harbours, irrigation works, and electric lighting and traction, and with the appointment of Djavid Bey to the Ministry of Public Works it is expected that we shall see more activity and encouragement of foreign capital in this department than has been evinced in the past, and the realisation of some of the many schemes for the much-needed economic development of the country. It is a pleasure to welcome certain important British houses who have established offices in this country, with the view of taking a share in the undertakings which are to regenerate the empire, and we trust to see other commercial and industrial houses follow their example. While it may be said that the moment is hardly propitious for the outlay of capital in a country which is in the throes of war, there is no doubt that there will be a boom in trade with the cessation of hostilities, and those who are already on the spot and have completed their organisation will be the ones to reap the benefit.

Government Tenders.

Our idea of organising an intelligence bureau with the object of acquiring early information regarding Government tenders has for the present not been realised, owing to the lack of means at our disposal to meet the necessary expenditure. We are under the impression, from what we have been told, that firms and individual furnishers who are in constant relations with the various Government departments, receive intimation of certain requirements long before the official notices are given to the Press, and as the delay for receiving tenders is often inadequate for correspondence with home firms, they are able to tender when it is materially impossible for others to do so. It would certainly tend to a larger number, and possibly to more advantageous tenders being put in, if a longer time were allowed for the adjudication than is the case at present.

The British Post Office.

One of our recommendations submitted to the Postmaster-General was the entire suppression of the Liverpool route for parcels to Constantinople. This the Postmaster could not see his way to adopting, as 54 per cent. of the parcels are marked by the senders to be sent by this route. On the other hand, as the despatching of parcels is often left entirely in the hands of an office boy, or perhaps to the postal clerk, for the paltry saving of a few pence, bulky samples which reach here from Germany in seven days may take, if despatched viâ Liverpool, nearly as many weeks to arrive from Great Britain ("viâ Constanza" they reach Constantinople in seven days). We believe much annoyance would be saved by the suppression of the slower route, without objection being made to the slightly higher rates. It also appears to us to be an anomaly not to be able to send parcels viâ Constanza to Great Britain when they can be received by this route.

Membership.

In answer to an appeal made to all business men in Turkey and to those in the United Kingdom and elsewhere having business relations with Turkey and Great Britain for that support which is indispensable if we are to attain the objects we have in view, the Board is able to report that it has received the support of some sixty-four new members during the year, and a further twenty-two since the close of the year, of this total seventy having joined in response to our appeal. This number is really insignificant considering the hundreds—nay, thousands—of British firms doing almost one-third of Turkey's import trade, when compared or contrasted with the support extended to like institutions of other countries.

Openings for Business.

CONCRETE BLOCK MACHINERY.

It would appear from the report published in the *Daily Circular Reports* by the United States Consul at Beyrout, Mr. Hollis, that there is an opening for concrete-block machinery in Syria.

"A French concern which has been very successful in introducing its concrete-block machines first sent one on approval and gave the consignee one year to pay for it, provided it was acceptable to him; and not only was the importer of this particular machine pleased with it, but he considered it so useful that he ordered four more. This French company is in a fair way to capture a great part of Syria's trade in these machines, and if the American concerns which have at different times written to this office asking its assistance in the introduction of their machines really wish to obtain a foothold here it will be necessary for them to follow the plan of this successful French firm. There is undoubtedly an excellent field in Syria for the sale of these machines."

In conclusion, the Consul points out that the American-Syrian Chamber of Commerce, Beyrout, is in a position to secure a goodly share of the orders for these machines for American manufacturers provided the said manufacturers will follow its suggestions, which are that a complete machine, together with all the necessary moulds, be sent to the chamber for exhibition."

The advice seems to us opportune, and might advantageously be followed by British exporters of concrete-block machinery.

INDUSTRIAL EXHIBITION.

The Union Panhellénique des Associations de Production is organising an exhibition of silk culture and of the silk industry, which will be opened at Athens on the 19th inst., according to the *Moniteur Officiel du Commerce*. The exhibition is under the patronage of his Majesty, the King of Greece, aided by and under the control of the Minister of Agriculture, Commerce, and Industry. It will comprise an international section, where the machines and material used in the culture of silk and in the silk industry will be displayed, together with samples of raw, twisted, and worked silk, also silk material and articles.

The exhibition will last officially one month. Exhibits from foreign countries enter free of customs and transit dues. Space is granted free to the extent of three square yards.

Further particulars can be obtained from la Commission organisatrice de l'exposition de sériculture et d'industrie de la soie (Académie industrielle et commerciale, place Kaning, Athens).

ROUMANIAN GOVERNMENT CONTRACTS

The American Minister at Bucharest (Mr. John B. Jackson) reports that bids are invited by the Roumanian Government for the following supplies: (1) The Director of the Hydraulic Service of the Ministry of Public Works desires proposals to supply the needs of that service for the fiscal year 1912-13. About 96,000 fr. will be available for the purchase of copper, wire, nails, iron, steel, cord, electric lamps, brick, etc. (2) The Ministry of War invites bids for considerable quantities of pyrotechnic supplies of various kinds, electric carbons, lamps, etc.

TOWN HALL IN ROUMANIA.

The *Zentral Anzeiger fuer das oeffentliche Lieferungswesen*, Vienna, notifies that the municipal authorities of Craijova have decided to erect a new town hall in that place at a cost of £52,000.

THE SHOE TRADE.

According to the *Bulletin Commercial*, Brussels, there are good openings for boots and shoes in Roumania, especially in the district of Galatz. Prices should, however, be moderate. The forms preferred are the French "pointed toes" and the American "broad toes." Men's better quality boots fetch 12s. to 20s. a pair, and ladies' 8s. to 16s. a pair. In order to promote business, it is important to have a good agent on the spot.

PACKING MATERIAL FOR PALESTINE.

In connection with our remarks last week pointing out the fact that, though the United Kingdom "buys yearly three-quarters of the Jaffa orange crop, the material used by the cultivator in packing his oranges is imported from all countries excepting England," we quote the following from the *Handelsmuseum*, Vienna: "There is at Jaffa a considerable demand for packing paper, which is used in the shipment of oranges. In 1910 the value of the importation reached £6,400. The article was to a great extent supplied by Sweden and shipped through the intermediary of Hamburg agents. The packing is usually made up in bales and supplied at about £2 f.o.b. Jaffa. Owing to the steady growth in the export of oranges from Palestine, requisitions for this material are likely to increase."

BUCHAREST MUNICIPAL LOAN.

With reference to the above loan, sanctioned by the Roumanian Legislative Assembly on April 21, and frequently mentioned by us, the British Acting-Consul at Bucharest, Mr. L. Schondorf, has now furnished the following details of the works to be carried out under the Act:—Continuation of the canalisation and sewerage, £240,000; building and furnishing the Municipal Palace, besides the £80,000 granted by the State, £120,000; reconstruction of the water filters, £100,000, complete installations of motor power required for different public services, £60,000; construction of schools, markets, etc., £120,000; completion and construction of slaughterhouses, £100,000; paving and opening new thoroughfares, etc., £200,000.

CANDLE TRADE IN SMYRNA.

The *Bulletin Commercial*, Brussels, states, on the authority of the Belgian Consul at Smyrna, that there is an excellent market for imported candles there, about 55 per cent. of which are supplied by the Netherlands and France. The article mostly in demand is a small white candle, of medium quality, which sells at from 100 to 108 francs per 100 kilogs. Common candles fetch 92 francs per 100 kilogs., and come for the most part from the Netherlands. There is a more limited market for better quality candles, which come from France, and are sold at from 127 to 130 francs per 100 kilogs. Packing is usually done in cases of from 50 to 60 kilogs, and the boxes usually contain four, five, six, or eight candles, according to the wishes of the customer. Packing cases should be of material stout enough to withstand long journeys and a considerable amount of handling. Those who have succeeded in building up a trade have done so through extensive advertising, periodical visits by their travellers to Smyrna, and the sale of a good, serviceable article.

EGYPTIAN STATE RAILWAYS.

The Council of Ministers sanctioned at a recent meeting the addition of £E55,000 to the budget of the Egyptian State Railways for buying rolling-stock, and £E20,000 for the building of a line between Ziftah and Zagazig.

TENDERS INVITED.

EGYPT.

Supply of Uniforms.—Tenders invited by the Director-General, Ports and Lighthouses Administration, for the supply of uniforms required during the years 1913, 1914, and 1915. Date, June 28.

Purchase of Old Materials.—Tenders invited by the Egyptian Delta Light Railways, Limited, for the purchase of the undermentioned materials that may accumulate during the year ending June 30, 1913, at Damanhour, Tantah, Mit Ghamr and Saida Zenab Stores:—Scrap cast iron; scrap wrought iron; iron and steel turnings; old tyres, axles, and steel; burnt iron castings; steel files, secondhand; empty oil barrels; empty oil drums; empty petroleum tins. Separate quotations should be given for each item. Tenders must be submitted to Chief Storekeeper, No. 15, Rue de la Gare du Caire, P.O. Box 261, Alexandria, from whom any further particulars of the conditions under which contracts will be placed may be obtained. Date, June 15.

Supply of Boots.—The Postal Administration invites tenders for the supply of about 800 pairs of boots, half the quantity to be delivered by March 31 and the balance by September 30, 1913, under the usual conditions which apply to Government contracts. The specification may be seen at the Central Postal Stores, Alexandria. Tenders should be addressed to H. E. the Postmaster-General, Alexandria, under double cover, the inner being endorsed: "Tender for the supply of boots." Date, July 15 (noon).

Supply of Mail Bags.—The Postal Administration invites tenders for the supply of about 10,000 mail bags of various qualities and sizes to be delivered between January 15 and 31, 1913, under the usual conditions applying to Government contracts. Copies of the specification, together with samples of the bags required, may be seen at the Central Postal Stores, Alexandria. Tenders should be addressed to H.E. the Postmaster-General at Alexandria, under double cover, the inner to be endorsed: "Tender for the supply of mail bags." Date, July 15 (noon).

TURKEY.

Electric Tramway Concession.—Tenders will be received at the Ministère des Travaux Publiques, Constantinople, for a concession for the construction and working, during a period of sixty years, of a system of electric tramways in the Asiatic part of Constantinople and its suburbs. Deposit of £T5,000 required. A copy of the *cahier des charges* (in French) in connection with this concession may be seen by British contractors at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C. [Note.—Local representation is practically indispensable.] Date, June 15.

ROUMANIA.

Supply of Gloves, Cartridge Pouches, Carbine Belts, and Bayonet Belts.—Tenders invited at the Ministry of War for the supply of 3,000 pairs of gloves in brick-red wool, 1,500 pairs ditto in brick-red cotton, 200 infantry cartridge pouches, 300 carbine belts, and 300 sets of bayonet belts. Date, May 29.

Supply of Absorbent Wool, etc.—Tenders invited at the Ephorie des Hôpitaux Civils, Bucharest, for the supply of 27,000 packets of absorbent wool, etc. Date, June 1.

BULGARIA.

Supply of Turpentine.—Tenders invited at the offices of the Administration des Finances du District, Sofia, for the supply of turpentine for the use of the Bulgarian State Railways. Etsimated value, 7,000 frs. Date, May 27.

Supply of Postal Vans.—Tenders invited for the supply of six postal vans. Estimate, 120,000 frs. Apply, Offices of the Administration of the Finances of the District, Sofia. Date, May 30.

MALTA.

Coal.—Sealed tenders are invited at the office of the Receiver-General and Director of Contracts, Valletta, for the supply of coal to the Maltese Government Departments during the year 1912-13. Tenders are to be accompanied by a deposit of £100. If the tenderer does not reside in Malta his tender must contain the name of a person residing in the island, to whom power must be given to represent the tenderer. Copies of the specification and form of tender may be obtained on application to the Crown Agents for the Colonies, Whitehall Gardens, London, S.W. Date, May 23 (11 a.m.).

Engineering Notes.

A PROPOSED WATERWAY.

(From Our Own Correspondent.)
Belgrade, May 5.

An Important Project.

The economy in transit of merchandise by water as compared with the cost of carriage by rail needs no comment; and for a country like Servia, having no seaport and lying inland, water carriage is of an inestimable advantage. The Servian Government has under consideration a project for making a river port on the lower Danube near Negotin, and is constructing railways traversing the country in various directions from that point, but partial conveyance by rail remains expensive. There exists, however, a superior project, which a few years ago was brought before the Servian authorities, was later feebly revived, and is now again spoken of.

The Proposal.

The scheme referred to is to connect the Ægean Sea with Central Europe by a waterway, utilising two rivers for the purpose. Five years ago an American syndicate made thorough investigations and drew up plans, spending £2,000 in preliminary expenses, and were about to form a public company when the Macedonian troubles caused them to abandon the scheme. Three years later the same idea was taken up by some English contractors; but, through lack of energy, no progress seems to have been made. To-day the subject has again come to the front.

The River Morava has its source near Uskub, passes through the whole length of Servia, and flows into the Danube near Semendria, to the south of Hungary. The River Vardar springs from a point also not far from Uskub, and flows through Turkey, emptying itself near Salonika, in the Ægean Sea. The connection between these two rivers is simplified by two small rivers in the plains of Uskub, the Bukovitza, which flows into the Morova, and the Chinija, which flows into the Vardar; and all that requires doing is to make a canal of 20 kilometres in length through a plain which divides the two smaller rivers. The length of each of the rivers is from 320 to 350 kilometres.

A Chance for England.

For works of this description British engineers and contractors enjoy in Servia, as elsewhere, the highest reputation, and the Servian authorities would gladly avail themselves of any solid British combination for executing such an important and useful enterprise. And such a waterway from the Ægean Sea to Central Europe should interest Great Britain on account of her being a maritime Power, as by this water route she would gain great facilities, counteracting the great advantage Germany possesses through railway facilities in Central Europe, and thus enable Great Britain to compete successfully with Germany and other countries.

Natural Features.

The natural characteristics of the two rivers in question are that their sources lie close together, they run in opposite directions, the one to the north and the other to the south, without any large bends, quite unlike the Danube and many other rivers. Another interesting point is that the source of both rivers is not more than 112 metres higher than the sea, and that they flow steadily and slowly without any rapids.

Hundreds of years ago, probably, if the Arabs, instead of invading Spain, had been able to take possession of the Balkan Peninsula the waterway connecting these two rivers might have been constructed. The Romans, who in ancient times were masters of these parts, sought only roads for military purposes. Having no commercial aims, they did not occupy themselves with the construction of canals. After the fall of the Roman Empire these districts were the prey of barbarous nations. Later, when the whole of the Balkan Peninsula fell into the hands of the Turks, their neglecting to utilise the two rivers and to construct a continuous water route may be accounted for by their being, like their predecessors, a military nation bent on conquests, and requiring only military roads.

Financial Aspect.

According to the statistical and economical studies made by the American syndicate previously referred to, the probable cost of the project of this waterway from the Ægean Sea to the Danube, south of Hungary, was estimated at £2,500,000, and it was considered that the transit of merchandise in the first years would yield an income equivalent to 6 per cent. on the capital expended, and later on would produce 15 per cent. or more.

As regards the importation from England of rice, coffee, spices, and other colonial produce, it may be remarked that shipments from England for Central Europe now made via Trieste, Galatz, etc., would be superseded by the new route, for instead of taking twelve days from the Ægean Sea through the Bosphorus and then up the Danube by making use of the rivers connected by means of the canal, one-fourth of the time only would be required, thereby acquiring not only a considerable gain in time, but also effecting an immense economy in the consumption of coal.

THE RIGA-KHERSON SHIPWAY.

(From Our Own Correspondent.)
Odessa, May 12.

In the same way as the abrogation of the Russo-American Treaty of 1832 gave an immediate impetus to the project of such an extension of cotton cultivation in Turkestan as will eventually render this country absolutely independent of the foreign-grown commodity, the temporary closing of the Dardanelles, and the consequent ruinous paralysis of Russia's Black Sea trade, has very actively revived the long-contemplated scheme of connecting the Baltic and the Euxine by a ship canal from Riga to Kherson.

The route of this proposed waterway has several times been surveyed by expert engineers, all of whom agree that there is no physical difficulty in the way of its construction. A considerable section of the suggested route lies through inland lakes, where the fairway would be very easily dredged to the required depth. Some ten years ago a British financial group had the route surveyed by its own engineers, and overtures were made to the Imperial Government for the cutting of the canal. For some reason or another the concession sought was not granted. Now, however, the leading organs of the Russian Press are urgently advocating the construction of the Riga-Kherson shipway, and the scheme, it is credibly stated, is being seriously considered in ministerial circles.

If the Crown be not in a position, for financial reasons, to undertake the work, the time would appear to be favourably opportune for the British syndicate referred to, or some other British group of capitalists, to renew its pourparlers at St. Petersburg with the view of obtaining the important concession; and there can be little doubt that, if the construction of the canal be resolved upon and if foreign aid is to be enlisted for its achievement, preference will be given to an acceptable British offer.

HARVESTERS FOR DARDANELLES

The cereal crop in the Dardanelles district of Turkey was very good last year, being about 40 per cent. above that of 1910. Ten sheaf-binding harvesters and twelve reaping machines of Canadian origin were sold in the Dardanelles province last year, and, according to a Consular report, there might be an opening for more of these machines if a representative or commercial traveller would visit that district.

Near East Oil Notes.

LONDON, May 16.

Galician Combine.

A big oil combine is being talked about which is to include the Premier Oil and Pipeline, the Alpha Petroleum Company, the Central Carpatnian Oil Company, and the Amalgamated Pipelines of Galicia. We have at various times written about these companies, all of which are trading in Galicia. The Premier Oil and Pipeline Company has its own pipeline to Boryslaw, and is a steady dividend payer. Its chairman is Mr. E. T. Boxall. The Central Carpathian is also under the chairmanship of Mr. Boxall, is a dividend payer, and works in the districts of Tustanowici and Truskawic. The Alpha Petroleum, another of Mr. Boxall's companies, has wells at Tustanowici, and was formed in February last year. Three of its properties are producing. Amalgamated Oil Pipelines has a controlling interest in six of the eight principal oil transport and storage companies in Boryslaw and Tustanowici. It was founded in May, 1911. Mr. Boxall is on the board, and Mr. Lincoln was instrumental in arranging the business. These four companies have a total issued capital of £2,085,000, and as it is expected that other concerns will join in, we may get a very big promotion. The amalgamation is to be carried out on the basis of taking Premier Oil and Pipelines at 27s., Central Carpathians at 15-16, Amalgamated Oil Pipelines of Galicia at 15-16, and Alphas at 10s. There is a good market in both Premier Oil and Pipelines and Central Carpathians, but the other shares are not dealt in to any large extent. It is stated semi-officially that the Deutsche Bank will interest itself in the promotion, and will have a representative on the board.

Roumanian Combine.

The big Roumanian combine, of which THE NEAR EAST was the first to give particulars, has now been registered with a capital of £1,750,000, of which over £950,000 will be available for working capital. This is one of the biggest oil deals that has ever been handled in Great Britain, and it will take over five British oil companies now operating in Roumania. The first directors will be Mr. Barnett, Mr. Rutherford, Mr. Quilter, Mr. W. W. Rutherford, M.P., Mr. W. Smellie, Sir Henry Blake, and Mr. W. H. Plewman. The prospectus should be out very shortly.

The Barnett and Allen group are also arranging a deal with the General Oil and Finance Corporation, by which the two companies will amalgamate. The new corporation will have an authorised share capital of £600,000, and the General Oil and Finance shareholders will receive three shares in the new company for every four now held. The shareholders in the General Oil and Finance will receive one share 12s. paid in exchange for each share 5s. paid in the present company, and one share fully paid will be given for every two deferred shares in the present company. As there are some shares 15s. paid in the General Oil and Finance, each holder of these shares will receive three £1 shares in the new company 13s. 4d. paid in exchange for every four shares 15s. paid. It is also proposed that the ordinary shareholders of the Oilfields Finance Corporation shall pay 1s. 4d. per share when claiming their 12s. paid shares in the new company. The secretary states that apart from investments and cash in hand, the new company will thus have an uncalled capital of over £100,000, whilst 225,000 shares will be available for additional working capital. General Oil and Finance has properties and interests in Taman, Kertch, Anapa, Mexico, Trinidad, and elsewhere, but as it is short of money, it has not been able to fully develop any of its properties. Oilfields Finance, as everyone knows, has been a phenomenally successful undertaking under the management of Messrs. Allen and Barnett.

Kuban Black Sea.

Kuban Black Sea send out a notice that they have received a cable from their managing director that their well No. 1 spouted three times last Friday and Saturday, and that the last spouting gave clean oil of 900 specific gravity. This is considered very satisfactory. Kuban Black Sea is under the control of the Anglo-Maikop Corporation, is in the Tweedy group, and owns about 400 acres in the province of Kuban. It was formed in March, 1911, and has now got several wells down whilst others are being drilled. Well No. 2 is down 714 ft., and should, therefore, very shortly strike the oil horizon, from which No. 1 well spouted at 749 ft. Apparently, the country is not particularly easy to drill in, for the stratum is composed of gravel boulders and hard oil sand. The diameter of well No. 1 was twelve inches. It is not very clear whether the latest telegram refers to the oil horizon at 749 ft., or whether they have shut down this horizon and sunk the well to a lower depth, because in February last the manager decided to deepen this well.

Anglo-Egyptian.

Within a few days the Anglo-Egyptian will distribute its shares to the shareholders in the Red Sea Oilfields and Egyptian Oil Trust. This should create a certain amount of activity in both these shares, and consequently some attention has been paid on the Stock Exchange to these companies working in the same group—namely, the Suez Oil Company and the Eastern Petroleum Company. Eastern Petroleum Company has an issued capital of £84,750. It has rights over the Jubal Islands, an interesting proposition about which we have previously written, but which appears to us to have one drawback—namely, that there is only a single oil horizon. It also holds 60,000 shares in the Suez Oil Company, which, according to a little map published by the authority of the company, has apparently the right to bore under the sea off the Gulf of Jemsa. How far it would succeed in this somewhat difficult undertaking we cannot say. But it also possesses two blocks to the south of the Red Sea Oilfields on the coast of the Red Sea. There are wells in California sunk below the level of the waves, and there is no reason why, if the sea is calm, one should not obtain oil from the depths of the Red Sea. But the operation is expensive. The Eastern Petroleum holds a controlling interest in the Fersan Islands Oil Company, which have been inspected by Mr. Stokes, who found oil flowing in eight of ten places. He believes that these oil springs will prove spouters. We do not know upon what Mr. Stokes bases his opinion, but there are many places in the world where there are oil springs, and it does not at all follow that because there is an oil spring that there must necessarily be a spouter. On the contrary, we should imagine that where oil bubbles up from the ground it is a sign that there is a water pressure underneath, and not a gas pressure. Oil is a curious phenomenon, of which we know very little either as to its occurrence or its probable quantity. We do not wish to throw cold water on the Fersan Islands, but in our opinion very strong seepages of oil are rather against a large quantity of oil being found than in favour of it.

SUDAN NEWS.

Cattle Plague.

Progress in dealing with the outbreaks mentioned last month in the Blue Nile and Kassala Provinces has been satisfactory. Disease has been reported from Sennar Province. The outbreaks, however, have been dealt with as notified.

Shipping Rates.

As a result of the coal strike, the Clan, Ellerman, Harrison, and Temperly lines have increased their rates from Port Sudan by 10 per cent.

Road Building.

The road from Kaka to Um Einegba, in the Upper Nile Province, is now completed, and the Arabs are very pleased at getting a direct route. Clearing was extremely difficult owing to the thickness of trees. The Kurshawal road inland has also been completed and a good meshra made. Both these roads will cost very little to put in order next year. Work is still proceeding on Gelhak-Ulu road, but it is difficult owing to scarcity of water and the amount of roots which have to be taken up.

In the Bahr el Gazal a new cart road has been made from Sheikh Aiyat to new M'Volo, shortening considerably the journey from Atwot Fort. On the other hand, it has been found impracticable to continue running the large ox-wagons of the South African type on the Wau-Tonj road owing to the steep gradients at certain places. The small ox-carts are now working on this route, and the third large ox-wagon built this year has been transferred to the Wau-Meshra road.

Trade Returns, 1911.

The total value of the external trade of the Sudan during the last four years has been:—£2,538,895 in 1908; £2,585,580 in 1909; £5,139,561 in 1910; and £4,157,231 in 1911. These figures show the improvement in the prosperity of the country, a great deal of which is due to the increase in the value of native produce exports.

The exports were £515,958, £673,902, £977,621, and £1,376,958 for 1908, 1909, 1910, and 1911 respectively; and the imports £1,892,798, £1,775,957, £1,931,426, and £2,273,949 for the same years. The value of the imported specie was £60,172 in 1908, £44,158 in 1909, £126,128 in 1910, and £287,289 in 1911.

The cattle, sheep, and goats exported in 1911 were valued at £E215,981, compared with £E110,438 in the previous year. The trade has now become the third in importance among the exports of the country, and, judging by the inquiries received from Egypt and Mediterranean ports, is likely to increase.

The import of cotton fabrics has increased from £372,364 in 1909 to £580,697 in 1911. This increase is due to the spread of more civilised methods of life among the natives of the interior, though there is evidence of the accumulation of large stocks of cotton goods in the country at the present moment, which in some cases will take time to dispose of. The imports from Great Britain were £793,416 in 1911, as against £600,370 in 1910, and the exports to Great Britain £226,230, as against £100,273 in 1910. The imports from Egypt were £902,513 in 1911, as against £874,763 in 1910, and the exports £757,330, as against £640,751. It is to be noted, however, that a large proportion of the goods exported to Egypt are despatched thither for re-export to Europe and elsewhere. Similarly, many goods from Great Britain and other foreign countries are imported into the Sudan viâ Egypt, and appear in statistics as imports from Egypt.

Produce Markets.

LONDON, May 16.

Quietness has been the predominant feature in the markets this past week, and prices have moved regularly. Sugar is lower. Coffee in good demand. Currants firm. Sultanas dearer. Linseed, cotton and Soya oils in demand on slightly higher prices. Russian petroleum oil has declined.

Sugar.

Beet sugar is 5d. to 6d. lower, and refined 3d. to 7½d. Dry weather on the Continent caused prices to stiffen lately, but the fall of rain last week allayed the fears and prices dropped as noted above. Closing rates of German 88 per cent. analysis are :—May, 13s. 0½d.; June, 13s. 0¾d.; July, 13s. 1½d.; August, 13s. 2d.; September, 12s. 9½d.; October-December, 11s. 1½d., f.o.b. Hamburg. Refined sugar.—English, Tate's No. 1 cubes, spot, at 23s. per cwt.; June-August, 23s.; September-October, 22s. 9d. No. 2, 22s. 6d. Foreign, French, cubes.—May, 20s. 4½d.; December-January, 17s. 10½d., f.o.b. Paris. Dutch cubes, prompt, 19s. to 19s. 1d., f.o.b. Amsterdam. German and Austrian cubes, prompt, 18s. 11¼d.; May, 19s. 0¾d.; November-December, 15s. 10½d., f.o.b. Hamburg.

Coffee.

Activity is observable in this market, with prices slightly dearer. East Indian Plantations, small to mid., 76s. to 82s.; good to bold, 85s. to 90s. Costa Rica, low to ordinary, 76s. to 80s.; good mid. to fine, 84s. to 88s. Mexican, 77s. to 88s. Brazil, 68s. to 86s. Mocha, long berry, 80s. to 85s.; short berry, 82s.

Currants.

The "Balton" has brought about 900 tons of excellent quality. Provincial quarter cases and bags are a little easier, the former at 26s. 9d. to 27s., and the latter 26s. 3d. to 26s. 6d. Zante Casalima were sold at 28s. 6d. to 29s. 6d.; Gulf, 29s. 6d. to 30s.; Vostizza, 31s. 6d. to 32s.; choice, 34s.

Sultanas.

Smyrna fruit, especially the finer qualities, are dearer; fair quality dark fruit is offering from 42s. to 45s., and fair coloury 50s. to 55s. Choice are very scarce, and 65s. to 67s. is asked for the few remaining parcels. Greeks are in very short supply, and are quoted from 60s. to 65s.

Figs.

Turkish, finest Eleme, 70s. to 80s.; fine, 48s. to 55s.; good layers, 38s. to 42s.; common layers, 32s. to 35s.; natural bags, 20s. to 25s.

Dates.

Dates are unaltered in value.

Oils.

Linseed oil has been in good request. Spot pipes, waterside, £41 15s.; landed, £42; barrels, £42 5s. and £42 10s.; May, £42; June-August, £39 10s. Cotton oil, ordinary pale refined spot, £29; sweet, £31 to £32 10s. Olive oil remains at steady rates: Spanish, £44; Levant, £42.

Oil Cakes.

Linseed cakes, London made, £9 15s. to £9 17s. 6d.; ordinary Hull oilcakes, £7 17s. 6d.; Russian, £9 10s. to £9 15s. Cotton, London made, £5 10s. to £5 12s. 6d. Soya, London made, £7 to £7 5s.

Various.

Almonds, Jordan finest, per cwt., £10 to £11; good to fine, £9 10s. to £10; small, £7 10s. to £8. Egyptian onions are now arriving in splendid condition; prices are 5s. 9d. to 6s. 6d. per bag, and are in good demand.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows, for the week ending May 3 :—Nothing has been done in opium this week; nevertheless, our holders firmly maintain the position, owing to continual reports of damages to the poppy from growers. Many are of opinion now that the whole yield of Turkey opium this year will not exceed 5,000 cases, or at the most 5,500. If such is the case we must expect a reaction later on, and probably during the summer business will be transacted from 20s. to 25s. as to quality. Our nominal prices to-day are from 18s. to 19s. 6d. for old, and new druggists, 14s. to 17s. for common grades, and 21s. to 22s. for Yerlis. The arrivals to date amount to 1,167 cases, against 4,509 at the corresponding period last year.

NEAR EAST MARKETS.

FROM OUR OWN CORRESPONDENT.

BRAILA, May 11.

Heavy and abundant rain fell all over the country the day before yesterday, which has greatly improved crop prospects. In fact, all sowings are reported to be in excellent condition.

The demand for maize from Buda-Pesth still continues and many loaded barges have left up-river stations for Hungary.

Special Weekly Reports.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Constantinople. May 4.

Wheat has been selling at last week's prices, but the rains will most likely cause them to drop.

There has been no movement in opium and mohairs owing to the closing of the Dardanelles.

The price of sugar is dropping slightly, thanks to important arrivals before the closing of the Dardanelles, and the prospects of new arrivals as soon as the Straits are opened.

Damascus. May 1.

The export market is steady, the prices being well maintained, owing to a demand from Aleppo.

There is an utter stagnation as regards imports. The fire last week did not damage the property of our Manchester clients. Otherwise, the general commercial situation is suffering considerably.

Beyrout. May 7.

The market day the past week was satisfactory, but import and export transactions continue difficult, excepting in British cotton goods, which arrive regularly. Colonial produce imports are, owing to the war, nil. Under the circumstances the local merchants refuse to place any big orders.

The recent rains arrived in time to prevent the total destruction of the crops.

Wheat is quoted at P. Beyrout 330-345 the quintal, and barley at P.B. 215-228.

The silkworms will be taken to the "coconière" next week. The outlook is, up to the present, favourable.

Mitylene. May 4.

As a result of the international outlook, no commercial transactions have taken place. There have been no imports.

Abundant rains have benefited the local crops considerably.

Basrah. April 20.

The import market is in a state of hesitancy, owing to the general insecurity of communications between Persia and Baghdad, where an important stock of sugar and cotton goods is being held up.

The rise in cereal prices continues. 6-7,000 tons of wheat were sold at the same prices as last week.

The date outlook is favourable.

Angora. May 4.

There is no change in mohairs. Arrivals from the surrounding country are weak. If there is no improvement in the attitude of local merchants, who will only buy at low prices, the arrivals will stop altogether. Under the circumstances, the outlook is bad, and this in spite of the fact that the new clip is good.

The result is that the whole market has been unfavourably affected, and will continue calm and stagnant unless good news is received from Bradford, or unless the political situation improves.

Cereals, on the other hand, are in great demand, and prices are rising. The demand is so great that all qualities are being bought up at practically the same prices. Exports to Constantinople have diminished the stocks.

Janina. April 30.

The situation has not changed. The last week in April showed increased activity, as merchandise of first necessity was landed at Preveza.

The following are some of the articles in demand, with the prices at which some orders were recently placed in England :—

Galvanised iron, 1 by 2 m., 6 kilos per sheet, £16 5s. per ton; 7 kilos per sheet, £17 10s. per ton; black, 65 by 10 cm., 4 kilos per sheet.

Tin I.C.L., 40 by 20 inches, 108 lbs. per box of 150-180 sheets.

There is a considerable stock in the place of tin I.C.W., 14 by 20 inches, 108 lbs. per box of 112 sheets.

Owing to the distance from Preveza, the journey is performed in carts, and the boxes carrying tin must be hooped.

Owing to the general situation, local merchants are exercising great prudence in their negotiations.

Smyrna. May 10.

Stagnation reigns in the market owing to the lack of purchasers. Crop news from the interior, especially from Karahissar, is favourable.

Seven thousand quintals of oil were sold at low prices.

The same stagnation reigns in the Manchester cotton goods market.

COMMERCIAL NOTES.

LONDON, May 16.

Metals.

Copper maintains its high value on account of shorter stocks, which are about 100,000 tons, as compared with about 170,000 at this time last year. Nevertheless, the present price, about £72 for G.M.B's, as well as the position of the article, have become highly speculative, as the cost of production is no more than £55, and it will not be long before the supply is again ample. This fact is sufficient to create a certain amount of bear sales which give the market its present steadiness. Strong sheets are about £88 and India sheets about £85.

Tin also keeps high, and, on account of the good consumptive demand and short supplies, the syndicate is in complete control, and seems quite prepared and able to uphold its position, especially as money is cheap. Present quotation for standard is about £206½ for 3 months and £211½ for cash. But, of course, this price is a high one.

The iron market is steady at 55s. for 3 months; lead steady; English, £16 17s. 6d.; spelter, £25 15s., £26; antimony, £27, £27 10s.; silver, 28d., two months 28 3-16d. Bank rate, 3 per cent.

Sugar.

The good receipts in Cuba, the weakness of the American market, and the beneficial rain for the crops on the Continent are all factors for lower prices, which the market was bound to feel and holders too sensible to ignore. It cannot be said, however, that, all things considered, 12s. 6d. for August delivery and 10s. 11d., for October-December 88 per cent. beet are too high under present circumstances.

Coffee.

The total production for 1911-12 is computed at 28,500,000 bags, and the consumption at 17,500,000, which would leave the visible supply of the world on July 1 at 11 million bags, or the same as last year. Prophets say that the Brazilian crop of 1912-13, Rio and Santos, will be under 10 million bags against 12½ millions in 1911-12. Prices are very firm, superior Santos being quoted 73s. 6d. c.i.f. London.

Cereals.

French demand having ceased, the market is quiet. U.K. buyers are also indifferent except for some demand on choice white Karachee new crop at 38s. 3d. per 492lb.

Australia and San Francisco offer nothing, and Russia is out of the market; but La Plata is pressed for sale at 36s. to 37s. per 480lb. for May-June shipment.

Weather is still unfavourable in the United States, but favourable on the Continent and in the United Kingdom, where the sowings are larger than last year.

Maize is firm on more restricted offers from La Plata, May-June, 26s. per 480lb; barley is weaker, Bassora May-June being quoted 26s. per 400lb.; and oats are steady with fair demand, La Plata May-June, 18s. 3d. per 304lb.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondents.)

Alexandria, May 10.

Prices are maintained, but there is a slight downward tendency. Stock demands are nevertheless good, and inferior qualities are being absorbed at moderate prices. The speculation is bull, but unable to force the market. Crop views are favourable. The acreage under cultivation in Upper and Lower Egypt is increasing. There is as yet no signs of the cotton worm, and thus the plant, which is fifteen days ahead of last year, will be able to combat the parasite more easily.

Liverpool Report.

Messrs. Reynolds and Gibson telegraph that the market during the past week presented a very stale appearance. Both spinners and manufacturers appeared for the moment to have ceased to follow the vagaries of the raw cotton market, and to be devoting all their attention to the execution of outstanding contracts. The position at the time of reporting was extremely satisfactory, deliveries both of cloth and yarn being freely taken, and, speaking generally, stocks were not heavy. Yarn experienced during the week a very quiet market, and prices tendered were somewhat in buyers' favour, Egyptian yarn being in small demand.

INTERNATIONAL COTTON FEDERATION

Meetings of the Committee of the International Cotton Federation are being held in Salzburg, Austria, under the presidency of Sir Charles Macara, says the *Manchester Guardian*. Among the decisions arrived at by the committee was that in October next an international delegation should visit Egypt and make a tour of the cotton-growing areas of that country. The secretary reported that the Khedive, Lord Kitchener, and the Egyptian Prime Minister were taking deep interest in the proposed visit, and would personally receive the deputation and do all in their power to ensure the success of the visit.

EGYPTIAN TRADE.

The downward tendency of the imports into Egypt this year, when compared with 1911, continued during March, when the total arrivals were valued at £E2,061,000, against £E2,215,000 last year. The drop was thus £E154,000, bringing the total decrease from January 1 to March 31 to £E464,000. The shipments from the principal countries of origin during March were: From England £E639,000, as against £E792,000 in 1911; France, £E253,000, as against £E243,000; Turkey, £E219,000, as against £E205,000; Austria-Hungary, £E162,000, as against £E169,000; and Germany, £E129,000, as against £E110,000. It will be seen that the most noticeable decrease is in British imports, Germany, Turkey, and France showing an increase.

ATTRACTIVE TABLE WARE.

Quite one of the most charming and certainly not the least interesting of exhibits at the Earl's Court Exhibition (Shakespeare's England) is that to be found at Stall No. 43, where the Harvey Electro-Chemical Co., Ltd., are showing specimens of their well-known "Metalova" ware, which will undoubtedly attract the attention of every visitor from the Near East. This process constitutes a new system of electro-plating whereby all normally non-conductive substances can be plated with an absolutely protective covering of any of the commercial metals or of their alloys. Included in the category of normally non-conductive substances are china and glass, and some idea as to the immense potentialities of this invention can be gathered from the fact that it is as easy to electroplate these substances as it is to plate copper or white metal. For example, take the plating of an ordinary china teapot. After it has been duly prepared and placed in the silver plating bath it comes out not as merely a china teapot, but as a silver one having the advantage of a glazed china lining, an advantage which is invaluable by reason of the fact that tea is better brewed in earthenware than in metal, and there is in addition the all-important point of cleanliness.

Shipping Intelligence.

DANUBIAN PORTS.

From Our Own Correspondent.

Braila, May 11.

As I advised you last week, business was resumed here immediately upon receipt of the report that the Turkish Government had decided to reopen the Dardanelles, and the few steamers that had been waiting here idle rapidly completed loading. Owing to the absence of all competition, very high rates of freight were realised, shippers paying as much as 16s. Braila-Antwerp, 15s. Sulina-Rotterdam, and 18 francs from Braila to Mediterranean ports.

About the middle of this week, in the face of Turkish procrastination, shipments ceased again, but the only open tonnage in all three Danubian ports is one Belgian liner, berthed for Antwerp. There is not a single British steamer at either Galatz or Braila, and the aspect of these ports with the absence of ships is quite unusual.

Business is stagnant in every way. The Chamber of Commerce held another meeting yesterday, and it was resolved to send a deputation to Bucharest in order to point out to the Minister of Commerce the heavy losses that Roumanian merchants are incurring owing to the closing of the Dardanelles and to urge him to support any steps that the other Powers are taking for a speedy reopening.

RUSSIA AND THE DARDANELLES.

(From Our Own Correspondent.)

Odessa, May 12.

The question of claiming damages from Turkey for the losses sustained by Russian Black Sea shipping companies and grain exporters still agitates the Press. A week ago the matter was submitted to a consilium of three well-known Russian professors of international law. Their verdict was that no such claim as that contemplated would lie under international law. Despite this expert judgment, the *Novoye Vremya* and other influential organs are strenuously urging the Imperial Government to press the claim against the Porte, and not to consent to the submission of the question either to the Hague Congress or to any other court of arbitration.

The Odessa Bourse Committee yesterday despatched another lengthy telegram to the Minister of Trade and Industry describing the lamentable condition of the Black Sea and Azoff ports, where the labouring classes connected with the staple industry of grain exports are famishing. The Minister is urged to use what influence he can wield in forcing the claim for compensation from Turkey.

KHEDIVIAL LINE.

(From Our Own Correspondent.)

Salonika, May 11.

Owing to the Dardanelles being still closed two of the Khedivial Steamship Company's vessels are making this the terminus from Alexandria instead of Constantinople. One arrived yesterday, and was to have been welcomed by the Union and Progress Committee with a band of music, patriotic speech making, toasts, etc., the whole out of compliment to the Arab element represented by the ships. Through bad weather, however, the "Sadieh" came in somewhat later than was expected, and the demonstration had to be abandoned, as many of the Union and Progress Committee, as well as the officials, had to prepare for the reception of the Vali. Whether the coming of the Khedivial steamers to this port is to be continued as a regular service, or is only a temporary arrangement until the Dardanelles are clear, the company have not yet decided.

EGYPT AND THE DARDANELLES.

Since the closing of the Dardanelles communication between Constantinople and Egypt is by way of Dedeagatch, where the Khedivial mail steamers land their passengers and mails. Special trains connect Constantinople with the improvised port.

COUNCIL OF COMMERCE.

The representation of the British Chamber of Commerce of Turkey at the Eighth Congress of Chambers of Commerce of the Empire, to be held in London in June, will move two resolutions to be adopted by the Congress, namely:—

1. That in view of the improvement in the construction of steamers and the increased tonnage represented by each steamer, this congress request H.M.'s Government to take such steps as they may deem necessary to ensure the modification by the Ottoman Lighthouse Administration of existing regulations under which a certain class of steamers (passenger) are charged dues on 50 per cent. of the gross register tonnage, instead of on their net register tonnage.

That this congress begs to draw the attention of H.M.'s Government to the non-lighting of the Ottoman lights in the Archipelago, Adriatic Sea, Syrian Coast, and Red Sea, consequent on the Italo-Turkish War, thus imposing an enormous burden, inconvenience and loss to British shipping, due to lengthened voyages, increased consumption of coal, strandings, etc., and that steps be taken by H.M.'s Government to obtain from the Ottoman Lighthouse Administration an equitable refund of the dues paid by British shipping and the losses to British underwriters during the period of non-lighting.

2. That this congress request H.B.M.'s Government to endeavour, together with the other foreign Powers, to obtain the ratification of the International Sanitary Convention signed at Paris on December 3, 1903.

Further, considering that British shipping represents about 30 per cent. of the tonnage which pays dues in this Empire, and is consequently more directly interested in the question of a reduction of such dues, this congress considers it imperative that H.M.'s Government take such steps as they may deem necessary to ensure that the decision of the Mixed Sanitary Commission, taken in May, 1911, regarding a reduction, be put into force without any further delay.

BLOCKADE NOTIFICATION.

A telegram was received on Tuesday at the Foreign Office from the British Ambassador at Rome stating that the Italian Government had notified on the 12th inst. the establishment of an effective blockade of the Island of Rhodes from the 4th inst., and that a period of 24 hours was allowed within which neutral vessels might leave the blockaded area. The telegram adds that the town of Rhodes remains open to commerce, subject to conditions to be prescribed by the Italian military authorities.

THE TILCHE FAILURE.

The Tilche failure, to which we referred last week, involves a large number of private creditors, including many of the family, some of whom will be quite ruined.

It is estimated that the firm will be able to pay 50 per cent. This estimate is based on the assumption that the assets are £E150,000 and the liabilities £E330,000. The firm itself is one of the best known and oldest established Jewish firms in Alexandria.

The following are further details, supplementing those published last week exclusively by The Near East, as to the principal creditors:—

Imperial Ottoman Bank, £30,000, covered.
Anglo-Egyptian Bank, £10,000, partly covered in cotton.
Deutsche Orient Bank, £20,000.
Credit Franco-Egyptien, £23,400.
Cattaoui, of Paris, £19,000.
Swiss Bank Verein, 28,000.
Ruffer, London bankers, £12,000.
Banco di Roma, £20,000.
Bank of Egypt, £8,000.
Hambro, of London, £55,000. Of this £20,000 is guaranteed, and the rest is uncovered.
Bank of Athens, £7,000.
National Bank of Egypt, £7,000.

STEAMSHIP MOVEMENTS.

Cunard Line.

"Brescia."—Patras for Liverpool. Passed Gibraltar May 9. "Caria."—At Venice May 9. "Carpathia."—At Messina May 13. "Cypria."—Left Liverpool for Fiume (via Swansea) May 11. "Ivernia."—At New York May 9. "Lycia."—Liverpool for Pera. Left Gibraltar May 8. "Pannonia."—Left New York for Mediterranean May 2. At Gibraltar May 13. "Pavia."—At Genoa May 9. "Phygia."—At Pera April 27. "Saxonia."—At Trieste May 13. "Thracia."—At Liverpool. "Tyria."—At Pera for Benderecli May 6. "Veria."—At Fiume May 8.

The s.s. "Brescia" (if sufficient inducement offers) will close for cargo at Liverpool on May 25 for Oran, Algiers, Philippeville, Boma, Gibraltar, Malta (with liberty to tranship at Patras), Corfu, Patras, Syra, Smyrna, Constantinople, Odessa, Batoum, Trebizonde, Samsoun, and Poti.

Moss Line.

"Busiris."—Left Liverpool for Barry May 13. "Esneh."—At Smyrna April 20. "Karnak."—Left Liverpool for Pera May 8. "Khephren."—Left Liverpool for Glasgow May 13. "Menepthah."—At Liverpool. "Menes."—At Alexandria. "Meroe."—Liverpool for Alexandria. Left Algiers May 8. "Moeris."—Left Manchester for Alexandria May 8. "Seti."—At Liverpool. "Siptah."—At Alexandria May 8.

The s.s. "Seti," for Gibraltar, Algiers, Malta, Alexandria, Beyrout, Alexandretta, and Jaffa, will close for cargo at Liverpool on May 18.

Bibby Line.

"Derbyshire."—Rangoon for London. Left Colombo May 7. "Gloucestershire."—Rangoon for London. Left Marseilles May 11. "Herefordshire."—At Liverpool. "Leicestershire."—Left London for Liverpool May 12. "Staffordshire."—Liverpool for Rangoon. Left Marseilles May 9. "Warwickshire."—Liverpool for Rangoon. At Colombo May 13. "Worcestershire."—At Rangoon May 6.

The s.s. "Leicestershire," for Egypt, Colombo, and Rangoon, will close for cargo at Birkennead on May 29.

Prince Line.

"Carib Prince."—Syra for Liverpool. Left Malta May 10. "Castillian Prince."—At Manchester. "Corsican Prince."—Left London for Alexandria May 9. "Egyptian Prince."—At Alexandria May 8. "Highland Prince."—Left Alexandria for Manchester May 11. "Imperial Prince."—At Manchester. "Kaffir Prince."—On Syrian Coast May 10. "Merchant Prince."—At Liverpool. "Sailor Prince."—Left La Goulette for Alexandria May 13. "Soldier Prince."—At Alexandria April 28. "Trojan Prince."—Left Malta for Manchester May 6.

The s.s. "Merchant Prince," for Egypt and Syria, calling at Tunis and Malta, will close for cargo at Liverpool on May 20

Hall Line.

"Adalia."—Left Bushire for Hamburg May 4. "Anatolia."—At Manchester. "Branksome Hall."—At Glasgow for Cape Town. "City of Agra."—At Liverpool. "City of Baroda."—At Calcutta. "City of Birmingham."—At Liverpool. "City of Bombay."—At Batavia. "City of Chester."—Left Hangalore for London May 7. "City of Colombo."—At Calcutta. "City of Durham."—At Rotterdam. "City of Lahore."—At Belfast. "City of Lincoln."—Left Beira for Batavia May 7. "City of Madras."—Left Liverpool for Natal April 24. "City of Naples."—At Vladivostock April 15. "Crewe Hall."—At Antwerp. "Crosby Hall."—At Calcutta May 5. Croxteth Hall."—London for Beira. Passed Las Palmas April 23. "Denbigh Hall."—At Bassein May 15. "Haddon Hall."—Bombay for Liverpool. Left Port Said May 10. "Knowsley Hall."—At Cape Town May 11. "Langton Hall."—At Antwerp May 13. "Locksley Hall."—Liverpool for Bombay. Passed Perim May 9. "Melford Hall."—Left Cuddalore for Marseilles May 11. "Merton Hall."—At Cochin May 13. "Netherby Hall."—Colombo for Zaandam. Left Port Said May 11. "Newby Hall."—Left Bombay for Hamburg May 11. "Rydal Hall."—At Hamburg May 13. "Sandon Hall."—At Calcutta April 30. "Stanley Hall."—Cochin for Home. Left Algiers May 13. "Sutton Hall."—London for Beira. Passed Perim May 4. "Trafford Hall."—Liverpool for Bombay. Passed Perim May 12. "Trentham Hall."—Port Said for Penang. Passed Perim May 7. "Walton Hall."—At Yokohama May 11. "Worsley Hall."—Left Zanzibar for Durban May 13.

The s.s. "City of Lahore" for Bombay will close for cargo at Birkenhead on May 22.

Anchor Line.

"Algeria."—Liverpool for Calcutta. At Colombo May 6. "Anchoria."—Liverpool for Calcutta. Passed Gibraltar May 9. "Assyria."—Calcutta for Genoa. Passed Perim May 13. "Bavaria."—At Liverpool en route for Calcutta. "Calabria."—At Naples May 12. "Caledonia."—At Glasgow. "Castalia."—Bombay for Liverpool. Passed Suez May 14. "Circassia."—At Liverpool en route Bombay. "Elysia."—At Bombay May 4. "Massilia."—Liverpool for Bombay. Left Port Said May 9. "Olympia."—At Manchester en route Bombay.

The s.s. "Circassia," for Bombay (via Gibraltar and Suez Canal), will close for cargo at Birkenhead on May 25.

British India Steam Navigation.

"Barala."—Greenock for Calcutta. Left Suez April 5. "Berbera."—At Bombay May 13. "Carpentaria."—At London. "Chanda."—At London. "Chyebasa."—At Antwerp May 5. "Chupra."—At Bombay May 10. "Colaba."—London for Calcutta. Left Aden May 8. "Culna."—Left Bombay for Antwerp May 6. "Golconda."—London for Calcutta. Passed Lisbon May 8. "Jelunga."—At London. "Matiana."—Left Middlesbrough for London May 9. "Mombassa."—Calcutta for London. At Marseilles May 13. "Rewa."—At Southampton. "Rohilla."—At Southampton.

The s.s. "Matiana," for Port Sudan, Aden, etc., will leave for London on May 18.

P. & O. Steam Navigation.

"Arabia."—At Bombay May 3. "Assaye."—At Bombay May 12. "Delta."—Bombay for Shanghai. Left Colombo May 12. "Egypt."—Bombay for London. Left Port Said May 13. "Mooltan."—London for Bombay. Passed Gibraltar May 14. "Nyanza."—London for Calcutta. Left Aden May 14. "Persia."—London for Bombay. Left Aden May 12. "Salsette."—Left Bombay for Aden May 11. "Sardinia."—Calcutta for London. Left Colombo May 10. "Socotra."—Left London for Calcutta May 12. "Sunda."—London for Calcutta. At Colombo May 11.

The s.s. "India," for Bombay and Karachi, will leave London on May 24, and Marseilles May 31.

Ellerman Line.

"Andalusian."—At Leghorn May 9. "Arabian."—At Manchester. "Assiout."—At Liverpool. "Asturian."—At Pera April 25. "Avon."—At Alexandria May 7. "Barcelona."—At Liverpool. "Bavarian."—At Fiume May 8. "Belgravian."—Left Antwerp for London May 12. "Bosnian."—At Alexandria May 13. "Bulgarian."—At Smyrna May 9. "Castillian."—At Lisbon May 10. "City of Oxford."—At Liverpool. "Douro."—Liverpool for Lisbon. Left Swansea May 14. "Fabian."—At Pera April 17. "Fabernian."—At Liverpool. "Flavian."—At Liverpool. "Italian."—At Smyrna May 6. "Lisbon."—At Liverpool. "Minho."—At Liverpool. "Oporto."—At Liverpool. "Perim."—At Oporto May 10. "Persian."—At Cardiff. "Venetian."—Alexandria for Liverpool. Passed Gibraltar May 10.

The s.s. "Britannia," for Gibraltar, Malta, and Alexandria, taking goods for trans-shipment to Beyrout and Alexandretta, will close for cargo at Liverpool on May 25.

City Line.

"City of Athens."—Liverpool for Bombay. Passed Gibraltar May 12. "City of Benares."—Liverpool for Calcutta. Passed Gibraltar May 8. "City of Calcutta."—Left Liverpool for Calcutta May 11. The s.s. "Venetian," for Tangier, Algiers, Malta, and Alexandria, will close for cargo at Liverpool on June 6.

Westcott and Laurance.

"Belgravian."—At London. "Eden Hall."—At London. "Egyptian."—Alexandria for Liverpool. Passed Gibraltar May 11. "Favonian."—At Smyrna April 29. "Gulf of Suez."—London for Alexandria. Left Gibraltar May 9. "Joshua Nicholson."—At Salonica May 7. "Orchis."—At Galatz April 21.

PASSENGER LIST.

Sailed from Marseilles, per Messageries Maritimes s.s "Orenoque," May 9, for Alexandria:—M. Rioche, Mr. Grace, Mr. E. Young, Mr. E. G. Baker, M. Anstiss, Mme. Biau, M. and Mme. Grosclaude, M. and Mme. Yabour Mekbeb and child. For Jaffa:—Mme. Luckie, Rev. L. R. Whigham. For Beyrout:—M. and Mme. Sardi Botros and child, M. Ajaj Chaker Assad, M. Joseph Allam and Mme. Allam, M. Bechara Georges.

OPENING OF THE DARDANELLES.

The latest report from Lloyd's is to the effect that the Dardanelles are not clear yet, as apparently all the mines have not been recovered. It is doubtful whether the passage will be free before the end of the week.

NEW DOCKS.

The Turkish Admiralty has decided to call for bids for the construction of a naval station and repairing dock for the Imperial Navy near Deirmendere, on the south shore of the Gulf of Nicomedia.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912).

SETTLING DAYS.

CONSOLS.
Monday, June 3.

STOCKS AND SHARES.

In Mining Shares the next carry-over is May 28.

Continuation Days.	Ticket Days.	Pay Days.
Wed., May 29.	Thurs., May 30.	Fri., May 31.
Wed., June 12.	Thurs., June 13.	Fri., June 14.

LONDON, March 16.

The settlement passed off badly. There were three failures. It is not thought that any more will occur, but it is quite clear that the sound of the hammer has scared away business. The account just begun is not likely to be profitable to the bulls. Money is plentiful. The banks having reduced their rate, lent the Stock Exchange all the funds they required at 3½ per cent. The City is therefore making big profits on its money-lending, for some unfortunate bulls had to pay as high as 12 per cent.

Foreign Market.

Business in the Foreign market has been absolutely dead. The whole interest of this section centres in the negotiations now going on with regard to the Chinese loans. Austria has taken a hand on the ground that she was interested in a small loan of £350,000. No one knows what the end will be. It is believed that the Seven Powers will coerce China into accepting the terms. If a revolution should occur, and unless China gets the money this is a certainty, it is clear that we shall have a very serious collapse in credit, so serious that probably not even the Chinese will dare to bring it on. One trembles to think of the consequences, for the big banks have been taking stock from all sellers for the past six months, and all the great financiers have been lending money to enable this to be done. The market position is therefore dangerous—if China relents the outside world will never know how dangerous. Bulgarians made up at 89½. Egyptian Unified at 100¼ are certainly worth buying. Greek Fours were promptly marked up to 55 on the carry-over, at which price they remained steady. Hungarian Fours at 91¾ are harder by the turn. Italians closed at 93 and show no change, but the general feeling throughout the House is that a lower quotation will be seen shortly. Peru Prefs at 45 are almost back at the price they were quoted a year ago. Russians look a little weak Turkish Unified carried over at 89¼, but it has been possible to deal in them since then at 89. They are well supported by the big banking houses who are interested in Turkey.

Home Railways.

Very little business has been done in the Home Railway market, but there is a fair amount of speculation in Great Centrals, which move backwards and forwards in lively fashion. They are a good gambling counter, and the low value of the A and B make them easily handled. The heavy lines are being sold, but the Stock Exchange has discounted the reduction in dividends that seems inevitable through the coal strike.

Yankees have improved on last week's quotations, though whether this improvement will be maintained is perhaps doubtful. Copper shares are likely to see much higher prices, and Amalgamated are talked to par. The feature of the week has been the extraordinary rise in Canadian Pacifics, which have been dealt in at the record figure of 271½—a rise of 30 points on the year. The story goes that the stock is to be split into land shares and preference and deferred, but nothing definite is known, and this tale has been put about for so long that it is probably only a canard emanating from Wall Street. It is much more likely that the railway intends to make a further issue of common stock.

Rubber and Oil.

Rubber shares, in spite of the poor demand at the auctions, have kept hard. The Golconda report was unsatisfactory. Nothing has been done in either Kaffirs or Rhodesians, and most of the dealers have migrated from these markets to that in Oil, where there has been a very large business. Indeed, two-thirds of the speculation now carried on has been in Oil shares. Shells and Urals have led the way. Red Seas and Egyptian Oil Trusts are talked higher, and North Caucasian is the latest tip. Lobitos have been bought, and everyone is confident that we are in for a good Oil boom.

The Egyptian Market.

It must be confessed that very little trade has been done in the Egyptian market during the week. Aboukir carried over at 1 19-32, and investors who desire a sound security cannot do better than place some of their money in this share. Agricultural Banks are 6½. Behera at 14½ remain very weak, and until all the shares now offering have found a home, it is doubtful whether we shall see any advance in the quotation. Delta Lands have been offered, and although they made up at 16s., they have been purchased since at 15s. 6d. Delta Light Railways traffic shows a steady increase. Alexandria Water have been firm at 12½, and Land Banks have also been purchased by the Continent and are strong at 7. The market in Salt and Sodas has been kept up, no doubt with the idea of unloading some of their very big blocks that still remain unsold out of the Zervudachi liquidation. The company is doing well, and at 15s. the yield is high enough to tempt most people. Garbieh Land show no alteration. Egyptian Markets are quoted 26s., and the receipts for the week were satisfactory. National Banks made up at 17⅝, but there has been very little business. Sidi Salems have risen, and at one time were quoted 1 11-32, but they can now be bought at about 26s. Union Foncière are unchanged at 2 9-16, and United Egyptian Lands are friendless at 3s. As we mentioned a few weeks ago, the prospects of the new crop in Egypt are excellent. The young plants have developed well, and are from 15 to 20 days in advance of last year's. A larger area has also been sown, and throughout the whole of Egypt everything in connection with the cotton crop looks most satisfactory. As the prosperity of Egypt hangs upon the cotton crop, this is very good news.

The Mortgage Company of Egypt.

The Mortgage Company of Egypt has issued its annual report (a summary of which will be found on another page), which shows a profit for the year of £84,015. This enables the board to pay a dividend of 7 per cent., carry £12,000 to reserve, and write off £4,500 from expenses of debenture and preferred share issues. The Mortgage Company of Egypt has now invested £2,597,473 on mortgage, and the property pledged as security is valued at 5½ millions. The Mortgage Company only began business in December, 1908, and its progress has been remarkable. Its profits in the three years have more than trebled. We congratulate Lord Milner and his fellow directors upon the capable manner in which they administer this company.

The B.C.G.A.

The British Cotton-Growing Association sends out its seventh annual report, and the portion relating to Egypt and the Sudan is most interesting. The association has a large holding in Sudan Plantations Syndicate, which is making some important experiments in the Gezira province. Mr. Hutton, Mr Whiteley, and Mr. Clegg have studied the question on the spot, and report that in Tokar there are good possibilities of producing from 10,000 to 20,000 bales of cotton of fair quality in the immediate future. They consider that in Khartum there is a moderate prospect of obtaining 5,000 bales of high-class Egyptian cotton, and they think that Gezira is one of the finest cotton propositions in the world, with the prospect of a 10,000 bale output of high-class Egyptian cotton, which would increase to 250,000 bales within ten or fifteen years, and there are further possibilities of a production of a million bales. They think that the chance of cultivating rain-grown cotton is great, and in some ways better than those in either Northern Nigeria or Uganda. Lord Kitchener takes the greatest interest in the development of the Sudan, and it would appear that there are boundless possibilities for the future in the whole of the Anglo-Egyptian Sudan. Indeed, it is not saying too much to prophesy that one of these days the Sudan will supply all the Egyptian cotton that England requires.

ALEXANDRIA NOTES.

[FROM OUR OWN CORRESPONDENT.]
ALEXANDRIA, May 3.*

In spite of events in the Dardanelles and the consequent rise in the price of foodstuffs, the market has been firm, and, though operations are not very numerous, there is a marked tendency for them to augment. Though Nationals and Agriculturals show no change, there has been a decided rise in Alexandria Water Co., Cassa di Sconto, Building Lands, Trams, and Delta Railways.

Delta Railway.

There has been a decided rise here owing to rumours that the Egyptian Government has granted the company the concession of a new line in the Delta from Bisla to Baltim, which is situate on the north of Lake Bonallos, which will partially disappear as a result of the irrigation works now being undertaken in the Delta. The company will it is stated, issue new obligations to be sold to the Egyptian Government.

Mixed Court Reforms.

It is proposed to modify the expropriation laws in order to enable creditors to realise more rapidly the assets of their debtors. This reform will be welcomed by all who have financial interests in Egypt. The General Assembly of the Mixed Court of Appeal is at the present moment studying the project submitted to it by the Egyptian Government.

With the consent of the fourteen Powers interested, the prisons attached to the Mixed Courts have been experimentally suppressed for a period of one year, their place having been taken by the native prisons.

ALEXANDRIA, May 10.

The market, which had begun to improve, has fallen again into an utter state of stagnation, as a consequence of the failure of Messrs. B. Tilche and Sons, a firm founded in 1720. After a thorough examination of the situation, it results that the assets amount to £150,000, as against liabilities at £330,000. The creditors will thus receive about 40 per cent., or 8s. in the pound. It is almost certain that the *concordat préventif* will be granted.

This failure has been caused, as were those of the Bank of Egypt and Zervudachi, by the dangerous habit of drawing bills on foreign countries without provision. It is a most deplorable habit, and one that has ruined many firms in this city.

I have the firm conviction that the failure of Messrs. Tilche and Sons will definitely close the long series of important failures. It is to be hoped that in future goods will be delivered to Egyptian retail dealers only against cash payment, and that no credit will be allowed.

Another factor which has influenced the market is the important sale of the Zervudachi dossier held by the Société Marseillaise, at Marseilles. During the past three days £125,000 of Land Banks, Beheras, Union Foncierès, etc., have been disposed of. The public absorbed, at excellent terms, a part of the lots offered.

State Finances.

It seems paradoxical that such a long and uninterrupted series of failures should not have caused a profound perturbation of the country's economics, and consequently of its revenues. On the contrary, we see that the receipts of the Railways, Posts and Customs are steadily progressing. Moreover, from January 1 to March 31 the State revenues show an increase over the same period last year of £200,000.

Tanta and Dessouk Markets.

In spite of the fact that these markets are being held this year at a time when work in the cotton fields is most strenuous, 30,000 natives more than in previous years have visited them. The amount of trade operations carried through at these markets is considerable, showing that the purchasing power of the fellah augments progressively.

Cotton Precautions.

In order to assure the purity of cotton in the Delta, the Egyptian Government has forbidden the importation of cotton from Upper Egypt into depôts in Lower Egypt. It will thus be possible to prevent the mixture of cottons, an operation indulged in hitherto by unscrupulous merchants.

* Delayed in transmission.

Company Notes and Reports.

The Mortgage Company of Egypt.

The report of the Mortgage Company of Egypt, Limited, for the year to March 31 last, to be presented at the meeting on 21st instant, states that the company's business continues to make good progress, and that the prospects for the current year are favourable. The accounts show a profit (after providing for the interest on the 4½ per cent. first charge debentures) of £84,015. Allowing for dividends paids and accrued on the 6 per cent. preferred shares to March 31, 1912—namely, £50,000—there is a balance for the year of £34,015. Adding the amount brought forward, £2,821, there is available for distribution a total sum of £36,837, which the directors propose to allocate as follows :—To payment of a dividend of 7 per cent. (being 1s. 9d. per share) on the amount paid up on the ordinary shares, less income-tax, £17,500; to general reserve, £12,000; towards writing off the discount and expenses of the debenture issues, £2,800; towards writing off the expenses of the preferred share issue, £1,700; leaving a balance to be carried forward of £2,837. To provide the funds required to meet the increasing business of the company, the directors in January last created and issued a further £750,000 4½ per cent. first charge debentures.

Romano-Carpathian Oil.

Dealings have been initiated in the shares of the above company, which has been formed to work the property of the Société Romano Belge de Petrole, a going concern registered in Bucharest under the Roumanian laws. It appears that the Societé Romano Belge owns several valuable oil-bearing concessions, covering about 788 acres, and situated in Baicoi, Tintea, Gura-Vitiorei, and Magurele. The company has its own pipe-line, six miles long, connecting the fields with the railway station, and allowing connection with the main pipelines of the largest refineries, also large storage tanks situated at the railway station of Gageni and on the fields for the storage of over 5,000 tons.

Maikop New Producers.

The report of the Maikop New Producers, Limited, to be submitted at the statutory general meeting on the 23rd instant, states that the total number of shares of 10s. each allotted is 400,000. Of these 399,993 have been credited with 8s. per share paid up in respect of the purchase consideration, and 6d. per share has been received in cash, leaving 1s. 6d. per share still to be called up; seven shares have been issued wholly for cash, and 8s. 6d. per share has been paid up. The total amount of cash received by the company in respect of the 400,000 shares is £10,014, leaving an amount of £29,988 due on these shares, whilst £11 has been received in respect of calls paid in advance.

Hamburg and Anglo-American Nile.

The report of the board of directors of this company, presented at the general meeting of shareholders held on May 3, only deals with eleven months' working of the company. Although the general receipts from the tourist traffic exceeded those of last year by £2,900, the season cannot be considered a good one. There was especially a heavy falling off in the receipts on the Luxor-Assuan Express Service. The receipts of this service were seriously affected by the unusual number of delays through want of water and the difficulties in passing through the various locks. The spring level of the Nile was lower than it has been for many years. Representations have been made to the Government, which, it is trusted, may be favourably received, and result in greater attention being paid to the requirements of fluvial transport in Egypt. Increased expenditure on account of the high price of coal has reduced the profits on the freight business. The traffic receipts of this company have steadily gone up; 21,549 tons were transported across the lake in 1911, against 14,731 in 1910. The company has now completed the locks at Rasswa and on the Ananieh, with the exception of the gates, which are ready to be put in place, and the opening of the through communication between the harbour of Port Said and the Nile now only depends on the time taken by the Suez Canal Company to carry out their portion of the works. The new railway bridge at Rasswa will be opened for traffic on May 1, 1912. The workshops at Shoubrah are in good order. Unfortunately, the general stagnation of business in Egypt has prevented outside orders being placed with the company to the extent which they are in a position to undertake. The fleet has been kept in a thorough state of repair. The experiment of converting the second twin screw barge into a single screw barge has been completed successfully, and the estimated economy has been effected in consumption of coal. Important structural alterations have been made to the S.W. Germania, resulting in an increased speed and economy in coal consumption. The cost of maintenance has been £E4,130, against £E4,430 last year. The property of the company has been depreciated by £E3,398, as against £E3,350 last year. After transferring the amount £E7,000 from last year's P. and L. account, this fund now stands at £E9,622. The directors propose to hold this amount as available for any emergency. The ordinary reserve fund of the company was increased by the transfer from P. and L. account last year of £E1,127, and now amounts to £E10,959. This fund is created in accordance with the statutes, and is also for the purpose of meeting any extraordinary expenditure. Although the company's special reserve could be utilised to pay dividends, the board is of opinion that it is sounder finance to pay a dividend more in accordance with the earnings of the company, and propose the distribution of four per cent.

Roumanian Development Syndicate.

Our Braila correspondent, under date of May 11, informs us that the Roumanian Development Syndicate, of London, has been granted the requisite authority to start business in Roumania and to open an office at Bucharest. The syndicate undertakes the building of private houses and commercial buildings, and advances money on mortgages.

FINANCE ITEMS.

The closing of the Dardanelles, which has had such serious consequences for shipping companies, has, on the other hand, provided advantages for certain railway companies. Thus the receipts of the Orient Railway Company for the week ended April 28 amounted to 338,210 frs., or an increase of 108,701 frs. as compared with the corresponding period of 1911.

The Uskub correspondent of the Bulgarian Telegraphic Agency states that work has begun on the Uskub-Kalkandelu-Gostivar line.

The board of the Casso di Sconto é di Risparmio at Alexandria has been reformed, Baron Felix de Menasca having been elected chairman.

The Société Immobilière et Agricole du Soudan, to which we referred in last week's issue, has its headquarters at Alexandria.

The traffic returns on the Delta Helouan and Cairo Quarry branches of the Egypt Delta Light Railways for the ten days ended April 30 amounted to £E7,257, as against £E6,947 for the corresponding period of 1911, or an increase of £310.

The Egypt Debt Commission announces that payments on the coupons of the Delta Privilégiée et Unifiée will be effected in Paris at the rate of 25.25½ frs. per £, and in Berlin at 20.40 marks per £.

The receipts of the Tramways of Alexandria for the first four months of 1912 amounted to 741,578 frs., as against 713,227 frs. in 1911, or an increase of 28,351 frs.

The gross profits of the Deutsch Orient-bank in 1911 amounted to 4,130,971 marks, and the net profits 1,349,029 marks, as against 3,594,259 marks and 1,103,701 marks in 1910. The dividend for 1911 is maintained at 5 per cent.

During the first quarter of 1912 1,447 vessels passed through the Suez Canal, as against 1,729 in 1910 and 1,274 in 1911. The dues were 36,050,000 frs., as against 35,190,000 frs. in 1910 and 33,950,000 frs. in 1911.

NEW COMPANIES.

Roumanian Consolidated Oilfields.

Under the above title a company of £1,750,000 in £1 shares was registered on May 10 with the object to acquire certain oil, petroleum, and mineral-bearing lands and claims and options and concessions over oil and petroleum producing and mineral properties, together with wells, fixed and loose machinery and plant, pipes, refinery works and petroleum undertakings, in Roumania and elsewhere, to carry on the business of producers, importers, exporters, carriers, buyers, sellers, manufacturers, and refiners of oils and petroleum spirit, to erect and maintain works for the purpose of distilling and refining oils and preparing therefrom separate products for sale, and of producing chemical materials or substances necessary in connection with the refining of oils, or conveniently operated in connection therewith, and to adopt an agreement, the parties to which are not named. Minimum subscription, seven shares. The first directors are Messrs. R. Barnett, A. Rutherford, P. Quilter, W. W. Rutherford, M.P., W. Smellie, Sir Henry A. Blake, and W. H. Plewman. The qualification is 1,000 shares, and the remuneration £400 each per annum (£150 extra for the chairman, and £100 for the deputy chairman) and 10 per cent. of the profits available for distribution in any year when at least 10 per cent. dividend is paid. The registered offices of the company are at City House, 48, Cannon Street, E.C.

Oilfields Equipment and Trading.

Under the above title a company has been registered with a capital of £2,000 in 2,000 ordinary shares of one shilling, and 1,900 preference shares of £1 10s. The offices are in Philpot Lane, E.C.

Prahova Syndicate.

Under the above title a company has been registered with a capital of £2,000 in £1 shares. The offices are in 111-113 Copthall House, E.C.

Galician Oil Trust.

A company has been registered under the above title, with a capital of £300,000, in 10s. shares. The objects of the company are stated to be: To carry on the business of petroleum and oil refiners and merchants, miners, prospectors, etc.; to acquire oil, petroleum, and mineral bearing lands and claims and options over oil and petroleum producing and mineral properties in Austria, Russia, or elsewhere, and to adopt an agreement with the Oil Trust of Galicia, Limited, and the liquidators thereof, and the Mining and General Investment Co., Limited.

The first directors are Messrs. A. Hicks, A. Armitage, J.P., and L. A. Sandey. The qualifications are 100 ordinary shares and the remuneration £200 per annum (chairman £300). The offices are situated at 804-809, Salisbury House, E.C.

DIVIDEND ANNOUNCEMENTS.

Compagnie des Eaux de Scutari et Kadi Keui.—For 1911, a dividend of 7 per cent., or 40.25 frs. per share.

Banque Française d'Egypte.—On and after May 15, on account of dividend for 1911-12, 3 per cent., or 3 frs. per share.

Société Belge-Egyptienne de l'Ezbekieh.—On and after June 15, dividend 1911 of 26 frs. per preference share, No. 1-8,000, and 1 fr. per ordinary share, No. 1-14,000 (Coupon No. 12).

COMPANY MEETINGS.

Cairo Electric Railways and Heliopolis Oases Company.—Tuesday, May 21, at 11 a.m., at the offices of M. Carton de Wiart, Cairo.

The Mortgage Company of Egypt.—Tuesday, May 21, at 3 p.m., at the Cannon Street Hotel, E.C.

Maikop New Producers.—London, May 23.

NOTES OF THE WEEK.

For all who are concerned with the promotion of British interests abroad, however restricted may be the sphere in comparison with the aggregate of British territorial possessions, Empire Day has a special significance. In the columns of THE NEAR EAST, which counts its readers in all quarters of the globe, we may, therefore, be allowed on this day to voice the feelings of goodwill and solidarity that bind the Empire together, with the knowledge that the interests of any one part are not without their relation to the well-being of the whole.

The Dardanelles, which were closed at the time of the Italian bombardment of April 18, were reopened to traffic on May 18. Outgoing vessels only were allowed to use the channel at first, and four days were required to convoy all the ships detained east of the Straits. While the Turkish Government has been thus engaged in placing itself right with the neutral Powers, the Italians have been consolidating their hold on the islands of the Ægean Sea. A fortnight after the formal occupation of Rhodes, the Italian troops, by a well-executed movement, were able to take effective possession of the whole island. The main part of the Turkish garrison had withdrawn to a position about twenty-five miles from the town of Rhodes, and in order to prevent it from breaking up into small parties and inaugurating a guerilla warfare in the mountainous country General Ameglio decided upon a night surprise. The attack took the form of an enveloping movement, carried out by three columns, one of which advanced by land over difficult country, while the two others were conveyed by sea to points on the coast west and east of the Turkish position. Early on the morning of May 16 the three columns were in touch with one another and started their attack. The Turks by common consent made a gallant resistance, but the completeness of the Italian dispositions sealed their fate. By the end of the day they had taken refuge in scattered bodies in ravines, which were at the mercy of a fresh advance on the part of the Italians the next day, and on the following morning they surrendered to the number of 53 officers and 950 men. This small engagement appears to have been fought out in a manner fully in keeping with the traditions of the belligerents. The Italian troops were clearly well handled, and the concerted movement by night, nearly always a difficult operation, was carried through with commendable precision. Telegraphing to his Government, General Ameglio announced that as an expression of respect for their gallant conduct the Turkish officers had been allowed to retain their swords.

The story of this fighting on Rhodes has served to relieve the monotonous recital of the capture of fresh islands in the Ægean by the Italians, and adds a more genuine war note to the details of a dull campaign. But these operations in the Ægean Sea, whatever may be their measure of success, will not, *per se*, solve the problem of Arab resistance in Tripoli. So long, therefore, as the Porte contrives to eliminate extraneous complications from the war, the chief considerations in this stalemate conflict are the cost to each of the combatants and the possible weariness of the Arabs, who are bearing the brunt of the struggle in North Africa. Defections are reported among the natives near the Italian sphere of effective occupation; but fanaticism among the tribes in the desert is said to be as rampant as ever, although the closing of caravan routes on the Tunis border adds to the difficulties of their commissariat. The fact that the end of the war does not appear appreciably closer, however, does not lessen the general desire to see a struggle that has altogether outgrown first causes brought to a speedy conclusion.

The news from Albania, as our correspondent in Constantinople indicates, is still vague and contradictory. It would seem, however, that the presence of Turkish troops has for the present prevented a general outbreak, and that, by force of arms or persuasion, a temporary cessation of hostilities has been procured. Large numbers of the Albanians are reported to be still in the mountains, and, while protesting their loyalty to the Sultan, urge their claims upon the Turkish Government. The latter, while maintaining its optimistic attitude in regard to the disturbances, continues to despatch troops to the districts concerned, explaining its action as being designed to prevent rather than to crush an insurrection. A truce with the Mirdites is said to have been arranged on the strength of the promise that all the concessions granted to the Malissori last year shall be extended to the Mirdites. In Macedonia no serious conflicts have yet taken place, although fresh activity on the part of the revolutionary bands is reported. The hopes centred in the appointment of Hussein Kiazim Bey as Vali of Salonika are not likely to be realised, as he has immediately tendered his re-

Digitized by Google

signation as a protest against the appointment of Halil Bey to the Presidency of the Turkish Chamber. Halil Bey does not enjoy a great reputation even in his own party. The incident, coupled with the resignation of Nail Bey, Minister of Finance, indicates that the Committee of Union and Progress is not altogether free from domestic troubles, which may find expression even in a Chamber almost exclusively filled by its own members.

Elsewhere in this issue we publish an official summary of the work of the Commission which, under Hadji Adil Bey, has now completed its three months' tour in Macedonia and Albania. If the document does not add much to the knowledge that has already been gleaned of the Commission's activities, it well indicates the nature of the reforms for which these provinces have had to wait so long. Even now, with the exception of certain disciplinary measures carried out on the spot, the chief value of the Commission's tour lies in the future. The fact that the needed reforms have been catalogued marks one step in advance; but they have been promised before, and the Turkish Government must not be surprised if neither the population of the two provinces nor the friends of Turkey abroad hail the Commission's report with rapture until the extent to which effect is to be given to these fresh promises is known. The very comprehensiveness of the programme outlined by Hadji Adil Bey militates against any immediate instalment of reforms on a large scale. But it cannot be impressed too often upon the Porte that it is now being given what may prove to be its last trial in these provinces. With the return of Hadji Adil Bey to his Ministry, the Government has the services of a capable administrator with first-hand knowledge of the conditions in Macedonia and Albania, and with goodwill much can be done to remedy their conditions. These provinces, it is true, form only one portion of the Turkish Empire, but it is a portion vital to the well-being of the nation. The war and the general financial situation must inevitably claim special attention at the moment: but the Macedonian problem is too critical to be regarded as otherwise than in the forefront of Imperial questions.

From Persia comes the satisfactory intelligence of the severe defeat of Salar-ed-Dowleh's forces near Hamadan; but it is more than counterbalanced by the news of the death of the victor in the engagement, Yeprem Khan. The accounts of the manner in which he met his end are conflicting. According to one version he was shot in his tent by an unknown assassin; according to another he was killed either during the engagement or by a bullet from an old fort in the neighbourhood of which he was walking after the battle. Yeprem Khan was Chief of Police in Teheran, but he was a greater asset to Persia than his position might indicate. His success as a military commander had given him considerable prestige in the country, and he appears to have exercised from time to time a salutary influence upon the Teheran Government. To Europeans his presence gave a sense of security, and the chief hope of Persia seemed to be centred in him. His victory on May 19 was in keeping with his former prowess in the field, and a decisive defeat of Salar-ed-Dowleh's forces might in other circumstances have constituted a turning point in Persia's fortunes. It is to be feared, however, that the loss of Yeprem will not only demoralise the loyal troops, but will also tend to paralyse the Government's efforts to cope with the existing chaos in the country. The intention to hold elections for the Mejliss is now reported to have been abandoned in view of the disorders. At Bundar Abbas, owing to disturbances among the tribesmen and an attack upon the town, British bluejackets were landed on May 17, but after clearing the wells of the insurgents were able to re-embark on the following day.

In Egypt Lord Kitchener continues his policy of personal orientation in all questions affecting the well-being and progress of the country. He has recently concluded a tour in the Delta, where the same evidence of his popularity among the natives was given as on the occasion of his visit to the Sudan. Throughout this tour he has continually been the object of public acclamations, of which the spontaneity has only served to emphasise the obvious sincerity. At the more formal receptions he offers each local community the same accessibility that marks the British Agency in Cairo. Conversation, it may be taken for granted, is directed towards questions of vital interest to the rural population, and his exchange of views, in a country where the personal element means so much, must inevitably tend to facilitate the introduction of new methods intended to promote the welfare of the people.

The prospects of cotton-growing in Egypt were elaborated in an interesting speech made at the annual dinner of the British Cotton-Growing Association by Mr. J. A. Hutton, who recently concluded a tour in Lower Egypt and the Sudan on behalf of the Association. In regard to the Sudan, he pointed out that it was not a question of starting from the beginning, of building up a cotton industry from nothing. The Sudan is already a cotton-producing country with an export exceeding 20,000 bales a year. What was required was the extension and development of the cultivation that already exists. It was necessary to educate the cultivators up to the needs of the industry, and there were possibilities of producing large quantities of cotton of American type. Railway construction would have to be undertaken, and the work of development would call for capital. Mr. Hutton proposed that the British Government should be asked to advance on loan to the Sudan Government for these purposes the sum of £1,000,000, while the cotton interests of Great Britain would be expected to contribute a similar amount. He anticipated from the Anglo-Eyptian Sudan larger and quicker results than from any other part of the British Empire; and with adequate capital, if everything were to be pushed on as rapidly as possible, he saw no reason why in ten years' time the Sudan should not be producing annually a quarter of a million bales of excellent cotton.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 18.

The Dardanelles were declared open at 1.15 p.m. to-day, all the mines having been removed from the channel, which was left free for navigation until the Italian demonstration against the entrance of the Straits. An old steamer was towed down yesterday from above Nagar to Kumkalessi without incident or accident, and it may be presumed that the passage will now be attended by the minimum of risk. The clearing of the channel has, of course, been a slow affair, but it must be admitted that, if the Turkish naval and military authorities threw the mines into the water in rather haphazard fashion, they were greatly handicapped by bad weather when they had to fish them up again.

The departure of the swarm of tramps, liners, oil-tanks, and colliers which have been lying off Haidar Pasha and San Stefano during the past fortnight will quite change the appearance of the port. Lifeboat races were held last Saturday for the crews of the British vessels detained here, the prizes being given by Messrs. Gilchrist and Walker, and caused much excitement. Altogether there have been nearly 200 merchantmen between the Kavaks and the Dardanelles since the closing of the channel.

War Items.

No news comes from Rhodes save that the Turkish garrison is reported to be surrounded and that the Italians are effecting a leisurely occupation of the interior. No more confirmation of the great victory in which 1,000 or 1,500 Italians were killed is forthcoming and none is now expected. Enver Bey reports a series of skirmishes, in which the Turkish troops and their Arab allies have been successful from Cyrenaica. It is noteworthy that in these affairs, in which very small numbers seem to have been engaged on either side, the Italians made considerable use of native Tripolitan levies as scouts and light cavalry.

The Chamber of Deputies.

Hálil Bey, the new leader of the Committee Parliamentary Party, has been elected President of the Chamber of Deputies. The first Deputy-President is Mehmed Pasha, M.P. for Damascus, the second Haladjian Effendi, M.P. for Constantinople and sometime Minister of Public Works. Needless to say, all these officers, with the "questors" and secretaries, are the nominees of the Committee Party.

The elections are not yet over. According to to-day's telegrams, the stubborn resistance of the Nationalist Albanians to official pressure has been crowned with success at Ipek, Djakova, and Prisrend. Nedjib Draga, Bekir Bey, and Hassan Bey of Prishtina, the first and last of whom are well known for their advocacy of the Latin alphabet and for their particularist principles, have been elected with another Nationalist deputy for Prishtina, after a great struggle, which at one moment seemed likely to end in bloodshed. It would appear that the support of Serb candidates by the Committee in certain districts of Old Servia—a name which the reader would do well to avoid using in the presence of an Albanian—militated against its chances of success so near the Servian border. In Asia the remaining elections seem likely to be won, for the most part, by Committee nominees. As for the islands, all the elections do not seem to have been held, owing very possibly to the appearance of a disturbing element in the shape of the Italian Fleet. Little news has been received here as to the state of public feeling among the Greeks of the Ægean, who are faced with the possibility of invasion. Those best informed maintain that they will preserve a prudent neutrality. Their position, between the Turk and the Italian, is not a happy one, by any means.

Albanian Affairs.

It is more than a little difficult to find out what has really been taking place in Albania during the last ten days. Flights of *canards* are followed by flocks of *démentis;* the combat near Gussinje dwindles down to a mere affair of horse-stealing followed by resistance to arrest; the outbreak at Istok becomes a mere piece of turbulence on the part of some misguided peasants; while a telegram from Prenk Bibdoda Pasha assures the world that the Mirdites were never quieter. On the other hand, there seems to be little doubt that fighting has actually occurred in the town of Djakova and in Lower Dibra, in which artillery had to be used before the Albanians retired to the hills, and messages from Salonika speak of the rising of about 2,000 Djakova Malissors, including the Krasnitchi and Hasi clans. On the Scutari side there has been an attack on the police station at Gamsitche by Albanians of the Zadrima and Puka districts, which was repulsed by the gendarmes; but the Malissors of the five great Bairaks (Hoti, Klementi, Grudi, Kastrati, and Skreli), who bore the brunt of last year's Malissor war, have thus far kept quiet.

In Macedonia the bands are very active, and appear to be receiving reinforcements and supplies from the Macedonian colony in Bulgaria. However, no serious collisions have taken place between the troops and the komitadjis, and the peasantry are still unconvinced that they will be well advised to risk their own necks and their women's honour by rising against the Government, as they did in 1904, at the bidding of the internal organisation.

THE TURKISH GENDARMERIE.

We are informed that the Turkish Government has requested Great Britain to appoint five English officers for incorporation in the command of the Gendarmerie in European Turkey, which has recently been reorganised, and is to have its headquarters at Salonika. The British Government, we learn, promptly acceded to this request.

THE BOYS' SCHOOL AT CONSTANTINOPLE.

According to the report of the British Chamber of Commerce of Constantinople, the English Boys' School at Constantinople moved into the new premises last September, and is temporarily accommodated in the boarding-house, pending the building of the class-room block.

The number of boys in the school is now ninety-three, including twenty-five boarders, and next autumn there will be room for 150 boys, including fifty boarders. The school is situate in the healthiest quarter of the town (Nishantash), looking straight on to the open country. No expense has been spared to provide the best drainage and sanitary system, and both British and Turkish parents are to be congratulated on the facility afforded for obtaining English education for their boys under the best conditions.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 15.

The New Tribunals.

The scheme for the institution in Egypt of a system resembling that of justices of the peace in England is a judicial innovation the working of which will be watched with much interest. As the underlying motive in the extension of the Post Office Savings Bank to rural districts is the desire to bring the facilities for thrift to the door of the *fellah*, so the principal reason for the establishment of "Cantonal Tribunals," as they are to be called, is the wish to place the means of obtaining justice within the immediate reach of intending litigants. Thereby it is hoped that much unnecessary loss of time and money will be prevented, since it will be possible in future to have minor cases decided without plaintiff and defendant having to make the journey to the Markaz tribunal. The new institution is, however, intended to remedy another defect in the existing system, namely, the conflict between justice as dispensed by professional judges and justice as understood by the *fellah* in the light of local customs and ancient traditions. Each Markaz is to be divided into two cantons, each of which will have its tribunal with five judges—three of whom will form a bench—chosen from among the notables of the district by the Minister of Justice on the recommendation of the Procureur Général, the Mudir of the Province, and the President of the Native Court of first instance. Only in exceptional cases will village sheikhs or omdehs be chosen, since the nature of their duties frequently entails absence from their villages, and the essential feature of the scheme is that the judges should always be on the spot. An important part of the functions of these new courts will be to attempt to bring about a reconciliation between the two parties. Should they fail, and should the matter fall within their competency, the case will be decided with due regard to local customs, so long as these are not contrary to equity. With respect to the competency of the new courts, both civil and penal cases come under their jurisdiction. In the first category are comprised disputes concerning stock, workmen's salaries, damage to crops, sakkias, rent, the hiring of animals and other questions of a similar nature, provided, however, that the amount involved does not exceed £E10. Penal cases can be decided by the Cantonal Tribunals only so long as the legal penalty does not exceed a fine of 25 piastres or twenty-four hours' imprisonment. In other words, the function of the courts is to give decisions in disputes such as usually arise between peasants, and, this being so, the law by which they are established does not apply to the chief towns of the provinces nor to the various *gouvernorats*.

Cost of the Innovation.

As is usually the case with reforms, the institution of the cantonal tribunals will cost money. On the one hand, owing to the lower tariff which has been drafted in order to bring justice within the means of all, the diminution in receipts is estimated at £E12,000. On the other hand, practically all the Markaz Tribunals are to be transformed into summary tribunals, to each of which a member of the *parquet* is to be attached. This charge will involve an increase of expenditure estimated at £E30,000. As a set-off to the increased cost, however, a great alleviation in the work of the summary tribunals is looked for. Had the Cantonal Tribunals been in existence last year, in fact, it is estimated that they could have disposed of nearly half the cases that came before the summary and Markaz Courts. By relieving the Summary Tribunals of much of the work entailed by lesser disputes, it is hoped that it will be possible to extend their competency and thus to bring about a certain decentralisation in the judicial organisation of the country. The scheme, if workable, is an excellent one, both from the point of view of lessening the work of the Summary Tribunals and of accelerating the course of justice in cases of minor importance. One criticism, however, naturally arises, and the working of the scheme—which, it should be noted, is only provisional—alone can show whether it is justified or not. This is the question of the suitability of local notables to act as judges in cases where frequently plaintiff or defendant will be friend or enemy of the judges. Should, however, the sense of the responsibility of their office be strong enough to cause them to sink possible prejudices and thereby to gain for them the confidence of the rural population, the scheme should prove a valuable instrument in the training of the people towards self-government.

Prince Hatzfeldt's Resignation.

With the departure from Cairo at the end of last week of Prince Hatzfeldt-Wildenburg the post of German Agent and Consul-General in Egypt has become vacant. Prince Hatzfeldt's resignation, which is understood to be due to his desire to devote himself, for a time at all events, to the management of his private affairs, was not unexpected. A few months ago he was obliged to return to Germany for several weeks to look into the affairs of his estates upon the Rhine, which he recently inherited from Prince Francis Hatzfeldt, whose name was well known in England in connection with racing. It would not appear, therefore, that the departure of Prince Hatzfeldt, who is the son of Count Hatzfeldt, for many years German Ambassador in London, is connected directly, at all events, with the shuffling of German diplomatic posts. Until the appointment and arrival in Cairo of his successor the business of the Agency will be in the hands of Baron Richthofen. Before leaving Alexandria on Saturday Prince Hatzfeldt was entertained at a banquet by the Khedive at Ras-el-Tin palace. Here also His Highness received Lord Kitchener yesterday before leaving for Constantinople and his usual European tour, from which he is expected to return early in August, after visiting England.

The Situation in Assir.

Advices received by the local Press point to the existence of a considerable amount of unrest in Assir. According to information from an Italian source, the situation of the Turks is critical, since El Idrissi has rapidly gained in power and has announced his intention of proclaiming himself Caliph. In consequence, it is said, many Moslems are flocking to his banner. The Turkish expedition under the command of Hamdi Pasha which is operating against El Idrissi is said to be making the utmost efforts to gain over the tribes to their side. It is reported from Aden to the *Egyptian Gazette* that last month El Idrissi, aided by the fire from an Italian cruiser, made a determined attack upon Konfidah, but was defeated with heavy losses. On the other hand, information received from other sources states that the reports of hotly contested battles between El Idrissi and the Turks are not confirmed.

The "Aslam" Incident.

A few days ago the trial of the captains of the "Aslam" and the "Psara," the two vessels which collided near the barrage on Easter Monday, took place. The captain of the "Psara" has been sentenced to two years' imprisonment, and the captain of the "Aslam," the vessel which finally sank, to eighteen months' imprisonment. The collision, which involved the loss of about ten lives, has led to the general impression of a desire to see more stringent regulations for the navigation of the Nile introduced. It has also served as another example of the grossly exaggerated manner in which Egyptian news appears too often to be served up for European consumption.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 17 mai.

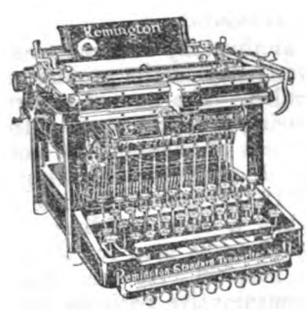
Les deputes cretois.

La venue à Athènes de M. Lyonakis, membre du comité exécutif de Crète au département des finances, a résolu l'importante question de savoir si les députés crétois sont en effet décidés à forcer l'entrée du parlement. M. Lyonakis, un des extrémistes qui organisèrent et dirigent le mouvement insurrectionnel et promoteur de la malheureuse idée de l'envoi de députés à Athènes, est arrivé ici vendredi soir dans le but de se rendre compte comme il l'a dit, de l'état d'esprit du peuple grec relativement à la question crétoise et de savoir ce qu'il pense au sujet de leur mouvement. M. Lyonakis a dit aux journalistes qui l'ont interrogé que la situation critique dans laquelle se trouve la Crète demande une solution immédiate qui n'admet pas le moindre délai et que les Crétois ne veulent plus attendre que la Grèce ait complèté ses préparatifs militaires. "C'est bien le moment," a-t-il ajouté, "de tenter un coup décisif; nous sommes à même de vous envoyer 15.000 Crétois bien armés et un bon nombre égal de volontaires."

Le lendemain de son arrivée M. Lyonakis a été reçu par le président du conseil et, après avoir exposé tout ce qui précède et l'avoir entretenu de la capture des députés crétois, il a déclaré à son compatriote qu'en Crète on persiste à ce que leurs députés entrent coûte que coûte dans la chambre hellénique. M. Vénizélos, après avoir insisté sur les raisons qui ne permettent pas au Gouvernement grec d'accéder en ce moment à une action qui l'entraînerait à une guerre avec la Turquie, lui déclara à son tour qu'il est décidé à ne pas admettre les députés crétois et lui a exprimé la conviction que les motifs pour lesquels il est obligé de leur refuser l'entrée sont fort bien compris en Crète et que leur insistance n'a d'autre but que de lui créer des difficultés. M. Lyonakis a repoussé cette accusation assurant que ses compatriotes n'ont jamais eu une telle intention et il a ajouté la déclaration suivante. Il a assuré que si la Chambre partageant la manière de voir du gouvernement, se prononçait contre l'admission des députés crétois, ceux-ci n'insisteraient plus et retourneraient en Crète.

D'autre part les dernières nouvelles de la Canée, où M. Lyonakis est arrivé depuis trois ou quatre jours, font espérer que des avis plus sages commencent à prévaloir dans l'île. La grande commission permanente a élu avant hier les cinq nouveaux conseillers qui sont chargés de gouverner l'île pendant le mois de mai; leur choix a produit une très bonne impression en raison de leurs idées modérées. En effet dès sa constitution le nouveau gouvernement a pris des mesures pour assurer l'ordre et effectuer des économies dans l'administration. Suivant les mêmes renseignements la commission permanente se réunira de nouveau, quelques jours avant l'ouverture de la chambre grecque, pour prendre des décisions définitives en ce qui concerne les instructions qu'elle aura à donner aux députés qui se trouvent à Athènes. Ces instructions seraient à l'effet de leur recommander d'éviter tout conflit et de ne pas provoquer des troubles. Il paraîtrait en effet, toujours d'après ces reseignements, qu'il commence à se manifester une certaine tendance à laisser languir la révolution et à revenir à la légalité et il paraîtrait probable que, lorsque la question des députés envoyés à Athènes aura été résolue, on procédera à la formation d'un gouvernement constitutionnel et stable conformément aux suggestions de M. Vénizélos. Cela ne serait pas étonnant à la suite de l'attitude sévère des puissances à l'égard des députés capturés, attitude qui a dû sans nul doute convaincre les partisans d'une politique aventureuse que les puissances n'hésiteront pas, le cas échéant, a réoccuper l'île. Il est donc permis d'espérer maintenant que les dangers, qui faisaient et n'ont pas cessé de faire redouter la présence des députés crétois à Athènes, ne seront pas réalisés. Après le changement survenu dans les dispositions des députés crétois quant à leur entrée à la chambre, ces dangers sont moins à rédouter des Crétois que de ceux qui chercheront probablement à profiter de cette circonstance pour mettre le gouvernement en mauvaise posture.

Mardi soir sont arrivés cinq autres députés crétois partis clandestinement la nuit à bord d'un bateau grec qui a fait la traversée avec les fanaux éteints de peur d'être aperçu et capturé par l'escadre internationale. Quatre autres encore sont arrivés ce soir, parmi lesquels M. Pologeorgis.



L'occupation des iles de l'archipel.

L'occupation des îles de l'archipel à laquelle procède graduellement l'Italie continue à'inspirer ici de sérieuses appréhensions et de provoquer de vives protestations. Une partie de la presse émet le soupçon que l'Italie, forte d'accords secrets conclus avec d'autres puissances, occupera définitivement ces îles grecques que la Grèce espère voir un jour faire partie de son royaume, disant qu'elle les gardera jusqu'àu paiement de l'indemnité de guerre qu'elle réclamera à la Turquie, indemnité qui, comme elle le sait fort bien, ne lui sera jamais payée.

Mais ce qui inspire le plus d'inquiétudes c'est la crainte qu' après le départ des Italiens ces îles ne perdent le régime quasi autonome dont ses habitants jouissent actuellement et qu'ils ne soient maltraités par les Turcs pour avoir bien accueilli les Italiens. On craint tout particulièrement que, si l'Italie vient à occuper Samos, cette île ne se trouve, après son évacuation par les Italiens, privée de son autonomie et que les Turcs ne cessent de reconnaître les privilèges dont jouissent une douzaines d'autres petites îles. Dans cet ordre d'idées on rappelle à l'Italie ses traditions libérales qui lui imposent de respecter les droits des nationalités et on exprime la conviction que l'occupation de ces îles n'est que temporaire et pour intimider la Turquie et que l'Italie aura bien soin d'assurer les privilèges de ses habitants avant de les rendre à la Turquie.

Bien que toutes ces craintes ne paraissent point justifiées et qu'il soit loisible, par contre, de nourrir des espoirs dans le sens contraire, il n'est pas moins prudent, comme je le disais à cette place la semaine passée, que les habitants s'abstiennent de toute manifestations qui pourraient indisposer les Turcs contre eux; il paraît en effet que des instructions dans ce sens ont été envoyées d'Athènes.

ARMENIAN LETTER.

(From Our Special Correspondent.)

Constantinople, May 17.

Much importance is attached to the cordial relations existing between the Armenian Patriarchate and the Russian Embassy. M. Tcharikoff on his departure arranged a special interview with the Patriarch, and the new Ambassador during the week paid a visit to Koum Kapou Patriarchate, remaining there about an hour. Strangely enough, the Armenian massacres were not mentioned by the Ambassador, and a remark of Mgr. Arscharouni concerning Russia's responsibility for the wholesale murders of seventeen years ago is much commented on in the Armenian papers.

The Question of Conscription.

The Ottoman Government have lately undertaken to call to arms all Christians up to the age of forty-five, thus creating general discontent, especially in the provinces. Upon the request of the Armenian Mixed Council, the Patriarch presented a *takrir* reminding the authorities that this action is neither right nor legal. This *takrir* points out that all persons up to the age of forty-five have in the past paid poll-taxes, and thereby obtained exemption from military service; secondly, the law on Christian conscription was passed in 1909, and has no retrospective action; and, thirdly, the law was plainly intended to apply to the young men of military age. "Massacre and outrage," the *takrir* adds, "have already taken away thousands of labourers; there are thousands of young men who are serving for the country; and if everybody is subject to conscription commerce and agriculture will be stopped and thousands of families would be left to sheer starvation and misery." It is hoped that the Government will take the protest of the Christians into consideration before they go any further in this matter.

The Armenians in America.

The Armenian colony in America having congratulated the Sultan on the occasion of the third anniversary of his accession to the throne, Assim Bey, the Minister of Foreign Affairs, wired a despatch of thanks to the community through the Turkish Consuls in the United States. At present there are about 70,000 Armenians in the States, mostly located in New York, Providence, Boston, and Worcester. During the last ten years 28,916 Armenians have emigrated from Turkey to the United States, the majority having left since the Constitution; and apparently the exodus is increasing. Turkey is not losing by this state of affairs, however. The export and import trade with Turkey carried on by the Armenian immigrants in the States amounts to several million dollars, besides which almost every immigrant sends money to his relatives in this country.

The Armenian Hospital.

The eightieth anniversary of the Armenian Hospital was celebrated yesterday in the grounds of the institution at Yedi Kouleh. The annual report was read by the trustees. During the long years of the existence of the hospital hundreds of thousands of poor people have been sheltered and cared for. During the year the expenses were £T12,000 and the income £T13,400. The trustees state that a new building was bought at Shishli for £T6,500 to be used for the orphanage connected with the hospital. It was also stated that a sanatorium for consumptive patients has been planned and an appeal for funds was made to the public.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, May 18.

A number of interviews took place at Sinaia this week between the King and the respective leaders of the Conservative and Conservative-Democratic parties, with a view to finding a basis for the fusion of the two parties. It is practically certain that the Maioresco Ministry cannot last longer than the autumn, and the King is most anxious that th reunion, or "concentration" as it is called here, should take place before then, in order that a strong Conservative Government may be called into being and relieve the country of frequent Ministerial crises. He is said to have used all his influence to that end, and to have threatened to send for M. Take Ionesco should the Conservatives refuse to come to terms with him before the autumn. So far, however, the negotiations have not led to any result, and they have even been indefinitely postponed. Those who are most opposed to a fusion are the very three statesmen that lately withdrew from the Government in order to appease the Opposition and facilitate the settlement of the Bucharest tramways question, viz., M. P. Carp, the chief of the Conservative party; M. Marghiloman and M. Filipesco. Their counsels still prevail, as their influence is very strong, and M. Maioresco finds it a difficult task to be the head of a Government that does not include the head of the party with which he governs.

It is anticipated that negotiations will be resumed again, or a definite rupture announced, as it is recognised that the Maioresco Cabinet is but a transition Ministry.

The Bucharest Tramways.

Judgment was delivered on the 13th inst. in the action brought by the Bucharest Tramway Company against the Home Office for damages sustained through the Government's stopping the circulation of the company's tramcars. The Home Office was ordered to withdraw the order preventing the free circulation of the cars or pay 1,000 frs. for each day's delay, and the company was further awarded 100,000 frs. damages and 5,000 frs. costs. Notice of appeal was given.

There is yet another suit pending in the Courts having reference to the same question, that instituted lately by the Corporation of Bucharest against the Tramway Company asking for a revision of the concession and an amendment of the company's statutes, as being too onerous to the town.

Roumanian Aerial League.

An Aerial League has been formed at Bucharest for the purpose of purchasing by public subscription aeroplanes for the Army. M. Constantine Olanesco, the President of the Chamber of Deputies, is the first president of the League. Aviation is making good progress in Roumania, and several aeroplanes piloted by young officers took part in last year's autumn manœuvres.

"THE SPHINX."

Cairo's illustrated weekly paper, the *Sphinx*, which recently changed hands, will, under its new management, appear regularly throughout the year, and not, as hitherto, during the winter months only. It is, moreover, the edition's ambition that the *Sphinx* shall be to Egypt what the *Graphic* and the *Illustrated London News* are to Great Britain. We wish the paper every success in its future rôle.

NOTES FROM SMYRNA.

(From Our Own Correspondents.)

Smyrna, May 15.

Italian Activities.

The Italians continue occupying island after island, and it is reported that Halki, Leros, Kalymnos, and Patmos have been seized. The s.s. "Antwerpen" arrived this morning in our harbour, and the captain reports that yesterday evening, when off the northern side of Chios, he heard heavy firing. It is believed that the Italian squadron is operating off Chios, the occupation of which is expected daily. Within the past fortnight a number of Turkish troops have been marched from here to Cesme opposite Chios, and have been transported by sea across the narrow straits to the island. The Turks declare that staunch resistance will be offered to the Italians if they attempt a landing at Chios, and in view of the preparations which have been steadily made during the past month this is likely to prove the case.

The Turkish population here is getting somewhat restive at the encroachments of the enemy, and the authorities are most anxious to expel the Italians so as to remove cause for any ebullition of public animosity and feeling against them. The notification of expulsion is being made courteously, the police officials having received strict instructions to avoid the display of any ill-feeling towards Italians irrespective of rank. The whole conduct and attitude of the authorities cannot be too highly commended.

Smyrna, May 16.

The Expulsion of the Italians.

The order to quit given to several of the leading members of the Italian colony has soon been followed up by a general expulsion of all Italians of the Vilayet of Aidin, with the exception of widows, a few workmen, and the priests; but as feeling against the last-named is strong amongst certain classes of Turks, it is likely that they will be ordered to leave also. This order includes women and children, and one cannot but regret that the Turks have gone to extremes, as many of the Italians here are very poor. The Italian Government, unfortunately, has not placed funds at the disposal of the German Consulate, and great credit is due to the untiring efforts of the German Consular officials on behalf of the not over-grateful Italians. They have telegraphed for some German cargo ships to come and take away the poorer classes, but it is probable that many will either adopt Ottoman nationality or remain as prisoners of war. In this connection, it may be mentioned that hundreds of so-called Italians were formerly Ottoman subjects, but the Italian Consulate for years made it very easy for them to take out Italian nationalisation papers, and it will now be no great blow to their national feelings to turn their coat once more.

Many of the merchants and manufacturers will be badly affected by the expulsion order. One great firm of carpet manufacturers was the first to feel it, their managing director and several of the heads of departments being Italian subjects. Some offices are almost emptied. It is remarkable how the Turkish authorities were aware of the Italian nationality of those ordered to go, but in such matters the Turks are always well posted.

A Commission has been formed to carry out the expulsion order, and it will no doubt be kept busy, as there are some 10,000 Italians in the province.

The Occupation of Rhodes.

Ships coming from Rhodes are now furnished with Italian papers, and one touching at Makri, nearly opposite Rhodes, was fined for having its papers signed by the Italians! Early fruit from Rhodes is in great demand always in Smyrna, but it is now looked upon as Italian, and the Turkish Custom House officials are debating whether to tax it 100 per cent. or to let it pass as Turkish. In the meantime, the Italians have established telephone, postal, and wireless telegraph services, and have made more progress in Rhodes in a week than the Turks have done in centuries. Abdullah Bey and his thousand men are still holding out, but the Vali, Soubhi Bey, is a prisoner.

NOTES FROM HAIFA.

(From Our Own Correspondent.)

Haifa, May 5.

Jewish Colonization.

The Mutessarif of Acre recently brought an action for damages against the editor and proprietor of *Al Carmel*, a local paper which has been distinguished ever since its appearance by playing an active part against the Jewish movement. The chief ground of complaint appears to have been that, in an article which took the local authorities to task for the assistance they have lent the Jews in acquiring land, the writer asked: "Are we all bargainers?" The case attracted much attention, but it was commonly supposed that it must inevitably terminate in favour of the official. Judgment was, however, given for the journalist on the grounds that he had written as a true and sincere Ottoman, and the Mutessarif has had to pay all the costs of the action.

Jews and Natives.

The Jews have already obtained permission for the construction of a large school here, and have commenced work upon it. But they resolutely decline to employ native contractors and labourers on the work. This, they declare, is in consequence of the difficulties that have been put in the way of their acquiring land by the natives, and the opposition they have met with in various directions. Consequently disputes and quarrels have been numerous, and the natives, it seems, occasionally go up to the work for the express purpose of making trouble. The Vali, who lately visited the town, has promised to exert himself in the direction of improving matters.

Lack of Fire Appliances - An Illustration.

It is to be hoped that the recent disastrous conflagration at Damascus will be the means of inducing the Ottoman authorities to adopt more up-to-date methods of coping with fires. Recently a fire broke out here at midnight, in a large building in the business portion of the town. The owner of the place, who resided in the upper part of the premises, narrowly escaped death, and his cries for assistance speedily brought together a large crowd. Anxious to assist, and being without appliances, they broke into a large store near by, in which earthen jars and vessels were kept, brought out all the jars they could find, and—the building being close to the seashore—filled them with sea water and endeavoured to extinguish the flames. The success of their efforts was, unfortunately, not very marked, and the building was nearly gutted; while the cost of the vessels broken by the amateur firemen, which is estimated at about £40, has to be borne by the poor owner of the store! It is high time that the municipalities should provide proper pumps and engines; but apparently they have not yet realised the fact—or have not the necessary funds at their disposal. Perhaps the benefits of fire insurance, also, will be better appreciated by the natives in course of time. At present they certainly are not clearly understood.

LETTER FROM MALTA.

(From Our Own Correspondent.)

Valletta, May 17.

The Mediterranean Naval Base.

The announcement made by the *Daily Malta Chronicle* last week that Mr. Churchill was to pay an official visit to Malta, though, of course, quite unexpected, did not cause much surprise; indeed, the visit of the First Lord of the Admiralty to this much talked-of naval base seems but a corollary of the still hotly debated reorganisation scheme which recently so much lowered the strategic importance with which the island has been invested, owing to its unique geographical position, from almost the beginning of history. The precise object of the First Lord's visit is not yet known, but it cannot long remain a mystery, as Mr. Churchill is expected here on the 29th inst. The Board will inspect the naval establishments on the 30th, and will probably leave for Gibraltar on the 2nd prox.

The opinion is still generally entertained in well-informed circles that the absorption of the Mediterranean Battle Fleet into the Home Fleet, and the consequent removal of its headquarters from Malta to Gibraltar, cannot but be a temporary measure, rendered necessary by the formation of a new active squadron in the German High Seas Fleet. It is known, in fact, that as soon as the new British Dreadnoughts have been completed and commissioned into what are now the First and Second Battle Squadrons, several ships will be detached from the Home Fleets for the re-formation of the Mediterranean Battle Squadron. But in the meantime the Admiralty have been credited with the intention of strengthening the Mediterranean Cruiser Squadron, as it will be known under the new scheme, by the addition of several vessels.

Mr. Churchill is not personally unknown in Malta, having paid a visit to the island in October, 1907, when he was Under-Secretary of State for the Colonies.

The Premier's Visit.

It is now certain that the Right Hon. H. H. Asquith will arrive in Malta on the same vessel which is conveying hither Mr. Churchill, to meet Lord Kitchener. It is believed that the visit is connected with the Imperial defence scheme, and will have for its primary object the defence of the Mediterranean possessions. The people of Malta will, no doubt, be glad of the opportunity of welcoming such an eminent statesman as Mr. Asquith and such a famous soldier as Lord Kitchener. Although the latter has passed the island twice, he transhipped on both occasions without landing.

The Eucharistic Congress.

The first meeting of the large and representative committee charged with the preparations for the holding of the Eucharistic Congress at Malta next year has been summoned for this afternoon, under the presidency of the Archbishop. It is expected that no less than seven Cardinals, besides a very considerable number of Archbishops, Bishops, and other church dignitaries, will take part in the Congress. The belief that the Cardinal Archbishop of Westminster will be the Papal Legate on the occasion still lacks official confirmation. Cardinal Bourne is expected shortly to call at Malta on his way from England to the Holy Land.

Sporting Items.

Nothwithstanding that the heat is already making itself felt, football is still being keenly indulged in. Yesterday, before thousands of eager spectators, the Mediterranean Naval Football Team and the Floriana F.C.—the best civilian team in Malta—tried issues with one another, the civilians turning out victors after a splendid game by 2 goals to nil. The Admiral Commander-in-Chief, who kicked off, warmly complimented the winners at the conclusion of the game.

The event of the sporting season will come off on Tuesday next, the 21st inst., when the eighth annual football match between the Navy and the Army for the *Malta Chronicle* Challenge Cup will be played at the Naval Ground. Although this year the match has been delayed on account of the absence of the Fleet, it promises to be none the less interesting. As usual, the gate-money will be devoted to the Soldiers and Sailors Families' Association.

NOTES FROM ODESSA.

(From Our Own Correspondent.)

Odessa, May 19.

Lord Lamington's Persian Tour.

Lord Lamington, returning from his tour through Persia, was expected here yesterday, where despatches were awaiting him. As he wired instructions for his correspondence to be forwarded to Constantinople, he has apparently diverted his homeward route viâ Batoum and the Bosphorus. Lord Lamington's visit to Persia was made, I believe, on behalf of the Persia Committee in London. It has been a flying trip from south to north, accomplished in a few short weeks. It may have enabled his lordship to gather a more intimate general knowledge of the condition of affairs in the Shah's dominions, but it was too brief and superficial for a close study of the chaotic situation and the various factors and causes which continue to retard a durable restoration of peace, order, and security.

Mohammed Ali Shah.

The ex-Shah continues to observe a sort of monastic seclusion in his villa residence here. He is never seen abroad. After his return here he received an occasional visit of courtesy from the City Prefect, but those gubernatorial attentions were discouraged. He declines to accord audiences to local Press representatives, but, as a matter of fact, neither the Press nor the public now take the slightest interest in Mohammed Ali or his affairs. During the first period of his exile here the ex-Shah took a lively interest in his surroundings. He was then lodged with his family, suite, and harem in a spacious and luxuriously equipped forty-roomed palace in the Gogol Street. He was daily seen in the city, occasionally in the saddle, but more frequently in a motor-car or well-appointed victoria. He visited by turns nearly all the local industrial works, and was inducted into the mysteries of the production of a daily newspaper. He was a regular *habitué* at the opera, the hippodrome, and the chief café-chantants. He was also a patron of the racecourse, and founded a sweepstakes in his own name. His second term of exile in the southern capital has no such royal diversions. Mohammed Ali is said to be in impaired health, and he has become extremely morose. It would appear that he has abandoned his previous intention of taking up his permanent residence in England; his majordomo is now looking for a more suitable and commodious villa-residence than that in which his Majesty, family, and small suite are very crampedly accommodated at present. Mohammed Ali Shah maintains a regular correspondence with his leading partisans in Persia, and is occasionally visited by emissaries from Gomesh-Tépé.

The Dardanelles.

The gratifying news of the reopening of the Dardanelles reached the Black Sea and Azoff ports yesterday. Anything but the *fait accompli* would not have been credited. Merchants and grain exporters had become heart weary of the reiterated and subsequently falsified announcements of the immediately impending reopening of the waterway made during the last fortnight. On what appears to be a trustworthy authority in Constantinople it is to-day declared that had Turkey been earnestly anxious to clear the Dardanelles fairway of mines that task could have been accomplished in forty-eight hours; but, as a matter of fact, the Porte was in no hurry to reopen its water-gates. It was the pleasure of the Powers to permit, without protest or demur, the Italian bombardment of the Sedil-Bahr and Koum-Kalé forts, and it was, in turn, the pleasure of Turkey to allow those Powers to feel the economical result of their unfriendly complacency before reopening the Straits. The Turkish attitude and action have been unquestionably correct, and if Great Britain and Russia have been the principal sufferers by the closing of the international waterway, they have only themselves and their extraordinarily passive diplomacy to blame.

THE MACEDONIAN COMMISSION.

As our readers are aware, a Commission has been travelling during the past few months in Macedonia and Albania. The president of this Commission is Hadji Adil Bey, Ottoman Minister of the Interior, and the other members include two civil inspectors, delegates of the Departments of Finance, War, Justice, Public Works, Education, and Gendarmerie. Mr. Graves, Financial Adviser to the Ministry of Finance, represents this department in the Commission.

The Commission has full powers to inspect everything, listen to the complaints of the inhabitants, discover their real needs, dismiss officials proved guilty of wrong-doing, introduce on the spot the most immediate measures of reform in the different branches alluded to above, and to draw up plans where the introduction of the reform requires study and time. The Commission, which has already accomplished its mission in the Vilayets of Salonika, Kossovo, and Scutari in Albania, is at the present time in Monastir. We publish below extracts of an official report by the President, Hadji Adil Bey, showing the result of the work accomplished by the Commission in the Vilayet of Kossovo.

Public Order and Security.

Guard houses have been established and placed in telephonic communication with each other. The number of those to be constructed immediately in the Vilayet of Kossovo is as follows:—Four in the Uskub district, 37 in that of Prichtina, 26 in that of Ipek, and 37 in the Prizrend district—or a total of 104. The numbers of gendarmes in the Vilayet has been likewise augmented as follows:—200 men have been added to the Prichtina battalion, 150 to that of Ipek, and 250 to the Prizrend battalion.

It has been decided to have recourse to armed force in extraordinary cases, such as the pursuit of bands, the repression of revolt, or the protection of road constructions or other enterprises of public utility from the attacks of brigands.

The Governor-General of Kossovo has been authorised to appoint to the Administrative Councils of Prizrend, Ipek, and Prichtina members chosen from among the Albanian and Bairaktar chieftains. Four have been appointed in each of these three districts with a monthly salary of 200 piastres.

Among the officials whose bad conduct has been proved the Commission has recalled the Director of the Uskub Prison, guilty of maltreating a prisoner. An inquiry having been opened as regards judicial officials, the Juge d'Instruction of Précheva and a judicial official at Yéni-Bazar have likewise been recalled. Measures have been taken as regards certain presidents of Civil Tribunals, and steps have been adopted to ensure the regular working of justice in all these tribunals.

A new regulation has been promulgated in order to put an end to the trade in stolen horses in the districts of Prichtina, Tachlidja, Sénidjé, Ipek, and Prizrend.

Public Works.

The high roads from Ipek to Ferizovik, from Scutari to Prizrend and from Mitrovitza to Ipek will be constructed in the course of 1912 by the Ministry of War.

These roads were included among those to be constructed by the Ministry of Public Works, but they have been entrusted to the Ministry of War in order to hasten their construction. The authorities at Kossovo have received the order to construct in part, during the present year, ten main roads and to repair an equal number during the same period.

It has been decided to create agricultural schools and to establish an experimental farm, a depôt of agricultural machinery, and a model institute for the improvement of cattle breeding in the districts of Prichtina, Ipek, and Prizrend.

The establishment of these schools, depôts, etc., and the construction of the three highways in the above-named districts, will largely contribute towards the improvement of the economic situation and public security in these regions. It has been decided, moreover, to improve the tanning industry, which is so important in Ipek and Prizrend.

An inquiry has been opened in order to determine the number of prisons necessary in the different districts of the Vilayet. As soon as this inquiry has been concluded orders will be given for the construction of these prisons, for which a credit of £T20,000 has been opened.

The construction of State konaks at Mitrovitza and Voultchetrin has been begun, as well as that of other konaks in the seven *nahiés* of the Ipek district. These constructions will be finished in the course of the present year.

Education.

It has been decided to establish primary boarding-schools in all the *nahiés*. Among these schools will be some for Serbs and Catholics. The *medressés*, mosques, and village schools will be repaired, and a large *medressé* will be constructed at Férizovik. In order to meet these expenses, a sum of £T3,000 has been allocated by the Department of Pious Foundations.

In order to improve the lyceums at Uskub, Prizrend, Prichtina, Ipek, and Tachlidja, the Commission has decided to raise the grants of these institutions to P100,000; likewise, with a view to modify and reform the preparatory schools at Préchovo, Guilan, Sénidjé, Kalkandelen, Prépol, Bereketli, Bouzna, etc., it has been decided to bring their grants up to P57,600; and, finally, with a view to opening eighty-two primary schools in the different districts of the Vilayet of Kossovo, the total has been made up to P469,800. Other sums having been likewise devoted to expenses under this heading, the budget for education in Kossovo has been drawn up as follows:—

Salaries	P469.800
Permanent expenditure	229.000
Constructions and repairs	268.000
Total	P966.800

A sum of P23,200 has also been set aside from the extraordinary Budget of this year for the construction and repairs of one school at Mitrovitza, eight primary boarding-schools in the district of Ipek (of which 2 are for Serbs and Catholics), one at Louma, and one at Prizrend.

Finances.

A study of the reforms of the collection of tithes and other taxes according to local requirements is being made by Mr. Graves, a member of the Commission, who has already drawn up a Bill, submitted to Parliament, and relating to the modifications to be introduced in the existing system of the collection of tithes.

THE EMANCIPATION OF TURKISH WOMEN.

The author of an article, entitled "The Girl Graduate in Turkey," which appeared recently in the *Lady*, gives a glowing account of the work done by the American College for Girls at Constantinople, and takes a quite hopeful view of the future for the women of Turkey.

It must be said, to the credit of the new régime, that, in addition to permitting philanthropic foreigners, without hampering and harassing them, to carry the light of emancipation to the Turkish fair sex, it is trying to evolve an educational system which will provide adequate facilities for the girls to acquire knowledge. During the last few years many schools especially and exclusively designed for girls have been established, and many more are being built. An effort is being made to train teachers to staff these new academies, and text-books are being compiled along modern lines.

The work of emancipation proceeds slowly. In some towns any man seen talking with a Moslem woman in public renders himself liable to a fine, while the woman must submit to be bastinadoed!

However, such stringent measures are more than offset by the fact that the conscience of Islam is slowly being quickened, and that it has commenced to feel the sting of shame at the low state of Moslem women. The men followers of the Prophet are beginning to believe and declare that their women are not being treated as well as Mahomet intended them to be. They are searching the Koran for proof of this assertion, and are showing by the great Teacher's own words that he expected women to have a much higher status than is given in Islam to-day. They quote texts to prove that Mahomet really prohibited plurality of wives, and they expatiate on the fact that their religion gave to women at its promulgation property and divorce rights that they have enjoyed through the centuries.

Turkey, more than any other Moslem country, shows the action of this Islamic revival. The Sheik-ul-Islam, whose position corresponds with that of the Primate here, has unhesitatingly spoken in favour of feminine progress. The present Sultan, too, is sympathetic towards the movement.

LETTERS TO THE EDITOR.

THE "NEAR EAST" ANNIVERSARY.

To the Editor of THE NEAR EAST.

Sir,—I congratulate you on your anniversary number; you deserve the reputation which I feel you now hold, and you have earned it. My earnest wish is that you will continue the good work. As far as Turkey (Europe and Asia) is concerned, your journal and the way it is edited are worthy of all praise, and I hope you will continue on the broad lines you pursue. You have, perhaps without knowing it, helped our Chamber in Constantinople and British trade with Turkey. British manufacturers and merchants are at last waking up, and, considering the tremendous competition we have, we ought to be, and are, thankful for the help you give. As a rule, we are "too sleepy," and during the last twenty-three years I have been honorary secretary to our Chamber I have felt the necessity of a medium like your NEAR EAST.

GEO. THOMAS
(Hon. Sec. of the British Chamber of Commerce of Turkey for the North of England).

Manchester, May 13, 1912.

To the Editor of THE NEAR EAST.

Sir,—I should like to take the opportunity of THE NEAR EAST completing its first anniversary to offer you my sincere congratulations.

I am one of your readers here, and I translate many of your articles in the *Ikdam*. I find your paper more interesting than any other English papers. I am sending you two papers, in which you will find translations of your articles about the bombardment of Meshed.

Your paper is of interest to both Europeans and Orientals. Easterns can extract much interest from your journal, and I think they must help you in any way possible.—Yours truly,

S. M. TEWFIK
(Director of *Shems*, Persian weekly paper published at Constantinople).

Constantinople, May 17, 1912.

THE BRITISH FAILURE IN EGYPT.

To the Editor of THE NEAR EAST.

Sir,—It has long been a matter of surprise that the entire British Press should have ignored the question of German commercial advance and the corresponding decline of British trade in Egypt. I therefore notice with satisfaction that "Commentator," writing in your last issue, has at length begun to show signs of unrest, and it is to be hoped that he will further devote himself to the enlightenment of the British public in this regard in a future issue. The subject is an interesting, albeit a depressing, one. Even the casual visitor can scarcely fail to be impressed by the fact that almost all the best shops are in the hands of German firms, and this is but the most superficial side of the evil which besets the country.

"Commentator" selects the astonishing advance in the German supply of electrical machinery as an object-lesson for British capitalists; it will be found that in almost every department of the engineering trade a similar increase of German goods is making itself felt. The reason for this is to be found in the fact that British firms still cling to conservative methods, which cannot hope to stand against those of their more liberal competitors. Not only is the unwillingness of British firms to grant any terms of credit even to old-established businesses of good standing gradually driving trade into the hands of more accommodating rivals; in the matter of expediency also the British are being left behind in the race for trade. The Germans move faster and take more pains to meet the individual needs of their clients, with the inevitable result that one firm after another is transferring its trade from British to German houses.

As a matter of fact, England has failed in almost all her commercial enterprises in Egypt. Time and again British companies have been floated, only to fail, until it is not surprising to find the public looking askance at any company which carries a preponderance of British names upon the board of directors. To anyone who is interested in the decline and fall of our Egyptian trade I would recommend the study of a most able report recently written by M. Lefeuvre-Meaulle, Commercial Attaché to the French Government in the Orient. The picture which he paints of our position in the commercial world in Egypt is not gratifying to British sensibilities, but it is a position which will have to be faced if we are to drag the remnants of our traditional commercial efficiency from the ashes.—Yours, etc.,

London, May 22. E. F.

THE POLITICAL CRISIS IN CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—I think we should all be grateful to Mr. Stavrinides for giving us his views as a "moderate" Greek on the question which has brought about the extraordinary state of affairs that now exists in Cyprus, which at the present time may afford useful information as to what might be expected to take place in Ireland under a Home Rule Parliament with Ulster standing out.

Mr. Stavrinides tells us that unrest has been created among the Greek inhabitants because certain "political and financial reforms" petitioned for by the Greek members of the Legislative Council have not been granted. But will he not go further and state what these changes are, so urgently desired by the Greeks, but not wanted by the Turkish inhabitants of the island and not considered advisable by the Government?

I am told that besides the members of the Council the Greek members of the local councils have also resigned. Further, that during the recent tour of the High Commissioner, Sir H. Goold Adams, when the waving of Greek flags was forbidden, the discontented inhabitants amused themselves by displaying black flags with a view to annoying the authorities.

In fact, there would seem to be a "sort" of rebellion in progress, though happily of a pacific or passive nature, but now that some facts have come out it would be good to know a little more.—I am, Sir, yours, etc.,

CYPRIOT.

Authors' Club, 2, Whitehall Court, S.W.,
May 16, 1912.

THE ITALIANS IN TRIPOLI.

To the Editor of THE NEAR EAST.

Sir,—Since the Turkish Government have taken the statesmanlike and commendable step of reopening the Dardanelles to navigation the Italian Press appears to have been roused to the highest pitch of indignation. The neutrals are abused, and England, as one of them most severely hit as a result of the unhappy Tripoli venture, has come in for a good deal of adverse comment. Frankness is always praiseworthy, and we should rejoice to see that the Italians are showing themselves in their true colours. The pen is mightier than the sword, and it is with leaflets printed in Arabic and Berber that the Italians fight for the land promised to their starving population of the south. In those leaflets also, dropped over the Arab camps from aeroplanes, we see the true state of their feeling towards this country. They were mentioned in the *Times* of March 27, but for some unknown reason the matter was never again alluded to. Strictly speaking, we expected at least a leading article from the *Times* on such an important matter. In those pamphlets the Italian general told the Arabs that he came to Tripoli as an agent of the great, glorious, and rich Italy in order to save them from the threatened invasion of thousands of Englishmen and Frenchmen who wanted to take their land and their work because they were starving at home! I trust the Arabs know better, but their friends here hoped the statements would meet with more publicity. There is also another class of pamphlets circulated by the Italians. A copy of one is to be seen at the Foreign Office, but they are reluctant to send them to this country. I understand, however, that they are spread broadcast in Italy and in Russia. In them can be seen photographs, obviously faked, of "Arab atrocities" on live Italian soldiers, and I am not surprised that when asked for a copy the Italian Embassy refers one to Rome.—I am, Sir, yours obediently,

GEORGE RAFFALOVICH.

Junior Conservative Club,
May 18, 1912.

THE OCCUPATION OF RHODES.

A Smyrna correspondent forwards us a copy of a letter which he has received from an Englishman who was in Rhodes at the time of the Italian landing. It is dated the 10th inst., and the writer says:—

"As you have heard of Rhodes having been bombarded, I hasten to inform you that we and all the inhabitants of Rhodes in the town and villages are safe. Last Saturday, the 4th inst., the Italians landed troops at Calithies, about ten miles distant on the eastern coast of the island, and followed the road leading to the town. After dislodging two Turkish outposts of about 300 and 500 men respectively and one mountain gun each, they made prisoners of a Turkish patrol of 30 men under a sub-lieutenant, at two miles distance from the town. The Turkish troops, who were all posted outside the town, immediately retired to the inland village of Psithos, which had been chosen by them since their arrival for that purpose, but from which they had not long ago removed the ammunition and victuals that had been stored there for several months before.

The Call to Surrender.

"At about two in the afternoon an Italian officer landed in a boat flying a white flag and handed to the Vali a notification of blockade and a demand to surrender. His Excellency replied that he could not do so, and immediately left the town and joined the Turkish troops at Psithos. The following day (Sunday) the Italians, informed of the approach of their troops from Calithies, landed a party of bluejackets, who at once proceeded to occupy the Konak, situated on the seashore, and the principal parts of the town. The occupation was effected without a single shot being exchanged with the natives, who watched the operations sullenly. The Italian flag having been hoisted, the two Italian forces joined hands, and eventually the bluejackets re-embarked. Since that moment troops of all arms, mountain batteries, horses, mules, and an amazing quantity of munitions and victuals have been, and continue to be, landed. The number of soldiers was reckoned yesterday evening to amount to 15,000 and that of mules and horses to about 1,500. This overwhelming armament is stated by Italian officers to have for its object the avoidance of bloodshed, as the Turks will see the utter impossibility of resistance. The Vali's intention was not to oppose a resistance, which would only cause a tremendous loss of life; but the military commander persists in his intention to hold out to the last. Native redifs and volunteers are deserting.

Officials Taken Prisoners.

"The Italians have not yet moved a single soldier inland. I suppose they intend sending strong columns to different points of the island to render all resistance impossible. The Vali, the Defterdar, and the Mektoubji have been made prisoners at Lindos (whether on shore or at sea is not yet clear) while trying to cross over to Anatolia. The number of dead to our knowledge is two Turkish soldiers and one Italian (who was buried with great display of honours), and there are eight or ten wounded on each side.

The Position at Psithos.

"The poor inhabitants of Psithos are the great sufferers at this moment. When the Turkish troops arrived they got frightened and were departing, but the military commander told them to remain, as they had nothing to fear on their part; and he was annoyed when they locked up their houses and all deserted the village for neighbouring villages. Only one family, consisting of the mother with three daughters, two of them married, with their husbands and children and a married son, in all twelve souls, have remained on the mountains, and they have not been disturbed in any way by the Turkish soldiers. After the departure of the peasants, the soldiers broke open the doors of the houses and located themselves therein, in a few cases throwing the peasants' clothing into the street. It is natural that they will make free with all victuals and with anything else to their liking. Peasants from the Greek villages tell me that the rumour that Turkish soldiers were compelling them to join the Army is without foundation, and that hitherto they have committed no depredations in any of the villages. They can still live on their own supplies (which are rather limited), but appear decided to die to the last rather than surrender. The only house in Psithos which has been respected is one belonging to an Italian subject. The loss of the peasants of Psithos extends to their crops, which are not gathered, and are eaten up by Turkish horses, mules, etc., and by their own animals, which they have abandoned, including their herds of goats. The Turkish soldiers will certainly make food of the latter if the Italians delay much longer their occupation of the inland districts.

"The population in the town and suburbs are giving up their arms or will be disarmed. The central prison inmates, numbering about 300, have broken open the gates and walk freely about the town, but do not misbehave. Perfect tranquility and security prevails in the town and suburbs. Fifteen of the militant members of the Union of Progress have been apprehended and sent out of the island."

NEAR EAST IN PARLIAMENT.

The Red Sea Lights.

May 16.

In the House of Commons Mr. Joynson-Hicks asked the Secretary for Foreign Affairs whether, having regard to the success of his representations to Turkey regarding the opening of the Dardanelles, he would make similar representations as to the unlit lights in the Red Sea.

Sir E. Grey: I can hardly represent the two questions as being on the same footing; the extinction of four of the Red Sea lights is an inconvenience, which, in the interests of British shipping, I should like to see removed, but these particular lights are not absolutely essential to navigation, and I cannot plead the same urgency as was felt by neutrals in the case of the closing of the Straits, and I cannot say more than that I shall take advantage of any development which seems to justify a request for the restoration of the lights.

Mr. Joynson-Hicks: On a previous occasion the right hon. gentleman admitted the urgency and danger of the lights being extinguished, and representations were successful. As shipping is in danger, could he not make further representations to both sides on the subject?

Sir E. Grey: Navigation is not stopped by the extinction of these lights, and I am not aware that accidents have occurred hitherto, or even that we have had complaints. There is, of course, a great deal of inconvenience, which I deplore; but in view of the recent news of the course of military and naval operations, I do not think this is a specially favourable moment for urging the restoration of the lights.

Mr. Lloyd asked whether representation could be made in respect to two of the lights where warlike operations would not be affected.,

Sir E. Grey: It is very difficult unless there is a case of extreme urgency to make representations to belligerents, which would mean curtailment of their action in one direction or another. I can only say I am anxious that the lights should be restored, and deplore the inconvenience caused by their absence. It is impossible to avoid inconvenience to neutrals when countries are at war, but I think in this case the inconvenience is a minor one.

The Perso-Afghan Frontier.

Mr. Mitchell-Thomson asked whether any representations had been received from the Persian Government with regard to infringements on the Perso-Afghan frontier; and, if so, what steps his Majesty's Government proposed to take in the matter.

Sir E. Grey replied: "The answer to the first part of the question is in the affirmative; as regards the second part, his Majesty's Government are in consultation with the Government of India."

THE PRESS ON THE NEAR EAST.

The Ex-Sultan at Salonika.

Mr. M. H. Donohoe, the special correspondent of the *Daily Chronicle*, "having secured special permission from a high quarter," recently sought an interview with the ex-Sultan in the villa at Salonika in which he is confined. The Imperial prisoner refused to receive him, but Mr. Donohoe was able to gather some particulars concerning his present way of life. His Majesty, it is hardly surprising to read, lives in constant dread of assassination. At his own request his prison walls were raised 8 ft. shortly after his captivity began; the main entrance has been bricked up; the doors of his suite of rooms have been fitted with stout steel bolts; and he continues to take most elaborate precautions against being poisoned, either by his cooks or his medical attendants! On the whole he enjoys good physical health, but he is subject to gloomy moods and fits of intense mental depression; and at times he will not quit his apartments for three months at a stretch. It is pleasant to learn, however, that—

The fallen autocrat is treated with the greatest deference by those who are charged with his safe keeping. He is subjected to no harsh or degrading régime. At the Villa Latini he lives in semi-regal state, and to a very large extent his will as expressed there is law. The Young Turks, whatever be their faults, have never forgotten that although Hamid was a merciless enough tyrant, he once ruled over the Osmanli people.

The military commandant at the Villa sees his prisoner but at rare intervals, and then only when either summoned by the ex-Sultan himself or charged with the conveyance of some instructions by the Government or the local military authorities. Formerly, during the day armed sentries patrolled within the grounds of the villa, but these have now been removed lest their presence should prove irksome to the Royal captive were he to venture forth into the garden in quest of sunshine and fresh air.

Moreover, all the servants at the villa are Turks, who, while they enjoy the full confidence of the party in power, at the same time endeavour to gratify the whims of the prisoner, and humour his eccentricities as far as possible. Such consideration certainly does credit to the Young Turks. Yet it is a sad picture that Mr. Donohoe draws for us, of the lonely old man, going in fear of his life every moment of the day, changing his sleeping place nearly every night, afraid to eat a mouthful of food or to take a dose of medicine until it has been "tasted" by one of his attendants, and passing his time in making little models of mosques and soldiers, or in writing memoirs only to tear them up afterwards. Surely, even the bitterest of Abdul Hamid's enemies could hardly wish him a worse fate than this existence of fear and futility?

Moslem Unity.

Commenting upon the fact that the recent session of the Nadwat-ul-Ulama was presided over by Syed Rashid Raza, a famous scholar of Egypt, the *Comrade* observes that it is remarkable in two of its aspects:—

In the first place, one feels the unity and broad comprehension of Islamic culture which makes it possible for a gentleman, grown up in different environment, to enter easily and naturally into the spirit of the conditions obtaining in India and treat them with true insight and sympathy. Secondly—and this, perhaps, to some extent explains the first—the general situation all over the Islamic world is almost alike in its broad intellectual and social character. The deeper evils that afflict Moslem society in all its parts, in Russia, Persia, Turkey, Egypt, as well as in India, are not different in kind. Everywhere the problem is one of fresh intellectual equipment and social reconstruction. The inspiration of Islam is still a vital force, but it has got to be released and set to work by removing the thick encrustations that ignorance, religious indifference, and other secular causes have left over the Moslem mind. The intellectual renaissance of the Mussalmans in one part of the world will react on the other parts and thus hasten its final consummation. This is the true "Pan-Islamism," *i.e.*, the intellectual response of the Mussalmans of the world to the best impulses of modern civilisation and not the political monstrosity that weighs on the brains of some alarmists in Europe.

The Græco-Bulgarian Rapprochement.

On Monday the *Morning Post* published an article by its Constantinople correspondent on the question of a *rapprochement* between Greece and Bulgaria, and dealing especially with the prospects of healing the schism between the Patriarchists and the Exarchists. The writer says:—

As is well known, the Bulgarian struggle for independence was to a large extent a struggle against the political and the social domination of the Greek clergy over the Bulgarian people. The Bulgarians succeeded in throwing off Greek domination, and in securing from the Sultan in 1870 a firman recognising the orthodox Bulgarians as a distinct politico-religious community under the headship of an Exarch. The political power of the Patriarchate was weakened by this decree, and two years afterwards the Patriarch retaliated by excommunicating the Bulgarian Church. The schism led to a prolonged estrangement between Greeks and Bulgarians, and was one of the chief causes of the conflicts between the two nationalities in Macedonia. Greek and Bulgarian bands fought for the possession of village churches, and "Patriarchist" and "Exarchist" were the watchwords of an international strife.

It was natural, therefore, that when the question of co-operation between the Christian nationalities of the Ottoman Empire for the defence of their common interests was first raised the possibility of the annulment of the Græco-Bulgarian schism should be discussed.

After recalling negotiations conducted two years ago, he remarks that recently, in view of the energetic efforts put forth in Greece and Bulgaria to reach a friendly understanding, the question of the annulment of the decree of excommunication has acquired a more urgent character.

It was mentioned on the occasion of the audience given last week by the Emperor of Russia to a Bulgarian deputation at Livadia, and it is understood here that the Emperor Nicholas intimated his earnest desire that the schism between the Greek and Bulgarian Churches should be brought to an end. If the negotiations now in progress are successful the question will in the near future be discussed in Constantinople at a special conference, in which the Œcumenical Patriarch, the Exarch, a Russian Archimandrite, and a learned representative of the Hellenic National Church will take part.

He thinks that the schism will ultimately be healed, and that the Patriarchate will recognise the Bulgarian Church as an autocephalic Church, with a status similar to that of the Russian, the Servian, and other Orthodox National Churches. "The only difficulties lie in the jealousies of the Greek and Bulgarian Nationalists, in their fears as to the probable effect of the annulment of the schism on the position in Macedonia. For once the ecclesiastical barrier is removed the competition between Greeks and Bulgarians must assume a new character. In the absence of religious fanaticism both sides must have recourse to more complex means of securing their hold on the Macedonian peasantry, and apparently both sides are reluctant to take the risk." Which is no doubt very true, though it hardly affords grounds for satisfaction to those who wish to think well of Christianity in the Near East!

Articles to Note.

"Italy's Action in the Ægean: What It May Mean to England," in the *Pall Mall Gazette* (May 22).

"The Work of the Jews of England in Palestine," by M. E. Lange, and "Palestinian Progress" (in Editorial Notes), in the *Jewish Review*.

"La situation économique en Grèce," by Y. M. Goblet, in *Correspondance d'Orient* (May 15).

"The Army Manœuvres in Egypt," in the *Sphere* (May 18).

"Baghdad Railway: German Activity," by Perceval Landon, in the *Daily Telegraph* (May 20).

"The Situation in the Mediterranean," in the *Times*, (May 22).

"Cotton Supply," in the *Manchester Guardian* (May 22).

"La mode féminine chez les Egyptiennes d'autrefois," by G. Maspero, in *La Revue Egyptienne* (May 5).

Periodicals Received:—*Al-Kulliyeh* (April); *La Revue Egyptienne*. (No. 1); *The Dawn; The Journal of the Manchester Geographical Society*.

MYSTICISM AND MAGIC IN TURKEY
AN ACCOUNT OF THE RELIGIOUS DOCTRINES, MONASTIC ORGANISATION, AND ECSTATIC POWERS OF THE DERVISH ORDERS
By LUCY M. J. GARNETT, AUTHOR OF "TURKEY OF THE OTTOMANS."
Crown 8vo, Cloth Gilt, with Illustrations, **6s. net.**
The Times says:—Miss Garnett's intimate knowledge of the manners, folk-lore and life of Turkey is turned to good purpose in this instructive study of a widespread but somewhat hidden phase of Islam.

NEAR EAST BOOKSHELF.

WOMAN'S LIFE IN TURKEY.*

The question of woman's life in the East is always interesting. There is a sense of mystery in the screened windows and in the forbidding *yashmak*, behind which the majority of the female population of the Orient pass their days. Most mysteries lose much of their charm when they are unmasked, and behind the veil we find details of a life which bears in its essentials very prosaic similarity to our own. In this volume we are, however, taken to a new land, where all the circumstances of life and thought are different to those which obtain in Europe. Miss Hester Donaldson Jenkins has lived for many years in intimate relationship with the mysterious beings who pass their lives "behind Turkish lattices," and in the unpretending volume under review we are afforded many interesting sidelights upon the manner in which Turkish women live. But, although the author writes throughout with a sympathetic pen, and although the march of civilisation throughout the world is not leaving Turkey entirely untouched, it cannot be said that the picture which Miss Jenkins presents is altogether an encouraging one. Superstition and intolerance still, unfortunately, play a large part in the lives of even the educated population, and until this spirit is eradicated there can be but little hope of emancipation for the women of the East.

Miss Jenkins quotes from letters from Turkish women containing ardent expressions of desire for Western education; but, although these are interesting in themselves as giving an insight into the individual thoughts of the writers, we imagine that it would be unduly optimistic to regard them as voicing the opinions of any considerable proportion of the community. The tenets of the Mohammedan religion have for many years borne the brunt of Western criticism because of the fact that its female adherents are denied an honourable place in society; and it is a common belief among Christians that, according to the teaching of Mohammed, the soul of a woman is dependent upon the religious exercises of her male relations for her salvation, if, indeed, it is admitted that a woman has a soul to save. It is certainly true that in the darker ages of Mohammedanism such a belief was current even in the minds of the Turks, but Miss Jenkins effectually proves that the idea is quite contrary to the written law of the Koran.

An especially interesting chapter is the one entitled "The Reaper, Death." It includes an enthralling anecdote of the love and devotion of a bereaved husband, and it is in the telling of these anecdotes that Miss Jenkins is at her best. On the few occasions that she rises to more serious matters we seem to find that her evident love of the Turkish people is blinding her to the fundamental differences which exist, and which must always exist, between the West and the East. It is far from our purpose to deny the possibilities of an effectually enlightened Turkey, or to belittle the efforts which she is making to raise herself on to a higher plane of civilisation, but, in the opinion of the writer, the change must come from within. European education may help towards accomplishment, but we must look rather to a perfected natural Orientalism than to a Europeanised one if Turkey is to "take her rightful place among the enlightened nations." Miss Jenkins has written a book which is well worth reading, and it is particularly easy to read. It is profusely illustrated with excellent photographs.

A USEFUL MAP.†

Last year Major R. Huber, formerly Imperial Commissioner of Railways, Asia Minor, published the first of his comprehensive maps showing the Christian dioceses of Turkey in Europe, and this year he supplements his painstaking work by another map, drawn with an identical object in view, and restricted to Turkey in Asia. Together the two maps form an inseparable whole, and are indispensable not only to the student of religious movements in the Near East, but to all who are interested in theology, and more particularly in the ethnographical divisions of the Ottoman Empire.

Both maps have been drawn on a generous scale, facilitating a detailed study of the various dioceses, of the many schisms into which the Christian Church has been cut in the Near East, and of the hierarchy peculiar to Catholics, Gregorian-Armenians, Greeks, Nestorians, Jacobites, etc. A detailed survey of the maps would be rich in its harvest of hitherto little-known data about the spread of the Christian Church in countries generally supposed to be under the despotic sway of Islam.

The work itself is, to our knowledge, unique, and is therefore bound to be a valuable addition to the documents illustrative of Christian aims and schisms in the Ottoman Empire.

* "Behind Turkish Lattices." By Hester Donaldson Jenkins. (London Chatto and Windus. 6s.)

† Maps illustrating the Christian Religions of the Near East. By Major Huber, Sharia Abbasia 22, Cairo. I. Turkey in Europe, Frs. 12·50; II. Turkey in Asia, Frs. 15. Maps I. and II., Frs. 25.

NEAR EAST BOOK NOTES.

Messrs. Hurst and Blackett have just issued "To-day in Egypt," by Alfred Cunningham. There are twenty-four full-page illustrations, and the work is published at 12s. 6d. net. The author, who has lived in Egypt, and has been actively identified with its public affairs, discusses the situation there, not only from the purely Egyptian point of view, but also as it affects Great Britain and international politics generally.

"Themis," by Jane Ellen Harrison, Hon. LL.D. (Aberdeen), is a study of social origins of Greek Religion, with an Excursus on the Ritual Forms preserved in Greek Tragedy, by Professor Gilbert Murray, and a chapter on the Origin of the Olympic Games, by F. M. Cornford. The publishers are the Cambridge University Press.

Mr. Murray is adding to his interesting series, "The Wisdom of the East," a new and complete translation from the Palic text of the Buddhist classic, "The Dhammapada."

"The Legal Sufferings of the Jews in Russia," by Lucien Wolf, should prove to be a most informing volume. It is to be published by Mr. T. Fisher Unwin.

Dalmatia has so long been regarded as a country whose chief characteristic is its inaccessibility, that it comes as a surprise to learn from Mrs. Russell Barrington's book, "Through Greece and Dalmatia," just published by Messrs. A. and C. Black, that it is now possible, in six weeks, to explore the country, with a good deal of Greece as well. Mrs. Barrington has illustrated her book from her own photographs.

The Harvard Ingersoll lecture of 1911 was delivered by a leading American Egyptologist—Professor George A. Reisner. The subject was "The Egyptian Conception of Immortality," and it was published recently by the well-known Boston publishers, Messrs. Houghton, Mifflin and Co., whose agents in England are Messrs. Constable and Co.

A book of exceptional interest at the present moment is shortly to be published by Messrs. Herbert and Daniel, of New Bond Street. Mr. Francis McCullagh, the war correspondent, whose criticisms of Italian conduct in Tripoli caused such a stir throughout Europe recently, has written a detailed and uncensored story of the Italian invasion from October 3 to October 31, 1911, together with an outspoken expression of opinion as to causes which led Italy into the perpetration of what is termed "one of the worst cases of international highway robbery which has occurred during the last fifty years." Whatever may be the final judgment passed by the public upon the case which he presents, the book is certain to command a large sale.

BOOKS RECEIVED.

Through Greece and Dalmatia: A Diary of Impressions recorded by Pen and Picture. By Mrs. Russell Barrington. Illustrated. (Adam and Charles Black. 7s. 6d. net.)

To-day in Egypt: Its Administration, People and Politics. By Alfred Cunningham. (Hurst and Blackett. 12s. 6d. net.)

A History of Civilisation in Palestine. Illustrated. By R. A. S. Macalister, M.A., F.S.A. (Cambridge University Press. 1s. net.)

Ancient Assyria. Illustrated. By C. H. W. Johns, Litt.D. (Cambridge University Press. 1s. net.)

CURRENT COMMENTS.

The report of the expedition against the Anuaks, which has turned out to be something more than a mere promenade, and has indeed been one of the most serious affairs with which the Sudan Government has had to deal of late years, must bring great pleasure to all of those who have had anything to do with the training of the Egyptian Army. The bearing of the native troops, their coolness, accuracy of aim, and the brilliance of the bayonet charge furnish but one more proof of the contention that the "Gyppie" is no longer the byword for cowardice and inefficiency that he showed himself to be in the early years of the occupation. It is now pretty certain that the native soldier failed in those days because he was the victim of circumstances which had combined to blunt his better qualities and undermine his discipline. The material was good enough; it was the manner in which it was worked that was at fault and resulted in the turning out of an inferior article.

***

The British officers attached to the Egyptian Army have succeeded in proving to the world the sterling qualities of which the soldiers of the Khedive are made. They have understood how to appeal to the best side of the "Gyppie," and by fearless example have managed to shake him free from the unfortunate effects that his incapable leaders of two decades ago had had upon him. But, whilst the present condition of the Egyptian Army and the bearing of the native troops on parade and under fire certainly reflect the greatest credit on the small band of British officers who, under Sir Evelyn Wood, Sir Francis Grenfell (Lord Grenfell), Viscount Kitchener, and Sir Reginald Wingate, have been entrusted with the training of the Khedive's Army, we must always remember the great share that Lord Dufferin had in the transformation in the early days. Had it not been for the tenacity with which he adhered to his plea for a fresh trial under different conditions to be given to the native soldiers, the Egyptian Army, which was disbanded in 1882, would have remained a dead letter for many, many years. The ridicule that was poured on his proposal was enough to discourage the stoutest of hearts, but the success that has been achieved in the transformation of the Egyptian Army constitutes a triumph for his tenacity of purpose and his perspicacity.

***

There seems to be no doubt but that the postal service between Egypt and the Continent and England requires thorough rearrangement. Years ago, of course, Anglo-Egyptians and British firms interested in Egypt had to content themselves with two—or perhaps three—mails out and home every week. That was owing to the comparative fewness of post-bearing steamers calling at Egyptian ports. But times have changed since then—especially within the last year or so—and Ismail Pasha's famous boast that "his country formed part of Europe" has now become a solid fact, seeing that not a day passes but mail-boats from and to European ports enter and leave Alexandria and Port Said. On six days out of the seven there is an outgoing mail from Cairo viâ one or other of the ports. Equally so there is supposed to be the same number of incoming mails per week. But whilst the European—and especially the Anglo-Egyptian—community can always rely upon the outgoing mails leaving as advertised, the same does not apply to the incoming ones. Thus it often happens that no English mail is received in Egypt from the Wednesday (the day the Brindisi mail arrives) until the following Tuesday (the day the French mail is due). And if—as not infrequently happens—the Messageries steamer is late, very nearly a week goes by without any mail being received.

If this long interval were due to the fact that the mail steamers had been delayed through rough weather, accident, or some such cause, the residential community in Egypt could not complain. But considering that an Austrian Lloyd steamer arrives at Alexandria regularly every Sunday, and an Italian and a German steamer every Monday—all being mail steamers—it must be admitted that the erratic arrival of mails in Egypt gives just cause for grumbling. No blame lies with the Egyptian Post Office. The fault undoubtedly rests with the European and Home postal authorities; for the fact that steamers which are supposed to bring mails to Egypt often arrive without any proves that there is some serious defect in the organisation on the other side of the Mediterranean. It is to be hoped that steps will be taken to remedy this defect, which gives rise to no little inconvenience in Egypt. Considering that nowadays the sailings are so frequent, it should be possible to have a daily postal service. The commercial interests of Egypt, Europe, and England are so closely interwoven that they certainly warrant the making of some such arrangement.

***

We are pleased to see that, by a majority of twenty votes, the Egyptian Legislative Council has decided to annul the protest which it addressed to the Government at a preceding sitting on the question of the decree conferring on the Council the right to interpellate the Ministers. The making of that protest and the persistence in their absurd attitude only held the Councillors up to public ridicule, and afforded additional confirmation of the general opinion held up to now on their incapacity for co-operation in the administration of the country. After all, the right to interpellate Ministers is a prerogative of the Khediviate, and the bestowal of that right on the Council was nothing more nor less than a free gift on the part of the Khedive. It is true that the privilege was accorded to the Council about two years ago. But it was bestowed on them by letter only. The promulgation of a decree on the subject gives the bestowal of the right more force and a legal sanction, and since the Council itself had petitioned the Khedive to issue this decree, it was surely ungracious, to say the least of it, on its part to protest because that decree was not submitted to it before it was signed. We can only hope that the withdrawal of the protest is an earnest that a more reasonable frame of mind has come over the Councillors, and that they will make practical use of the great privilege that has now been conferred on them, instead of seizing on it as an additional means of wasting the Minister's valuable time by futile discussions, as they have done up to now.

***

The occupation of Rhodes by the Italians has brought this beautiful island, famous in the time of Crusaders, into prominence. But it is not the first time that Italy has cast covetous eyes on the isle. In April, 1908, it will be remembered, she proposed to the Sublime Porte that she should establish post offices in various ports of the Ottoman Empire similar to those of Britain, Austria, France, Germany, and Russia. This proposal was naturally rejected, as Turkey, far from wishing to see more foreign post offices in her territory, was endeavouring to suppress the others. Italy thereupon made a show of force, and threatened to occupy Rhodes and Mitylene. The Turks then gave in, and Italian post offices were established in Constantinople, Smyrna, and other places. In the meantime, Italy's spies, of whom she has always had many in Turkey, made use of their time, and a complete plan to be followed in the occupation of Rhodes was drawn up by the general staff in Rome. This is the plan they have just carried out.

***

A short time ago the Archipelago, of which Rhodes is the seat of Government, received as its Governor Soubhi Bey, an official who made a name for himself in getting rid of the plague of dogs in the streets of Constantinople. The military force at Rhodes consisted of a battalion of infantry, about 1,500 strong, under a smart officer named Major Abdullah Bey. There were over 100 Greeks in this force, and it will be interesting to learn how they acquitted themselves in the fighting with the Italians. There were also some 200 gendarmes trained in the gendarmerie school under two very capable British officers.

***

Apropos of the clearance of the streets of Constantinople of the dogs that so long acted as scavengers, it is said that a *hoja* perambulated the streets of Stamboul prophesying that the destruction of the animals would lead to ill fortune for the city. War, he said, would break out, fire and sword would be carried through the land, and "the light of Mecca would be put out." Further, at "the call of the dogs" the "hand of the Bulgar would strike a heavy blow." And it is said that not a few Turks are to-day in terror lest the Bulgar Army should enter in at the breach in the wall of Yedi Kuleh, which served as the death-pit for the last of the Constantinople scavengers.

***

Our Malta correspondent writes:—Contrary to what has been stated in the *Daily Mail*, the gentleman who is undergoing a thirty days' fast in the Carnegie Institution, at Boston, for scientific purposes, is a Maltese, and not an Italian. His name is Mr. Agostino Levanzin, and he is a solicitor, chemist, and *litterateur*. A telegram received here on the 16th inst. announces that the experiment, which has aroused the keenest interest in the scientific world at large, has now been successfully accomplished. M. Levanzin had already undergone, with like success, the same experiment here two years ago.

***

Phonography evidently has an enthusiastic supporter in Egypt in the person of Professor Ahmed Zaki Pasha, Secretary to the Council of Ministers, who has presented a sum of £50 for the purpose of encouraging the spread of the useful art. The amount is to be divided into three prizes—one of £E20, and two of £E15, which are to be competed for by subjects of Egyptian nationality at an examination that is to be held next December by the Department of Technical and Commercial Education. Candidates are to be allowed to use any system of shorthand they may choose to adopt, and will be required to take down and transcribe words spoken in Arabic at the rate of not less than ninety words per minute.

***

The spread of a study of shorthand is undoubtedly advantageous to the progress of any country; for, quite apart from its utility for merely commercial purposes, in these days of the power of the Press it would be difficult to overestimate the value of the really competent reporter. The knowledge that there are one or two such men taking down his "flow of oratory" is apt to make the public speaker careful in his choice of expressions; and in countries where the political agitator is not unknown the good done in this way is certainly great. On the other hand, the wide publicity that the exercise of the verbatim reporter's art can secure for a speech that may do much to help a nation on the path of progress—or, on occasion, to check a nation from rushing headlong upon some danger—is obviously a benefit to humanity.

PERSONAL & SOCIAL

Sir H. Babington Smith, K.C.B., has been appointed one of the British representatives upon the International Wireless Telegraphy Conference.

Sir Reginald Wingate is expected in Khartum to-morrow from Erkowit.

On his arrival in England in July, Moh. Said Pasha, Prime Minister of Egypt, and Regent during the Khedive's absence, will be received in audience by King George.

During the absence from Greece of the King of the Hellenes, who is attending the funeral of his brother, the late King of Denmark, the Crown Prince is acting as Regent.

Last Saturday the birthday of H.H. the Khedive was celebrated with the usual pomp and ceremony in Egypt.

H.I.M. the Sultan has conferred the Grand Cordon of the Osmanieh upon M. Revoil, Director-General of the Imperial Ottoman Bank.

M. Grouitch, the Servian Chargé d'Affaires, and Mme. Grouitch have taken a house at Ayot St. Lawrence, Herts, in order that Mme. Grouitch may more speedily recuperate after her recent severe illness.

Earl and Countess Percy left London on Saturday for Goodwood House, Chichester, on a visit to the Duke of Richmond and Gordon.

Lord Rathmore left London on Saturday for Paris.

Captain P. L. Holbrooke, R.G.A., Instructor in Gunnery 1st Class, Shoeburyness, has been posted to No. 100 Company R.G.A. at Malta.

Professor Margoliouth, Litt.D., and Mrs. Margoliouth, have been visiting Constantinople.

Watson Bey, general traffic superintendent, Port Said—Suez division Egyptian State Railways, has been honoured with the grade of Officier of the Acadamie de Science.

M. Constantin Effendi Mavroudi has been appointed Secretary, provisionally, to the Turkish Embassy.

Mr. Hope Vere, of the British Embassy, Constantinople, is now in charge of the British Legation at Belgrade, where he will remain about a month.

Admiral Tufnell has returned to Greece after his short leave of absence, and has been directing the tactical manœuvres of the Greek fleet.

Lady Maxwell's dance, which was to have taken place at 90, Eaton Square, on Monday, the 20th inst., has been postponed until Monday, June 10.

The *Birmingham Post* says that there is excellent ground for stating that arrangements have been definitely made by the War Office for the extension by one year, dating from October 1 next, of the appointment of Major-General Sir John Maxwell in command of the army of occupation in Egypt. General Maxwell has held his present command since October, 1908, and there is reason to suppose that the extension now accorded is for the purpose of the completion of several reforms in which he has been closely engaged, and in which Lord Kitchener is known to have taken keen interest.

Professor M. A. Refalo, Assistant Crown Advocate of Malta, has assumed the office of Crown Advocate during the absence of the Hon. Sir V. Frendo Azopardi.

Major J. G. Baldwin, R.A., C.B., the newly-appointed British Consul for the Kingdom of Roumania, has arrived at Galatz and taken up his duties.

Mr. Louis Schöndorf has been appointed British Vice-Consul at Bucharest.

Our Bucharest correspondent writes that the King and Queen of Roumania were expected to return to Bucharest from Sinaia on the 18th inst., and to remain in the capital until after the National Holiday, on the 23rd inst. Should the King feel strong enough and the weather be fine, a week's excursion on the Danube, on board the Royal yacht "Stefan cel Mare," is contemplated, otherwise the King will return to Sinaia and the Queen will proceed to Constantza.

Lord Kitchener will leave Alexandria on Sunday on board the cruiser "Hampshire," and is expected to arrive on the 29th inst. at Malta, when he will meet Mr. Asquith. It is stated that Lord Kitchener will not return to Egypt by the "Hampshire," but will accompany Mr. Asquith on board the Admiralty yacht when the Premier pays his visit to Gibraltar.

Mr. Winston Churchill, the First Lord of the Admiralty, accompanied by the Prime Minister, left Victoria Station, London, on Tuesday morning, on their way to Genoa to join the Admiralty yacht "Enchantress," for an official inspection of the naval establishments of Malta and Gibraltar. The First Lord was also accompanied by Rear-Admiral David Beatty Mr. J. E. Masterton Smith, and Mr. E. Marsh, and will be joined en route by Vice-Admiral Prince Louis of Battenberg, the Second Sea Lord.

The Cairo correspondent of the *Times* states that striking evidence of the interest attaching to the personality of Lord Kitchener among the rural population of Egypt, and of the prestige which he enjoys among the natives, was furnished during his short tour in the Delta, from which he returned last Friday. The British Agent, who was accompanied by the Adviser to the Minister of the Interior, was everywhere received by large numbers of notables and *fellahin*, who acclaimed him as he passed through the streets, while the receptions which took place at the various *moudiriehs* gave Lord Kitchener an opportunity, of which he took full advantage, to discuss with those most nearly concerned the various projects for the improvement of the lot of the rural population, recently introduced, of which he is the author.

An engagement is announced between J. B. Christopherson, M.D., Khartum, Sudan, son of Canon Christopherson, rector of Falmouth, and Joyce Eleanor, daughter of J. A. Ormerod, M.D., F.R.C.P., of 25, Upper Wimpole Street, and Greenhill, Hants.

The *Gazette* announces that on the 14th inst. M. Michel I. Madjaroff had audience of the King to present his credentials as Envoy Extraordinary and Minister Plenipotentiary from his Majesty the King of the Bulgarians, and that M. Constantin G. Mano also had audience and presented his credentials as Envoy Extraordinary and Minister Plenipotentiary from his Majesty the King of Roumania.

Lewa Hussein Pasha Moharrem has taken rp his new duties as Director-General of the Khedive's Daira Khassa.

The death occurred suddenly last Friday in Athens of Engineer Pill, of the British Naval Mission which is engaged in the work of reorganising the Greek Navy. The funeral took place on Saturday with full honours, M. Venizelos, the Greek Premier, the members of the British Legation, and a large number of Greek officers being present. Engineer Pill was appointed for service in the Greek Navy in June of last year.

The funeral of General Nazare Aga, the former Persian Minister in Paris, took place in the French capital last Friday, and was attended by the Persian Minister, Samad Khan, who represented the Shah, by a representative of President Fallières, by M. Emile Loubet, and by a number of other diplomatic and political representatives.

At the Royal Institution next Tuesday afternoon Professor W. M. Flinders Petrie will give the first of two lectures on "The Formation of the Alphabet."

It is stated that M. Scassis will be appointed to succeed M. Philon as Greek Agent in Egypt.

Sheikh Noury Eff., the newly appointed Cadi, arrived in Cairo on May 13 from Constantinople.

The death occurred last Saturday at his residence at Worthing, after a long illness, of Major John E. Pierson, who took part in the Egyptian Campaign of 1882 and the Sudan Expedition of 1884-5. He had the medal and bronze for the former campaign and a clasp for the latter expedition.

The *Egyptian Gazette* states that Mr. V. Williams, Deputy Director of the Legal Department at the Ministry of the Interior, whom the Government intended to appoint as Director of that Department, vice Mr. Bernardi, has resigned from the Egyptian service and left for England.

The late Lieutenant-General J. W. Laurie, whose funeral took place at Paddington Cemetery yesterday, was twice wounded when serving before Sebastopol. He was mentioned in despatches for twice repulsing Russian sorties with a small detachment of men, and for his services in the Crimea he was endowed with the Order of the Medjidieh, and received the Crimean War medal and clasp and the Turkish War medal.

The death occurred in Bombay on the 1st. inst. of Colonel John Anderson, M.R.C.V.S., who in the Egyptian War of 1882 was Principal Veterinary Surgeon with the Indian contingent. He was present at the battle of Tel-el-Kebir and the capture of Cairo, and received the medal with clasp and the Khedive's Star.

The Rev. Dr. A. G. Pentreath, Senior Chaplain to the Forces, Malta, appeals to those who are interested in Church work in the Army for help to build a military church in Malta. There is a great need, he says, for a church in Pembroke Camp, where a recreation room is the only place available for divine service at present. The appeal has the warmest approval of General Sir Leslie Rundle, Governor and Commander-in-Chief, Malta. Donations may be sent, marked "Army Church Building Fund (C. of E.), Malta," and crossed "Anglo-Egyptian Bank," to the hon. treasurer, the Rev. Dr. Pentreath, Senior Chaplain to the Forces (C. of E.), Malta, who will gratefully acknowledge them.

Engineer-Lieut. Horace E. Dowling, who has been appointed Assistant to Chief Engineer for Gun Mountings at Malta Dockyard, will leave for Malta by the P. and O. ss. "Nile" to-morrow.

THE POWERS AND THE WAR.

Although from a military point of view no progress may have to be recorded in the struggle between Italy and Turkey, it is evident that with the indefinite prolongation of the war the international situation that hinges on it undergoes some modification with each successive week. Thus while the capture by the Italians of the numerous islands of the Ægean may appear to have no direct bearing on the course of hostilities, it has introduced a new factor into any consideration that Europe as a whole may feel compelled to devote to the conflict. With the reopening of the Dardanelles the Porte may claim that it has removed the main or only cause for criticism on the part of the Powers, and that it would be in keeping with their profession of strict neutrality if they refrain from all further interference. On the other hand, however much the occupation of the Ægean Archipelago may have been discounted, it is impossible to ignore the fact that the pressing forward of the Italians to the coast of European and Asiatic Turkey, coupled with unrest in the European provinces, must inevitably increase the misgivings with which the continuation of hostilities is being universally viewed. Doubtless, some Powers would find it difficult to set forth in words the actual grounds for their uneasiness; the ability of the Turks to cope with disorders in Albania is not questioned, and for more than seven months the fears that have never been altogether absent have not been realised. But the traditional uncertainty regarding the Near Eastern situation remains, and no amount of familiarity with the bogey tends to lessen the apprehension to which it invariably gives rise. All the elements of trouble, it is felt, are still there, and any measure of success achieved in the past in rendering them innocuous may well prove to be only temporary.

In this picture of the permanent attitude of Europe to the Near Eastern question it is apparent that the actual struggle between Italy and Turkey occupies but a small part. The *leit motif* is not the issue of the war nor ambitions of one or other of the minor Balkan States, but the settled policy of "les deux Puissances les plus intéressées." In spite of the assurances that have been given by the respective Foreign Ministers and the co-operation among the Powers when the Italian and Turkish Governments were approached in turn with a view to possible mediation, the old feelings of distrust have manifested themselves. With the further prolongation of the Turco-Italian war these will tend to increase. On the one hand there is the broad line of cleavage between the Triple Alliance and the Dual Alliance, and on the other there are the misgivings that any friendly understanding between Russia and Italy may be given a practical direction that would not be appreciated in Vienna. It is not unnatural, therefore, that the general feeling of anxiety should have given rise to the suggestion for a congress of the Powers. A conference may ultimately be necessary to adjust the dispute between Italy and Turkey; it might be thought a simple expedient to extend its terms of reference to the whole Near Eastern question. International pacts, it is to be feared, have not received of late such unquestioning observance that a new European Congress would be viewed with much optimism. In some quarters the belief is entertained that such a conference would only provide an opportunity for the formal announcement of claims that Europe suspects indeed, but seeks to disguise from herself. In other quarters the possibly provocative nature of the proceedings is held to outweigh any likely advantages. These views hardly take into consideration the different circumstances in which a Congress of the Powers would meet to-day from those which obtained a generation ago. European equilibrium has been largely achieved by the elimination of individual influence. The opportunities for unforeseen combinations have been removed, and even a declaration of new claims is not calculated to strain the bond of linked interests to breaking point. On the other hand, a frank exchange of views may well remove many of the misunderstandings that now clog the course of European diplomacy. The history of the Turco-Italian War shows how little is required to produce a fresh crop of these at every turn. Again, a clear understanding among the great Powers could hardly fail to have its effect on minor States, even if no attempt were made to indicate the limits within which these would be expected to work out their own destinies. But while it is possible to view the suggestion of a Congress with approval, it is not so easy to decide when the time would be ripe for convening it. That it would have to take cognisance of the Turco-Italian War is a foregone conclusion, and here we are thrown back on the prospects of success that attend any further efforts at mediation. But if it should be necessary to await further developments in the war, it can hardly be doubted that the mere exchange of views between the Powers preparatory to the summoning of a Congress would go far to remove some of the more dangerous elements in the Near Eastern situation to-day.

At this point we may consider the position of Great Britain in regard to a possible Congress of the Powers. So long as the struggle between the Italians and the Turks was restricted to the seaboard of Tripoli it was a simple matter for the country to maintain an attitude of benevolent neutrality towards the two belligerents. The indefinite prolongation of the war, it is true, was calculated to render uneasy any Power with a vast number of Moslem subjects, but such difficulties have to be regarded as inseparable from the burden of empire. With the occupation by Italy of the islands in the Ægean Sea, however, the struggle, as far as Great Britain was concerned, entered upon a totally different phase. Although such an eventuality might be highly improbable, the possibility had to be faced of a far more serious conflict than had hitherto been waged for the possession of Tripoli. In such a case the islands in the Ægean Sea might remain permanently alienated from Turkish sovereignty, and a new factor of serious import would be introduced into the international equilibrium in the Mediterranean Sea. If to such considerations are added the necessity of safeguarding British interests in any modification of the *status quo* in the Balkans, and the increasing embarrassment caused by the unsolved Cretan problem, it will be seen that Great Britain has special cause to watch closely the course of events in the Near East, and to formulate a policy to meet all emergencies. It may, therefore, be not altogether fortuitous that the coming week should witness a conference in Malta between the Prime Minister, the Secretary of State for the Navy, and Lord Kitchener, who leaves Egypt for the purpose. There is a tendency nowadays among certain Powers to set more store upon probabilities than on facts, and it is possible that a miscalculation regarding British naval strength in the Mediterranean might result in a serious menace to European peace. The somewhat dramatic consultation in Malta can hardly fail to call attention to the fact that Great Britain does not subscribe to the theory that any change in her naval dispositions implies the least modification of the equilibrium of Europe which it is her policy to support. A clearer conception of this point might not be without its effect on the course of the war. Italy has vindicated her claim to freedom of action in the Ægean Sea, which had never seriously been challenged. But while what is legitimate and what is expedient may join hands in the occupation of the southern islands, it is certain that the seizure of the islands immediately commanding the entrance to the Dardanelles would lead to the closing once more of the Straits and further damage to neutral interests. There is no reason to suppose that the step is being contemplated, but all danger of its occurring would be eliminated if the Powers could make it clear that in their attitude towards the war they were in complete harmony owing to their acceptance of the basic principle of the equilibrium of Europe.

COTTON IN THE SUDAN.

The British Cotton-Growing Association held its annual dinner in the Midland Hotel, Manchester, on Monday last, Lord Derby occupying the chair. The principal speaker was Mr. J. A. Hutton, who gave a lengthy account of his recent trip to Khartum, following it up with a detailed plan for the future development of the Sudan as a cotton producing country. Owing to the unusual importance of Mr. Hutton's address and to the far-reaching possibilities included in his suggestions, we reproduce below a summary (based upon the report in the *Manchester Guardian*) of the more significant aspects of the questions raised by the speaker, who, in the words of Lord Derby, "has been the moving spirit of the Association."

Climate and Soil.

"The Anglo-Egyptian Sudan is an immense country, half the size of India, where sufficient cotton can be grown to keep the B.C.G.A. quiet for the next twenty-five years. As far as the climate is concerned, in the southern part there is an ample rainfall with a well-marked dry season. As one proceeds northwards the rainfall decreases to a negligible quantity, but then you have the Blue Nile, the Atbara, the Gash, and other torrents, and it is simply a question of time and money to turn the water from these rivers on to the land. The soil naturally varies, but there are enormous tracts of country with excellent soil for cotton. The one point we were anxious about was the population, but it is estimated that there are now nearly 3,000,000 people in the Sudan, and as far as we could judge there is ample population for immediate requirements.

Transport Facilities.

"The transport facilities are really splendid. There are 1,500 miles of railway, extending from Halfa to Khartum and thence to El Obeid, and this is connected with the sea by the railway from Atbara to Port Sudan. On the White Nile steamers can proceed 1,000 miles up to Gondokoro at all times, and on the Blue Nile there is fair transport during seven months of the year. Of camels and donkeys there seemed to be an excellent supply. There is a first-class harbour at Port Sudan, with excellent wharf accommodation and good draught of water suitable for steamers of 10,000 tons. As regards ocean transport, I have discussed the matter with Sir Owen Phillips, and he is both anxious and ready to help us. Anyone who has to deal with our colonies in East and West Africa must feel jealous of the really excellent harbour and transport facilities in the Sudan.

"There is also another most important factor in connection with the Sudan, namely, that it is already a cotton-producing country, and its exports to-day exceed 20,000 bales per annum. Consequently, we have not got to carry out expensive experiments to prove that cotton can be grown on a commercial basis. We have the far easier task of extending and developing the cultivation which already exists."

Mr. Hutton proceeded to analyse the cotton-growing prospects in the various districts.

Tokar and Kassala.

"At Tokar each year the flood comes down from the Abyssinian mountains and spreads out in a sort of delta, when it reaches the plain, and there deposits its silt. This last is rather an important point, as in consequence cotton can be grown year after year on the same land. The growth is further assisted by a certain amount of rainfall. At present from about 40,000 to 50,000 acres are irrigated annually, producing from about 8,000 to 12,000 bales of cotton. The unginned cotton is carried by camels to Trinkitat, and is conveyed thence by sailing boats to Suakin, where it is ginned. It is essential that a railway of about sixty miles in length should be constructed to Suakin, so that the cotton could be taken direct from Tokar to Port Sudan. If certain irrigation works were constructed, the land under cultivation could be increased to 60,000, or, possibly, to 100,000, acres, and the production to 15,000 or 20,000 bales.

"We were not able to visit Kassala in the short time at our disposal, but here we have a somewhat similar proposition to Tokar. Large irrigation works are necessary before regular cultivation can be ensured, but it is absolutely essential that a railway should be constructed before anything can be done on a large scale. Possibly 50,000 to 100,000 acres might be brought under cultivation, with a production of 25,000 to 50,000 bales.

Khartum District.

"Along the banks of the Nile north of Khartum there is a large tract of land which could be easily irrigated, but the most suitable type of cotton has yet to be found. Owing to the restrictions on irrigation insisted on by the Egyptian Government, cotton has to be grown as a winter crop. The last season has been only a fair one, but the cotton was really excellent in quality. It has not got quite the lustre and glossiness of Delta cotton, but it is a capital grade, long and fine in staple and of most exceptional strength. What is required is a more robust or more rapidly maturing type of cotton. Unfortunately, the Agricultural Department is much understaffed and short of funds, and they have not been able to do much in experimenting with various types of cotton. This is one of the most difficult propositions in the Sudan, but if the difficulties were overcome at least 50,000 areas could be irrigated, and if a third of this were under cotton one should get an annual production of, say, from 10,000 to 20,000 bales of Egyptian cotton.

"It is not every spinner who wants Egyptian cotton, and it will be good news to the majority of the Lancashire spinners to learn that in the Sudan there are really most encouraging possibilities of producing large quantities of cotton of American type. In some ways the prospects are even better than those in Uganda and Nigeria. The cotton would be grown as a rain crop, and the extent of land where the rainfall is sufficient is probably not less than 100,000 square miles. Given the necessary capital, the necessary means of transport, and the necessary management, I see no reason why in the next few years the production should not be increased to 50,000, or even to 100,000, bales of good, useful cotton.

Gezira.

"The Gezira plain is a huge country, and contains at least 5,000,000 acres of first-class cotton soil. This means a cotton-growing country as large as the Egyptian Delta. It is impossible to imagine the flatness of the land, really as flat as a billiard table. At the moment (one year after the first attempts at cultivation have been made) there are 520 acres under cultivation, 271 of which are bearing luxuriant crops of cotton. There is not one single venture in any part of the British Empire in which the British Cotton-Growing Association is interested which has given such good results in the first year. You have got the soil and you have got the population and you have got the climate. All that is wanted is the water."

Mr. Hutton proceeded to quote from a letter which he had written whilst in the Sudan:—"I am really beginning to think that, both in the immediate future and also in the distant future, there are larger possibilities in the Sudan than any of us dream of. I would not advocate for one minute that the British Cotton-Growing Association should in any way relax its efforts in other parts of the Empire, but if, as I am now inclined to think, this is one of the great cotton-growing districts of the future, by all means let us devote ourselves largely to this wonderful country. There seems to be no doubt that the Sudan can produce Egyptian cotton of high class. Lancashire needs finer cotton every day, and I am convinced as regards this type of cotton her salvation lies in this country."

Continuing, the speaker said that to develop even a portion of the Gezira large irrigation works, involving the expenditure of £4,000,000 or £5,000,000 of capital, were necessary. Further than that, from £2,000,000 to £3,000,000 additional capital would be required for commercial developments.

Provision of Capital.

In summing up, Mr. Hutton stated that in the Sudan we have the soil, the climate, and the water. "We

WIDE SECULAR FOREST IN ROUMANIA, of great value, about 300,000 cubic metres, **TO BE SOLD** very advantageously.—Apply, F. W. GERSTL, BUCHAREST, ROUMANIA.

Digitized by Google

have, in addition, in the administration of the Sudan one of the finest sets of men in the Empire. We have, too, one great asset in Lord Kitchener. It has been proved beyond dispute that the Sudan can grow cotton of excellent quality. What is now needed is the capital for railways, for irrigation works, and for commercial development, and also expert assistance and advice. As far as the latter point is concerned, the services of the Association are at the disposal of the Government. As regards the capital for commercial development, which will run into several millions, I think we can rely on the assistance of Mr. F. Eckstein, Lord Lovat, Mr. Macgillivray, and their friends. The capital for railways and for irrigation works should, I think, be found by the Government, and when I say the Government, I mean the British Government.

"It will naturally be asked why the British Government should do this. Well, the Sudan is called the Anglo-Egyptian Sudan, and is presumably part of the British Empire. We have so far thrown on Egypt almost the entire burden of finding the necessary capital for the construction of railways and other development works. I think, therefore, we can reasonably go to His Majesty's Government and ask them to find this money, and I have not the least doubt it will pay them to do so, for in a very short time this capital is bound to bring in a handsome return.

"Let us, however, recognise that really large amounts of capital will be wanted, and some of it very soon—say, £8,000,000 for railways and irrigation works and £4,000,000 for commercial developments. We must, however, be reasonable. The whole of the capital required is not wanted immediately, and I would suggest as a first step that we should go to the Government and ask them to advance on loan to the Sudan Government for railways and cotton development in the Sudan the sum of £1,000,000. If we meet with a favourable response, as I confidently hope we shall do, I think it would be only reasonable for us and our friends to find a similar amount for the commercial development of the country.

"You may reasonably ask—Supposing this capital is found, what quantity of cotton can we expect to obtain from the Sudan in the immediate future? I have no hesitation in stating, without fear of contradiction, that in the Anglo-Egyptian Sudan you will obtain larger and quicker results than in any other part of the British Empire. If the capital is found, and if everything is pushed on as rapidly as possible, I see no reason why in ten years from now the Sudan should not be producing annually at least 2,000,000 bales of excellent cotton. After our investigations I and my colleagues are convinced that the Anglo-Egyptian Sudan offers one of the best cotton-growing propositions in the British Empire, and in the Gezira we have the very finest proposition in the whole of the world."

APPEAL TO THE GOVERNMENT.

At the annual meeting of the British Cotton-Growing Association held at Manchester on Tuesday the following resolution was unanimously adopted:—"That the attention of His Majesty's Government be drawn to the dangerous position of the supply of the raw material of the cotton trade of this country, and to the exceptional opportunity offered in the Anglo-Egyptian Sudan for the extension of cotton-growing on a large scale in the immediate future, and to the vital importance to Lancashire of the work being pushed on with all possible speed; that the Government be respectfully requested to make a grant-in-aid to the Government of the Sudan of the sum of £200,000 to be spent in experimental and research work for the advancement of cotton-growing in that country; that the Government be also respectfully requested to make arrangements for a loan of £1,000,000 to the Sudan Government for the construction of irrigation and other works necessary for the rapid development of the cotton-growing districts of the Anglo-Egyptian Sudan; and that copies of this resolution be sent to the Prime Minister, the Chancellor of the Exchequer, the Secretary of State for Foreign Affairs, and Lord Kitchener of Khartoum."

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The annual dinner of the British Cotton Growing Association on Monday last is likely to become an historic event—the birth, as it were, of a new Sudan. True, it has been heralded time and again by enthusiastic believers in the Sudan's tremendous agricultural potentialities, but the enthusiasts were few in comparison to the bulk of the people whose knowledge extends to a faint notion that the Sudan was somewhere on one of the maps. It needed the eulogistic words of Mr. Hutton, backed by an offer of £1,000,000—provided the British Government provided an equal amount—to convince Lancashire that in the Sudan lies one of the finest cotton-growing propositions in the world.

***

It is not for me to add to Mr. Hutton's remarks. In my small way I am convinced that he is right, and convinced, moreover, that an investment in a serious cotton-growing undertaking, under Government guarantee, in the Sudan will bear a rich reward. Imperially speaking, the success of the B.C.G.A.'s appeal to the British Government is to be warmly desired. It would certainly be better for us in the long run to participate with one million sterling less in the proposed Chinese loan and to devote that million to the economic development of the Sudan.

***

But how few of us realise it? Is it that the scheme is too big, or the Sudan too little known? Perhaps both. At any rate, I was surprised to see the general indifference with which Mr. Hutton's words were greeted by the London Press. It was as though no Imperial scheme of stupendous magnitude had been ventilated, as though an every-day dinner had been eaten and an every-day after-dinner speech made. That was all.

***

The fact is, the Sudan does not seem to interest us. My prediction is, however, that it will turn out to be one of the most valuable of the Empire's possessions; but in order to hasten its development it must be brought more frequently to the notice of the public. The public know little or nothing about it, and to this is due, to a very great extent, the public's indifference. This apathy must be overcome, and the Press which attempts to make the people think Imperially can aid in doing so. "British cotton for British looms" is surely a goal worth striving for!

***

Since writing the above news has reached me, through the *Manchester Guardian* (which, by the way, has been extremely patriotic in giving its readers an accurate and detailed account of all that has transpired in connection with the B.C.G.A. during the past few days), that at the association's annual meeting a resolution—quoted elsewhere—was passed requesting the British Government to make a grant-in-aid to the Government of the Sudan. Needless to say that I can only approve of the initiative and wish it every success.

***

Nothing has been decided as regards the adjudication of the irrigation works in Mesopotamia. The Commission responsible for the provisional adjudication rejected Messrs. Pearson's tender, but did not recommend the definite acceptance of Sir John Jackson's offer, "considering the price too high." The final decision rests, however, with the Minister of Public Works, who will not be called upon to give it until a month after receipt of the Commission's report. Considering the nature of the latter, I should not be surprised if my prophecy on May 10 came true, namely, that the "adjudication will be cancelled and a new one opened, probably with more concise and explicit specifications."

***

According to the *Financial News* the representatives of the British European Trust have concluded a convention by which they have obtained from the Imperial Ottoman Government a concession to construct a system of tramways in and about the City of Smyrna. Negotiations are also taking place for the acquisition of telephone and power concessions for the same city.

***

The Egyptian Promotion Committee, to which I have referred on previous occasions, is progressing favourably, and adhesions are being received from all sources by the secretary of the society, care of Shepheard's Hotel, Cairo. A definite plan of campaign is being decided by the executive, but naturally much will depend on the funds collected for that purpose. It is to be hoped that all those whose business either depends on or is affected by the tourist season will lend a willing hand to further the sound aims of the Promotion Committee.

***

"This has been a disastrous year for fire insurance offices doing business in Constantinople," says the Report of the British Chamber of Commerce of Turkey. "The approximate losses have reached over half a million sterling, and when it is remembered that the total premium income of the companies from Constantinople is less than one-quarter of this amount, and that during the last fifteen years little or no profit has remained to the companies, the decision of a minimum increase of 50 per cent. on former rates cannot be wondered at. Our own opinion is that the increase is perfectly justifiable and moderate. Business which cannot be done with a fair chance of a profit is not worth doing at all."

***

I read in the *Moniteur Officiel du Commerce* that two commercial missions, one Russian and the other Spanish, are visiting Smyrna with the object of studying the market. The first-named has the intention of establishing an Information Bureau which will practically render the same services as our Chambers of Commerce. The Spanish mission, on the other hand, is endeavouring to secure a stronger foothold for cottons manufactured in Spain, and it has managed to form relations with the most important houses in the place. As a matter of fact, Spanish tissues are beginning to oust the Italian, and there is every prospect of the sale of these articles increasing to the advantage of Spanish manufacturers. To which I call the attention of British cotton manufacturers.

On June 12 there will be held at the offices of the Deutsche Bank, at Berlin, no fewer than four company meetings. All four companies are interested in Turkey, three of them in Ottoman railways—Baghdad, Anatolia and Salonika-Monastir—and one in the Haidar-Pasha port. Surely this ought to constitute a record of German enterprise in the Near East?

***

The *Egyptian Gazette* states that the Agricultural Bank's decision to lend syndicates amounts up to £E1,000 at an interest of 7 to 8 per cent. is "raising a storm of opposition in native circles and in the press." Considering that the Deutsche Orient Bank advances money at 5½ per cent., it seems to me more rational that men who are witnesses of our gradual commercial and economic decline in Egypt, should be thus called upon to regret the Agricultural Bank's decision.

***

The news, reproduced elsewhere, that the directors of the Suez Canal Company have decided to reduce their tariff to shipowners will be welcomed by the latter. True, the reduction is a small one, but it is a step onward. Apropos, rumours of forthcoming works being undertaken at the canal are gaining ground, but nothing definite is likely to transpire until after the general meeting of the shareholders to be held next month.

***

The economic effects of the Turco-Italian war are echoed in a recent sartorial failure in Cairo. The unhappy victim, an Italian tailor, has demanded a *concordat preventif*, on the grounds that his trade has been ruined by the persistent boycott to which he was submitted by his native patrons. There is no truth, however, in the rumour that he has claimed damages from the Turkish Government, in imitation of the spirit of the times.

***

According to a Reuter wire, M. Teodoroff, the Bulgarian Minister of Finance, will shortly leave Sofia for Vienna and Paris. It is stated that the object of his journey is to enter into negotiations for the conclusion of a loan of 200,000,000 francs, 80,000,000 of which would be applied to the conversion of the 6 per cent. 1892 loan and the rest to the construction of railways and other purposes. London is apparently not on M. Teodoroff's programme, but Vienna—Germany's outpost in the Balkans—is naturally included.

***

The *Matin* announces that it is authorised to state that no new Italian or Turkish loans will be allowed to be quoted on the Paris Bourse so long as the war continues.

***

"British merchants," writes Mr. W. B. Heard, the British Vice-Consul at Sofia, in a report on Bulgarian trade, reproduced on another page, "should note the flourishing state of the Bulgarian market, in which there is likely to be an *increased demand for foreign goods* during the current season."

***

I draw the attention of Sudan merchants to the fact that Bulgaria—and generally speaking the Balkan States—import considerable qantities of gum.

E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - - £1,500,000.
Paid up Capital - - 500,000.
Reserve - - - - - 640,000.

The Bank undertakes every description of Banking Business on most favourable conditions.

BANK OF ATHENS.

(Incorporated in Greece.)
CAPITAL FULLY PAID - - Dr60,000,000
RESERVE FUNDS - - Dr10,480,000
Head Office: ATHENS.
London Office: 22, Fenchurch Street, E.C.
Branches:

GREECE: Piræus, Patras, Syra, Calamata, Tripolitza, Volo, Larissa, Agrinion and Carditza.
CRETE: Canea, Candia and Rethymo.
TURKEY: Constantinople (Galata, with Agency at Stamboul), Samsoun, Trebizonde, Kerassunde, Bafra, Mersina, Smyrna, Adana, Tarsus, Salonica, Serres, Cavalla, Xanthi, Janina, and Chio.
EGYPT: Alexandria (with agency in the quarter of Midan), Cairo (with agency in the quarter of Mousky), Zagazig, Mansourah, Mit Ghamr, Tantah and Beni Souef.
SUDAN: Khartum & Port Sudan. CYPRUS: Limassol.
HAMBURG: Domhof, Mönckebergstrasse 18.

Special facilities for Banking, Exchange and Commercial Business of every description with Greece, Egypt, Turkey, Crete, Cyprus and the Levant generally. Most favourable rates for Deposits, Collections, Cable Transfers, &c., on application.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - - £650,000
RESERVE - - - - - £210,000
Reserve Liability of Shareholders - £1,000,000

London Office: 25, Abchurch Lane, E.C.
Chief Office in Persia: Teheran.

Branches at Ahwaz, Bushire, Hamadan, Isfahan, Kazvin, Kerman, Kermanshah, Meshed, Mohammerah, Nasratabad, Resht, Shiraz, Tabriz and Yezd.

The Bank is prepared to transact Banking business of every description in and connected with Persia; and in London grants Drafts, Telegraphic Transfers, and Letters of Credit, and negotiates or collects Bills on Persia.

IONIAN BANK, LIMITED.

INCORPORATED 1839.

SUBSCRIBED CAPITAL - - - £600,000
PAID-UP CAPITAL - - - - 485,580
RESERVE FUND - - - - 65,000

Head Office—LONDON.

BRANCHES—

Athens, Patras, Corfu, Cephalonia, Zante, Piræus, Tripolitza, and Nauplia, in Greece; and at Alexandria, Tantah, Fayoum, Minieh, and Mansourah, in Egypt.

Every description of Banking Business undertaken on most favourable terms.

NATIONAL BANK OF EGYPT.

Paid-up Capital - £3,000,000 (In 300,000 Shares of £10 each, fully paid). **Reserve Fund - £1,500,000**

Governor—F. T. ROWLATT, ESQ. **Head Office**—CAIRO.
London Committee—HON. HUGO BARING, SIR CARL MEYER, HON. ALGERNON MILLS, HON. SIDNEY PEEL.
London Agency—4 and 5, KING WILLIAM STREET, E.C.
Manager—J. T. BEATY-POWNALL, ESQ.
Asst.-Manager.—A. F. GILLBEE, ESQ.

Branches in all Principal Towns in Egypt and the Soudan.

Deposits received for a fixed term. Current Accounts opened. The Purchase and Sale of every kind of Stock and Shares undertaken Bills discounted. Every kind of Banking Business transacted. Full information can be obtained at any of the Offices of the Bank.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople May 17.

Government Adjudications.

The complaint has often been heard that the notice given for Government adjudications is much too short to permit of correspondence with home firms in the matter. One does not like to take the view that the shortness of time allowed is intentional, and that there is some ulterior motive for it, and yet if the authorities—and in these are included almost every Government department—desired to give this impression, which one can be certain they do not, they could hardly go a better way about it. The object of public adjudications is to obtain certain specified goods according to a sample given, or in other cases to sell something, or to invite tenders for the carrying out of certain works under the most favourable conditions; and to allow insufficient time for a letter to reach the Continent and a reply to be received is simply to defeat the end in view. As I believe The Near East is read with interest in certain departments, it is hoped that this reference to existing conditions will have some effect, and that, excepting under very special circumstances, longer notice will be given for official adjudications, unless the intention is to deliberately keep the tendering in the hands of a few, who, by questionable methods, may be able to obtain early information from indirect sources.

As an instance of the insufficiency of the time allowed for correspondence with home manufacturers, I would mention a notice emanating from the Military Department, inviting tenders for 650 to 1,000 tons of barbed iron wire. The provisional adjudication is to take place on May 30, and the definite adjudication on June 6, when offers will be received for a 5 per cent. reduction. Seeing that offers are to be made on a sample which was only to be obtained from the Inspection Générale on May 13, the time allowed for communication with manufacturers to obtain quotations is only seventeen days, which is surely insufficient for so important an order.

As another instance, I mention the following: The Hedjaz Railway Company invites tenders for three tons of sulphate of copper, the final adjudication to take place on June 1, but samples must be handed in not later than May 20. Further comment is superfluous.

The Question of Agents.

On the other hand, manufacturers who are interested in the numerous orders for supplies of every kind for the various Government departments should look ahead and name local agents in advance, as the chances of being able to make all these arrangements after tenders have been invited, even if the time limit were considerably extended, are very slight. While on this subject, I cannot let the opportunity pass of recommending the utmost care in the choice of agents. I am aware of many firms having been disappointed with their experiences in this country, but, in nearly every case, had their agents been of the standing that one would like to see the representatives of all British firms possess, their troubles might have been avoided. There are many local British agents of the highest standing, as well as numerous French, German, and Austrian of like character, and before appointing an agent it would be well if all manufacturers were to apply to the British Consulate General or the British Chamber of Commerce, who are always prepared to recommend desirable agents.

As an example of how an adjudication should not be conducted, I would mention that at a recent adjudication for clinical thermometers for the army the Turkish Commission was assisted by a German military officer as its vice-president, all the offers being submitted to this officer for him to pass his opinion upon. The offers of two British firms, which were almost identical in price—about 8d. a piece for the cheapest—were curtly thrown out, whilst those of several German firms were held over for consideration. When all the offers had been opened, the German officer and member of the commission addressed the president and stated that he had also written to a firm which he could highly recommend, and produced samples ranging from 2d. upwards. This may or may not be an exceptional instance, but if such things should occur often the result will be the turning away of desirable offers. It should be remembered that a judge cannot also be a competitor.

Tokat Copper.

The Ministry of Commerce and Agriculture notifies that a stock of 132 tons of copper, extracted from the well-known mines of Arghana, smelted at Tokat, and now stored at Samsoun, is put up for sale by sealed offer. Offers will be received until June 6.

Wagon Factory.

By an official notice dated May 12, the Ministry of War invites offers from local and foreign capitalists who may desire to establish a factory under advantageous conditions for the manufacture of wagons or carts of all kinds. Offers, stating conditions, must be addressed to the "Présidence de la section de l'artillerie de campagne et d'expédition," at the Ministry of War, within two months from date of notice.

Army Aeroplanes.

The local press announces that the Ministry of War has placed an order for two aeroplanes with a Bristol company at a cost of £T1,300 each. It is also stated that six officers and five engineers will be sent to the makers to study aviation.

Trade Returns.

The latest Board of Trade figures for the month ended April 30 show a slight recovery in the export to Turkey of cotton yarns and cotton piece goods, but on the other hand the export of coal almost ceases.

The total enumerated exports from the United Kingdom to Turkey for the four months ended April 30 are £1,856,886, as compared to £2,296,078 for the same period in 1911, and £1,835,312 in 1910. The principal imports from Turkey into the United Kingdom were for the same period £768,378 in 1912, £541,265 in 1911, and £447,756 in 1910. While this is not a bad showing, all things considered, with the closing of the Dardanelles on May 18 last, the returns for next month may be expected to show a very different result.

Among recent arrivals in Khartum is the agent of Messrs. Hagenbeck, of Hamburg, the wild animal dealers. He arrived from Port Sudan, where he landed with a cargo of wild animals from Somaliland. He has already bought four giraffes in Khartum, and is still expecting to obtain a few more animals.

TRADE WITH BULGARIA.

Our trade with Bulgaria is on the increase. We exported to the value of £1,199,000 to Bulgaria in 1911, as against £907,500 in 1910. Austria's exports, at £1,885,000 showed a slight decrease, and Germany's at £1,590,000 a considerable increase.

Our imports from Bulgaria amounted to £969,000 as against £613,000 in 1910. As a matter of fact, Bulgaria's total exports in 1911 showed an increase of over £2,000,000, as compared with 1910 (£7,385,000 as against £5,164,000 in 1910).

These figures, as Mr. W. B. Heard, H.M. Vice-Consul at Sofia, points out in the *Board of Trade Journal*, testify to the prosperous condition of the trade of Bulgaria, which is largely due to recent good harvests. The crops for the current year promise well, though fruits have been damaged by late frost.

British merchants, adds the Vice-Consul, should note the flourishing state of this market, in which there is likely to be an increased demand for foreign goods during the current season.

GREEK DEBT SERVICE.

The gross receipts for March were 2,713,515 drachmae from monopolies, and 2,288,106 drachmae for Piræus customs, as against 2,725,851 drachmae, and 3,169,246 drachmae, respectively for March 1911.

The actual receipts during the first three months were 9,934,469 drachmae from monopolies, and 6,571,304 drachmae from Piræus Customs, as against 9,025,767 drachmae and 7,014,246 drachmae respectively for the first three months of 1911.

There was a surplus estimated over actual receipts of 2,709,469 drachmae from the monopolies and 3,896,304 drachmae from the Piræus Customs, as against 1,800,707 drachmae and 4,339,246 drachmae surplus respectively for 1911. Of the surplus over the estimated receipts from monopolies, tobacco, stamps, stamped paper, and Naxos Emery, 49 1-5 per cent. is applied towards increasing the *minimum* rates of interest and sinking fund of the Eternal Gold loans of 1881 to 1893. The receipts in gold from both Naxos Emery and the Piræus Customs are converted into drachmae at the mean rate of exchange for the month.

FINANCES OF MALTA.

The report of the Royal Commission on the finances, economic position, and judicial procedure of Malta was issued on Tuesday. The most important recommendations are as follows:—

That the Agricultural Department should be placed under an officer who would give his whole time to the work; that an Indian engineer should report on the advisability of limited expenditure on irrigation works; and that a committee should be appointed to conduct a thorough investigation into the expenditure of the Government. It is further recommended that the scale and amount of expenditure on public works extraordinary should be cut down; and that the contribution of £5,000 a year at present paid to the Imperial Government in aid of the military service should be discontinued. The tax on imported grain should, it is proposed, be reduced by half, and emigration to California and Brazil should be encouraged.

CYPRUS TRADE IN 1911.

The Chief Collector of Customs at Larnaca reports that the total value of the imports of merchandise into Cyprus in 1911 was £547,772 (1910, £493,475), of which £147,574 came from the United Kingdom and Colonies, as compared with £120,308 in 1910. Austria sent £73,029; Turkey, £68,278; and Italy, £67,362 worth of goods. The values of the principal imports showing increases were: Cotton piece goods, £26,975; cotton yarn and thread, £17,662; woollen goods, £5,369; and machinery, £3,164. Olives, olive oil, sugar, and timber showed decreases.

The total value of the exports during 1911 constituted a record, and amounted to £626,557, an increase over 1910 of £114,716. The principal increases were in animals, £46,768; caroubs, £37,293; wine, £25,733; and oranges and lemons, £4,897.

Engineering Notes.

CANAL AND RIVER MOTOR TRANSPORT.

In all countries of the world, especially in the agricultural districts of Egypt and the Near East generally, where canals are provided for irrigation purposes, the question of reducing the cost of carriage of goods is becoming a matter of the gravest importance.

Old Fashioned Methods.

The chief motive power used up to the present has been horse towage, as the attendance required is the least expensive. Where a number of barges can be towed together steam tugs are employed, but, as in most canals, the locks are only sufficiently large to allow of one barge passing at a time, the delay caused at each lock is so great that the saving in running cost and increase of speed over horse-drawn traffic is practically nil. Steam barges are also used, but the weight of the engines, boiler, and fuel, together with the space occupied, reduce the carrying capacity to such an extent as to render them useless except in special cases.

Oil Traction.

Motor barges driven by paraffin or crude oil are now being tried, and are working successfully. For some time past Messrs. H. A. Harvey and Co., Limited, have been making practical experiments to ascertain what class of motor is most suitable for the purpose. The barge they are using is of the "narrow" or monkey-boat type. She is built of English oak and elm throughout. Her length is 71 ft. 6 ins., with a beam of 7 ft. 1 in., and a moulded depth of 4 ft. The reason these dimensions were adopted was that a boat of this size is the largest that can pass through the locks of a number of English canals, including those that connect the Grand Junction Canal with the Birmingham system.

The Harvey Motor-Barge.

The motor is a 15-h.p. twin cylinder paraffin engine, turning at 750 revolutions per minute, and driving a cast-iron propeller 2 ft. in diameter. To get the highest possible efficiency out of the propeller, its speed is reduced to 250 revolutions per minute, the reduction being effected by "Morse" rocker-joint chains running in oil in a gear-box, which also contains the reversing gear. The motor is arranged to be started either by a blow-lamp or by petrol. In the former case it takes seven minutes to start, but as blow-lamps are not allowed in the London docks a small charge of petrol may first be admitted to the carburettor, and the motor started, the paraffin being turned on after a few strokes as soon as the engine is warmed up. The ignition is effected by a low-tension magneto driven from the half-speed shaft, and the cooling by a reciprocating pump of large diameter, having a variable throw, so that the quantity of water can be regulated. The thrust of the propeller is taken on ball-bearings, which are carried on the after-end of the gear-box. The clutch pedal, reversing lever, and control handles are all carried up on deck, so as to be within easy reach of the steersman. The motor room is placed aft, so that the man in charge can always have his eye on it, and is lined inside with metal, and floored with corrugated aluminium, so as to reduce the risk of fire. Tanks are placed under the counter and in the hold to carry a total of 150 gallons of fuel, the hourly consumption being under one gallon, but varying, of course, with the number of locks which have to be negotiated.

The carrying capacity of the barge is from twenty-eight to thirty tons, according to the class of cargo, and when fully loaded her speed is 4¼ miles per hour. When towing another barge as well, loaded with thirty tons of cargo, the speed is 3½ miles per hour. There is practically no wash whatever from the propeller owing to the shape of the counter, and the ripple from the bows is very little more than that of a horse-drawn barge. Forward of the motor room is a cabin, providing accommodation for two men. This is comfortably fitted up with folding bedstead and table, lockers for food and coal, and equipped with a cooking-range. A sliding panel in the after-end of this cabin affords access to the forward-end of the engine, in order to allow adjustments being made to the circulating pump, etc. Owing to the presence of thick mud, dead leaves, etc., in the canal the circulating water has to be filtered, and a specially large and easily cleaned filter is provided for the purpose. The main hold, which is 45 ft. long, comes forward of the cabin, and in the bow is a locker for chains and stores.

The hold is open from end to end, and a tarpaulin cover carried on portable planks and uprights covers the cargo, and protects it from damp.

The barge was built by W. H. Walker, of Rickmansworth, and the motor, gear propeller, and fittings by the Phœnix Engineering Company, of Altrincham, Cheshire.

The Barcar Motor.

The motor is of their well-known Barcar type, with alterations for the special requirements of the work. The chain reduction gear is of the "Morse" silent type, in which pins are replaced by rocker joints, and was made by the Westinghouse Brake Company, of York Road, King's Cross.

COTTON PICKING BY MACHINE.

In all harvesting the demand for labour comes at the same time over any given district, with the result that there is practically always a demand in excess of the available supply. Harvesting machinery is therefore becoming more of a necessity from day to day. The latest machine of this type is one for stripping the ripe bolls from the cotton plant, and it is said to be working very successfully in those districts in which it has been tried. A thirty horse petrol or paraffin motor is mounted on a four-wheeled carriage, and gear is provided by which the ripe bolls of cotton are combed off the plants and thrown into canvas bags carried on the machine. In the course of the operation some of the leaves of the plant are also plucked off and thrown into the bags, but these are easily removed subsequently. The machine is worked by one man and the saving in cost per bale is said to amount to nearly 13s. In places where population is scarce and labour for hand picking difficult to obtain, the use of machines of this type should greatly extend the area on which cotton can be grown at a profit, and it should therefore prove of great value to the colonies, Egypt, and other cotton growing countries.

DREDGERS FOR THE PANAMA.

It is a great tribute to British engineering skill that the Panama Canal Company, which is, of course, an American enterprise carried out under the control and supervision of American engineers, should have ordered a large powered dredger from a Renfrew firm for use on the canal. This vessel, which is of the bucket dredger type, has a ladder capable of dredging down to a depth of 50 ft. below the sea level, and the hopper is capable of carrying 1,200 tons of sludge. The dredging gear is of very massive construction, and the complete ladder, with its steel buckets and chains, weighs 240 tons.

AN ELECTRICALLY-DRIVEN AIR PUMP.

Messrs. Merryweather and Sons, of Greenwich, have just supplied an air pump arranged to be driven by a 2 h.p. electro motor. The pump is required to exhaust the air from two portable tank vans of 350 gallons capacity each, and by the vacuum thus created these vans empty the contents of the drainage cesspools at a large hospital abroad. The pump is of the double barrelled type and is mounted on the same bed plate as the electro motor. In case of the failure of the supply of electricity a hand gear is fitted, with detachable winch handles, and this gear can be thrown in or out by means of a clutch lever.

Near East Oil Notes.

LONDON, May 23.

Romano-Carpathian.

The Romano-Carpathian is the latest addition to our Anglo-Roumanian Oil companies. It has a capital of £125,000, of which £50,000 is set aside for working capital, and it has been formed to buy the whole share capital of the Roumano Belge de Petrole, which was formed in 1908 in Bucarest with a capital of £68,000 divided into 3,400 shares of £20 each and 3,400 deferred shares. This company owns plots at Tintea, Baicoi, Magurele, and Gura Vitiorei, amounting in all to 788 acres. The only wells that are actually being pumped are on the forty-two acres at Tintea, where the Steaua Romano and the Orion are working. Tintea lies midway between Baicoi and Gageni. The wells are connected up by pipeline to the railway stations. Only one producing well is owned by the company. This was pumped in May, 1910, but got choked with sand. After cleaning the well started in October, 1910, and is now producing about ten tons daily from the second horizon. As soon as this has been exhausted the well will be sunk to the third, fourth, and fifth horizons. There are three wells now being drilled or put into repair. Well No. 5 is drilled down to 482 metres, and has passed through four oil-bearing horizons. It first produced in March, 1911, but the casing gave way and the well is now being repaired. Well No. 2 was drilled as far back as 1908, and yielded a fair amount of oil. It is now to be deepened. Well No. 3 struck good oil in May, 1909, but after having produced over 7,000 tons, the company decided to deepen the well. Well No. 6 reached the oil strata at 355 metres, but the casing became damaged, and the well is now being repaired. Well No. 7 has just started drilling. There is room for sixteen other wells on the plots at Tintea, and it is expected that wells 2, 3, 5, and 6 should shortly be ready to pump, when each ought to give about 400 tons of oil a month. At the present price of 24s. a ton, the company, if carefully managed, might make a reasonable profit. The Romano-Carpathian will require a considerable amount of working capital. It costs about £4,000 to drill a well at Tintea. But if the price holds, the company should make a reasonable profit of at least 12s. a ton. It does not appear to us that the Romano-Carpathian will have anything like enough working capital to develop its other plots, and it should divide the whole of its attention to the Tintea ground, where £50,000 can easily be spent, and will probably bring in a reasonable return.

British Maikop.

The British Maikop Oil Company have been drilling on plots Nos. 490 and 513, but these plots were not productive, and the nine wells only gave 400 tons. This was very disappointing, and the board have therefore acquired five additional plots, amounting in all to 135 acres. Plot 489 adjoins the Maikop Victory, and is bounded on the north by the Maikop Spies. On this plot workshops, storage tanks, and ambars have been erected at a cost of about £7,500. These properties have now been leased by the British Maikop, who pay £5,000 cash, of which £1,500 is payable at once, and the balance of £3,500 by a royalty of 2 kopecks a pood until the amount is liquidated. The oil horizon is expected to be reached at 600 ft. The original purchase price of the plots 434, 490, and 513 was £5,000, payable when the output reached 30,000 poods. This arrangement has been altered, and the vendor will now only receive £500 in cash and £500 in shares. But if the output of 30,000 poods is reached, instead of taking another £2,000 in cash, the vendors will receive £2,000 in shares. This gives the company another £2,000 working capital. The seven plots that were originally acquired in the Hadijensky will not be drilled for the moment. Maikop has been a disappointing territory, but we think the British Maikop people have done the best they could under all circumstances, and it is satisfactory to learn that Mr. Trew, who is secretary of the Maikop Spies, has joined the board.

Ural Caspian.

THE NEAR EAST was the first paper to give lang and detailed accounts of the Ural Caspian territory. It is understood that the Shell people propose to take over the whole of the Ural and work it themselves. This is the latest story, but whether they will pay for it in cash or shares, is doubtful. The idea that the Shell intended to buy the control is, of course, nonsense, because it already holds a preponderating influence in the company. It is believed that the Ural ground will turn out the biggest oil field in Russia, and it is, therefore, of immense interest to the Shell, now that they have bought the Rothschild refineries, to hold Ural tight. Candidly, as an investment, we think Urals are priced too high. It is no use paying 25s. for a sovereign, and big as we anticipate the field will bulk, it will take some years to develop, and many things may happen before then.

Suez Oil.

Mr. Rushton has just returned from Egypt, where he has been interviewing the Government with regard to the Suez oil. So little does the Egyptian Government understand oil that it would not believe that it was possible to bore underneath the Rea Sea. As a matter of fact, although some of the blocks owned by the Suez Company are under water, the depth of water is very small, and there will be no difficulty whatever in sinking wells and pumping.

North Caucasian.

The North Caucasian Oilfields has had very bad luck. It began drilling in the western portion of Grosny, and, like all the other companies working there, struck water. This was a serious matter, and exhausted the working capital of the company. Now a debenture issue of £100,000 has been made, of which £50,000 has been taken by the Standard Russe of Paris. Holders not only get 6 per cent., but they also receive a royalty of 2 kopecks a pood on oil produced during the current year, 1½ kopecks on the production of 1913, and 1 kopeck on the production of 1914. This means that they will get about 12 per cent. for the current year, 16 per cent. in 1913, and 21 per cent. in 1914, always supposing that the drilling turns out satisfactorily. The Standard Russe will handle the whole of the oil output. Mr. MacGarvey will remain as managing director. It must be admitted that North Caucasian have not fulfilled the promises made in the prospectus, but it is greatly in their favour that they have got Standard Russe to interest themselves in the venture. Let us hope that the North Caucasian, which certainly has some very satisfactory plots, will be able to make a profit which in some way approximates to the estimates that are now being distributed throughout the Stock Exchange. In one of these estimates the dividend for 1914 is put at 58 per cent. If the public divides this by five and gets the result, they may congratulate themselves, and the North Caucasian will certainly have nothing whatever to grumble at, and we suspect that Mr. MacGarvey, who is a good sound oil manager, will also be highly pleased.

CITRUS FRUIT INDUSTRY OF PALESTINE.

The principal centres of production of citrus fruits in Syria are Jaffa, Alexandretta, and Sidon.

Increasing Orange Groves of Jaffa.

The development of the orange in the Jaffa district has been of late years very great, over 13,000 acres being now covered with fine orange groves. The fruit is of excellent quality and flavour, and, owing to the thick skins and strong fibre, lends itself readily to export. The fruit commences to ripen early in September, and lasts until the end of March. It was long the custom of the orange growers to sell the entire crop before gathering it at a fixed price. In late years both this production and trade have shifted into the hands of colonists, who prefer to deal directly with the outside markets and to pack and ship their produce themselves, thus realising greater profit.

Oranges intended for export to Europe are carefully wrapped in tissue paper and packed in wooden cases of a uniform size, the standard dimensions being 27 by 13 by 11 inches. The number of oranges contained in a case varies according to the size of the fruit, the smallest number being 82 in a case. These numbers increase as the size of the oranges diminish, and for purposes of trade the cases are known as those of 84, 96, 128, 136, and 144, and sometimes rise to as many as 250 oranges per case.

The fruit intended for the Egyptian market is packed in cases 50 by 50 inches, which contain 600 to 700 oranges. Liverpool and London are the two largest markets for Jaffa fruit. The cases exported to these ports usually contain 144 oranges. Trieste, Constantinople, and Odessa prefer the larger size, from 96 to 98 oranges per case.

The freight to Liverpool has been fixed at 1s. 3d. per case, an agreement being made between the agents of the steamship companies and the orange shippers. An attempt is now being made to have these oranges carried to Liverpool by the steamers bringing coal to this port on their return voyage; the terms offered are considerably lower than those above-named. Prices f.o.b. Jaffa are 6½ to 7 frs. per case.

Alexandretta and Sidon Oranges.

In the Alexandretta district it is estimated that about 7,000 acres are devoted to orange tree cultivation. The oranges are of an excellent variety, as large as the Jaffa orange, and are principally exported to the Black Sea ports. The fruit is sold on the trees at an average price of 40 gold piastres per thousand. The Sidon orange is perhaps superior to any grown in Syria. It is large, heavy, and shaped like a Jaffa orange, but is thin skinned, and of most delicate flavour. Only a very limited number is exported.

Lemon Growing in Syria.

It is almost impossible to give even an approximate estimate of the annual production of lemons in Syria. The local consumption is very great. The quality is not as fine as that of the Sicilian fruit. The foreign export is limited to Russia, Egypt, and the Balkan States, and in 1910 amounted to about 100,000 cases, Odessa taking about 8,000 cases. Tripoli and Beirut are the principal export centres.

The statistical record of the shipment of oranges from Jaffa and of oranges and lemons from other Syrian ports during recent years is as follows :—

Ports.	1908.	1909.	1910.
	Cases.	Cases.	Cases.
Jaffa	675,926	744,463	853,760
Beirut	5,600	3,700	4,800
Sidon	75,000	188,000	125,000
Tripoli	189,000	134,000	218,007
	Tons.	Tons.	Tons.
Alexandretta	2,320	4,046	4,191

"SUN" PATENT SUPERHEATERS & EVAPORATORS
give controlled superheating of steam, economise fuel and safeguard the plant.
"ALBION" PATENT CO_2 RECORDERS & FLUE GAS ANALYSERS
check the products of combustion and indicate preventable waste.

Openings for Business.

WORSTED YARNS AT SMYRNA.

The importance assumed in the manufacture of Smyrna carpets since the constitution of the Oriental Carpet Company makes it apparent that, in the near future, native spinners will find it impossible to cope with the needs of the carpet industry, says the *Bulletin Commercial de Bruxelles*, and that it will be necessary to call in foreign manufacturers to supply the requirements for worsted yarn. Worsted imported into Smyrna from Europe is used locally for the making of waistcoats, drawers, stockings, socks, corsets, etc.

There are five small factories at Smyrna for this purpose belonging to the following firms: Georges Tabbach and Company, Algranati Cohen and Company, Moise and Abraham Antobi, Zisso Pappou, Jacob Ninio.

The annual importation is from 100,000 to 150,000 kilograms. One quality—a fine one—is very much in request, at 4 frs. to 5 frs. per kilo., c.i.f. Smyrna. These prices are for unbleached worsteds, those of the coloured variety being increased by about 8 to 10 per cent. Up to the last few years England (Bradford) supplied nearly the whole of these articles, but, as the British quality is too heavy—that is to say, too greasy—and, as it is expedient, above all, for the manufacture of ordinary goods, to have a finer texture, the consumers are now securing their supplies from Belgium, France, Germany and Austria.

The wools of the country, which were formerly exported entirely to America, are to-day completely utilised at home, and it is seldom that the production, which represents about 4,000,000 kilos. of wool, suffices for the consumption of the country. This extraordinary development of the local industry has been manifest during the past four years, and if it continues in the same proportion, the wools of the country will be insufficient to cover the needs of consumption, and Europe will be called upon to contribute to the furnishing of worsted yarn for carpets.

GREEK HARBOUR WORKS.

With reference to the proposed improvements at the port of Piræus, Mr. C. J. Cooke, the British Consul, has forwarded a copy of the Budget for 1912 of the Port Committee, the following extracts of which are from the *Board of Trade Journal*. The works to be undertaken include:—Removing to a depth of 8½ metres the rocks in the middle of the port, £4,460; completion of the right side of the Thémistocle jetty, £3,200; removal of lighthouse from the interior port to a more serviceable position, £1,600; purchase of a dredger for deepening the port, £4,000; completion of the paving of the street bordering the port by means of Vesuvian lava blocks, £6,800; repair and upkeep of the quays, £2,740. It is hoped that, after the works already provided for in connection with the graving docks at the port have been carried out, sufficient funds may be forthcoming for the purchase of a 60-ton floating crane. Plans of the port are now being prepared, and it is expected that they will shortly be submitted to the Ministry of the Interior for approval. The total cost of the improvements is not expected to exceed £320,000.

WORKS IN CYPRUS.

The *Cyprus Gazette* publishes the text of a Bill to authorise the expenditure of £24,600 on various services, including the purchase of breeding stock, £1,400; carbonising plant, £1,800; machinery and tools for the Forest Department, £650; construction of a lighthouse at Klides Island, £1,500; improvement of Kyrenia Harbour, £1,500; construction of a jetty at Limassol, £1,000; erection of agricultural school, £1,300; and the construction of new bridges, £1,400.

It is stated by the Constantinople Press that the protocol concerning the uniting of the Turco-Bulgarian railway lines at Kustendje has been submitted for final approval, and the Compagnie des Chimin de Fers Orientaux will immediately begin work on the Komanovo-Bulgarian frontier branch.

AGRICULTURE IN ROUMANIA.

The sale of agricultural machinery in Roumania, which was excellent last year owing to the good harvest, says the *Handelsmuseum*, Vienna, promises to be better still during 1912.

Among the machines finding the greatest chances of sale are ploughs with one or two ploughshares, sorters, seed-lips, and implements of husbandry. The Americans are meeting with success in the introduction of their reapers.

There has just been founded at Bucharest a concern known as "Comertul Romanesc," with an initial capital of 500,000 lei, the essential object of which is to devote itself to the importation and the sale of agricultural machines.

CEMENT IN BULGARIA.

According to the *Oesterreichisch-ungarische Konsular Korrespondenz*, Vienna, cement now finds a ready sale in Bulgaria, especially at Varna, owing to the increasing activity of the building industry.

That of Hungarian, French and Belgian manufacture is preferred. It is usual to deliver this material at the price of 35 frs. per ton, free on quay at Marseilles, in casks of 120 kilo. gross, with four months' credit or 3 per cent. discount for cash. The Belgians deliver cement at 5 frs. 80 per cask of 130 kilos. gross, c.i.f. Varna, and 3 per cent. discount.

TENDERS INVITED.

GREECE.

Army Equipment.—Sealed tenders will be received, at the Ministère de la Guerre (Section du Matériel), Athens, for the supply of the following articles of military equipment:—10,000 haversacks, 9,000 bayonet sheaths, 10,000 rifle slings, 16,000 belts, 43,000 ammunition pouches, 11,000 belt slings, and 4,000 sword knots. Each of the above tenders is divided into four lots and a deposit of 5,000 francs (£200) is required for each lot. Local representation is necessary. Date, June 16 (7 p.m.).

EGYPT.

Supply of Forage.—Tenders invited for supply of forage required for the police for one year commencing on July 1, 1912, and ending on June 30, 1913. Conditions from Personnel and Equipment Department (Nizam and Ghafir Office), Ministry of Interior, Cairo. Tenders (on the printed form provided for the purpose, with a covering letter on stamped paper of 30 milliemes) to be addressed to the Under-Secretary of State, Ministry of Interior, Cairo, enclosed in sealed envelopes, marked, "Tender for the supply of forage." Date, June 5 (noon).

Supply of Cyprus Cattle.—Tenders invited at the Central Administration, Department of Public Health, Cairo, for supply of animals (Cyprus cattle) necessary for the Serum Institute, Abbassia, according to conditions of contract. Information on application to the Director of Stores. Tenders (on stamped paper of 30 milliemes) to the Director-General, Department of Public Health, Cairo. Date, June 12 (noon).

Supply of Glass Globes, Candles, and Matting.—Tenders will be received at the Economat Central of the Ministry of Finance for the supply of glass globes for lamps, beeswax candles, and straw matting. Persons wishing to tender should apply to the Economat Central at the Ministry of Finance in order to consult the conditions and specification of the supply. Date, June 10 (noon).

Supply of Drugs and Materials.—Tenders invited by the War Office for supply of drugs and materials to the Medical Corps during the year 1913. Apply, Finance Secretary's office. Date, June 15 (11 a.m.).

Supply of Sacks.—Tenders will be received at the Department of Agriculture for the supply of a certain quantity of one-ardeb and half-ardeb cotton-seed sacks. Persons wishing to tender for these must quote rates per 20,000 sacks of each capacity delivered at Zagazig Railway Station before the end of October, 1912. The following are the particulars of the sacks required:—One-ardeb sacks, dimensions 30 ins. by 60 ins., weight 3¼ lbs.; and half ardeb sacks, dimensions 28 ins. by 43 ins., weight 2¼ lbs. All sacks must be stamped with the star and crescent in red. Sample sacks can be seen at the Central Office of the Department. Specimens of sacks offered must be deposited at the time the tender is submitted. Tenders must be submitted on stamped paper. They should be addressed to the Director-General, Department of Agriculture, Cairo, in a sealed envelope bearing the inscription: "Tender for cotton-seed sacks." Date, June 11 (10 a.m.).

Steel Marine Boiler.—Tenders will be received by the Director of Stores, Coast Guard Administration, Alexandria, for the supply of a cylindrical steel boiler for the cruiser "Sarea." Provisional deposit of 2 per cent. of value of offer. "Domicile" (legal) in Egypt necessary. Date, August 1 (noon).

MALTA.

Stoneware Pipes and Specials.—Sealed tenders will be received at the Office of the Receiver-General and Director of Contracts, Valletta, for the supply of stoneware pipes and specials. Tenders to be accompanied by deposit of £100. If the tenderer does not reside in Malta, his tender must contain the name of a person residing in the island, to whom power must be given to represent the tenderer. Copies of specification and form of tender may be obtained from the Crown Agents for the Colonies, Whitehall Gardens, S.W. Date, May 30 (11 a.m.).

BULGARIA.

Road Rollers.—Tenders are invited by the Bulgarian Ministry of Public Works for the supply of sixteen 8-ton road rollers. The estimated value of the contract is £5,800, and a deposit of £290 will be required with each tender. Tenders will be received at the Kreis-Finanz-Verwaltung, Sofia. Date, June 7.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria, May 17.

In spite of a certain hesitation, prices have generally risen, and speculation has become aggressive. The new crop is promising. The plants are vigorous and precocious. The appearance of the cotton-worm has been announced, but the rumour has not been confirmed. Doubtless they were spread by people speculating on a rise in prices. It is premature to speak of the acreage under cotton cultivation, but it would seem to be superior to that of last year. The exports of cotton seed are important, and prices continue to rise. Speculation is, however, unimportant.

LIVERPOOL REPORT.

Messrs. Reynolds and Gibson telegraph that steady markets are still the rule, and trade as a whole views with content the comparative quietness of the last few weeks. The looms and spindles are well employed on lucrative orders, and more attention is being paid to working these off than to seeking fresh business.

Cloth.—Salesmen only experience a slack demand, with here and there an extensive inquiry. Yarns.—Egyptian is distinctly the quieter of the two markets, but even in fine counts no weakness is in evidence. Egyptian cotton on spot has been in moderate demand. Inquiries still run on the finer growths, and Joanovich is one-eighth dearer, while Nubari is raised a farthing for good fair to good. Other descriptions are unchanged.

EGYPTIAN ARRIVALS.

The arrivals of Egyptian cotton at Manchester to date represent 210,000 bales, against 201,000 bales during the corresponding part of last season. The "Highland Prince" from Alexandria with 4,047 bales is now en route to Manchester. The "Trojan Prince" has arrived in the Canal this week with 6,259 bales of Egyptian cotton.

EGYPTIAN COTTON IN AMERICA.

Since 1906 the Bureau of Plant Industry of the Department of Agriculture at Washington has been experimenting in the cultivation of Egyptian cotton in the southern part of California and Arizona. Results have now been so satisfactory that the Bureau issued early in May a bulletin recommending the cultivation of the Egyptian staple on a large scale. It is estimated that if one-fifth of the available irrigated area of Southern California and Arizona is put under Egyptian cotton sufficient can be raised to meet the present requirements of American mills using this staple.

The likelihood that Egyptian cotton will be grown in Arizona and California, writes a correspondent in the *Manchester Guardian*, will have considerable effect on the recently revived agitation for import duties on cotton from Egypt and Peru. The National Association of Cotton Manufacturers at its Convention in Boston in April endorsed the movement for a duty on imported cotton, and if the American Association of Cotton Manufacturers—the southern organisation that has its headquarters at Charlotte, North Carolina—has not already come into the movement, it will lose little time in so doing, and it is almost certain that an attempt will be made to commit the Republican party to protection for American cotton growers against competition from Egypt and Peru.

Shipping Intelligence.

THE "TEXAS" DISASTER.

(From Our Own Correspondent.)

Smyrna, May 4.*

The "Texas" disaster is assuming a different aspect, and is likely to become a serious question between the American and Ottoman Governments. The Turkish local authorities persist in their statement that the "Texas" was a long distance behind the "Montana," which alone was in charge of the naval pilot boat, and that the captain disregarded all the warnings from both the pilot boat and the land batteries, resulting in his running his ship on a contact mine. Many of the survivors, however, including some of the crew, contradict this official version.

The American Consulate telegraphed to Aivali to have the depositions of the captain and passengers of the "Montana" taken, and, these having been received, it would appear that the "Montana" waited for the "Texas" to arrive from Smyrna. On its approach the two ships followed the pilot boat, the distance between the "Montana" and the "Texas" being the same as between the "Montana" and the pilot boat. The "Montana's" crew were consequently surprised at the land batteries firing, but, according to their statement, the "Texas" stopped on the third gun, which was loaded with ball. Signals were then made by the pilot boat and the "Texas," understanding these to mean her to continue, again went forward, but immediately afterwards the explosion took place and she sank in five minutes.

The "Montana" wished to go to the rescue, but was prevented by the pilot boat, which lowered some boats and rescued as many people as possible. The "Montana" also lowered a boat and picked up a few people.

It is stated that none of the dead bodies bears signs of a mine explosion, and that death resulted from drowning and not from the effects of a mine. The captain, too, who was on the bridge, which was lifted off its iron supports by the force of the explosion of the boilers below, bears injuries caused by his being thrown down.

Later.

The Result of the Disaster.

Mr. Fowle, dragoman of the American Embassy at Constantinople, and Commander Upham of the s.s. "Scorpion," the American guardship on the Bosphorus, have arrived here to open an inquiry to ascertain the cause of the sinking of the "Texas" on April 29.

Yesterday afternoon they proceeded to the scene of the disaster, in company with Hikmet Bey, Commodore of the Archipelago, and the captains of the French Messageries ship "Sinai," and the Ellerman Company's ship "Italian." As the actual position of the wreck could not be approached, owing to the naval authorities stating that the risk of being blown up by mines was too great, the visit of the experts was fruitless. In the meantime, the captain of the "Texas" is a prisoner in the Turkish hospital, and the real cause of the explosion remains unknown.

"DACRE CASTLE."

The "Dacre Castle," which stranded in the Gulf of Suez on May 17, left New York on April 21 for the Philippines. She is a vessel of 4,261 tons, built in 1908, and valued at £46,000. She is managed by J. Chambers and Co.

237C.J.S. * Delayed in transmission.

RUSSIAN SHIPPERS.

(From Our Own Correspondent.)

Odessa, May 19.

The Bourse Committees in Odessa, Nicolaieff, Kherson, Taganrog, and Novorossisk have formally laid before the Grain Importers' Associations in Berlin, Hamburg, Bremen, Duisburg, Rotterdam, and Marseilles a plea of force majeure on the part of the Black Sea and Azoff shippers who have been unable to fulfil all their April and May contracts.

From this it would appear that the Black Sea and Azoff grain shippers have abandoned their previous and foolish hopes of recovering their losses from the Ottoman Government. These aggrieved Russian merchants and traders estimate their total losses at £500,000, and they are disappointed that British shipowners, whose aggregate loss by the month's demurrage must also approximate to half a million sterling, have formulated no claim against Turkey. British shipowners probably know the futility of preferring such a claim to the Porte; and, furthermore, they know that in equity and international law no such demand would lie against the Ottoman Government.

The South Russian Press presumes that the Powers will now take some steps either for the neutralisation of the Dardanelles or for compelling Italy to respect the immunity of the straits so long as her war with Turkey continues.

COMMERCIAL REVIVAL.

(*From Our Own Correspondent.*)

Braila, May 18.

Some interest is already being shown in charter-sized steamers from Sulina, and several fixtures are reported at 14s. Berth sizes have secured 13s. 3d. to Antwerp, Hull, London, or Rotterdam, 6d. extra Hamburg.

From Braila and Galatz the demand is more likely to be for Mediterranean ports, as Italy and Marseilles are short of maize. Some spot business has been done for Venice at 18 frs., whilst cargo is being booked ahead for Marseilles for steamers now waiting outside the Dardanelles at 17 frs. to 17 frs. 50 c. There is little inclination to book ahead for either Antwerp or Rotterdam.

NEWS FROM ALL SOURCES.

The renewal of relations between Roumania and Greece, which took place about a year ago, has led to an order for Roumanian petroleum for the Greek Government's monopoly. The present order is experimental and further orders are conditional.

A special mission is expected in Cairo shortly from Abyssinia for the purpose of discussing the political and commercial relations between Egypt and the Sudan on the one hand, and the Ethiopian Kingdom on the other.

The director of the Assouan Reservoir has been charged with the execution of the scheme for the drainage of the Gharbieh province, and replaced in his former capacity by another engineer, the work of heightening the dam having been completed.

Mr. J. W. Williamson, of Cairo, was the successful tenderer to the Egyptian War Office in an adjudication held on May 1 for the supply of 360 tons of lentils.

The s.s. "Avon," for Gibraltar, Malta, Syra, Smyrna, and Constantinople, taking cargo to Odessa and Batoum, will close for cargo at Liverpool May 30.

Westcott and Laurance.

"Barcelona."—Left Liverpool for Antwerp, May 17. "Belgravian."—Left London for Alexandria, May 19. "City of Perth."—Left Gibraltar, home, May 19. "Eden Hall."—Left London for Odessa May 15. "Egyptian."—At Liverpool. "Favonian."—At Smyrna, April 29.—"Gulf of Suez."—At Alexandria, May 19. "Joshua Nicholson."—At Salonica, May 7. "Orchis."—At Galatz, April 21.

Papayanni Line.

"Alexandria."—At Alexandria, May 14. "Britannia."—At Liverpool. "City of Cambridge."—At Alexandria, May 8. "City of Khios."—Left Liverpool for Alexandria, May 13. "City of Oxford."—Left Swansea for Alexandria, May 17.

The s.s "Venetian," for Tangier, Algiers, Malta, and Alexandria, will close for cargo at Liverpool on June 6.

British India Steam Navigation.

"Aronda."—Left Greenock for Calcutta, May 19. "Barala."—Greenock for Calcutta. Left Suez April 5. "Berbera."—At Bombay, May 13. "Carpentaria."—At London. "Chanda."—London for Bombay. Passed Oitavos May 20. "Chyebassa."—At Middlesbrough. "Chupra."—At Bombay, May 10. "Colaba."—London for Calcutta. At Madras, May 20. "Culana."—Bombay for Antwerp. Left Port Said, May 19. "Golconda."—London for Calcutta. Left Port Said, May 16. "Jelunga."—At Middlesbrough. "Matiana."—Left London for Calcutta, May 18. "Mombassa."—Calcutta for London. Passed Ushant, May 20. "Rewa."—At Southampton. "Rohilla."—At Southampton.

The s.s. "Chyebassa," for Kurrachee, Bombay, and the Persian Gulf, will leave London on May 31.

P. & O. Steam Navigation.

"Arabia."—Left Bombay for London, May 18. "Assaye."—At Bombay, May 12. "Caledonia."—London for Bombay. Left Gibraltar, May 18. "Egypt."—Bombay for London. Left Gibraltar, May 21. "Mooltan."—London for Bombay. Left Marseilles, May 17. "Nyanza."—London for Calcutta. Left Aden, May 14. "Oriental."—Left Singapore for Bombay, May 17. "Persia."—At Bombay, May 17. "Plassy."—At Southampton. "Salsette."—Left Aden for Bombay, May 20. "Sardinia."—Calcutta for London. Left Colombo, May 10. "Socotra."—London for Calcutta. Passed Malta, May 20. "Somali."—At Southampton. "Soudan."—At Southampton. "Sunda."—At Calcutta, May 18.

The s.s. "Egypt," for Bombay and Karachi, will leave London on June 7 and Marseilles on June 14.

Strick Line.

"Afghanistan."—At London. "Armanistan."—Madras for London. Left Port Said May 20. "Avristan."—Barry for Muscat. Left Aden May 17. "Baluchistan."—Glasgow for Persian Gulf. Left Barry May 10. "Bardistan."—London for Bombay. Left Port Said May 11. "Boukadra."—Left Marseilles for La Goulette May 18. "Camerata."—Left Rotterdam for Naples May 14. "Djerissa."—Left Suez for Bushire May 10. "Gorjistan."—At Mackay April 19. "Luristan."—Bussorah for Oran. Left Port Said May 12. "Muristan."—At Hamburg May 20. "Nigaristan."—Left Calcutta for London May 17. "Tabaristan."—Marseilles for Bussorah. Left Port Said May 16. "Tangistan."—Left Port Sudan for Djibouti May 19. "Turkistan."—At Hull.

The s.s. "Afghanistan," for Port Sudan and the Persian Gulf, will close for cargo at Glasgow on May 30 and at Manchester on June 7.

Moss Line.

"Busiris."—At Barry. "Esneh."—At Smyrna April 20. "Karnak."—Liverpool for Pera. At Malta May 16. "Khephren."—Left Glasgow for Alexandria May 18. "Menepthah."—At Liverpool. "Menes."—Alexandria for Liverpool. Left Gibraltar May 18. "Meroe."—At Alexandria May 14. "Moeris."—Manchester for Alexandria. Passed Gibraltar May 13. "Seti."—At Liverpool. "Siptah."—At Alexandria May 3.

The s.s. "Esneh," for Gibraltar, Malta, Syra, Smyrna, Constantinople, Odessa, Samsoun, Trebizonde, Batoum, and Poti, will close for cargo at Liverpool on June 1.

Anchor Line.

"Algeria."—At Calcutta May 9. "Anchoria."— Liverpool for Calcutta. Passed Port Said May 16. "Assyria."—Calcutta for Genoa. Left Port Said May 19. "Bavaria."—Left Liverpool for Calcutta May 18. "Calabria."—Left Palermo for New York May 17. "Castalia."—Bombay for Liverpool. Passed Suez May 14. "Elysia."—Left Bombay for Marseilles May 17. "Italia."—Left New York for Naples May 18. "Massilia."—Liverpool for Bombay. Passed Perim May 14. "Media."—Left Calcutta for Genoa May 6. "Olympia."—Left Liverpool for Bombay May 17. "Perugia."—At Leghorn April 13. "Scindia."—Left Gibraltar for Liverpool May 20.

The s.s. "Circassia," for Bombay (via Gibraltar and Suez), will close for cargo at Birkenhead on May 25.

PASSENGER LIST.

Sailed from Marseilles per Messageries Maritimes s.s. "Congo," May 16, for Alexandria:—M. Pontal, M. Riordan, M. Constantacopoulos, M. and Mme. Meus, M. Lisbonne, Père Berlandier, M. Magguar, M. François Lenjeele, M. Vauseen, M. Dubois, M. Gustin, M. Lesage, M. and Mme. Maligne, M.M. Naggiar and Clementi, M. and Mme. Andreani, M. and Mme. Defassiane, M. Couroy, Pères Mercini and Riviere, M. Alfred Mayaud. For Port Said: MM. Chaiokin, Mrs. Lizzie Gibbons. For Beyrout:—Mr. Brunton, Mrs. Brunton, M. Guillot, M. Notton, M. and Mme. Derwiche Haddad, M. Maloff.

Passengers for Port Said per Bibby s.s. "Herefordshire," which left Liverpool, May 16, and Marseilles, May 24. From Liverpool: Mrs. J. A. Fisher, Miss McManus, the Hon. H. C. Vane. From Marseilles: Captain C. H. Jolliffe.

Passengers for Port Said per Ellerman's City Line s.s. "City of Paris," which left Liverpool, May 17: Miss Howarth, Mr. Gaston Girard.

SUEZ CANAL DUES.

The directors of the Suez Canal Company state that they have decided to reduce their tariff to shipowners, as from the commencement of next year, from frs. 6.75 to frs. 6.227 per ton.

Digitized by Google

Produce Markets.

LONDON, May 23.

The markets have been generally dull, and business is on a restricted scale at irregular prices. Sugar continues to decline. Coffee is firm. Currants are cheaper. Sultanas dearer. Seeds in moderate request. Oils are without material change. Petroleum is dull.

Sugar.

Refined sugar has further declined 6d. to 1s. 3d. per cwt., and old crop beet 1s. to 1s. 1d. The market is in a dull state. Hamburg advices have had a depressing influence, heavy realisations being reported. Rains have fallen on the Continent and the weather is favourable for the roots and their development. In Cuba also the outlook has been favourable, and all these conduce to the weakness in prices.

Beet Sugar :—Closing rates of German 88 per cent. are :—May, 11s. 11d.; June, 12s.; July, 12s. 2d.; August, 12s. 2½d.; September, 11s. 9d.; October-December, 10s. 7½d., f.o.b., Hamburg.

Refined Sugar :—English in slow demand at 6d. to 9d. per cwt. decline. Tate's No. 1 cubes, spot, 22s. 6d.; June-August, 22s. 6d. No. 2, 22s. Foreign: May, 20s. 4½d.; December-January, 17s. 10½d., f.o.b., Paris. Dutch prompt, 18s.; May, 18s. 1½d., f.o.b., Amsterdam. German and Austrian cubes, prompt, 18s. 1½d.; November-December, 15s. 5½d., f.o.b., Hamburg.

Coffee.

All descriptions maintained their previous positions as regards value, but there is a decided falling off in the quantity of Costa Rica, which is quoted, ordinary to good mid, 78s. to 87s. East Indian, small to mid, 76s. to 82s. Mexican, 76s. to 88s. Brazil, 68s. to 86s.

Currants.

Provincial kinds are a little easier, but better grades are firm, with a fair business doing. ¼ cases Pyrgos are quoted at 26s. 6d. to 27s.; Gulf and Patras, 29s. to 30s. There is a fair demand for Vostizza at 31s. to 32s., with choice at 35s.

Sultanas.

On account of the bad news of the growing crop the market is dearer. Fair coloury, Smyrna fruit at 50s. to 55s., also fair darkish, from 42s. to 45s. Samarkand are also higher in value, large bags quoted 44s. to 45s., with business done in small bags at 46s. Greeks are firm at 60s. to 62s.

Figs.

Bag Naturals continue in steady demand at unchanged prices.

Seeds.

Canary seed is firm, but in moderate request, Turkish being quoted 52s. to 54s. per pr. Linseed has advanced, but market closes quiet: Russian, 72s. to 74s. per qr.; Dutch, 72s. to 76s. Beans, colonial and foreign, 33s. to 41s. per 480 to 504 lbs. Lentils Split, 11s. to 13s. per 100 lbs.

Oils.

Linseed oil :—Prices are higher on the week, but the market is quieter. Spot pipes, waterside £42, landed £42 5s.; barrels, waterside, £42 15s., landed £43; June, £40 2s. 6d. to £40 5s.; July-August, £38 15s. Cotton oil is firmly held, but business is restricted at prices reported last week. Olive oil is in limited request; Spanish, £44; Levant, £42.

Oil Cakes.

Linseed, London made, £9 2s. 6d. to £9 5s. per ton; Russian, £9 to £9 2s. 6d.; Cotton, London made, £5 17s. 6d. to £6; Soya, London made, £7 to £7 5s.

Various.

Onions :—At present the supply is very short and merchants are asking 7s. per bag ex the steamer now due with Egyptian. Roumanian eggs, 6s. 3d. to 7s. per 120; Russian, 6s. 3d. to 7s. 6d.; Egyptians are not offering this week.

NEAR EAST MARKETS.

(FROM OUR OWN CORRESPONDENTS.)

Nicosia. May 10.

I have just learned from a reliable source that heavy orders have been received here from merchants in Italy for Cyprus wheat and barley.

Braila. May 18.

We have again had general and abundant rains this week, so that the wheat crop is almost assured. Barley and maize are reported to be backward, but more rain and warm weather will set things right.

Beyrout. May 13.

The wool clip is just beginning in the north, and is in full swing in the south. The quality is good, but prices are 10 to 20 per cent. dearer than last season.

Alexandria. May 17.

The Egyptian onion crop constitutes a record, both as regards quantity and quality. The yield is over 2 million sacks, and prices are favourable.

The exports have never been so important, thanks being mainly due to the closing of the Dardanelles.

The wheat crop is likewise important, and the quality excellent.

Special Weekly Reports.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Constantinople. May 11.

The closing of the Dardanelles has created an impression on the market, and has made all transactions difficult to be realised. The lack of merchandise, credit, and confidence has produced a state of general stagnation.

Until the Dardanelles are reopened there will be no important transactions in mohairs and opium.

Adrianople. May 12.

The stagnation of the market becomes more and more pronounced, and merchants more and more reserved. The dead season is on, and political events help to render the situation worse.

Basrah. April 22.

We learn that a local firm has signed a contract with the London market for the sale of 3,000 tons of wheat at 40s.

Three thousand five hundred to four thousand tons were loaded during the past week for London.

Beyrout. May 13.

During the past week trade in British cloths have been satisfactory. As regards other articles, a complete calm has been reigning.

There is practically no export or import trade, merchants refusing to place orders even for the most current articles. It is calculated that the rate of decrease in Customs dues during the past week is about 50 or 55 per cent.

Prices of cereals have dropped slightly, the quintal of interest being quoted at P.B. 325.55. Barley is maintained at a high price, however, owing to a shortage in stock.

Heavy downpours of rain have damaged the crops on the coast, but exact details are as yet not to hand.

Jaffa. May 13.

The new orange crop promises well; 1,129 boxes were shipped during the week to Egypt.

The prices of commodities are unchanged, with a tendency to rise in the case of wheat, sesame, and durra. Flour has been imported from Marseilles (500 sacks) and Bulgaria (200 sacks). Imports of oil are weak.

Damascus. May 11.

There is no movement in the imports of Manchester goods, the situation having been aggravated by the recent fire.

COMMERCIAL NOTES.

Metals. LONDON, May 23.

Copper is £2 10s. dearer than last week, while tin is £4 cheaper. There is nothing new, however, in the situation, which is highly speculative, but for the present seems well in hand. Silver is ⅛ dearer.

Sugar.

Old crop is about 2d. cheaper than last week, and new crop about 4d. lower, for the reason we gave in our last report. Stocks in Europe are 423,000 tons less than last year, and world's supplies are 321,000 tons shorter than they were then. The future will depend on the weather for the growing crops, which up to the present are doing well.

Cereals.

The position is about the same as last week, and weather is quite favourable.

Opium.

News from Turkish growing districts still speak favourably of the new crop, and collection in some of the early districts is now near at hand. Buyers are content to look on and await development; for, if anything like an average yield of Turkey drug is forthcoming, prices must go back to their normal level. Sales are now quite of a retail character. Persian on spot is ample, and whilst the fine will find its level in time, there is a large quantity of low quality and poor test which is no use for this market, and has little chance of being sold here.

Cotton Seed.

Cotton seed is quiet, but linseed and rape seed are firm and dearer, and their oils much dearer.

CROP NEWS.

Oil.

H.M. Consul at Corfu, Mr. S. Raymond, reports (May 9) that very little olive oil is expected to be made in the district, as the trees only bear fruit every other year; a large quantity of last year's fruit is still on the trees. The weather, up to the time of writing, has been favourable. The present price of olive oil is 58 to 82 drachmae per barrel of 16 gallons, according to quality: it is impossible to say if these prices will be maintained. There is a large quantity of oil in the island for sale.

Tobacco.

H.M. Consul at Adrianople, Major L. L. R. Samson, reports (May 6), that since May 4, the tobacco market has become active, a large quantities of the weed having been bought from growers. In view of the proportion of superior tobacco which these consignments are expected to yield, prices are ruling higher than those of last year.

It is as yet early to form an opinion as to the extent of planting for the current year. It is, however, probable that it will be less than last year owing to the unfavourable weather conditions which have prevailed hitherto, and to the scarcity and high cost of labour.

OPIUM MARKET.

Barker Brothers, Smyrna, for the week ending May 10 :—The week has been again very quiet, only one basket of New Yerli talequale changing hands at 18s. per lb. c.i.f. An American buyer offered about 15s. 6d. for new 10½ per cent. Carahissar talequale, but without result, and it is a question whether 18s. would tempt sellers. The weather has turned abnormally cold, a most unusual thing at this season, which will further retard the harvesting of the crop. The arrivals to date amount to 1,175 cases against 4,524 at the corresponding period last year.

MANCHESTER GOODS IN EGYPT.

There is little to be said about our local market, says the *Journal* of the British Chamber of Commerce of Egypt. Though the demand is small and weak, as it usually is at this time of the year, yet, owing to the fact that there is not an overabundance of supply, not much difficulty is met with in advancing prices in sympathy with Home rates.

The imports during March were valued at £E294,000, as against £E341,000 in 1911. There was a decrease both as regards goods classified by weight and those classified by length.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912).

SETTLING DAYS.

CONSOLS.
Monday, June 3.

STOCKS AND SHARES.

In Mining Shares the next carry-over is May 28.

Continuation Days.	Ticket Days.	Pay Days.
Wed., May 29.	Thurs., May 30.	Fri., May 31.
Wed., June 12.	Thurs., June 13.	Fri., June 14.

The Stock Exchange is in the dumps. Brokers are everywhere advising their clients to unload. Every market suffers from liquidation. It will take some weeks for the House to recover its tone. It is certainly not the moment to buy anything. Money remains plentiful, 3 months' bills having been done at 2⅞.

Foreign Market.

The Foreign market, without being weak, has suffered from the general depression that exists throughout the Stock Exchange. Bulgarians, however, are the turn harder, and buyers have to pay 90¼. Nothing has been settled in the Chinese question. The longer this thing hangs over the market, the more serious will it become. An agitation is being got up in China in order to strengthen the hands of the negotiators, but the agitators may go too far, and overdo their enthusiasm. Egyptian Unified at 100¼ are firm, and German Threes dropped a point on Wednesday, and no one seems to have discovered the reason. A Danish loan has been offered by Messrs. Hambro. Greek Fours show no change on the week. Hungarian rentes, in spite of the weakness in German Threes, are a shade better. Italians have not moved. There is very little business here. Peras look dull, and the Prefs shed fractions without any genuine business occurring. Turkish Unified are unchanged.

Home Railways.

The Home Railway market, like all other markets, has been flat; and the bull account in Metropolitans is being liquidated without any regard to the feelings of the unfortunate punter. The Great Central issues have now lost all interest. The '91 Prefs are quoted at 70, and the '94's are no better than 60. It is not the moment to buy Home Rails.

Yankees are upset at the Roosevelt successes. But Amalgamated keep good, and Anaconda have also been bought. Copper shares appear the only things to go for in this market. The boom in Canadian Pacifics has boiled over. Leopoldina continue weak.

Rubber and Oils.

Rubber shares are hardly mentioned, but in spite of the fact that Urals have had a heavy slump there seems every inclination to go on gambling in oils. Those of our readers who have accounts open should, however, close them, as they will be able to buy back cheaper later on. The tips of this market are Anglo-Hungarian, which are said to have obtained the support of the Burma group, and Roumanian Consolidated, who appear to have brought in two new wells.

The Egyptian Market.

The Egyptian market remains without any feature. Business has completely died away. But clever people who have just returned from Cairo report that the tone there is good, and that the whole position is clearing up rapidly. Aboukirs are quoted 1 9-16. Agricultural Banks are a shade better at 6¼. Beheras, however, do not recover, and there are evidently a few shares still to be sold. Delta Lands have improved to 16s. Abdy's have not been mentioned, and the price shows no change. Markets are firm at 26s. Salt and Sodas have improved 3d. on the make-up price. National Banks are practically the same price as they were a week ago. Sidi Salems and Union Fonçiere both show no change. The meeting of the Mortgage Company of Egypt went off well. The chairman's speech pleased the market.

Cairo Electric Railways.

The report of the Cairo Electric Railways and Heliopolis Oases Company has now been issued. The balance sheet shows an increase in the capital from 30 to 50 million francs, due to the fusion of the company with the Société Française d'Entreprises en Egypte. The revenue of the company has reached 2,936,757 francs, and, after writing off ample depreciation, the company shows a credit balance of 571,888 francs. The directors state that if the company continues to progress, the shareholders may hope to receive their first dividend in the forthcoming year, for the results of 1911 are far better than those of previous years. For example, the receipts of the railway and electric trams are up 338,193 francs. There is a constant demand for the land of the company. There are now 938 buildings erected, and independent of the buildings belonging to the company, the number of private building schemes in increasing. Heliopolis will one day become a very important town. A mosque has been opened since last year. A Catholic cathedral, the building of which is due to private enterprise, is being proceeded with. There are five schools, at which 300 students attend. On the side of sport, racing is looked after by the Heliopolis Racing Club. Polo, cricket, tennis are all provided for, and a golf course has been opened. The Luna Park attracted great crowds during the summer season, and the hotels appear to have been crowded. The report points out that the water service is perfect. The Cairo Electric Railways and Heliopolis is doing great work in Egypt, and it is very satisfactory to find that the efforts of the directors are meeting with the success they so thoroughly deserve.

FINANCE ITEMS.

Last week witnessed in Brussels a lively demand for and a corresponding rise in the value of Cairo Electric Railways and Heliopolis Oases shares.

Reuter states that at a board meeting of the Suez Canal Company, held in Paris on Monday, it was decided to propose to the general meeting of shareholders, which is to be held on June 3, to fix the distribution of the revenue of 1911 as follows:—Per capital share, gross 179,559 frs., net 165 frs.; per action de jouissance, gross 154,559 frs., net 141,869 frs.; per Founders' share, gross 87,075 frs., net 80,707 frs.

The traffic receipts of the Smyrna-Aidin Railway for the week ended May 4, 1912, amounted to P683,404.20, against P599,053.10 during the corresponding period of 1911.

Messrs. N. M. Rothschild and Sons publish the numbers of Egyptian State Domain Mortgage Bonds to the amount of £159,240 nominal capital, which have been drawn for payment at par on the 1st prox. The drawing consists of all the bonds, not previously cancelled by the sinking fund, contained in the series of numbers advertised.

The receipts of Chemins de fer Orientaux during the week ending May 5 were 478,921.77 frs., as against 335,026.79 frs. for the preceding week, or an increase of 143,894.98 frs.

The value of Greece's imports during 1911 is given as 173,487,441 drachmae, and her exports as 140,902,651 drachmae. The total exceeds that of the previous year by 9,282,551 drachmae.

A Lloyd's telegram from Achar, Basrah, states that owing to a fire at the offices of the agents of the Hamburg-America Line, all the Baghdad through cargo was totally destroyed. The loss is estimated at £4,000.

COMPANY MEETINGS.

Société Impérials Ottomane du Chemin de fer de Baghdad.—June 12, 1912, at 12 noon, at the offices of the Deutsche Bank, Berlin.

Société du Chemin de Fer Ottomane Salonique-Monastir. — June 12, 1912, at 3.30 p.m., at the offices of the Deutsche Bank, Berlin.

Société du Chemin der Fer Ottomane d'Anatolie.—June 12, 1912, at 11 a.m., at the offices of the Deutsche Bank, Berlin.

Société du Pont d'Haidar-Pasha.—June 12, 1912, at 4 p.m., at the offices of the Deutsche Bank, Berlin.

Compagnie Générale d'Omnibus et d'Autobus de Constantinople.—June 12, 1912, at 3 p.m., at the offices of the company, at Constantinople.

The Gharbieh Land Company.—Cairo, May 30, at 11 a.m.

Land and Mortgage Company of Egypt.—To-day, at the Cannon Street Station Hotel, at 12 noon.

ALEXANDRIA NOTES.

[From Our Own Correspondent.]

Alexandria, May 17.

Last week was the worst in this market since the Zervudachi failure. Prices have come down with a run, and there is nothing doing. The proximity of the summer season is not calculated to improve matters. The Tilche failure and the restriction of credit introduced by the banks on account of the Turco-Italian war, are the principal causes of the depression.

The Tilche Failure.

I learn that Messrs. Tilche and Sons are likely to come to an arrangement with their creditors, who will receive ten shillings in the pound. All depends on the approval of the Crédit Franco-Egyptien, which is one of the principal creditors.

On the other hand, imports are passing through a critical moment, owing to the numerous failures of small traders. As I have already stated these failures are due to long credits accorded by Continental manufacturers to insolvent people. The remedy is simple, namely, to sell against cash only, the credit system being accompanied by grave risks.

New Companies.

In spite of the many failures, the country's activity does not slow down. Two new brokerage companies have been formed on the Cotton Exchange, namely, Messrs. M. G. Vitiadis and Co., with a capital of £E17,500, and Messrs. Alexandre J. Sinadino and Co., with a capital of £E15,000.

Other new companies are the Société Maussa Sercussi fils, with a capital of £E23,110, the object of which is cotton-ginning and commerce, and Messrs. Donek, Masseri and Son with a capital of £3,000, who are engaged in the cloth trade.

North Egypt Land Co.

The Hamam Domains (Mariut), of 10,560 feddans, will be up for sale towards the latter part of the month. Mr. Baker, the liquidator, and Mr. Lyon, representing the creditors, have entered an action against the sale.

French Land Co.

A French company is negotiating the acquisition of vast domains in Egypt. It is said that the property of Messrs. Cattaui é figli in the Gharbieh, consisting of 1,500 feddans, will be purchased for £E35,000.

Union Fonciere.

The general meeting of the above company, held here the day before yesterday, offered the balance-sheet. The profits of the last year have been devoted to the amortisation of various sums. The company sold last year 577 feddans at the average price of £E72, whereas the average yield is about £E63.

Land Bank of Egypt.

The balance-sheet for the past year is an improvement. The net profits amount to £101,393, allowing of a dividend of 8 per cent. The arrears of previous years are, however, considerable.

DELTA RAILWAY EXTENSION.

With reference to our Alexandria correspondent's announcement in last week's issue of The Near East, it transpires that, in order to facilitate the transport of material for Lord Kitchener's Delta draimage scheme, the Delta Light Railways have been commissioned to extend their line from Bielah, in the Mudirieh of Gharbieh, in a north-easterly direction, past Abou Badawi, on the Bahr Tireh, and Kafr el Sharki to Salahib, and from thence to Khassa, where a powerful pumping station is to be erected. The line will then be extended to the village of Baltim, on the western shores of Lake Borollos, 50 miles from Bielah. No time is being lost in constructing the line, the route to be followed having already been surveyed, and material having been collected or cabled for from England.

The Merkaz of Borollos, which the new line will serve, comprises an area of some 40,000 feddans, and has a population of over 20,000. Apart from the great convenience it will be to the drainage scheme, the line will serve to develop this district and encourage and facilitate the growth of a large fish, vegetable, and date traffic.

Company Notes and Reports.

Mortgage Company of Egypt.

The fourth ordinary general meeting of shareholders in this company was held yesterday at the Cannon Street Hotel, E.C., the Right Hon. Viscount Milner, G.C.B., G.C.M.G. (chairman of the company), presiding.

In moving the adoption of the report, the Chairman referred to the new items in the balance-sheet. "One of these is 'Freehold Premises in Cairo.' Up to last year the business of the company in Cairo was carried on in hired premises, but in the course of 1911 an opportunity presented itself of acquiring a large and very well built house which occupies a conspicuous position in the very centre of the business quarter of Cairo. We have been in occupation now for some months, and from what I saw of these premises during my recent visit to Cairo, I may say, that in addition to the greater comfort of being in our own freehold instead of a hired house, I think we have got in the property itself a most excellent bargain.

"The second new item in the balance-sheet is that of 'Property acquired through expropriation,' which stands at £1,174. The particular property in question has since been sold at a small profit to the company, but I expect that this item will reappear in most, if not all, of our future balance-sheets.

"There is only one other item in the balance-sheet, to which I ought perhaps to refer: it is the item 'Sundry Debtors and Debit Balances,' which stands at £81,962. This is not a new item, but the amount may appear somewhat large. That is accounted for by the fact that it includes arrears, which, with our increased business, are likely always to be fairly considerable at the time when our balance-sheet is made up, that is March 31.

"Turning from these matters of detail to the general position of our affairs, it is pleasant to be able to point out that the financial year 1911-12 shows a further improvement. The net amount which we now have invested on first mortgages in Egypt has increased during the past twelve months by over half a million. That is not as great an increase as in the preceding year, when we added about £900,000 to our capital invested in Egypt, but it is neither probable, nor desirable, that our investments should continue to grow quite as rapidly as they did at first starting. Even at this slackened pace they are growing considerably, as is shown by the fact that we have had to have recourse during the year to a further debenture issue, so that our 4½ per cent. debentures (which are a first charge on all the property mortgaged to the company as well as on its uncalled share capital) now stand at £1,750,000.

"With this increase in the amount invested by us, our profits have also increased. Although we have had to meet a considerably heavier charge in respect of our debentures, the sum available for distribution at the close of the year, after interest on the debentures and on the preference shares has been provided for, is £34,000, as compared with £27,000 a year ago.

"We are thus enabled to pay a dividend of 7 per cent. as against 6 per cent. last year, and at the same time to add a considerably increased sum to reserve. Last year the sum so set aside was £8,000; this year we propose to make it £12,000—a 50 per cent. increase.

"I think everybody must admit that the steady progress which the company has shown during the three years of its existence is very encouraging. What makes the results all the more satisfactory is that they have been achieved without our having any good luck. During the whole of the company's existence the business world of Egypt has been in a state of great depression—recovering, no doubt, but recovering very slowly and painfully, from the crisis of 1907. Failures like those of last autumn necessarily help to keep up the distrust, which the European, and especially the British investor, continues to exhibit in all Egyptian business.

"The most hopeful thing in the Egyptian outlook to-day is the fact that the situation in both these essential points has been enormously improved by the advent of Lord Kitchener. That Lord Kitchener's reappearance in Egypt would have a good effect on the political situation was the general hope, and a hope which has certainly not been disappointed. What was perhaps less generally expected was that he would devote special attention to public works, and in particular that he would lay his finger at once upon the particular spot where energetic action was most urgent. He had not been six months in Egypt before a great project of agricultural drainage in the Delta—in the preparation of which he had been aided by the advice of one of your directors, Sir W. Garstin, and of another great expert, Mr. Webb—had actually been begun. You may feel very sure that it will be carried out with the greatest energy. And no man who knows anything about the agricultural conditions of Egypt can doubt that this is a step of the greatest importance. And so, while I am very far from wishing to encourage any premature or exaggerated hopes, I may say with confidence that the future looks to me much brighter than it has done at any time since the foundation of this company.

Oilfields Finance Corporation.

A general meeting of the holders of ordinary shares in the above-named company was held on Tuesday at River Plate House, Finsbury Circus, for the purpose of considering and, if thought fit, passing extraordinary resolutions approving of an agreement made between the company and the General Oil and Finance Corporation, Limited, for the sale of the property, assets, and undertakings of both to a new company to be registered under the name of "The Oilfields Corporation ,Limited," or other suitable name. Mr. Richard Barnett presided.

The Chairman said that recently they had arranged two important combinations of capital. The first was the Roumanian Combine, embracing five concerns, including two subsidiaries of the corporation. The new Roumanian Consolidated Oldfields, Limited, commenced its career with a unique selection of proved oil lands. The prospects of the new company were brilliant, and a cablegram had just been received to the effect that oil had been struck in one of the new wells, while two other wells of the combine in the same locality would probably be brought into production during the next few days.

The second, or present, amalgamation scheme was of a different character. The General Oil and Finance Corporation, Limited, formed in April, 1910, had, owing to various causes, not achieved so large a measure of success as the Oilfields Finance Corporation. Without doubt many of its investments were of great inherent value, but it had overtraded, and to some extent lost the confidence of the Stock Exchange and the investing public. The directors of the Oilfields Finance Corporation had been considering the potentialities of the Taman Peninsula and the group of oilfields north-east of the Black Sea known variously as Tchengelek, Kertch, and Anapa, and the fact that the General Oil and Finance Corporation possessed important interests in that region mainly influenced him and his colleagues in recommending the alliance. The proposed new company would have a capital of £600,000 in £1 shares. Having regard to the large increase in the capital value of the assets of the Oilfields Finance Corporation, its ordinary shareholders would receive one £1 share, 12s. paid, for each £1 share, 5s. paid, now held, while the deferred shareholders would receive a fully-paid £1 share for every two deferred shares. The shareholders of the General Oil and Finance Corporation would receive three £1 shares, 13s. 4d. paid, in exchange for every four £1 shares, 15s. paid, they held. The ordinary shareholders of the Oilfields Finance Corporation would pay 1s. 4d. per share when they claimed their shares in the new company, and the remaining 6s. 8d. per share would be called up in two equal calls in the near future. The new company would thus have an issued capital of £375,000 in fully-paid shares, of which over £180,000 would be cash working capital; 225,000 shares would be available for future issue, and the subscription of 50,000 of them was guaranteed. The scheme was equitable to the shareholders of both companies. While the work of the past three months had been largely of a preliminary character, the realised profits of the Oilfields Finance Corporation were sufficient to justify the payment of the usual interim dividend on the ordinary shares at the rate of 10 per cent. per annum for the period from January 1 to May 6, the date from which the amalgamation would take effect. He moved the adoption of the resolutions approving the agreement.

The resolutions, being seconded, were unanimously adopted without discussion; and they were assented to also at a separate meeting of the deferred shareholders and at a joint meeting of shareholders of both classes.

Bank of Egypt.

The report on the liquidation of the Bank of Egypt has been issued to the creditors and shareholders by Mr. H. Brougham, Senior Official Receiver and Liquidator, and Sir William Plender, special manager. They regret to say that up to the present they have found it impossible to come to terms for the formation of a realisation company to take over the assets and relieve the shareholders from the uncalled liability on their shares, but negotiations are still proceeding in Egypt and Paris with this object. Under the order of the Court it now becomes necessary to proceed with the collection of the first instalment of £4 3s. 4d. of the call on the shares. The value attached to the Egyptian assets by the directors, £1,850,000, was assessed on the basis of the bank being a "going concern." There can be little doubt that the estimate of the directors will fall very far short of fulfilment. The total collections effected in Egypt, including cash balances in that country at the date of suspension, amount to £447,253. The Cairo and Port Said premises have been sold, and negotiations are in progress for the sale of other properties of the bank, and the Port Said branch and several of the agencies have been closed.

It is hoped that the first instalment of the call now being collected, and the further instalments if they have to be paid, will eventually be returned to the shareholders, but it is impossible at present to express definite views on the subject owing to the difficulty of forming a reliable opinion regarding the value of the outstanding assets, or of the income which may be expected to be derived therefrom, pending collection. If the negotiations now proceeding in Egypt and Paris result in a satisfactory issue, or if other arrangements can be made which would warrant them, such steps as may be necessary to obviate the necessity for collecting any further instalments of the call will at once be taken.

Land and Mortgage Company of Egypt.

The report of the Land and Mortgage Company of Egypt, Limited, for the year to March 31 last, to be presented at the meeting, to be held to-day, states that the gross earnings for the past year amount to £39,858, as against £42,304 for the preceding year, and the net earnings to £13,398, as against £14,749. To the net earnings for the year must be added £1,778 balance from last year, and £1,056 interest accrued to March 31, 1911, or a total of £16,233. Deducting the amount of the interim dividend paid on November 11, 1911, namely, £7,500, leaves a balance to credit of profit and loss of £8,733. Out of this available balance the directors recommend that a dividend of 5 per cent. for the past six months be declared, or a dividend of 10 per cent. for the whole year, leaving the sum of £1,233 to be carried forward.

DIVIDEND ANNOUNCEMENTS.

Chemin de fer de Dumas-Humah.—On and after June 1 Coupon No. 22, 9.25 frs. per share.

Compagnie frigorifique d'Egypte.—Proposed dividend PT24 per share.

Eaux du Caire.—Proposed dividend per capital share, 5 frs.; for "jouissance" share, 10 frs.; per founders share, 68.45 frs.

Tramways et éclairage de la ville de Belgrade.—June 1, Coupon No. 3, 10 frs. per preference share; Coupon No. 18, 1 fr., per ordinary share, and Coupon No. 7, 10 frs. per 4 per cent. Deb.

NOTES OF THE WEEK.

Reference to the situation in Albania can be couched in a more hopeful tone than seemed to be justified last week. The danger of a general insurrection, it is true, was apparently even then no longer imminent, but the extent of the Porte's preparations for dealing with the disturbances augured ill for the Albanians and the immediate future of European Turkey. In the interval, however, there have been indications that wiser counsels are to be allowed to prevail. There is to be no repetition, it is said, of the ruthless methods of suppression adopted by Djavid and Torgut Shevket Pashas, while the whole attitude of the Turkish Government towards Albania and Macedonia is to undergo a change. As an earnest of the latter, it is announced that an armistice has been agreed upon, and that the Porte will enter into negotiations with the insurgent Albanians. If these reports are confirmed by subsequent events, credit for the new policy will rest with Hadji Adil Bey, Turkish Minister of the Interior, and Hussein Kiazim Bey, Vali of Salonika. The former represents the moderate wing of the Cabinet, and his position has been strengthened by the authority with which he now speaks on the conditions in Macedonia and Albania after his recent tour through these provinces. He is understood not to attach much importance to the existing unrest, which he regards as only an aggravation of the chronic Albanian lawlessness, and at the same time he deprecates the employment of troops for other than defensive purposes—that is to say, to secure the maintenance of order necessary to enable the Government to carry out the works to which it is pledged. Hussein Kiazim Bey, it will be remembered, suddenly resigned his post as Vali shortly after his appointment by way of protest against the nomination of Halil Bey to the Presidency of the Turkish Chamber. For the moment he has been induced to withdraw his resignation, but he is proving himself a formidable critic of the extremist section of the Committee of Union and Progress. In regard to Albania, he is credited with a desire to see a complete renunciation of all the pretensions put forward by the Young Turks that have led to a policy of "Ottomanisation." He would favour rather a programme of peaceful penetration, which, while giving full play to Albanian traditions and susceptibilities, would gradually extend to the country the advantages of civilisation as it developed the capacity of appreciating the attendant responsibilities. In that portion of Macedonia that falls under his jurisdiction the Vali of Salonika has given proof of his impartiality and sense of justice by insisting on the punishment and removal of gendarmerie officers who by their excesses in dealing with the Bulgarian bands have done much to inflame the feelings of the people, and have thus kept alive the revolutionary organisations. The precepts of Hadji Adil Bey and the example set by Hussein Kiazim Bey stand out as the most gratifying features of the recent history of Macedonia and Albania.

The reply of the Turkish Government to the Italian occupation of the islands of the southern Ægean has been the expulsion of Italian subjects from Turkey. Although the provocation was great, the Porte's best friends will be the first to admit that this method of retaliation is no more to be commended than the step that gave rise to it. Italy can hope for some ultimate advantage from the possession of Turkish territory, however relatively unimportant; the Porte, on the other hand stoops to the merest pinprick, which can confer no possible benefit on Turkey, but may even prove injurious to her immediate interests. As each combatant would welcome European intervention on his own behalf to the prejudice of the enemy, it would seem the natural policy for both to avoid any line of action calculated to place them in the wrong in the estimation of the Powers, unless compensating advantages could be adduced. Not only does the Porte ignore this aspect of the situation, but it shuts its eyes to the fact that the wholesale expulsion of Italians from Turkey may possibly be utilised by Italian diplomacy for its own ends. Meanwhile the suggestion for a congress of the Powers remains where we left it last week. However desirable such a conference may be in theory, it is clear that the psychological moment for summoning it, or for taking merely the preliminary steps towards it, will not have arrived until the Turco-Italian War has advanced a definite stage beyond the point where the abortive efforts at mediation two months ago found it. There could never have been any ground for supposing that a congress could be summoned while the war was actually in progress.

For the moment interest in the proposed congress of the Powers is lost in the attention that is being given on all sides to the less formal conference that is now taking place at Malta. This island has been chosen as a common meeting ground for the Prime Minister and the

Digitized by Google

First Lord of the Admiralty, on the one hand, and Lord Kitchener, as British Agent in Egypt, on the other. Although the precise nature of the Malta discussions is a matter for speculation, it is not difficult to sum up the main features of the new situation with which British diplomacy is now confronted. In the first place, as has already been stated in these columns, the indeterminate result of Italian action on the north coast of Africa threatens to introduce among the Arab population an attitude towards Europeans in general that may react prejudicially on the peace of Egypt. In the second place, the Italian occupation of the islands of the southern Ægean opens up the possibility of a modification of the political equilibrium in the Mediterranean Sea. We are not concerned here with the suggested alteration in the nature of the understanding that binds Great Britain and France together, and at present there is no need to discuss the strategy that governs the dispositions of the British fleet. Attention has, however, already been called to the inadequate strength of the British Army of Occupation in Egypt in comparison with the potential demands upon it, and we may feel confident that this point is not likely to be overlooked in any discussion of the situation in the Mediterranean in which Lord Kitchener takes part.

The Greek Chamber assembles to-morrow, and at the last moment the Cretan deputies in Athens, to the number of forty-one, have announced their intention not to attempt to attend its sittings. M. Lyonakis, a member of the Cretan executive, who recently paid a visit to Athens, is credited with having given a promise to the Greek Prime Minister that, if the Chamber refused to admit the deputies, they would return at once to Crete. There can, however, be no doubt that the deputies have been well advised to bow in advance to the decision of the Greek Government. Instead of seeking to complicate the situation still further they have contented themselves with a dignified statement of their case, addressed to the Legations of the six Great Powers. After reciting the recent history of Crete and the attitude of the Powers towards the island, the memorandum concludes by expressing the hope that the Powers which have hitherto encouraged the aspirations of the Cretans will now sanction their realisation. The doctrine of the integrity of Turkey, it is pointed out, already infringed in the case of Tripoli, can no longer be advanced in opposition to the Cretan claim. The postponement of the opening day of the Assembly has undoubtedly served to cool enthusiasm both in Crete and Greece; and it is unfortunate that both the Powers and the Cretans have proceeded to such lengths that a desire to "save face" may interfere with a rational adjustment of the situation. As things are, the former have vindicated their authority by detaining the Cretan deputies whose send-off from Canea was of so provocative a nature. The Cretans, in turn, having satisfied themselves that nothing is to be gained from the presence of the deputies in Athens, must be anxious to put themselves right again with the Powers. What seems to be required by the parties to the dispute is the appearance on the scene of an intermediary acceptable to both. The Powers could announce that the withdrawal of the deputies from Greece indicates a return to a proper spirit on the part of the Cretans, and that the Consuls in Canea are ready to discuss with the temporary Government of the island the terms of a provisional settlement. The Cretans, on their side, would have to announce their acquiescence in the *status quo* so long as the Turco-Italian War lasts. One point must not be lost sight of—that the Cretans cannot be expected to abandon all their aspirations without any attempt on the part of the Powers to meet them half-way. It has been shown to them conclusively that the hour of Turkey's embarrassment is not to be their opportunity for realising their ambitions. Nevertheless, as they point out in the deputies' memorandum, they can claim the promises of the Powers for special consideration, and the moment for redeeming that undertaking cannot be postponed for ever.

The outbreak of disturbances between Greeks and Turks in Cyprus, which has led to the strengthening of the garrison by the despatch of troops from Egypt, calls attention to the political unrest that has been a feature of the island for some time past. A fuller discussion of the situation will be found on another page. Briefly expressed, the position is that the Greek population, which comprises four-fifths of the inhabitants of the island, has had its political consciousness stirred, and claims recognition for its national aspirations in the administration of the island. Thirty-four years of freedom from Turkish rule have caused the Greeks to forget the history of Cyprus, and to shut their eyes to the possibility of the advantages of the *pax Britannica* entailing any responsibilities or obligations upon those who benefit by it. Unfortunately, the British lease of Cyprus suffers from one glaringly weak spot—the payment of a considerable sum to the Porte nominally as tribute, while in reality the money is returned in part payment of the loss sustained by Great Britain and France in paying the deficiency on the Guaranteed Turkish Loan of 1855. It is easy to see how this anomaly offers a convenient peg for all grievances, and the Greeks have not been slow to make full use of it. The amount annually lost to the Cyprus treasury and devoted to a cause in no way connected with the island would go far towards developing local resources, and it is hard to defend a policy which has nothing to justify it beyond the relative unimportance of the country that is being victimised. But the admission of the one injustice does not carry with it the necessity of acquiescence in the other demands of the Greeks. The position is common, *mutatis mutandis*, to most Crown colonies, and while we do not hesitate to allow that all legitimate aspirations should be met as far as possible, it has to be remembered that Imperial considerations must frequently overrule local requirements. So far as the Greeks of Cyprus are pressing for the adequate recognition of the island's needs there is good reason why their complaints against the anomalous drain on the Cypriot treasury should be given serious attention, and little difficulty need be experienced in rectifying the present state of affairs. On the other hand, all ideas of substituting administration by Greek amateurs for the Crown colony system may be summarily dismissed. It would be rash to infer that because our Mediterranean interests at the present moment offer more valuable *points d'appui*, Cyprus must necessarily remain for ever a negligible quantity, whether strategically or for purposes of diplomatic bargaining. The arrival, therefore, of a new Governor who is capable of directing, with some prospect of concrete results, the economic development of the island may well serve as a good opportunity for reopening the question of the Cyprus tribute.

The victory of Yeprem Khan over the forces of Salar-ed-Dowleh appears to have been even more decisive than was at first reported. Yeprem himself, it is now established, fell in the fight. The Pretender has crossed over into Asiatic Turkey, and from Khanikin has telegraphed to the Persian Regent proposing the cessation of hostilities and the holding of a conference. He suggests that this meeting should take place at Sultanabad, and that the solution of the Persian situation should be left to the decision of representatives of the Army, Court, members of the Cabinet, the Ulema, and the tribal leaders. Salar-ed-Dowleh undertakes to abide by the result of the conference, but if his proposal is rejected, he threatens to assume the offensive with 150,000 armed men. The reply of the Teheran Government to this ultimatum has not yet been made known; but is conceivable that, even after the death of Yeprem, the necessity of parleying with the ex-Shah's brother, when he is beyond the frontier, will not appear any more urgent than it did when he issued similar fulminations from Persian territory. Certainly the Government seems to be in a stronger position than at any other time within the last few months. It has, however, a complex situation to deal with, and the final withdrawal from Persia of Salar-ed-Dowleh would still find it taxed beyond its present capacity.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, May 24.

Nail Bey's Resignation.

The chief political events of the past week have been the promulgation of a decree of expulsion of all Italians from Turkey and the resignation of Nail Bey, Minister of Finance, which was accepted by Thursday's Council of Ministers. Nail Bey was appointed Minister of Finance in May, 1911, vice Djavid Bey, who resigned in that month in consequence of the split in the Committee of Union and Progress. His tenure of the high post which was then confided to him was distinctly successful, more so in some ways than that of his predecessor. A strong advocate of economy, he had the pleasure of seeing a distinct improvement in the revenues of the Empire, and his efforts to reduce expenditure, if not entirely successful, none the less produced an improvement in the financial situation of the Government. A better diplomatist than Djavid Bey, he might have succeeded in effecting an important conversion of part of the Turkish Debt had he not been handicapped by the continuance of the Italian war. He succeeded in getting the option of a loan contract with the Ottoman Bank group initialled, but this was his last achievement, and the combined effects of ill-health and military and extremist opposition compelled him to resign. The soldiers objected to his economies; the extremists averred that he had been too deferential towards the French financiers, though how the last class of critics expect Turkey to raise money at the present juncture without giving way to the demands of the foreign money-lender is not clear. A quiet, honest, and hard-working official, Nail Bey leaves nothing but regrets. Djavid Bey has been appointed Acting-Minister of Finance, and will probably succeed him, in which case Haladjian Effendi will probably be appointed Minister of Public Works vice Djavid, an appointment which may or may not soothe the Armenians. Rumours are current that Assim Bey will shortly resign, or be forced to resign. It is certain that the Minister of Foreign Affairs is not on the best of terms with Said Pasha and with some of the members of the Committee, but it is difficult to see who is to fill his place. The name of Ismail Hakki Babanzadé has been mentioned; but what are his qualifications for so important and delicate a post?

Albania.

The inspired Press gives us much information concerning the general lack of patriotism and evil-mindedness of the supposed leaders and promoters of the Albanian disturbances—Ismail Kemal Bey, Nedjib Draga, Hassan of Prishtina, Basri Bey, Isa Boletinatz, and the rest—but omits to tell us what is actually happening in the province of Kossovo. As for the leadership of the insurgents, the writer doubts very much whether Ismail Kemal really possesses any influence in Albania outside the districts of Avlona, Berat, and Elbasan, while Basri Bey and Nedjib Draga, not to mention Hassan of Prishtina, are all ex-members or members of the Opposition, no charge against whom is too grave for their political adversaries. The British reader of Turkish accounts of the insurrectionary movement in Albania had, therefore, better suspend his judgment as to the causes of the present outbreak until more is known. The Italian theory seems somewhat far fetched, the Italians having never had any prestige worth speaking of in Kossovo, and little in Scutari, where the Catholic population regards them as atheists who have done the Papacy much wrong. Austria is influential in Kossovo, but there is no proof as yet that Austria has fished very deeply in these troubled waters. By good luck Great Britain has no interest in Albania, or she would be accused by the numerous searchers for the "foreign finger" in the Turkish internal pie—or is it hash?—of having despatched the "cavalry of St. George" to aid the insurgents. Meanwhile a very powerful force is being concentrated near Ferizevitch, and troops are also being sent to Dibra and other points in Central Albania. The strength of the insurgents is unknown, estimates varying from 1,500 to 8,000 men.

The War.

The Italians, save workmen employed on railways, etc., widows, and members of religious orders, have received notice to quit within a fortnight. Italian and Turkish accounts of the fighting at Rhodes seem to show that the Turkish garrison fought very gallantly indeed, but was skilfully "rounded up" and captured by General d'Ameglio's forces, operating in three columns with remarkable precision and celerity of movement. Italian warships are now off Chios, but the attack, though hourly expected, does not seem to have begun. There is reason to believe that the capture of Mitylene—or, for that matter, a serious attack on the island—will result in the fresh closing of the Dardanelles by the Turkish Government, with all its untoward consequences.

The Situation in Macedonia.

The Bulgar bands are now growing very active in Macedonia, but they have been unable to do any serious damage to the most important bridges, which are well guarded by the troops, and have not yet been successful in provoking anything like an insurrectionary movement among the peasantry. The relations between Greeks and Bulgars continue to improve, but there is no question for the present of the end of the schism. The Bulgars, while anxious to remain on good terms with the Greeks, do not see the point of withdrawing the Exarch from Constantinople simply to please the Patriarchate, which cannot offer them any very great temporal advantages, though it may cease to call them schismatics. The Vlachs remain quiet in their hill villages.

The *Tanin* and other Turkish papers have recently been advocating the appointment of a high European official to an important post connected with the introduction, in accordance with Hadji Adil Bey's programme, of reforms in European Turkey. The *Hakk* (a new extremist organ), the Judæo-Turkish *Jeune Turc*, and the Salonika armoury of ferociously minded and bellicosely named newspapers, *Top* (Cannon), *Silah* (Arms), and the rest oppose the proposal. "Did we not make the revolution," they cry, "to keep the foreigner out of Macedonia, and are you desirous of inviting him in again?" So far no very definite proposals have been submitted to the Government as a whole by some of its members. All that can be said is that there is a scheme on foot for the creation of a special department under the Ministry of the Interior for the reform of the administration in European Turkey, and that serious opposition will have to be overborne before any European official is appointed to a high position therein.

ALLIANCE

ASSURANCE COMPANY, LIMITED.

Head Office: BARTHOLOMEW LANE, LONDON, E.C.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 22.

The Army of Occupation.

Lord Kitchener's impending visit to Malta, whither he will travel on board H.M.S. "Hampshire," and its possible results are forming a fertile subject for speculation. Although it has not been definitely so stated, the fact that he will there confer with the Prime Minister and the First Lord of the Admiralty leaves little doubt that the object of the visit is the discussion of possible modifications in the scheme of Imperial defence, and more especially as regards the Mediterranean. The meeting gains further in interest, inasmuch as it is generally believed here, rightly or wrongly, that one of the questions to be discussed is a possible increase in the Army of Occupation—a supposition which, in its turn, gives rise to further speculation as to the distribution of the troops in the event of their numbers being augmented, and as to the manner in which the added expenditure would be provided for. A few of the native papers comment upon the possible results of the Malta deliberations, and express the hope that, if the Army of Occupation is to be increased, the charges borne by Egypt under this head will not be increased in proportion. For the present, however, the whole question is in the nature of conjecture, and before registering opinion it will be advisable to wait until supposition has become fact.

Lord Kitchener and the Fellaheen.

Before his departure from Alexandria on Sunday Lord Kitchener will repeat in the provinces of Ben-Suef, Minieh, Assiut, and the Fayum the tour which he made at the close of last week in the Delta. The British Agent, who was accompanied by Mr. Ronald Graham, on that occasion visited the towns of Zagazig, Tantah, and Mansurah, and the manner in which he was received afforded striking evidence of the interest attaching to his personality among the rural population and of the prestige which he enjoys among natives. Everywhere large numbers of people were present, both at the Moudiriehs, whither sheikhs, omdehs, and village notables had been invited by the Moudir, and in the streets of the towns. At Mansourah, in fact, the press at the railway station was so great when Lord Kitchener alighted from his special train that those accompanying him had some difficulty in making their way through the crowd. It would seem as though the Egyptians were realising that one of the British Agent's main concerns is the material improvement of the lot of the *fellaheen*, and that the *fellaheen* were therefore anxious to come and see for themselves the man who sits at Kasr el Dubara and of whom there is so much talk. Not only, however, could they see him, but were able to present petitions to him, and to discuss and even criticise the measures of reform which are being introduced. On the other hand, Lord Kitchener, through the Moudir, explained to them the drainage schemes, the reforms connected with the rural cotton markets, the filling up of pools of standing water, the medical training of the village barbers, and other similar questions. The tour, and the other tours which will follow, was, in fact, the occasion for the British Agent to see the provinces for himself, and to carry out the policy which he has followed since his arrival in Cairo of getting into personal touch with the native population. Needless to say, Lord Kitchener is not the first British Agent to see the provinces for himself; but, inasmuch as the tour was attended with a certain amount of ceremony, there is something new in the manner of its execution. Concerned, as he is, with all that can make for the prosperity of the country, the discussion of his various measures with those whom they affect cannot but be of value.

Extension of Savings Bank System.

In this connection it may be noted that during the first six weeks of the extension of the savings banks to rural districts the number of depositors in Gharbieh was 21,328, representing a total sum deposited of £E5,695. In Sharkieh the amount was £6,998, divided between 30,088 depositors. The response with which the scheme has met in these two provinces is considered by those in authority to justify its application to other parts of Egypt, though sceptical spirits still maintain that many of the depositors are under a complete misapprehension as to what a savings bank really is. The usury law which has just been introduced is a counterpart to the savings bank, inasmuch as one encourages thrift and the other makes lending money above a moderate rate of interest (about 9 or 10 per cent.) a penal offence. Although the law states that a first offence can be punished with a fine not exceeding £E10, it is more probable that in practice a warning will be given before punishment is inflicted. As has been pointed out elsewhere in The Near East, the first obvious criticism of the usury law is the fact that it only applies to natives. Doubtless at first the foreign moneylenders will reap a richer harvest than before, but everything must have a beginning. In order to make the law applicable to foreigners it would need the consent of the Powers, and this, it is felt, there is much greater prospect of obtaining if Egypt can show a clean slate with regard to her own subjects.

The Alexandria Municipality.

The question of the Alexandria Municipality is still prominently before the public, though it would seem that a threatened conflict between the Municipal Commission and the Government has happily been avoided. In some quarters it is suggested that the Government should exercise its right of suspension of the Municipal Commission in view of the state of affairs revealed by the Commission of Inquiry. There is no doubt that the peculation, corruption, and general mismanagement of municipal business have been deplorable; but it is a very open question whether anything would be gained by suspending the present municipal councillors and proceeding, after a certain lapse of time, to new elections. The existing council being composed of the foremost men in Alexandria, it is probable that new elections would merely mean the re-election of the same councillors. As was expected, the report of the Commission of Inquiry has not officially been made public. It was only distributed to a certain number of persons for their confidential use. Nevertheless, as sometimes will happen in such cases, some of the most important passages have already found their way into the Press. The worst offender appears to have been the Secretary-General, Mohamed Bey Osman, who, profiting on the one hand from the sympathy with which he inspired certain of the municipal councillors, and on the other hand from the lack of firmness shown by the British Administrator, seems to have managed to feather his nest very comfortably. With regard to the British Administrator of the Municipality, whose lack of strength and of initiative is considered to have assisted Osman Bey in gaining the ascendency that he did, it must be borne in mind that this official had a post of much difficulty to fill, inasmuch as, while having to exercise a control over the Municipal Commission, he was never allowed to forget that he was the Municipality's paid servant. It seems not improbable that in consequence of this somewhat anomalous position the post of Administrator may be abolished, and in its place a post created which, filled by a Government official, would serve as a closer link between the Municipality and the Government.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes, le 24 mai.

La question des deputes cretois.

Malgré les déclarations plus ou moins rassurantes faites par M. Lyonakis au président du conseil pendant son séjour à Athènes, la question de l'entrée des députés crétois dans la chambre, dont l'ouverture aura lieu samedi prochain, inspire encore quelques préoccupations. Car, bien qu'une partie des dits députés soient disposés, tout en ayant l'air d'insister, à se conformer aux conseils du gouvernement, d'autres sont toujours décidés, du moins à ce qu'ils disent, à forcer l'entrée de la chambre, sans attendre qu'elle soit prononcée à leur égard, et à opposer de la résistance à la force armée si celle-ci essayait de leur barrer le passage.

D'autre part le gouvernement maintient sa façon de voir dans cette question. Les premiers jours de la semaine prochaine M. Vénizélos convoquera, dit-on, les députés ses compatriotes pour leur expliquer une fois encore que les circonstances critiques que nous traversons en Orient obligent le gouvernement à se tenir à ses résolutions primitives et il fera un dernier effort pour persuader aux plus intransigeants d'entr'eux de s'abstenir de démarches qui n'auraient d'autre résultat que de provoquer gratuitement des troubles dans le pays. Si toutefois après avoir épuisé tous les moyens de persuasion M. Vénizélos voit qu'ils persistent, il aura alors recours à des mesures de rigueur pour les empêcher de siéger dans la chambre. Il paraît cependant qu'en présence du langage tenu quotidiennement par la presse ainsi que de l'attitude froide de tous les cercles politiques et de l'opinion publique ils ont fini par comprendre que tout le monde désire qu'ils s'en aillent, de peur que leur présence ne provoque des troubles, et ils viennent de demander de nouvelles instructions à la commission permanente. Une dépêche de la Canée annonce que celle-ci, s'étant réunie aujourd'hui pour délibérer à ce sujet, se déclara incompétente de modifier les décisions de l'assemblée révolutionnaire qui leur a donné le mandat d'entrer dans le parlement grec. De sorte que cet écueil ne paraît pas avoir été définitivement franchi et la situation est encore assez incertaine. C'est en effet fort amusant de voir ces députés, au lieu de demander au gouvernement du pays où ils sont venus s'il consent à les admettre dans sa chambre, de demander au contraire des instructions à celui de la Canée. Dans les cercles bien renseignés on croit cependant que malgré tous ces grands mots la chose se passera sans graves incidents et on espère que les députés crétois se borneront à procéder à d'autres démarches par la voie légale. Ainsi ces jours derniers les dits députés, dont le nombre avec tous ceux qui sont arrivés par petits groupes s'élève maintenant à quarante-deux, soit à plus de la moitié du nombre total, ont tenu des réunions au cours desquelles ils ont décidé d'adresser aux ministres des grandes puissances à Athènes un mémoire sur leur question. Ce document, dont la rédaction a été confiée à une commission de cinq d'entre eux, parmi lesquels figurent MM. Pologeorgis et Lymbritis, exposera les motifs qui ont nécessité leur venue à Athènes et, rappellant aux grandes puissances leurs promesses réitérées, tendra à prouver que c'est la non-observation de ces promesses qui est la cause de la situation anormale et incertaine actuelle, laquelle est grosse de dangers, et concluera par la demande qu'une prompte solution soit donnée à cette question conformément à leurs aspirations nationales. Ensuite ils ont décidé de demander une audience au prince régent et sont allés s'inscrire à cet effet.

Les grand manœuvres.

Les troupes composant la division d'Athènes sont parties avant hier pour se rendre sur le terrain des grandes manœuvres qui commenceront après-demain sous la direction du général Eydoux. Ces troupes, s'élevant à prés de 15.000 hommes, feront leur fonction aujourd'hui près de Thèbes avec celles de l'autre division venant de Thessalie qui constituera l'armée d'attaque marchant sur Athènes.

Le prince royal, qui depuis le départ du roi à Copenhague exerce les fonctions de régent, est parti hier pour Thèbes afin d'inspecter, en sa qualité d'inspecteur-général de l'armée, le terrain des opérations militaires. La grande bataille sera livrée le 1 ou le 2 juin dans la plaine béotienne entre Tatoï et Schimatari et l'avant-dernier jour des manœuvres les troupes marcheront sur Athenes et défileront devant son altesse royale près Kiphissia.

En dehors des attachés militaires des légations étrangères, hier est arrivé aussi pour assister aux manœuvres, le colonel de l'armée française Buyuk connu par ses ouvrages militaires et par ses études sur les armées des états des Balcans. Cette fois-ci les manœuvres présenteront un intérêt exceptionnel dans ce sens qu'elles donneront la mesure des progrès réalisés jusqu'ici sous la direction des officiers de la mission française. Deux aéroplanes, système Farman, qui sont arrivés déjà, seront employés dans ces manœuvres.

Les manœuvres de la flotte.

La flotte, qui était partie pour Volo afin d'exécuter des manœuvres, reviendra à l'arsenal dimanche pour faire du charbon et se mettra sous les ordres de l'amiral Tufnell, qui est déjà rentré. Il paraît qu'il s'agit de faire exécuter à la flotte des manœuvres combinées avec celles de l'armée; elle sera, dit-on, chargée de protéger le transport par mer des troupes qui devront rentrer en Thessalie.

Divers.

M. J. Pill, l'un des membres de la mission navale anglaise, qui avait la place de mécanicien en chef de la flotte grecque, est mort d'apoplexie vendredi soir à son hôtel. Les funérailles ont eu lieu le lendemain avec toutes les honneurs militaires. Aux obsèques assistaient le président du conseil, le ministre d'Angleterre et le personnel de la légation, et les officiers de la marine grecque et de la mission anglaise. L'officier grec Pavlidis a prononcé une oraison funèbre. Le gouvernement grec va demander au gouvernement anglais de lui envoyer un autre mécanicien pour remplacer le défunt.

Mouvement diplomatique.

Le nouveau ministre de Turquie, Moukhtar Bey, est attendu ici demain. Galib Bey, le chargé d'affaires, partira aussitôt après son arrivée pour rejoindre son nouveau poste au ministère turc à Constantinople.

NOTES FROM ALEXANDRIA.

(From Our Own Correspondent.)

Alexandria, May 21.

Municipal Commission of Enquiry.

The report of the Commission of Enquiry into the Alexandria Municipality scandals has been issued, and copies of it have been sent to the Ministry of the Interior and the British Agency. It forms a lengthy indictment of the administration in every department, the Tanzim and scavenging branches being characterised as worst of all. In the opinion of the members of the Commission the administrator (Mr. Chataway) has allowed himself to fall under the influence of the Secretary-General (Osman Bey), who has succeeded in getting the control of the whole organisation into his hands. They recommend that Mr. Chataway should be retired and replaced by an official to be selected by the Government and Municipality jointly.

So far so good, but surely something else is wanted beyond the mere changing of the leading official? We all know what a strong man at the head of affairs can accomplish, but even he wants the help of a really representative body of men to enable him to meet the wishes and requirements of the community. Until the constitution of the Municipality is altered, and the franchise is given to a much larger body of electors of Alexandria there is little chance of the Government of the city being properly carried on. Everybody is sorry for Mr. Chataway. He may not, as the Commissioners say, be strong enough to control such an important administration as this, but as regards his probity he has come out scathless from this searching inquiry, and he is universally liked and respected. Whatever may be his future career, he will carry with him the good wishes of all classes of the community here.

"Boy Scouts" Movement.

A notable sign of the times is the establishment in Alexandria of a troop of boy scouts of British parentage, the formation of which has received the support and encouragement of Lord Kitchener. A very enthusiastic meeting of scoutmasters, boys, and parents was recently held at the Sailors' and Soldiers' Institute, at which the objects of the movement were fully explained by the Rev. Lucius Fry, the local secretary.

The Council of the Boy Scouts Association have recently issued a statement as to the objects with which it has been founded, a very necessary proceeding seeing that the movement is misunderstood and misrepresented by many people. Perhaps the name given to it—Boy Scouts—is not exactly a happy one, as it savours too much of militarism to recommend itself to peace-loving people; and possibly also the pictures in the illustrated Press have done much to deepen the impression that the movement was intended to foster the fighting instinct of British boys. At any rate, all objection to it on these grounds should be removed by the very explicit statement concerning the aims of the association.

A few months ago the editor of the *Egyptian Observer*, in an article entitled "Arab Boy Scouts," strongly urged the desirability of extending the movement to the Egyptian native boys, saying of them: "No one who comes in contact with the youth of this country can deny it a degree of intelligence that is so striking as almost to be abnormal. . . . Why, it may be asked, does he deteriorate into an inferior man? The question is not difficult to answer. To put it broadly, he is neglected both in his home and out of it. . . . He is taught nothing about honour, or chivalry, or decent behaviour; he is certainly not taught good manners. In short, he is not taught the Scout Law."

In concluding this article on the necessity of drill and discipline for boys, after showing its practicability in Egypt, the writer says:—"If this great work be undertaken earnestly and under wise direction in the immediate future, there is reason to hope that the present generation may witness the development of wholesome youth into noble virility, here in Egypt, endowed with all the moral material to become good citizens, good patriots, even good nationalists."

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, May 25.

Servian Anxieties.

At present there exists in the minds of the Servian population the belief that behind all occurrences that may be prejudicial to Servia Austria's influence is at work. The universal opinion here is that the Albanian unrest is fed by Austrian intrigue, in order to enable Austria to carry out more easily the military occupations she has in view, the first of which is said to be the taking possession of the Sanjak of Novi Bazaar, for which purpose Austro-Hungarian troops are being assembled in larger numbers than ever in Bosnia. It is asserted that to-day there are 160,000 men under arms there; and in Servian official circles the construction of a double line of railway from Buda-Pest to the Servian frontier at Belgrade is regarded as of military importance, and is spoken of as likely to be very soon completed.

It is but a narrow strip of land (the Sanjak of Novi Bazaar) that separates the two Slav countries, Servia and Montenegro. Servia has no outlet to the sea, and at the time of the Bosnia-Herzegovinian annexation Dr. Milovanovitch, the present Prime Minister, made a tour, calling on all the chief Courts of Europe, pleading for the commercial and economical existence of Servia. It is only a small strip of land, he urged, that Servia requires to enable that country to join hands with Montenegro and obtain an outlet to the sea.

If Austria again enters the Sanjak of Novi Bazaar, it will not be a simple occupation, as formerly; it will be rather a question of another definite annexation, a step further in her Eastern extension. No protests will avail Servia: even her political life may be at stake. The notion prevalent among leading Servians is that Austria-Hungary is making thorough preparations to swoop down on Servia in the event of hostilities breaking out in which Servia might attempt to take part.

Reports from Albania.

That the Albanian unrest is on the increase, and likely to produce serious results, is an opinion confidently entertained here, and alarming telegrams frequently appear in the Servian press.

One, dated May 20, from Uskub, published by the Servian press, says that the leading men of Jakovitza—Achmed Bey, Riza Bey, and Hussein Zur—have lately joined the Albanian insurrectionary movement; that there is a large increase of revolutionists from Petch; that the quarries of Rugova have been turned into a military "lager" and have become the chief Albanian stronghold; and that the second centre of concentration is in the neighbourhood of Jakova. Another telegram, of May 21, says that in Luma all Albanians are up in arms, the telegraph wires cut, and the roads at various points rendered impassable. The Uskub journal *Vardar* mentions that the well-known chief of an Albanian band, Isa Boletinatz, who had returned to a peaceful life, has again risen in arms, and with sixty followers has taken refuge in the mountains.

The Belgrade *Politika* of May 23 relates that envoys from Albanian bands arrived in Sofia three days previously on a mission to the revolutionary Macedonian organisation in that city. It further states that Hassan Balantza, the chief of the mission, declares that there is a great difference between the present and previous Albanian revolts. This time, says he, it is much more serious and important; and he declares that the Albanians will later on receive money and arms from a foreign country.

The Government's Position.

The Cabinet, not having a strong majority and not being able to make a fusion with either the Samostalni or Dissident Radicals, intended resigning, and there would then have been a reconstruction. But difficulties have arisen in the party, and, as it is not desirable to have new elections again immediately, it is now decided that the present Cabinet shall remain. Parliament being prorogued, the Government will be able to hold on until the autumn. In the meantime the Prime Minister, who is also Minister for Foreign Affairs, will take over the portfolio of Minister of Finance, *ad interim*, hoping to be able soon to fill up the two vacancies—the Ministries of Finance and of War.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, May 25.

Hussein Kiazim Bey.

Your last letter from Salonika mentioned the satisfaction felt here at the return of Hussein Kiazim Bey as our Governor-General. A day or two after his arrival he started on a short tour of inspection in the Drama district, but there was general astonishment when news came that he had again resigned. On his return here this report was found to be inaccurate; but there is certainly some rift within the lute which may yet lead to his resignation, an act that would be regretted by most of his friends. Rumour attributes the cause to an acute difference of views between himself and the central Government as to the general policy to be adopted in this vilayet. He is credited with wishing to try certain measures calculated to give some amount of satisfaction to the people at large, which the central Government will not let him carry out. On the other hand, bitter enmity is said to exist between him and Halil Bey, dating from the time when this latter was Minister of the Interior and our Governor was Prefect of Pera; and the fact of Halil Bey being appointed President of the Chamber, in spite of promises to the Vali that such appointments should not be made, is thought to be the true cause of offence. He is also supposed to be strongly in favour of the impeachment of the late Grand Vizier, Hakki Pasha. As Hadji Adil Bey, Minister of the Interior, with the Reform Commission, has now arrived here, our Governor is known to be taking the opportunity to lay his views, whatever they may be, personally before him. In all probability the question of his resignation, or otherwise, will be finally decided before the Minister, with the Commission, leaves for Adrianople. But the evidence is all in favour of his holding very enlightened views regarding the governing of this vilayet and Macedonia, and of his being quite capable of at once resigning, if he cannot get his own way, rather than acquiesce in a policy of which he does not approve.

The Expulsion of Italians.

One cannot help feeling that the Turks have suffered great provocation, and that they have shown very considerable patience under most trying circumstances; yet their best friends cannot but wish they would carry their magnanimity a little further, and cease to harass the Italian subjects dwelling in their midst. In the matter of the expulsion of the Italians, there is undoubted favouritism; else why should only six have been singled out in this town within the last week and packed off at forty-eight hours' notice, one being a hard-working doctor, far too busy to mix himself up with politics, who was allowed to return here only some six or seven weeks ago? And seeing two doctors were notified to clear out, why was one permitted to remain and the other forced to go? One cannot help wondering what influence was brought to bear to make this distinction. Now it is said that all Italians are to leave within a fortnight, with the exception of widows, Sisters of Charity, priests, and navvies working on the railways; the last being allowed to remain because they are the chief workmen on the Baghdad railway line, and their expulsion would mean the stoppage of the work, and consequent loss to the Germans. Putting magnanimity on one side, the policy is a mistake, as a great number of the most reliable workmen throughout this country are Italians, whose expulsion means considerable loss and inconvenience to the general public.

Albanian Affairs.

It is exceedingly difficult to learn the truth about the present situation in Albania. While official reports minimise the gravity of the movement, private information leads to the view that the unrest is very great, and is rapidly spreading. Many Albanians attribute the insurrection to the bad faith shown in the manner of conducting the elections, and to the fact that the Government have altogether failed to keep the promises made last year. Ismail Kemal Bey, ex-deputy for Berat, is one of the leaders of the movement prominently in view. He is reported to have sent a memorandum to the Government asking for the appointment of an Albanian Governor-General, the dismissal of certain high officials, and the return to the people of the arms previously confiscated. Whatever the real situation may be, there is a very considerable movement of troops towards the disaffected districts, whether as a simple matter of precaution or from absolute necessity not being known. A rumour says that three battalions of troops mutinied, refused to proceed further against the Albanians, and shot those of their officers who ordered them forward; but this has not yet been confirmed, and, even if it be true, it is never likely to be admitted by the military authorities.

The Reform Commission.

As already said, the Reform Commission has returned safely here, and is staying for a few days before going on to Adrianople, and, eventually, to Constantinople. Its members seem very satisfied with the experience and knowledge they have gained, and they are most hopeful about the future, providing the central Government will adopt the policy they are convinced will, although slowly, pacify the country and lead to its prosperity. There seems, however, to be a lurking suspicion regarding the genuineness of the discovery of bombs on the railway, as the spot where they were found is exposed on all sides, is one where nobody could pass without being seen, and is outside the sphere of the bands.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, May 18.

The Exodus of Italians.

The exodus of Italians from Smyrna is now in full swing, and the officials of the German Consulate are kept busy making out passports. A severe check has been placed by the port authorities on all people entering and leaving Smyrna. Most of the Italians appear to be going to Piræus or some of the Greek islands, apparently in the hope of being able to return easily to Smyrna as soon as peace is declared. The German Embassy in Constantinople has fortunately succeeded in obtaining authority from Italy to give tickets gratis to all those applying. A small sum of money is also given to the most needy. The first steamer to leave the port crowded with Italians was the ss. "Urana," of the local Pantaleon Company. She was soon followed by several others, the ss. "Osmanieh," of the Khedivial Company, taking over 300, and to-day the Austrian-Lloyd steamer and the ss. "Saghalien," of the French Messageries Company, are completely booked up. Two large steamers are being engaged by the German Consulate specially to carry Italian refugees. It is not thought that there will be any difficulty in conveying the whole of the 10,000 Italians who resided in Smyrna and district, as there are several large cargo boats in port. These boats had been bound for Constantinople and the Black Sea, but, owing to the closing of the Dardanelles, and finding the anchorage at Besika Bay dangerously overcrowded, they came on to Smyrna.

British Interests.

It is thought here that, whilst the departure of all the Italians may obviate the danger of any rising of the Moslem population, irritated by the Italian occupation of many islands in the Archipelago, it will now leave the Italian fleet free to bombard the batteries and the fort at the entrance to the gulf. In view of the approaching busy export season, it is earnestly hoped that the British Government will endeavour to exact a guarantee from the Italian Government that there will be no blockade of Smyrna, for most of the export business is in the hands of important British firms, and many millions of British capital are concerned in it.

Soma to Panderma Line.

The Smyrna, Cassaba, and Extension Railway Company, which succeeded in obtaining the concession to build the Soma to Panderma Railway line, has now opened the first section—viz., Soma to Kara Djalar. The order for the expulsion of the Italians does not include any workmen on this extension, and there will probably, therefore, be no interruption in its construction. This railway will, of course, be of great strategic value to the Turkish army, as the distance between Smyrna and Constantinople by land and boat from Panderma will be covered in about fifteen hours, as against the sixty by the Afion-Kara Hissar route.

TEHERAN LETTER.

(From Our Own Correspondent.)

Teheran, May 14.

Lord Lamington's Visit.

Lord Lamington has come and gone. His stay was a short one, but it can well be argued that the briefness of his sojourn is an indication of the awful chaos he found here. A mere glance at the present state of affairs is amply sufficient to justify the fears and warnings which have been repeated again and again during the last two years with almost nauseating persistency. Even during the short time occupied in journeying through the country Lord Lamington has seen the tide of disturbance steadily rising in the provinces; and whilst in Teheran he has undoubtedly formed a fairly accurate opinion of the capacity of the present Government to stem that tide. The opinion of so able an administrator will carry great weight, and we hope that the evidence collected by him will result in a modification of England's policy in regard to Persia.

The Outlook.

Prospects for the future are black indeed. There is not one hopeful sign of better things to come: we are still on the downward road. Serious disturbances have broken out in the Kerman district, whilst Arabistan, hitherto the most orderly province of Persia, has come into line with the rest. All this points to the need of a strong central Government; yet the Ministers are doing little or nothing. Their excuse for the present chaos is lack of money to reorganise. But give them money and it is gone—no one seems to know where—without any useful result being achieved by its assistance. The present condition of the country is largely, though by no means entirely, the result of evil administration; the rest of the responsibility remains with England and Russia for the immoral policy they are now pursing here.

Yeprem to the Rescue.

News from the West is both vague and indefinite. Prince Firman Firma appears to have had a fight with the rebels, and to have found it necessary to fall back upon Hamadan. The great Yeprem has again been called to the rescue. He has now arrived in Hamadan, and it is expected that a decisive engagement will be fought during the next few days. Upon the arrival of this leader the rebels are said to have fallen back in the direction of Kermanshah, but no one seems to know their exact position. All the available Bakhtiaris in Teheran are now leaving, or have already left, to support Yeprem.

The Position at Shuster.

No serious fighting has taken place between the Bakhtiaris and the Sheikh of Mohammerah in Shuster. Negotiations have been proceeding for some days, but little progress has been made owing to the telegraph line between Shiraz and Shuster having been cut. The last we heard from the south is that the Bakhtiaris had evacuated the town of Shuster and had fallen back to their own border. In the meantime much inconvenience is being caused by the Sheikh commandeering large numbers of pack animals usually employed in the transport of goods on the Ahwaz-Ispahan trade route.

A ROUMANIAN FETE DAY.

(From an Occasional Correspondent.)

Bucharest, May 23.

The 10th of May (O.S.—23rd new style) is to Bucharest what the King's Birthday is to London. The King reviews the garrison, and the citizens make holiday. All who can scrape together enough to visit the capital do so, and this year the Society of Journalists have organised a festival to which anyone can come for a half fare. Consequently the town is crowded, beds at the hotels, great and small, are at a premium, whilst the crowded cafés and restaurants, and the many and variously garbed groups of peasantry and hundreds of cheap trippers make life, except in the fastnesses of home, anything but pleasant. The Roumanian of the middle and lower class, however, loves a crowd, and enters with zest into the slow struggle along the principal streets or the fight for places in café or wine shop. Give him a good thick suit of holiday clothes, a locale into which about three times its normal capacity of humans are crowded, a babel of noisy tongues and laughter, the brassiest of brass bands, and a temperature of something over 90 deg. Centigrade, and he is happy.

In the morning all other parts are deserted for the neighbourhood of the Boulevard Elisabeth, where the review of the garrison is to take place. The scene is a gay one, for Bucharest has put on its best, and many new spring "creations" get their first airing. The royal pavilion is, of course, the objective of all eyes.

Suddenly boom goes a gun in the distance, followed by a hundred more. It is the sign that the royal cortege has left the Cathedral. A space, narrow enough (the police regulations left much to be desired this year, and went near turning the thing into a fiasco) is made, and presently Crown Princess Marie, looking younger and more beautiful than ever, with her daughters and young son, arrive, closely followed by the King himself, who mounts his charger and takes his place to receive the salute. Crown Prince Ferdinand, in his uniform of Inspector of Cavalry, and Prince Carol in that of his "Venator" Battalion, take up their positions near by. The staff and military attachés make a blaze of colour behind, with the statue of Michel the Brave looking down on all.

Now military music is heard, and the bands which are to play the regiments past deploy into the space opposite the saluting base. First come a detachment of the mounted gendarmery, in a uniform savouring somewhat of the Spanish in their turned-back coat lapels, though their steel helmets and white plumes, blue coats, white gauntlets and breeches, with top boots, have a faint resemblance to our Horse Guards. They are followed by the detachments of the new regiments with their flags, and a crowd of mixed uniforms, reserve officers, who form line as soon as they have passed. Then come cadets from the different military schools. They are followed by the 2nd Battalion of "Venatori" (Rifles) "Queen Elisabeth's," who are received with much enthusiasm. For at the taking of the Crevitza redoubt, the key of the position at Plevna, this regiment was decimated, though by its devotion it saved the day for the Russo-Roumanian forces. On its banner hangs a wreath, presented by Queen Carmen Sylva, when, twenty-five years after the war, new colours were presented to the regiments which took part in the fight for liberty. It is composed of roses and laurels, "Laurels for the dead; roses for the living," said Her Majesty in entrusting it to her soldiers. After the rifles come the infantry of the line "Curcanii" (turkeys), so-called from the turkey feathers they wear in their national astrachan caps.

Now the music ceases to give way to the mounted band of the artillery. And such artillery—men, horses, and guns—one must go far indeed to beat.

The guns give place to the cavalry, smart in their scarlet hussar coats and white breeks, their large pennons the colour of their busby bags. Crown Prince Ferdinand goes out to lead his horsemen by, and a useful, workmanlike lot they are

More horse gendarmes follow, and then the review is over. The crowd melts away, filled with pride—legitimate pride—in its fighting force.

THE UNREST IN CYPRUS.

Greek Aspirations.

For several weeks past our columns have contained letters regarding a "crisis" in Cyprus, the origin of which appears to have been as follows:—In December last a memorial was submitted to the High Commissioner, Sir H. Goold-Adams, by representatives of the Greek community, in which various claims were put forward, aiming at political and financial changes in the island. The reply of the High Commissioner, which was subsequently approved fully by the Secretary of State for the Colonies, stated that the demands were not such as could be complied with, and reminded the authors of a fact, sometimes ignored, that Cyprus is administered in accordance with the well-defined terms of the Anglo-Turkish Convention of 1878. The reply was considered to be displeasing, and, soon after the opening of the Legislative Council in April, the elected Greek members resigned, thus leaving the work of the Council to be carried on, as it has since been, by the official and Turkish elected members. The resignation was followed (April 28) by "demonstrations" throughout the island, at which resolutions were passed in support of the Greek members and of their action. The claims, which are put forward as being of the nature of "just rights," appear to be chiefly the following: that the surplus revenue should be expended in Cyprus for the benefit of the island; that the "tribute" (over £92,000) to the Porte should be accordingly borne entirely by Great Britain; that the Greek majority in the population should be more fully represented in the Legislative Council; that they should have a greater control over expenditure; and that some of the higher appointments in the island should be open to natives. With these demands is associated an expression of the "national" aspiration for union with Greece.

Greeks and Turks.

An organised agitation for "Union with Greece" is one of the marked features of the present situation in Cyprus. This "patriotic" claim holds a prominent place in all meetings, deputations, petitions, etc.; the Hellenic flag being used conspicuously on all possible occasions. That this aspiration should have been fostered as soon as Turkish rule was replaced by freedom of speech and of the Press was to be expected. The British Government has never checked, as assuredly any other Government would, to some extent at least, have done, the growth of this national idea. It is fully admitted by the Greeks that if the island cannot be handed over to Greece (as were the Ionian islands) British rule is next best and preferable to that of any other Power. But the fact remains that the agitation referred to is being pushed by every available means—through the influence of the Church, the Press, of schools and clubs; and that, as has been the case in Crete, it will continue to gain strength as time goes on. What the Greeks close their eyes to is the fact that, whatever the future may hold in store, such a demand is at present quite premature, at variance with existing political conventions, embarrassing to Greece, and calculated to impede, rather than promote, the advancement of the island's progress

On the other hand, another striking feature in Cyprus has always been the loyalty, dignity, and admirably correct attitude of the Turkish community of the island. The Turks have naturally opposed to the Greek claims their desire that the terms of the Convention should be honourably fulfilled; and as long as we hold Cyprus it cannot be doubted that British policy will provide for the just claims of Moslems as well as Christians, of Turks as well as Greeks. Our correspondent "Cypriot," of last week, suggests, as an analogy, what Ireland might be "under a Home Rule Parliament, with Ulster left out."

Advance Achieved.

There is ample evidence to show that the people of Cyprus in general are fully contented under British rule, as well they may be. The record of progress already accomplished may be studied in annual reports and other publications. But this progress, which has already completely transformed the island, is apt to be overlooked by the rising generation. The advance has been achieved in the face of many difficulties, including the vast amount of arrears of work, so to speak, taken over from preceding administrations, the sparseness of the population, and other causes.

It may also be candidly admitted that the island has not advanced in so marked a manner as would have been the case had it not been for the serious anomaly of our position there. This anomalous condition has undoubtedly stood in the way of various improvements. Had Cyprus been, or become, a British possession, much capital would no doubt have been invested in the island which the uncertainty of our tenure has kept from her shores. It may be easily imagined that many other disadvantages are involved, into which we cannot enter here. The work of development, however, even if somewhat slow, goes steadily forward; and it is clear that all grievances and just claims receive due and adequate consideration. One thing is quite certain, that the work which lies before the Government and the people can be best promoted by the loyal co-operation of all classes, especially of those who claim to be the leaders of native opinion.

OUR MEDITERRANEAN FLEET.

The flag of Admiral Sir Archibald Milne, selected to succeed Admiral Sir Edmund Poë as Commander-in-Chief, Mediterranean Station, after being hoisted by the "President" on June 1 and struck at sunset that day, is to be rehoisted in the "Good Hope," cruiser, at Portsmouth, on her arrival on June 3, after the flag of Rear-Admiral Sir Douglas Gamble has been struck by that ship. Admiral Sir Archibald Milne will embark in the "Good Hope" at Portsmouth before June 8 and leave for the Mediterranean; and, after handing over his command to his successor. Admiral Sir Edmund Poë will return to England in the "Exmouth," battleship, and strike his flag at Portsmouth.

The Executive Committee of the Navy League has had under consideration the new situation created under the scheme of Fleet reorganisation adopted by the Admiralty. In the view of the League the scheme involves the practical abandonment of the Mediterranean, with the consequent danger, in the event of war, to our position in Egypt, to our communications with India, and to the free passage of our trade with the East viâ the Suez Canal, as well as with Eastern Europe. The saving effected by the withdrawal of a battle squadron from the Mediterranean must be placed against the charges for increased garrisons at Malta and increased forces in Egypt in time of peace; and, apart from the grave risks to our position in the East, against the hazard to which the stability of the State will be exposed by the pressure of famine prices upon the masses of our population in war time. The following resolution, proposed by Mr. Wilfrid W. Ashley, M.P., and seconded by Captain Walter V. Faber, M.P., was unanimously adopted:—"That in the opinion of the Executive Committee of the Navy League earnest representations should be made to his Majesty's Government that in view of the recent naval developments in the Mediterranean it is urgently necessary so to strengthen our Battle Fleets that this country shall not only be superior to any possible enemy in home waters, but shall also be in a position to carry out our traditional policy of safeguarding British interests and of adequately protecting the route to India."

LETTERS TO THE EDITOR.

"PROTECTION" WANTED AT JANINA.

To the Editor of THE NEAR EAST.

Sir,—I am delighted to see in your paper of May 10 that Lady Lowther has founded in Constantinople a Society for the Prevention of Cruelty to Animals. If the majority of people in this country could make their voice heard through the medium of your much-respected paper they would express the wish that they might be included amongst the "protected" for whom the kind-hearted British lady feels.

It would be difficult to give you a true idea of the condition of this unfortunate corner of Europe. Protection of life and property is out of the question; communication is mostly carried on by mules; robberies are everywhere; the post from Paramithia to Janina was stopped four days ago, and four gendarmes and one civilian were killed in Philliatais, and merchants there are daily robbed of considerable sums. I may instance two cases that occurred only last week. In one of these cases a Mr. B. Mangas received a note threatening to kill him if he did not pay immediately twenty napoleons, which he did. Thereupon the authorities promptly demanded of him what he meant by supplying the brigands with funds! In the second case, Mr. Lampros Venetis received a note demanding ten napoleons. He refused the demand, and a few days later, as his horse was returning from Sayada loaded with rum in skins, the skins were split open, the rum was spilled on the ground, and the horse was taken away—for the ten napoleons!

You, sir, need not be astonished if you learn that the brigands act as referees in the elections, and that the people are obliged to do as they are told by these gentry. I could mention hundreds of worse cases. Trade is at a standstill, and everyone is praying for a change of some kind.

With best wishes for the success of Lady Lowther's scheme, and hoping that her protection may be extended, I remain, etc., J. C.

Janina, Epirus, Turkey, May 20.

A NEW INDUSTRY FOR CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—May I be allowed to endorse the suggestion in your columns as to the establishment in Cyprus of a tinned milk industry? Like the writer of your "Comments," I, too, have enjoyed goats' milk, not only in Cyprus, but in South Africa, India, and also England, and for many reasons prefer it to cows' milk. Certain known brands of tinned skim milk are now being sold in London, one of them called the "Goat" brand. If the milk sold under the above name were goats' milk, unskimmed, it could probably be sold at the same price, and would be worth double the money.—I am, Sir, yours,

London, W., May 16. TRAVELLER.

AVIATION IN TURKEY

To the Editor of THE NEAR EAST.

Sir,—The successful flight of a British pilot on the Sultan's Accession Day, when a Repp monoplane soared 1,400 metres above the highest point of Pera, must be regarded as the commencement of a new era in Ottoman annals. For under the Hamidian régime, which is not so long ago, the idea of anyone defying the laws of terrestrial gravitation was religiously tabooed, and it is on record that an Armenian who suggested making an ascent in a balloon was watched by the spies of Yildiz for weeks, and was obliged by superior order to renounce his intention. So, if we except the ludicrous feat of a Frenchman who, in the time of Abdul Aziz, fell from a tree-top in an endeavour to fly a hawk-like machine, one may safely say that since the days of Dædalus of Crete, the world's first airman, the noble art of aviation was till quite recently unknown in Turkey, and Blériot's disaster on the Champ de Mars here three years ago was not calculated to inspire the stolid Turk with much confidence in the practical possibilities of the invention.

The present war, however, in which the strategical advantages of the aeroplane on the Italian side have been demonstrated, has had the effect of waking the Turkish official world to the needs of the day, and public and private interest in the art has been aroused. The War Office, which is the most progressive of all the State Departments, has created a special aviation section, under the superintendence of Lieut.-Colonel Sureya Bey, son of an ex-Minister of War, in order to promote the science in the army.

I am not at liberty to give the names of the firms whose tenders have been accepted by the Government, but it is satisfactory to note that already five machines have been ordered, including that which flew last Saturday.

Technically speaking, the Constantinople field, starting from the San Stefano base, is unsatisfactory, owing to the variable atmospheric conditions, but with the gradual extension of the experiments better sites will be chosen. A trial of the hydroplane would also be of interest on the land-locked waters of the Marmora, which are generally calm.

L. MORTON.

Constantinople, May 3, 1912.

INDIAN MOSLEMS AND THE WAR.

The Committee of the London All-India Moslem League have addressed to the Foreign Office a representation on the extreme gravity of the situation the latest development of Italian activity in the Dardanelles and the Ægean Sea is creating in the East. They have reason to fear that the direct and immediate result of the situation will be to impel large bodies of Moslems from India as well as the frontier to endeavour to reach the seat of war as volunteers, and it would be impossible for his Majesty's Government to repress the movement without risk of great unpopularity.

Attention is also called to the extreme inconvenience to Moslem pilgrims and the loss to Indian commerce occasioned by the Italian blockade of the Red Sea ports. The Committee have been requested by many of their Indian co-religionists to submit that the injury caused by the Italian action has been far greater than is usually imagined. Large bodies of pilgrims have been unable to leave Hejaz for fear of capture by the Italian ships of war, and the suffering and distress among them are very great. The Committee pray his Majesty's Government "to take such steps as they may consider expedient to prevent the further development of a situation which they really fear will prove most prejudicial to the interests of humanity and to progress in the Eastern World."

In reply, the Secretary of State for India has caused to be addressed to the London All-India Moslem League a letter in which he states that while the Government has not failed in all cases brought to its notice to protect the rights of all British subjects, and while it is anxious by all means in its power to secure respect for the religious susceptibilities of the Indian Moslem community, it must repeat the disclaimer already given in a previous letter of any intention to offer advice to either of the belligerents regarding the sphere or conduct of their military operations.

ITALY AND THE DARDANELLES.

Truth and Rumours

(From a Correspondent in Turkey.)

I have been following up with great interest all that has been written concerning the Turco-Italian war, and have come to the conclusion that more attention might be given to some details, given by certain Press correspondents, which appear to me to be accepted as gospel truth when, as a matter of fact, they are based on hypothesis and not on what has actually taken place or is likely to take place. At the beginning of the war a great deal was said about the atrocities committed by the Italians, and the public was led to suppose that the Italians were more than barbarous, and only fit to go hand in hand with savages. Lately, we read in the papers that Turkish mines have exploded in the Straits of the Dardanelles, and that the explosions are due to the action of porpoises; and lastly, we hear, "on trustworthy authority," that the intention of the Italian Government is to attack the Dardanelles, and that aeroplanes and dirigibles will be used in order to discover, and, by means of bombs, explode the Turkish sea mines and damage their land defences prior to the rushing of the Bosphorus.

The atrocities referred to above have been dealt with by eye-witnesses and persons more competent than myself, so I will not attempt to add anything to what has already been said to exonerate the Italians. It is evident that there has been some mistake, as all the leading papers, which were so ready to blame the Italians at the start, have now ceased to find fault with them. But as regards the mines exploded in these Straits, I will explain from what an unreliable source the imaginary cause of the explosion must have originated.

At the time of the explosion I happened to be on one of the many piers or landing stages of the Dardanelles from which a good view of the entrance to the Straits can be had, and heard the four or five successive reports, the effects of which were to shake the whole town. No water was seen to rise in the distance, so I am safe in presuming that the exploded mines were somewhere near the coast on the Asiatic side of the Straits, which is hidden from view by the projecting forts, or that they were too far off to allow of the sound reaching me in time to give me a chance of seeing their effect on the water.

Feeling the shock, which could only be distinguished from that caused by an earthquake by the sound that accompanied it, all the inhabitants of the Dardanelles rushed to the piers, which soon became crowded to the point of collapsing. Naturally enough, among the spectators were to be seen representatives of the various Consulates of the place, who were all eager to know what had happened. I listened to the various suggestions made by Tom, Dick, and Harry in connection with the explosions, and was highly amused to hear the different versions of men who probably knew as little of the real cause of the explosions as any ordinary bootblack who happened to be present. One version was that the mines were attached to long wire ropes which made them swing round in circles, and that with the currents running in opposite directions they were brought into contact with each other. This argument, however, was put aside as valueless, seeing that the five explosions would have meant the coming into contact with each other of ten mines within five minutes (the duration of the explosions), which was improbable. Another man suggested that the mines had exploded when they were being lowered into the sea; but as, shortly after, all the Government tugs used for that purpose appeared without having come to any harm, that suggestion was also repudiated. A third maintained that a rock must have fallen on the connecting wires and set the things going; but that, it was argued, could not have taken place, as, under the circumstances, all the mines would have gone off at the same time instead of at short intervals. Finally, a short, dark-haired, bushy-eyebrowed Armenian with a gruff voice, which sounded as if it came from his boots, appeared on the scene and gave it as his opinion that porpoises had been playing with the mines and were the real culprits. (What poor fun for the porpoises!)

"Bravo, Mr. Agopian," I heard somebody say, "you have it"; and, to my surprise, I now see that idea accepted by the Press. Porpoises are rarely caught in nets, which are made of thin twine, and are much harder to see than huge mines, like buoys in appearance, so why are we to suppose that they would be blind enough to come into contact with the mines in broad daylight? No one thought of saying that the mines had been exploded by the Turks on trial, which was, after all, the simplest way of accounting for the explosions. Each one vied with the other in trying to think of the most fantastic solution of this difficult problem, and to invent the tale that would most readily be accepted by the papers.

To turn to the intended attack of the Dardanelles by aeroplanes and dirigibles, most people may not be aware of the difficulties to be encountered by the aviators who will be employed to run those infernal machines of destruction. To begin with, they make no allowance for the gales of wind for which the Troad is renowned, secondly they do not count on what the Turks might do, perched up as they will be on both sides of the Straits, on fairly high mountains; and thirdly, they have not taken into account the very important fact that the Straits are nearly thirty miles long, and that mines could be placed several feet below the surface and at varying distances the whole way up, which would take sharper eyes than an aviator's to discover, and more bombs than could be conveniently carried in an aeroplane to destroy when they have been discovered.

I would point out that an aeroplane would have great difficulty in hovering about in a gale of wind, and in the event of there being no wind it would have to keep well out of range of the thousands of rifles and guns ready to give it a hot reception. The Turks are not bad shots, and their hands are as steady as their hearts in battle; so that one might easily expect to see them making a determined stand even at a great disadvantage. Forcing the Dardanelles and rushing the Bosphorus is an easy matter on paper—but quite a different thing when it comes to doing it in real earnest.

One might well compare the present stage of the war to a boar hunt in Turkey on a large scale. The beaters or "surekdjis" are the handful of Turks and Arabs fighting in Tripolitania and the party in Italy clamouring for vigorous action by sea as well as by land; the boars are those ships belonging to the Italian navy destined to attack the Dardanelles; and the sportsmen or "durekdjis" are the Turkish officers and their men lying in wait at the Dardanelles. The tom-toms are the big guns and mines at the entrance to the Straits. At the shout of "Gelior! Gelior!" (It is coming! It is coming!) every heart in Turkey will beat with excitement, but, be it understood, not with fear. Whatever happens, the Turks will behave like men, and woe be to those who take it upon themselves to attack them in their haunts. My experience of the Turk is that he takes everything as a matter of course, and does not realise the importance of anything. This indifference is now serving him well, and, like the sportsman he is, he waits with impatience for an opportunity to meet his enemy on even terms.

Will the beaters drive the boars towards the sportsmen in wait, or will the boars beat back and content themselves with dispersing the beaters? Again, if enticed into the gorge, how many will be shot down, and at what expense to the sportsmen? Those are the vital questions.

THE PRESS ON THE NEAR EAST.

The Mixed Tribunals of Egypt.

The Near East played a prominent part in last Friday's *Times*, which was a special Empire Day number. The *Times* lately despatched a special correspondent to the Mediterranean, and his articles on Malta and Cyprus are of particular interest and importance at the present time, when those two islands are occupying such a large share of public notice. Special attention is paid to the questions of the economic decline of Malta and of the Cyprus tribute; while the rise of the Nationalist movement in both islands is dealt with in separate articles. The Trans-Persian and Baghdad Railway schemes are discussed in an article entitled "British Interests in the Middle East"; and two articles of importance on Egyptian affairs are "Savings Banks for the Egyptian Peasant" (which describes Lord Kitchener's scheme for helping the Fellah to cultivate habits of thrift) and "Egypt and the Mixed Tribunals," by a Legal Correspondent in Egypt.

The writer of the last-named article declares that "there is undoubtedly a strong feeling in the financial and commercial community that these Courts by no means afford that effective, rational, and speedy administration of justice which the public have a right to demand"; and he points out that the question of the Courts' efficiency is of great and practical moment, not only to those who dwell in Egypt, but also to the numerous and important financial and commercial houses in Great Britain and on the Continent who have vital interests in that country.

The Case for a Commission.

He points out many defects in the existing procedure of the Mixed Courts—chief amongst them the delay to which litigants are subjected—and gives illustrations, some of which are distinctly startling. And after reading his article most of his readers will agree with him in thinking that "great improvements can and ought to be made." He concludes:—

The time has come when the question of Reforms in the Procedure of the Mixed Courts should be exhaustively and systematically inquired into by a competent Commission.

A departmental committee will not suffice for this purpose. The able and hardworking lawyers, both British and of other nationalities, who act as the legal advisers of the Government would be the first to admit that in matters of procedure they are not competent to form a sound opinion without the assistance of judges and practitioners who have daily experience of existing defects. It may be objected that the appointment of such a Commission will only mean further delay and perhaps lead to no result. But would any other course be likely to be more rapid, or more efficacious? It is submitted, on the contrary, that a project of reform emanating from the Ministry of Justice and based upon individual opinions on isolated points would have far less chance of meeting with the approval of the Powers or of their representatives in the Court of Appeal than would a well-considered and comprehensive scheme resulting from the combined and concentrated efforts of a well-chosen body of Commissioners. But, however the object is to be achieved, there can be no two opinions as to the urgent need of reform in the procedure of the Mixed Tribunals, if the confidence and credit of the banking, insurance, manufacturing, and mercantile community in Europe is to be preserved for Egypt.

"South-Eastern Europe."

In the course of a leading article upon affairs in South-Eastern Europe which appeared in the *Morning Post* of the 23rd inst. the writer remarked:—

The Powers, broadly speaking, have never viewed the principle of nationality with any great sympathy except in so far as it directly concerned each one of them. . . The general principle on which each great Power acts is that of the promotion, direct or indirect, of its own interests, and in regard to South-Eastern Europe each great Power seems to think more of its own prospects in the shape of territory, of allies, or of trade, than of the welfare of the native population. The small States are not regarded as of great value as possible allies. It seems to be thought more useful to secure the favour of the Turks as a martial race than that of Bulgarians, Greeks, or Serbs. The Serbs are discontented because most of them have been absorbed into Austria-Hungary, and the rest seem destined to the same future. The Bulgarians are thought to be between the upper millstone of Austria and the lower one of Turkey, and the Greeks, rightly or wrongly, are too widely held to be of no account at all.

This article drew an interesting letter from M. Chedo Mijatovitch, the former Servian Minister in London, which appeared in the *Morning Post* of the 25th inst. M. Mijatovitch wrote:—

Unfortunately it is a fact that the great Powers seem to think that it is more useful to secure the favour of Turks than that of Bulgarians, Greeks, or Serbs, and that the small States of the Balkans are not regarded as of great value as possible allies. . . . In the circumstances of our days Great Britain, less than any other great Power, can afford to make such a miscalculation. No one has deeper sympathy with the patriotic endeavours of the Turks, young and old, to save their position in Europe than I have, but I cannot shut my eyes to the tragedy of their case: they will all die bravely and heroically for their country, but they will not save their country! . . . The Turks, with all their splendid qualities as a race, are losing ground in Europe; the Christian nations of the Balkans, with all their weak points, are gaining ground. The Turks cannot any longer be allies of Great Britain; the Balkan nations—Bulgarians, Greeks, Servians—are to-day and in the present political constellation of Europe natural allies of Great Britain, because their vital interests are going on parallel lines with the vital interests of the British Empire. Servia, Montenegro, and Bulgaria—leaving Greece aside—could bring into the field nearly 600,000 brave and well-trained and well-equipped fighting men, who would be at least a good match for 600,000 Turks, if these were to join a combination hostile to Great Britain. The Turks are still hesitating what choice to make. Speaking only for my own countrymen, the Servians, I say that in the present circumstances we have already made our choice, and in the case of a great conflict we could not do otherwise but range ourselves on the side of Great Britain.

It is also and certainly a fact that "the Serbs are discontented because Austria-Hungary has absorbed most of them." But I must make an exception to the further statement of your leader, viz., "that the rest of the Serbs seem destined to the same future." We Serbs have firm faith that a better future is in store for us, and that it will be secured by our own efforts, supported by our Slavonic brethren and by our friends, Great Britain and France. . . . And we wish our British friends to dismiss the disquieting notion that we, the Serbs of Servia, Montenegro, Old Servia, and Macedonia, are destined to be absorbed by Austria-Hungary. The political consciousness of the Serbs—wherever they may be—was never more vivid, nor the sense of our duty to live, and, if need to be, even to die, as a brave and liberty-loving nation.

NEAR EAST BOOKSHELF.

SCIENCE IN THE SUDAN.*

The first report of the Wellcome Tropical Research Laboratories issued in 1904 consisted of eighty-seven pages, and since then we have had others at intervals, until we now reach the fourth. When we mention that the present report is in two volumes amounting to 737 pages some conception may be obtained of the vast increase of work carried out since the early days of this important undertaking. In addition to the ordinary report, we are promised a "Second Review of Recent Advances in Tropical Medicine"—a first one having been issued in 1908. Even this, to the uninitiated, gives only a comparatively limited idea of all the work necessarily carried out.

When it is remembered what all real scientific research work means—the innumerable steps to be taken, processes to be carried out, results to be sifted and winnowed until they get narrowed down to the bedrock of possible facts which are worthy of consideration and record—we begin to appreciate the amount of labour and industry entailed in the production of these volumes.

The present volume A. is medical, while volume B. will be devoted to general science.

The work carried out at the laboratories is conveniently divided into research work proper and the ordinary routine work usual in connection with public health purposes. To show some measure of the extent of this latter branch it need only be mentioned that since the last report in 1908 some 1,800 examinations have been carried out in the bacteriological laboratory alone. A large and varied amount of special research work has also been carried out of much interest and importance.

The volume commences with a valuable article by Lieut.-Colonel Mathias on the question of sleeping sickness in the Sudan, which is illustrated by maps showing the distribution of the tsetse fly, and notes the administrative measures taken in the Southern Sudan to deal with the advance of the disease northward from Uganda, the Lado, and the Belgian and French Congo.

The question of animal trypanosomiasis in the Anglo-Egyptian Sudan is dealt with by Captain Fry, who writes an interesting and suggestive paper. He classifies the known trypanosomes into four main varieties which possess readily recognisable morphological characters by which they may be distinguished. He emphasises the desirability of adopting a systematic nomenclature, and enters exhaustively into the methods of differentiating trypanosomes.

Captain L. Bousfield contributes some notes on human spirochætosis, or relapsing fever, which are supplemented by Dr. Balfour, who writes at length in an article of great interest on this question of Egyptian relapsing fever. The director also contributes a long article on the spirochætosis of Sudanese fowls, in which he brings evidence to show that in all probability the avian spirochætosis of the Sudan is due to a special spirochæte to which he proposes to give the somewhat cumbrous but descriptive name of spirochæta granulosa penetrans.

Another article by the Director, of value more particularly to beginners in hæmatology, is devoted to Fallacies and Puzzles in Blood Examination, and more especially common deceptive appearances met with in tropical countries.

A paper by Captain Bousfield on the remarkable disease kala-azar, as studied in the Kassala and Blue Nile districts of the Sudan, gives at considerable length the result of an investigation carried out at the instance of the Sudan Government; while an even more exhaustive article by Captain Thomson gives the results of the investigation of the special commission of inquiry into the prevalence and cause of the disease in the Eastern Sudan. Particular parasites are described, also many interesting points noted regarding the disease—as to its probable mode of introduction, the means of infection, clinical course, and so on. But a good deal still remains to be worked out before an accurate and reliable knowledge of the disease is available.

We have also a paper on the alkalinity of the blood serum in kala-azar by Captain Archibald, which was carried out to ascertain whether any change occurred in the blood serum of patients suffering from this disease. In four cases of undoubted kala-azar the alkalinity was shown to be diminished. Though a specific drug has not yet been found for its successful treatment, this observation shows the desirability of exhibiting remedies which tend to increase the alkalinity of the blood. A case treated by "606" by Dr. Balfour and Captain Archibald gave inconclusive results.

Two cases of non-ulcerating "Oriental sore" are described by the director and Captain Thomson. This peculiar disease is apparently due to a parasite, and the evidence points to its being similar to Leishman's nodules.

Dr. Balfour gives us also a short account of two cases of veldt sore treated by autogenous vaccines—in the one a single and in the other a double vaccine being employed with satisfactory results. These cases are interesting from the clinical standpoint, though the scientific interest might have been increased if the usual opsonic determinations had been ascertained.

Further articles of interest by the director deal with "Fevers in the Sudan and Diphtheria in the Tropics," while Captain Archibald deals with four cases of pyrexia in two of which vaccine treatment was adopted, both results being satisfactory. Other papers by the director are one written in a popular manner on "Some Aspects of Tropical Sanitation," "Sanitary Notes," and a long and valuable one on "The Water Supply of Towns in the Tropics," chiefly from the bacteriological standpoint.

In addition, there are about a dozen shorter articles dealing with various animal diseases, veterinary notes, and miscellaneous notes, completing a volume of value and variety. We have endeavoured to give some slight idea of the extent and comprehensiveness of the work carried out by this the pioneer laboratory on the confines of civilisation. In venturing a final observation, it has to be remembered that the results of scientific research work—at first at any rate—are necessarily of a tentative character and of relative value. Before their absolute worth can be determined and they finally take their place as definitely ascertained facts they have to be tried, re-investigated, and again subjected to the crucible of criticism. No doubt when the subjects treated in this volume have undergone the further but necessary tests of time and experience, many of these opinions will be changed and modified. This, however, is a commonplace inherent in all work of this nature, and in no way detracts from the value or extent of the work carried out by this able group of investigators. We can unreservedly congratulate them on laying still another course of the foundations on which is yet to be raised the huge structure of tropical diseases.

The printing and illustrations are excellent, while the coloured plates are admirable specimens of their kind; and the whole forms a handsome and substantial volume which is a credit to authors and publishers alike.

* "Fourth Report of the Wellcome Tropical Research Laboratories. Gordon Memorial College, Khartoum." Volume A.—Medical. Andrew Balfour, Director.

Marlborough's

TRAVELLERS' PRACTICAL MANUAL of CONVERSATION.

In ENGLISH, FRENCH, GERMAN and ITALIAN (*in one book*).

Containing Travel Notes, Pronunciation, Classified Conversations for the Railway, Steamer, Customs, Hotel, Shopping. Sight-Seeing, Photography, Cycling, Motoring, &c., &c., Tables of Money, Weights and Measures, Dictionary of Words in Daily Use.

Red Wrapper, Round Corners, 1s.; Cloth, 1s. 6d.; Leather Tuck, net, 2s. 6d.

FRENCH TECHNICAL WORDS and PHRASES

An English-French and French-English Dictionary.

Containing Technical and Business Terms and Phrases used in Commerce, Arts, Sciences, Professions and Trades. With an Appendix of Tables of Money, Weights and Measures.

By J. A. STANDRING and C. A. THIMM.

GERMAN TECHNICAL WORDS and PHRASES

An English-German and German-English Dictionary.

UNIFORM WITH THE ABOVE.

By C. A. THIMM and W. von KNOBLAUCH.

16mo, Cloth, red edges, 2s. 6d. each; Bean Leather, gilt edges, 3s. 6d. each.

Sold by all ENGLISH and FOREIGN BOOKSELLERS.

For complete List write to the Publishers for No. 30 Catalogue, post free.

CURRENT COMMENTS.

Lord Kitchener has indeed initiated quite a new departure. It is many years since the British Agent made tours of inspection through the outlying districts. Zagazig Mansura, Tanta, Minia, Beni-Suef, Assiut have all been visited recently. Even Lord Cromer, who held the reins of administration so tightly in his own hands, did not make such journeys into the interior. It is evident that Lord Kitchener, whilst he requires the existence of an efficient inspectorate, is not content with that alone. He realises the value to himself and to the workers of personal inspection, and the great benefits of close contact with the provincial population. His visit to Lower Egypt was ostensibly to see what progress had been made in the drainage works. That fact alone should act as an incentive to those in charge of the operations and to the men under them —and no doubt he intended it as such.

***

But it is also evident that the British Agent meant to take this opportunity of affording the natives an assurance that he is very much concerned with their welfare. The free manner in which he conversed with the notables and even commoner folk and the numerous occasions he—or at his instigation the Mudirs—took the trouble to explain to the omdehs and sheikhs the motives and objects of the schemes which are being put into effect for the benefit of the "fellah" must have gone a long way to confirm the opinion that the one-time Sirdar wished them well. The almost regal manner in which he has been received everywhere, and the alacrity with which the natives flocked to meet him and presented their petitions to him show the respect—one might almost say affecton—with which they regard him. There is no doubt that whilst maintaining the iron hand for which he is so justly famous, Lord Kitchener understands exactly in what directions the velvet glove may be shown. The great transformation which has come over the political face of Egypt during the past eight months is proof positive of the wisdom of his policy.

***

The report of the Commission of Inquiry into the affairs of the Alexandria municipality does not make pleasant reading. It is apparent that the complaints which have been made so frequently during the past year or so are only too justified. Scarcely any of the branches of the service are above approach. It is a most unfortunate state of affairs, for, coming as it does at the present juncture, when projects of extended local government are under discussion, it makes one feel decidedly uneasy as to the advisability of allowing those extensions to come into being. Especially from a national point of view is it regrettable that the doyen municipality, one under the control of an Englishman, should have been found so defective. However, the promptitude with which the Commission of Inquiry was set to work immediately tangible evidence was forthcoming that something was wrong, and the drastic measures that are being taken, lead one to hope that an example has been given to the junior municipalities. It will, however, be necessary to institute a much closer supervision of municipal affairs in future. We think we can rely on the British Agent to see that that is done.

***

Duelling is an institution that dies hard, in spite of the ridicule that attends most "meetings of honour" nowadays. Such meetings are usually very harmless affairs, and one that took place recently in the neighbourhood of Alexandria would appear to have been no exception to the rule. The *affaire* took place between a rather well-known baron and a certain legal gentleman, as the result of an incident that occurred at a meeting of the Municipal Commission, and it resulted in the legal luminary being "very slightly grazed" on the arm after two hours' "hard" fighting!

***

The intention, with which the Egyptian Government is credited, of forbidding by law the transport of unginned cotton from Upper Egypt to Lower Egypt is a very welcome step, and one which must assuredly commend itself to the Lancashire spinners and all those interested in the welfare of Egyptian cotton. Up to now it has been a favourite habit of the dealers to bring the Ashmuni—the Upper Egypt variety—down into the Delta and mix it with the Afifi or Lower Egypt variety. The result was that the mixture was sold as if it were entirely a Lower Egypt cotton, for it was well-nigh impossible to detect the inferior strain until it was used for spinning. Since, of course, this tended to throw discredit on the higher varieties of Egytian cotton, it was high time that this scandalous practice was put a stop to. It may mean that owing to this interdiction the ginners will be forced to increase the number of their factories south of Cairo; but they ought not to complain since the maintenance of a high standard for Egyptian cotton should be as much in their own interests as in that of the fellaheen. At any rate, we wish the Egyptian Government every success in the putting into effect of their project.

***

The large number of Danes, Swedes, and Norwegians who distinguish themselves in the field of geographical exploration seems to show that the old spirit of adventure and of restlessness still flourishes in the North Lands. And these adventurous descendants of the Vikings are as ready to face the perils of the sandy and waterless desert as they are to risk life and limb amongst the icefields of the Polar regions. M. Barclay Raunkiaer's travels in Eastern Arabia afford the latest example of this readiness. Despatched last autumn by the Royal Danish Geographical Society on a tour of exploration in that little-known district, he arrived at Muskat, in Oman, at the beginning of this month, and is now on his way to Copenhagen, having, according to the latest telegrams received, succeeded in carrying out the work entrusted to him in the most satisfactory manner, in face of considerable difficulties. He is reported to have mapped several hitherto unexplored districts, and to have gathered much information of value in the departments of anthropology, zoology, and botany.

***

We await details of M. Raunkiaer's achievements and adventures with lively interest, for Eastern Arabia is still an almost unknown country, concerning which one hears most contradictory reports. But anybody who has visited the land at all is sure to have heard stories —quite unprintable mostly—of the adventures that have befallen the few Europeans who have from time to time ventured to penetrate even a little way into the interior. And what one hears is calculated to make one think highly of M. Raunkiaer's courage—and envy him his good fortune.

***

The U.S. Consul at Aden does not approve of the bathrooms in that town. In a report he writes: "We use washtubs for bathing purposes, and for shower baths we use an ordinary tin bucket with a sprinkler soldered in the bottom and suspended from the ceiling. Thus a shower arrangement costs only 50 cents." Similar arrangements are common throughout the East, and, though they are decidedly primitive, they are by no means ineffective. One rather suspects that the Consul is anxious to see a change in the matter of the Aden bathroom less because he finds it inconvenient than because, like a good representative of his country's commercial interests, he is anxious to see the introduction into Aden of "American plumbing and bathroom facilities," to which he refers in his report.

***

Apropos of the Rousseau bicentenary, it is interesting to note that the great Jean-Jacques was once, if only for a short time, and then not very intimately, associated with the Near East. This was when, as a young man, he acted as secretary to an Archimandrite of the Greek Church and was employed in collecting subscriptions for the 'restoration" of the Holy Sepulchre.

***

But if Rousseau's own connection with the Near East was of the slightest, the same cannot be said of other members of the family. From particulars gathered by M. Robert Rousseau it appears, indeed, that they have been peculiarly susceptible to the charm of the Orient. Thus Isaac, the philosopher's father, who was a watchmaker, in 1705 went to Constantinople and obtained an appointment as watchmaker-in-ordinary to the Sultan's Seraglio; and the same year Jacques, a first cousin, who was also a watchmaker, managed to get an appointment on the staff of a diplomatic mission to Persia, where he eventually settled at Ispahan as chief jeweller to the Persian Court.

***

François Xavier, son of the Ispahan jeweller, and second cousin to Jean Jacques, was French Consul at Baghdad and at Basrah, married an Oriental wife, and even when he visited his own country clung to the wearing of Oriental robes. He died at Aleppo in 1808, at the age of seventy. His son, Louis, followed in his footsteps, and was French Consul at Baghdad, Basrah, Teheran, Aleppo, and Tripoli; and of Louis's four sons, three served with some distinction in the consular service: Antoine was Consul at Jeddah; Alphonse, Consul-General at Tunis, and Amédée served as interpreter on the staff of the Duc d'Aumale in Algeria.

***

The recent death of Osman el Mahdi, or, to give him the name by which he was known before he was converted to Islam, Smallwood, recalls the Italian count of Hichens's famous novel, "The Garden of Allah." Mr. Hichens led his puppet to the Mohammedan fold through the charm of the great open desert and the simplicity which characterises the Moslem life and faith; it was precisely similar causes which influenced Mr. Smallwood to his change of faith. A man of more than average height, and possessed of an athletic body and energetic mind, there was nothing in his outward appearance suggestive of the keenly impressionable soul within; yet no one who came into personal contact with him could doubt the sincerity of his faith. The uplifting of Islam in a moral sense had become his ideal, and he steadfastly rejected all the pecuniary considerations which might have been his had he returned to the religion of his family. As it was, he lived more or less from hand to mouth, doing journalistic work when he had come to the end of his resources, travelling in little known lands when he had replenished his purse. Such examples of Englishmen embracing the life and faith of Mohammedanism are rare, but they are always interesting.

PERSONAL & SOCIAL

Lord Kitchener, on board the cruiser "Hampshire," arrived at Malta on Wednesday, and on landing proceeded to the Grand Master's Palace, where he was received by the Governor, whose guest he will be during his stay in the island.

Mr. Churchill and Prince Louis of Battenberg arrived at Malta on board the "Enchantress" shortly after Lord Kitchener.

Baron Marschall von Bieberstein was received in audience by the Sultan on Wednesday and presented his letters of recall. On Thursday Sir Gerard Lowther, the British Ambassador, gave a farewell dinner; to-day Assim Bey, Minister for Foreign Affairs, and to-morrow the German colony will entertain the retiring Ambassador. He will leave Constantinople on June 3, and is expected in London on June 20.

The Turkish Ambassador called at the Foreign Office and expressed the condolences of the Sultan and of the Turkish Government on the death of Prince George of Cumberland.

The King has approved the appointment of Admiral Sir E. S. Poë, G.C.V.O., K.C.B., to be his First and Principal Naval Aide-de-Camp in succession to Admiral Sir Lewis A. Beaumont.

H.E. Djavid Bey, of the Turkish Embassy, arrived in London on Wednesday from the Continent.

The King has approved of the appointment of Major-General John Stewart Scott Barker, C.B. (Commanding Royal Artillery, Malta Command), to be an Official Member of the Executive Council of the Island of Malta.

Captain G. Ogston, 1st Gordon Highlanders, is to be appointed Deputy Assistant-Adjutant and Quartermaster-General at Malta.

Lieut. N. W. Napier-Clavering, 62nd (Fortress) Company, Royal Engineers, at Weymouth, has been placed under orders for Malta.

The King of Roumania has conferred the distinction of Officer of the Star of Roumania on Mr. Walter Winans.

Mr. John Ridgely Carter, formerly of the American Diplomatic Service, with Viscount and Viscountess Acheson, left London last Friday for Paris.

The Khedive has conferred on Lord Edward Cecil the First-Class Mejidieh.

Sir Reginald Wingate is expected in Cairo on Sunday. He will sail from Egypt on the 10th for Trieste and Carlsbad. In the latter spa he will spend three weeks, accompanied by Slatin Pasha, who will later proceed to England with the Sirdar.

The Khedive has conferred the First-Class Mejidieh on Bird Pasha, member of the State Domains.

Sir William Willcocks has left Egypt for England. On June 10 he will lecture before the Royal Geographical Society upon "The Garden of Eden and its Restoration."

The Khedive is due to arrive at Constantinople on June 3, and will be accompanied on his journey to Europe and England by Hafiz Effendi Awad, of the Maieh Sanieh.

Saad Pasha Zaghloul will leave Egypt for Europe on June 5.

Lord Oranmore and Browne has been appointed a Knight of Grace in the Order of St. John of Jerusalem in England.

A contemporary states that Sir John Maxwell has bought the estate of the late Mr. Beyerle, formerly manager of the Credit Foncier Egyptien, situated at Garden City, Cairo.

H. E. Hunter Pasha, Director General of the Egyptian Coast Guards Administration, has gone to Sollum to take command of the garrison there, replacing Miralai Purvis Bey, now on leave.

Bernard Pasha is expected in England in June or the beginning of July.

Our Belgrade corespondent writes:—"M. André Nikolitch, one of the founders of the Radical Party, and repeatedly a Cabinet Minister, has been elected President of the Skupschtina, a position similar to that of Speaker in the British House of Commons.

On Tuesday General C. T. Aitchison, who took part in the Persian Expedition of 1856-57, entered upon his ninetieth year.

Major Blakeney, Sub-Manager of the Railway Administration; Mr. Willing, Chief Inspector of Irrigation in Lower Egypt; Mr. Tottenham, Inspector of Irrigation in the Sudan; and Mr. Anthony, Inspector of the State Lands, have been honoured by the Khedive with the Second-Class Mejidieh.

The Egyptian War Office Gazette announces that the Khedive has conferred decorations as follows upon the officers named for their services in connection with the operations against Gebels Tagoi and Katla in 1910:—Second Class Mejidieh on El Lewa Asser Pasha, Adjutant-General commanding the force. Third-Class Mejidieh on El Kaimakam J. L. Conry Bey, D.S.O., Assistant Adjutant General, Staff Officer and Column Commander; El Kaimakam R. S. Wilson Bey, Sudan Government, Political Officer; El Kaimakam R. M. Heath Bay, D.S.O., Officer Commanding Camel Corps. Fourth-Class Osmanieh on El Kamakam B. H. S. Romilly Bey, D.S.O., Camel Corps. Fourth-Class Mejidieh on El Bimbashi N. B. de L. Forth, Camel Corps; El Bimbashi R. G. Anderson, Medical Corps (now Temporary Kaimakam).

It is stated that Dr. Granville, of the Public Health Department, will in all probability be appointed Administrator of the Alexandria Municipality, in place of Mr. Chataway.

The *Gazette* announces that the King has granted permission to Victor Harari, Pasha, C.M.G., to wear the Cross of Officer of the Legion of Honour conferred upon him by the French President, and to Joseph Breeden McNamara, Esq., Chief Electrical Engineer in the Egyptian Railway Department, permission to wear the Insignia of the Fourth Class of the Imperial Ottoman Order of the Osmanieh, conferred upon him by the Sultan of Turkey.

Field-Marshal Lord Kitchener has accepted the honorary colonelcy of the New Zealand Engineers. His Lordship is colonel-in-chief of another Colonial corps—the Natal Carabiniers.

The death is announced of Sir Lewis William Molesworth, F.R.G.S., who was well known in Egypt, and had many friends in that country.

On the 24th inst. Mr. and Mrs. Robert Llewellyn Devonshire celebrated their silver wedding.

The marriage of Mr. St. John ffrench Blake, 21st (Empress of India's) Lancers, to Miss Doris Tweedie, of Port Said, will take place at Holy Trinity Church, Brompton, on June 1.

Mr. H. O. Goldie is on a short visit to London from Egypt.

Mr. Suter, the oldest British resident in Tantah, is about to leave Egypt to take up a post in the London office of the Egyptian Markets, Limited, of which he is now the inspector-general in Egypt.

Captain C. G. Jeffery, Yorkshire Regt., has been taken on the strength of the Egyptian Army with the rank of Bimbashi, vice El Bimbashi Lushington, struck off and posted to the 3rd Battalion.

El Bimbashi M. B. Savage, Blue Nile District, has been transferred to 14th Sudanese, and El Bimbashi C. Graham, 16th Battalion, to Upper Nile District.

The death is announced of Bimbashi F. U. B. Kirwan, of the Supplies Department, Egyptian Army. The deceased officer took part in the recent operations against the Beirs, and it is thought probable that the privations he underwent during the operations were largely responsible for bringing about the attack of enteric fever to which he succumbed.

Mr. René Quinton, the president of the French National Flying League, who was at Cairo in the season, is paying another visit to Egypt. During his stay the Egyptian section of the National Flying League will hold its annual general meeting, at which he will be present.

Bimbashi Pardo, who has just been promoted from Sagh, has been appointed assistant director of stores to the Coast-guards' Administration at Alexandria.

Mr. W. C. Hornblower is severing his connection with the Corporation of Western Egypt to take up a Government appointment.

The death was announced last Saturday of Lieutenant-Colonel G. T. Carré, at Downton, Wilts, as the result of heart failure following a bicycle accident. Colonel Carré served in the Egyptian expedition of 1882 and received the medal with clasp and bronze star.

The Rev. Constantine Pagonis, Archimandrite of the Greek Orthodox Church in London, has received the Order of Commander of the Holy Saviour from the King of Greece for the services he has rendered to the Greek Church and Greek Community in London and in Alexandria, where he was for many years theological professor at the community's school.

DOMESTIC ANNOUNCEMENTS

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

TOTTENHAM.—On the 22nd inst. at Ormesby House, Cromer, the wife of P. M Tottenham, Inspector-General of Irrigation in the Sudan, of a daughter.

HOWES.—On May 25, at Zeitoun, Cairo, the wife of Sidney G. Howes, 21st Lancers, of a son.

DEATH.

SASSOON.—On the 24th inst., at 25, Park Lane, W., Sir Edward Sassoon, Bart., M.P., aged fifty-six.

PROGRESS IN EGYPT.

Especial interest attaches to the annual Report on Egypt and on the Sudan published last night. It is the first that has been presented to the home Government since Lord Kitchener took over the administration of the Nile Valley; and the people of Egypt, no less than Englishmen at home and abroad, were keenly interested to see what the new Agent-General would have to say regarding the country over whose destinies he had been called upon to preside. In any circumstances such a report commands the attention of all who are interested in the affairs of the Empire, but its publication at this moment, coinciding, as it does, with the meeting between its author, the Prime Minister, and the First Lord of the Admiralty at Malta, invests it with increased importance to the student of international politics. Of any condition or proposed change of sufficient importance to necessitate such a meeting, the report, however, contains no hint. Following the precedent set down by Lord Cromer during his long term of office, Lord Kitchener has devoted his time to the preparation of a comprehensive survey of the existing conditions of Egypt and the Sudan at the present day, together with such remarks and arguments as become necessary in support of the text. He gives us no definite statement such as was expected concerning the abolition of the Capitulations or matters of kindred immensity. He merely expresses the hope "that some alleviation of the tutelage in which the country is still held may be the outcome of a protest made by Egypt at the last International Sanitary Congress, which was well received by the experts assembled in Paris." This paragraph occurs in the "Introduction" to the Report; it is a beginning, and from our knowledge of Lord Kitchener we imagine that Egypt may now assume with confidence that a definite move will shortly be made to relieve her of the irritating control imposed upon her by the Capitulations. In regard to the proposed reorganisation of the Mixed Tribunals, the British Agent writes with more decision and directness of purpose. He considers that these courts are no longer adequate to deal satisfactorily with the large volume of business which comes before them, and, in urging the desirability of an integral reform, expresses the opinion that little advance can be made until that becomes possible. There can be no doubt at all that this reform is one of the most pressing necessities in Egypt at the present day. The existing system satisfies nobody, and it is only a matter of surprise that these tribunals should have escaped attention so long.

In reading through the introductory pages of this Report it is hard to realise that it concerns the same country and the same people as those reported on by the late Sir Eldon Gorst shortly before his death. The circumstances are, however, entirely different. Sir Eldon's Report was produced after a protracted experimental period, during which the British Government had vainly striven to direct the minute details of Egypt's internal administration from Westminster, and it was not therefore surprising that the predominant note in the late Consul-General's most recent record was one of failure. Lord Kitchener has, on the other hand, been granted an absolute freedom of action —without such freedom he would certainly never have accepted the position—and it is gratifying to find in the statements contained in his Report a complete vindication of the prophecy, keenly debated at the time of his appointment, that a firm hand was all that was necessary to Egypt's regeneration. The record of internal events for the past year is an eminently satisfactory one, and for the first time for some years we can contemplate the future of Egypt in a spirit of healthy optimism. Lord Kitchener pays a well-deserved tribute of praise to the Egyptian people for their self-restraint in face of the strong provocation of Moslem susceptibilities during the war. This he evidently regards as one of the most hopeful features in the Egyptian character; for in a later passage of his Introduction, after reporting that "political feeling in other respects has lately become much calmer, and that the consideration of practical reforms for the good of the country has apparently become more interesting to the majority of the people than discussions on abstruse political questions which are unlikely to lead to any useful result," he returns again to the subject in the following passage:—"The development and elevation of the character of a people depends mainly upon the growth of self-control and the power to dominate natural impulses, as well as on the practice of unobtrusive self-reliance and perseverance, combined with reasoned determination. None of these elements of advance are assisted in any way by party strife." In this remarkable sentence lies the whole precept which must perforce be mastered before any dream of self-government can materialise, for the strength of primitive man is as nothing against the reasoned thought of generations. It is certainly a hopeful sign for Egypt that the ludicrous agitation of the pseudo-Nationalist party has been permitted to sink so far into obscurity as it has done during the past year, and if this senseless and unmeaning party advertising can be replaced, as Lord Kitchener believes it can, by the "consideration of reforms for the good of the country," then half the battle is won.

It is barely a year since the Egyptian and many London papers were filled with references to the question of Coptic grievances. Exaggerated as they undoubtedly were, there was still more than a modicum of truth in the allegations which were brought forward against the Government by the Coptic party, and again in this regard it is satisfactory to learn that the outward agitation has not only ceased, but that the Consul-General has received no complaints from members of the Coptic community regarding educational grants or any other matter. Lord Kitchener's prompt action regarding one of their grievances, that relating to the settlement of family disputes, is probably mainly responsible for the quiet which has followed it, but quite apart from that we are convinced that the spirit of unrest which was abroad in Egypt during the disastrous experimental period to which we have alluded was in a great measure responsible for the Coptic agitation. The two points which Lord Kitchener insists upon as being of paramount importance to the future development of the Egyptians are improved agricultural conditions and educational progress. In reference to the suggestions which he advances regarding the former necessity, we need only refer here to the fact that, in common with most authorities on Egypt, he places much of the cause of failure upon the too frequent rotations of cotton crops. It is well known that the question of education is one to which the new Consul-General has devoted a considerable amount of time since his arrival in Egypt, and we thoroughly endorse his views upon the subject. He urges the necessity of practical, as opposed to mere "bookish" learning for the fellaheen, and calls attention to two interesting developments in the educational system of Egypt. The first is the introduction of a system of commercial education in order to train Egyptian students to fill the many "honourable and lucrative" positions in civil life which have hitherto been closed to them; and the second, decided upon in principle, but not yet actually in practice, is "the institution of a proper system of Civil Service examinations for entrance into Government service." Taken as a whole, it is probable that this Report will be received with as much satisfaction in Egypt as in England. The two educational developments which we have quoted denote the interest which Lord Kitchener bestows upon the agricultural masses of the country no less than upon its more educated elements, and education is the stepping stone to power. The Report shows a renewed confidence in British administration among the Egyptian people, and while couched in definite and assured language, the justice and moderation of Lord Kitchener's reasoning must carry its appeal to all sections of the community.

LORD KITCHENER'S REPORTS.

The publication of the annual Reports by His Britannic Majesty's Agent and Consul-General on the finances, administration, and condition of Egypt and the Sudan is an event looked forward to with the utmost eagerness on the part of those who are interested in these countries, and not least on the part of the educated natives. That of Lord Kitchener, which has just been published, is couched in clear and precise language. It contains no disclosure of a startling character. There is no scheme for the abolition of the Capitulations or the reorganisation of the courts of justice. To this extent it may disappoint those who expected his lordship's advent to Egypt to be the immediate precursor of revolutionary changes. There is, however, much of interest in the report, and especially so are the casual remarks upon policy which it contains.

The report begins with a general introduction, in which Lord Kitchener praises the restraint of the Egyptian people, despite the excitement caused by the war and the warm and widespread sympathy for the Mohammedan combatants. He adds: "I am glad to be able to report that political feeling in other respects has lately been much calmer, and that the consideration of practical reforms for the good of the country has apparently become more interesting to the majority of the people than discussions on abstruse political questions which are unlikely to lead to any useful result." Of the political factions he writes:—

Whatever the value of a party system may be in Western political life, it is evident that its application to an intensely democratic community, the essential basis of whose social system is the brotherhood of man, combined with respect for learning and the experience of age, is an unnatural proceeding, fraught with inevitable division and weakness.

The development and elevation of the character of a people depends mainly on the growth of self-control and the power to dominate natural impulses, as well as on the practice of unobtrusive self-reliance and perseverance, combined with reasoned determination. None of these elements of advance are assisted in any way by party strife. Calm and well-considered interest in political affairs is good for both the governed and those who rule, but fictitious interest, generally based on misrepresentation and maintained by party funds and party tactics, does nothing to elevate or develop the intelligent character of an Oriental race.

There is ripe wisdom as well as eloquence in these words, nor are they applicable solely to Eastern peoples.

The disappearance of the strained relations between the Copts and Moslems which obtained in the early part of 1911, and which resulted in the "Congresses," is referred to with commendation; and in another part of his report Lord Kitchener mentions that he has had no complaints from the Coptic community regarding their treatment by the provincial councils in relation to the apportionment of educational grants or to other matters.

Agriculture.

Lord Kitchener records his belief that "The future development of the vast mass of the inhabitants of Egypt depends upon improved conditions of agriculture, which, with educational progress are the more essential steps towards the material and moral advance of the people." Accordingly these topics are dwelt upon at considerable length. As regards the former Lord Kitchener says:—

Owing to the fertilising Nile flood, the land, though in some places water-logged, remains as good as it ever was, ready again to return abundant results to careful cultivation. Certain defects have, however, temporarily reduced the productive qualities of the soil. Not only the urgent necessity for drainage works . . . but the want of cattle for ploughing in the Delta have been much felt. There has been a decrease of 250,000 animals through disease during the last seven years, although the cultivated area increased by a similar number of feddans. Other factors which have reduced the yield are the too frequent rotations of cotton crops, and the want of space allowed between the plants. When these shortcomings have been successfully rectified we may confidently look forward to the return per feddan being as good as it was in years gone by.

For the indebtedness of the fellah Lord Kitchener considers the remedies to be the spread of education, the extension of savings banks to the villages (already put into practice), and the establishment "of cotton markets through the country, where means for accurate weighing under Government control will be provided, and where the price of cotton will be daily posted," so as to prevent the fellah being defrauded by the small merchants to whom he sells his cotton. This last suggestion, it seems to us, requires careful consideration as to how it is to be put into practice, for it seems to open up a field for the practice of fraud by the officials employed and by those who read the returns to the illiterate fellaheen.

Education.

In regard to education, the "very interesting 1910 experiment" of handing over local education to the recently constituted provincial councils is discussed, and the following interesting remarks are made:—

There is no doubt that illiteracy places the fellah at a serious personal disadvantage in his mutual relationships in life, and impedes at every step the economic and social development of the country. When the conditions of life were still simple, illiteracy was not perhaps felt as a serious drawback. Modern changes have, however, brought the agriculturist, trader, and workman increasingly into contact with the more highly educated sections of the community, thus making larger demands on their intelligence and capacity, and placing them amongst surroundings in which their illiteracy is an ever-growing disability. Valuable elements of national advancement can be obtained from even a little learning, in addition to the discipline which the character and the intellect undergo thereby. One of the worst features of the elementary education hitherto supplied has been that it was restricted so largely to the cultivation of memory. An instruction that is merely "bookish" leaves some of the most useful faculties of the mind undeveloped. Manual exercises train the eye to accuracy in observation, the hand to skill in execution, and the mind to a sense of the importance of truthfulness in work. They cultivate habits of diligence, neatness, and attention to detail, and quicken the general intelligence. What seems most required for progress in this direction is to evolve the best type of rural school. . . . Before leaving the question of education, I should like to draw attention to two interesting developments in the educational policy of this country. One is the commencement of a system of commercial education. Many positions in civil life, both honourable and lucrative, have hitherto been practically closed to Egyptians educated in their own country by their lack of knowledge in this respect.

The other, which, though decided upon in principle, has not yet been actually put into force, is the institution of a proper system of Civil Service examinations for entrance into the Government service. It is hoped that this reform will both raise the intellectual standard of the officials and remove any suspicion of favouritism which, however unjustly, may have existed.

The Capitulations.

The reference to the Capitulations is of the most guarded nature. Lord Kitchener hopes "that some alleviation of the tutelage in which the country is still held may be the outcome of a protest made by Egypt at the last International Sanitary Congress, which was well received by the experts assembled in Paris."

Judicial Reforms.

As regards the reform of mixed justice Lord Kitchener entirely concurs with the view of the Judicial Adviser, recently set forth in these columns, that an integral reform is desirable, and that little advance can be made till that becomes possible.

Such are the chief features of Lord Kitchener's "Introduction" to his Report on Egypt. They indicate a practical mind working for practical results by practical methods. They also reveal that beneath and behind all are a profound knowledge of the conditions of the problems with which he deals, and a conception of political philosophy that is at once subtle and simple.

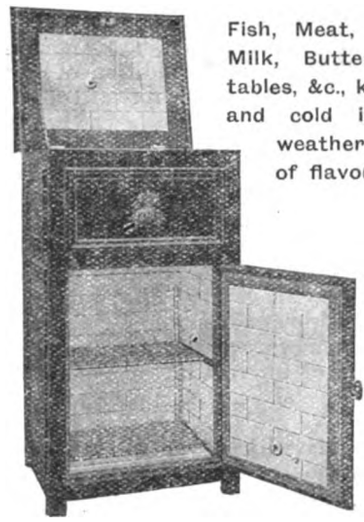
KENT'S
KNIFE CLEANING MACHINES

IMITATED BUT NEVER EQUALLED.

Unsolicited letters state that these machines have been IN USE WITHOUT REPAIR

59 years 1846/1905 in Sunderland,
55 years 1850/1905 in South Wales,
53 years 1853/1906 in Victoria, B.C.



The experience of 60 years enters into the construction of every machine. They save time and labour and do not injure the knives. Prices from 21s.

Over 300,000 in use throughout the world.

Prize Medallists in 1851 and still Supreme in 1912.

All three been in service a long time together.

Fish, Meat, Poultry, Game, Milk, Butter, Fruit, Vegetables, &c., kept dry, sweet, and cold in the hottest weather, without loss of flavour.

SINGLE.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The information published on page 126 to the effect that the Egyptian Government intend devoting part of the water power held by the Assuan Dam to the manufacture of nitrates, will be welcomed by all who are genuinely interested in the country's economic welfare. Years ago the King of Spain, in an informal speech, said that he did not only wish to be known as the first citizen of his kingdom, but as its "first agriculturist." I cannot help thinking of Lord Kitchener in Egypt when remembering Don Alfonso's words. For surely, in the nitrate scheme, as in so many others, we can trace our Agent-General's influence, especially as regards the rapidity with which the project has evolved from being a mere thought to something definite and immediate.

***

Two circumstances will have induced the Government to find means for insuring an adequate supply of nitrates for Egypt's soil, the first being the increasing demand for fertilisers, and the second the continual adulteration by unscrupulous merchants of the chemical manure sold to the fellaheen. It is on record that plaster and salt have been sold to unsuspecting farmers as fertilisers! The Government recently took action in the matter and employed the organisation of the Egyptian Markets as distributing agents for the bona-fide article, and doubtless the same company's good services will continue to be in request after the installation of the factories below Assuan.

***

I am reminded, in connection with the manufacture of nitrates, of an article on "Mining in Egypt" which appeared in THE NEAR EAST on February 16 last. Mention was there made of the phosphate deposits on the banks of the Nile and also on the shores of the Rea Sea, especially at Safaja, 240 miles to the south of Suez. Phosphates, it will be remembered, are also an important ingredient of chemical fertilisers, and, under the circumstances, it is more than likely that an impulse will shortly be given to the exploitation of these valuable deposits. It has been contended that for the possession of the valuable phosphate layers and sulphur deposits of Tripoli Italy went to war with Turkey. This will give an idea of the value of phosphates in modern agriculture. As for sulphur, in Egypt it is, at least, known to exist at Jemsah, and perhaps in other localities as yet unsurveyed.

***

A last remark in connection with the Egyptian Government's nitrate factories. Installations—for the generating of electricity, as well as those of a more specialised kind—will be required. Here, then, is an opportunity for the British machinery exporter. He must keep his eyes open, and if there is a man on the spot, so much the better.

***

The same warning or word of advice can be applied as regards the drainage works already initiated in the Delta. Machinery, such as pumps, etc., will be in almost immediate demand, not only for the canals, but also for the draining of Lakes Mariut and Borollos. The inviting for tenders is to be expected at any moment, as I have been authoritatively informed. More need not be said.

***

I am pleased to see the announcement that the Eastern Bank has now opened its Baghdad branch. THE NEAR EAST was the first to refer to the new venture and to wish it every success. Doubtless it will create a strong influence in British and Indian trade with Mesopotamia, because, alluding to an axiom, trade develops where banking facilities exist. The Imperial Ottoman Bank has already a long-established branch at Baghdad, and together, the old and the young will be able to give an impetus to our trade in the coming city of the Middle East. Two banks are not *de trop*, considering that Germany is striving her hardest to convert the market into a dumping-ground for her own products.

***

In last week's Constantinople Business Letter our Special Trade Correspondent ruthlessly exposed certain irregularities in connection with the conducting of adjudications in Turkey. Among other things, it was pointed out that the notice given "is much too short to permit of correspondence with home firms." Coming from the East, where time is proverbially, at least, of no account, this undignified hurry is suspicious. Moreover, it is not limited to Turkey. Mr. C. J. Cooke, our Consul at Piræus, complains in his report just published of a similar hustle, quite un-Oriental, in Greek notices. "It frequently occurs," he writes, "that not more than a week elapses between the appearance of the *Government Gazette* and the date for the submission of tenders. This is especially so with reference to yearly supplies for the various services. Certain agents are aware of the approximate dates when supplies will be required, and take their measures accordingly, but so far as general competitors are concerned, the *Government Gazette*, as a source of information, is valueless. In the case of contracts for public works, more time is given, but the original specification is frequently incomplete or faulty, so that further details must be obtained before a definite offer can be made."

***

In other words, the notice is so short (or incomplete) that there is, in the majority of cases, "no time for British manufacturers not already represented on the spot to compete." Surely this is worth remembering! Incidentally, it might be the subject of friendly diplomatic representations.

***

With reference to the British Cotton Growing Association's decision to appeal to the Government for a £1,200,000 loan to the Sudan (mentioned at length in last week's issue of THE NEAR EAST), the London correspondent of the *Manchester Guardian* states that the decision "was come to only after it had become known that the illness of the late Sir Julius Wernher had assumed a form from which recovery was considered doubtful by the doctors. Mr. J. Arthur Hutton, chairman of the Council of the Association, had for some long time been in private treaty with Sir Julius about cotton-growing in the Sudan, and had greatly interested him in the scheme. As a result Sir Julius Wernher promised that on his recovery he would be prepared to lend considerable financial assistance to the project."

***

I sincerely trust that the death of Sir Julius Wernher, however regrettable, will not prove an irreparable loss to the B.C.G.A.'s epoch-making scheme.

***

"E. F.," in last week's issue of THE NEAR EAST, refers at greater length than I have done to Germany's advance in Egypt at our expense. He attributes it to our slackness, or what we might call "the conservatism of our trade methods." To supplement the analysis of this psychic state, as made by "E. F.," I will quote an instance that came under my personal notice:—The agent of a British firm was approached with a large order for machinery, the only stipulation made being that, instead of the usual red paint covering the exposed parts, a dull green should be used. The agent forwarded the order home and received the following reply:—"We have always found that red suited our customers, and see no reason why we should comply with your request." The order was finally placed with a German firm.

***

While on the subject I should like to point out that not only is the German more *complaisant*, but, being a young competitor, he is more energetic, more obstinate and tireless in his attempt to wrest new markets from us than we are in retaining them. It is therefore not surprising that in Cairo, for instance, the most thorough (and perhaps the only really patriotic European paper in Egypt) should be a German daily. It is, from a British point of view, lamentable. But enough—I have no wish to advertise Germany, and consequently the less said the better.

***

The U.S. Consul-General at Constantinople, Mr. G. Bie Ravndal, estimates the annual exportation of canary seed and linseed from Turkey at £200,000, and gives it as his opinion that "hempseed could likewise be developed into an important part of Turkish trade, and is only waiting some kind of organisation." In Central Asia Minor, near Urfa and Severek, there are rich plains covered with hemp. It is also cultivated at Jaffa, Damascus, near Antioch, and in the vicinity of Erzerum.

***

The annual report on the trade and commerce of Beirut and the Coast of Syria was published yesterday by the Board of Trade. Reference will be made to the contents in the next issue of THE NEAR EAST.

***

Messrs. Henry Simon, Limited, of Manchester, have received an order for the reconstruction of a flour-mill plant in Roumania, the requisition including wheat-cleaning machinery, roller mills, plansifters, etc.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - - £1,500,000.
Paid up Capital - - 500,000.
Reserve - - - - - 640,000.

The Bank undertakes every description of Banking Business on most favourable conditions.

BANK OF ATHENS.

(Incorporated in Greece.)
CAPITAL FULLY PAID - - Dr60,000,000
RESERVE FUNDS - - Dr10,480,000
Head Office: ATHENS.
London Office: 22, Fenchurch Street, E.C.
Branches:

GREECE: Piræus, Patras, Syra, Calamata, Tripolitza, Volo, Larissa, Agrinion and Carditza.
CRETE: Canea, Candia and Rethymo.
TURKEY: Constantinople (Galata, with Agency at Stamboul), Samsoun, Trebizonde, Kerassunde, Bafra, Mersina, Smyrna, Adana, Tarsus, Salonica, Serres, Cavalla, Xanthi, Janina, and Chio.
EGYPT: Alexandria (with agency in the quarter of Midan), Cairo (with agency in the quarter of Mousky), Zagazig, Mansourah, Mit Ghamr, Tantah and Beni Souef.
SUDAN: Khartum & Port Sudan. **CYPRUS:** Limassol.
HAMBURG: Domhof, Mönckebergstrasse 18.

Special facilities for Banking, Exchange and Commercial Business of every description with Greece, Egypt, Turkey, Crete, Cyprus and the Levant generally. Most favourable rates for Deposits, Collections, Cable Transfers, &c., on application.

THE IMPERIAL BANK OF PERSIA

(Incorporated by Royal Charter, 1889).

CAPITAL (fully paid) - - - £650,000
RESERVE - - - - - £210,000
Reserve Liability of Shareholders - £1,600,000

London Office: 25, Abchurch Lane, E.C.
Chief Office in Persia: Teheran.

Branches at Ahwaz, Bushire, Hamadan, Isfahan, Kazvin, Kerman, Kermanshah, Meshed, Mohammerah, Nasratabad, Resht, Shiraz, Tabriz and Yezd.

The Bank is prepared to transact Banking business of every description in and connected with Persia; and in London grants Drafts, Telegraphic Transfers, and Letters of Credit, and negotiates or collects Bills on Persia.

IONIAN BANK, LIMITED.

INCORPORATED 1839.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, May 24.

The Opening of the Dardanelles.

Steamers which had been detained here for exactly one month and a day started leaving Constantinople for passage through the Dardanelles on Saturday last, the 19th inst. By Tuesday evening the last steamer had left, and thanks to the commendable measures taken by the harbour authorities, crowding at Nagara, which was the source of considerable danger, was avoided. The first arrivals inwards began to reach our port last evening. The vessels awaiting passage upwards are some 200 in number, including those chartered for Black Sea ports. The quantity of cargo for Constantinople is said to amount to about 25,000 to 30,000 tons. It is estimated that some 1,600 lighters are required to handle this cargo, and the port possesses but 400.

With a view of preventing the Custom Houses from being used as warehouses for the storage of goods not urgently needed, while attention is turned to others due to arrive later, but for which there may be a greater demand, a notice has been issued by the Customs Administration to the effect that, after the expiry of the usual seven days' grace, double storage dues will be charged.

The Present Situation.

The British Chamber of Commerce has decided not to associate itself with the proposal emanating from another local Chamber to issue a circular to home manufacturers advising them to support any extra charges on goods caused by the closing of the Dardanelles rather than to have their customers refuse to take delivery of the same. The whole question is, no doubt, one which is involved owing to the multiplicity of interests at stake, viz.—those of manufacturers, carriers, insurers, and receivers; and the Chamber could not commit itself to a policy which meant the support of the interests of one of these parties as against those of the others. There are so many side-issues which have to be taken into consideration that each case can only be decided on its own merits. The following questions suggest themselves:—Were the shipping companies justified in carrying goods back to port of shipment? (This was not done by any British lines.) If the goods were insured against the war risk, can the insuring companies be expected to stand the cost of carriage several times between the port of shipment and destination? If the goods were sold delivered c.i.f. Constantinople, who are to bear any extra charges, (a) If covered by war risk? (b) If not covered by war risk? Here would seem to be the subjects of likely litigation.

Agents: British *v.* Foreign.

This market unfortunately has a bad reputation, not entirely deservedly, although there are no doubt dealers who are ever ready to seize an opportunity to *chicane;* and such a circular as I understand at least one foreign Chamber has issued to manufacturers, even if it were advisable in certain cases is an undoubted invitation to the tricky dealer to *chicane.* There is one condition arising out of the present situation, which I wish again to emphasise, and, although it may be considered Utopian, it is an ideal which should ever be borne in mind. British firms should in preference be represented by British agents. I will hasten to admit that there are a number of very reliable French, German, and Austrian firms acting as agents for British manufacturers, but why should British agents not be given the preference. I have, at the moment of writing, tried to think of one unreliable British firm, and cannot do so; there may be degrees of suitability, but I do not know of one that I would consider undesirable; and I could not truthfully say this of every foreign representative of British firms. I feel that if I were the manufacturer I would prefer plain John Smith to Max Finkelstein, Samuel Juda, or Socrates Trickopoulo, because I should feel that when my interests clashed with those of my client, John Smith would think in the same way that I thought, and not in the manner of my customer. But it is more often than not the case that, for some inexplicable cause, a British manufacturer will give a British agent the go-by to appoint a foreigner. The reason for this I have never been able to understand. Is it thought that the foreigner or native is better acquainted with the country or conditions? This is the only excuse I can offer; but if it is the real reason, it is due to a misapprehension. The British agents here are all, I believe, without exception, in the second, and some are even in the third, generation of residence in Turkey, and, while knowing the local languages and the country, have not lost their British characteristics. If there should be any reason for complaint against the British agent, he is amenable to British law through the Supreme Consular Court. As regards the foreigner, he has to be attacked in his own Court, and if he is of the undesirable class it may be found that he changes his nationality with as much ease as does a chameleon its colour. Therefore I ask, why not a British agent? Are British agents doing business for the firms they represent? I believe they are. One, a week or two ago, informed me that he had just taken a large order for knapsacks; another has just taken a good order from the same department, but would not state for what it was; still a third has booked an order for two British-built aeroplanes.

In just such cases as are at present likely to arise, the British agent would not be the one to take advantage of the manufacturer in favour of the receiver of the goods.

Mesopotamia Irrigation Works.

As already announced in the adjudication for the irrigation works in Mesopotamia, the tenders under consideration by the Ministry of Public Works were those of Sir John Jackson, Limited, and Messrs. S. Pearson and Son, Limited. It was officially announced on May 18, that Messrs. S. Pearson's tender had been rejected, because they did not accept all the conditions laid down by the Government, and that Sir John Jackson, Limited, had been declared provisionally the successful tenderers. Negotiations are now proceeding between the latter and the Ministry of Public Works as to the details of the arrangements, and on the conclusion of these negotiations the Government will decide whether the provisional award is to be confirmed. The tenders cover two groups of works. The total price for the first group (for which a firm contract is to be made) exceeds two and a-half millions. The total price for the second group (which is subject to the result of further detailed surveys) exceeds one and a-half millions.

It is eminently satisfactory that this important contract should have been secured by a British firm, and I trust that it will be the forerunner of others of equal importance.

THE TRADE OF GREECE.

The report on the trade of the Piræus Consular district for the year 1911, by H.M. Consul, Mr. C. J. Cooke, was published last week. We reproduce the following extracts:—

British Trade.

This has remained at about the same level, with perhaps a slight improvement, though the Austro-Hungarian and German manufacturers are as pushing as ever, and naturally take advantage of their nearness to a growing market to dump down their wares, thus spoiling the market for their more distant competitors. The Italian trade with Greece, however, has almost come to a standstill.

Agriculture.

Agriculture in Greece is in a very backward condition, and little has been done by the State to promote this, the chief industry of the country. The alluvial soil of the valleys is remarkably fertile, but agricultural improvements have been deplorably neglected. Watercourses have been left untrained and allowed to become silted up, and little attention has been given to the drainage of low-lying districts, with the result that much of the best land is converted into marsh, after rains, and is either left uncultivated or produces only a small part of what it would produce under favourable conditions. Roads are few, transport is in consequence costly, and the use of labour-saving implements restricted. But a real effort has now been commenced to promote agriculture and better the condition of the peasant population. Under the new arrangement each village will form a distinct community, and it is anticipated that the villagers will combine and devote part of the local revenue to necessary improvements. Foreign agricultural experts are being employed to organise different branches of agriculture, and an effort is being made by the Ministry of Agriculture and Commerce to increase the cultivation of cotton and to improve the quality by the introduction of new varieties. The Government has, moreover, taken in hand the drainage of the bigger marshes with the view of adding to the productive land of the country. Finally, a factory for the manufacture of artificial manures has been established at Piræus, and an increasing demand is being met with for the products.

Shipping.

The comparative table of British vessels calling at Piræus during the last two years shows a decrease of nineteen vessels and 32,668 tons (239 vessels and 450,404 tons in 1910, as against 220 vessels and 417,736 tine in 1911). This decrease is easily accounted for by the rapid increase of Greek shipping, goods being carried at a much lower rate, and the crews receiving nearly 30 and 40 per cent. less pay.

As regards Greek shipping, a recent official publication gives 300 steamers of 296,354 tonnage for 1909, as against 348 steamers of 383,446 tonnage for 1911.

Finance.

The new law on bills of exchange reacts very severely upon recalcitrant debtors here. If the bill bears the proper Inland Revenue stamp and is protested at once, in the event of non-payment on maturity, immediate bankruptcy may follow, and none of the defences formerly raised, entailing protracted legal proceedings are of avail.

The principal reason for the demand for long credit here is the heavy customs duty on nearly all imported articles; in many cases this is greater, sometimes considerably greater, than the value of the merchandise.

Laurium Mines.

The minerals exploited are: lead, zinc, iron ore, etc. The principal markets are Antwerp, Marseilles, Newcastle, and Swansea. The French Mining Company of Laurium, with a capital of 14,500,000 frs., now employs about 3,300 labourers, and the Greek Mining Company about 700, whereas in former years there were over 10,000 men employed by both companies, from which it will be seen that Laurium is, and has been for some years, steadily decaying. Of course, the possibility remains of a new vein or veins being discovered, when the district may revert to its former prosperity for some time. The town is gradually being depopulated and house property has sunk in value more than 50 per cent.

Openings for Business.

BULGARIAN TRADE ACTIVITY.

The following information, showing the activity of the import trade in Bulgaria, is extracted from the *Oesterreichisch-ungarische Konsular Korrespondenz*, Vienna, viz.:—

Rustchuk.—Trade is now in a very healthy state, and is giving satisfactory results in nearly all branches. Imports during March were particularly brisk for woollen stuffs and cottons. Prices have, however, fallen in general, especially for printed cottons, owing to excessively advantageous offers of Italian manufacture.

Woollen stuffs come mainly from Germany, but Austria-Hungary also has a share of the trade. Women's ware of French make is preferred.

Large purchases of cotton thread for delivery in July or October have recently been concluded.

Large quantities of aniline dyes are bought from Germany, candles from Belgium, and household soap from Turkey and Great Britain. Building activity offers uninterrupted outlets for ironwork and hardware. Galvanised sheets of British manufacture are in ever-increasing demand.

Philippopoli.—The general situation of the market is very favourable, and sales are easy.

Business of all kinds was more brisk this spring than in preceding years. There is a tendency on the part of the people here to prefer clothes of foreign manufacture. Iron is still imported from Germany, and Italian competition is commencing to make itself felt in the hardware line. Orders for colonial products, such as spices, sugar, and coffee, are somewhat restricted.

Bourgas.—The general state of affairs is considered satisfactory. This can be deduced, moreover, from the numerous and important requisitions actually issued. Contracts for electric lighting, which are mainly secured by the Germans, are numerous.

Viddin.—The demand for men and women's attire is just now very active, and, owing to the excellent condition of trade, payments are regular. Stocks are becoming exhausted, and fresh supplies are being obtained from the interior and abroad.

RUSSO-AMERICAN TREATY.

The denunciation of the Russo-American Commercial Treaty by the United States has stimulated competition in the Russian agricultural machinery market. Messrs. Mackay and Mitchell have arrived in St. Petersburg from Australia, and are leaving immediately for the South of Russia in order to study agricultural conditions with a view to the introduction of Australian cutting and threshing machinery.

SULPHURIC ACID.

The *Nachrichten fuer Handel und Industrie*, Berlin, states that the Bulgarian Ministry of Finance has, under the Law for the Encouragement of National Industry, decided to permit the importation, free of Customs duty, of sulphuric acid.

AGRICULTURAL MACHINERY.

According to the *Oesterreichisch-ungarische Konsular Korrespondenz*, Vienna, the agriculturists in the region of Brusa (Asiatic Turkey) are becoming more and more interested in the use of implements of husbandry and modern agricultural machines.

American manufacturers are already taking advantage of these circumstances, and are supplying thrashing and mowing machines. France has shipped a quantity of ploughs. It is estimated that the Sandjak of Brusa could buy 600 or 800 ploughs each year. It is, however, necessary, in order to secure this trade, to grant the farmers long credit, and it is, therefore, advisable to have recourse to experienced agents.

INCINERATOR AND SLAUGHTER-HOUSE.

The *Zentral-Anzeiger für das Offentliche Lieferungswesen*, Vienna, announces that the Municipal authorities of Bucharest intend to construct an incinerator, and to enlarge the slaughter-house in that town.

BAGDAD CONCESSIONS.

El Reyad, a Bagdad paper, states that the Turkish Imperial Government has offered the concession granted by the municipality of Bagdad to M. Shabunder to build a tramway from Moazzem, five miles north of Bagdad, to Garara about five or six miles south of Bagdad, and that M. Shabunder has left for Europe to contract for material and engineers. Such an undertaking, however, could not be carried out without widening a street through the city of Bagdad, which would be, according to Mr. Sauer, United States Consul at Bagdad, an expensive undertaking.

The same gentleman states in the *Daily Consular Reports* that the municipality has opened bids for installing an electric lighting plant, and the army post is considering introducing a telephone system all over the city. This will open here a limited market for electric lighting and telephone fixtures. The municipality recently authorised a loan of £26,400 to carry out city improvements, including the widening and paving of streets.

BAGHDAD'S HARDWARE TRADE.

Although Great Britain appears to obtain the bulk of the orders for machinery in Baghdad—her participation representing the value of 850,000 frs. out of a total trade of 1,300,000 frs.—she is a long way behind her rivals in the supply of hardware to the well-known Turkish province (says a recently issued French Consular Report). The imports of ironmongery in 1910 were composed of 1,724 cases of various articles, 11,055 cases of cutlery, and 816 cases of enamelware, the value of these goods being over one and a-quarter million francs. The countries sharing in this trade are:—Austria, to the value of 460,000 frs.; Belgium, 330,000 frs.; Germany, 250,000 frs.; India and Turkey, each, 100,000 frs.; England, 40,000 frs.; and France, 20,000 frs. Great Britain's share of the trade consists almost wholly of cheap cutlery, including knives and razors, but Germany's quota has been mainly for hardware in general, as well as implements, Belgium for nails, and Austria for enamelware and household articles. The conditions of sale are for the merchandise to be delivered c.a.f. Baghdad or Bussorah, payable by acceptance three months after arrival.

BELGIAN ENTERPRISE.

Our Odessa correspondent, writing on Belgian activity in the Middle East, says:—

"It is peculiarly characteristic of the Belgians that their foreign industrial and commercial enterprises are undertaken with more or less secrecy, or, at all events, with the least possible ostentation, with the object, presumably, of keeping possible competitors out of the fields chosen for their energetic exploitation and development. The Belgians themselves are wont to speak of their prodigious activities in the Middle East as the quiet and peaceful invasions of Russia and Persia, and that is a fact as well as a phrase.

"As regards the last-named country, there were, in 1875, absolutely no industrial or commercial relations between Belgium and Persia, and the only Belgians in the dominions of the Shah were the Legation staff at Teheran and a few widely scattered consular officials. To-day there are 2,370 Belgians in Persia, including 24 in the diplomatic and consular services. In the Persian Customs and Posts there are 438 Belgian employees of all grades. In various branches of Persian trade and commerce 580 Belgians are engaged; in mining enterprises, 84; and 145 in the employ of seven Belgian sociétés anonymes capitalised with 41 million francs (£1,640,000), and latterly paying dividends of from 10 to 12 per cent.

It may be said, indeed, that whilst Russia and Great Britain have been exclusively occupied with political affairs in Iran, the Belgians have been pulling the chestnuts out of the Persian fire, but for their own aggrandisement only."

TENDERS INVITED.

EGYPT.

Supply of Oil.—The Municipality of Zagazig invites tenders for the supply of 150 tons of crude petroleum, to be delivered in quantities of not less than ten tons, as required. Tenders to be accompanied by official analyst's certificate, stating the heating power of the fuel. Tenders to be marked "Offre pour fourniture de mazout," and addressed to M. le President de la Commission Municipale de Zagazig. Date, June 10 (noon).

Supply of Uniforms.—The Ports and Lighthouses Administration invites offers for the supply of uniforms during the years 1913, 1914, and 1915, according to conditions of tender and specification and size rolls, copy of which can be obtained from the Secretariat Department, against payment of P.T. 10. Tenders should be made on a 30-millieme stamped paper and accompanied by a provisional deposit in accordance with Art. VI. of the conditions of tender and enclosed in double sealed envelopes, the outer bearing the address of the Director General, Ports and Lighthouses Administration, Arsenal, Alexandria, and the inner marked, "Tender for the supply of uniforms during the years 1913, 1914, 1915." Date, June 28 (noon).

Supply of Calico.—Tenders invited by the Prisons Administration for the supply of 16,500 yards of calico. Specification and samples at the office of the Administration. Tenders to be made on stamped paper (30m.) and marked "Offre pour la fourniture de 16.500 yards de calicos." Date, June 30 (noon).

TURKEY.

Establishment of Coach and Carriage Works.—Capitalists desirous of establishing, on advantageous terms, in Constantinople, a factory for building carriages and carts of all descriptions are invited to submit offers to the Presidence de la section de l'artillerie de campagne et d'expedition, ministère de la guerre, Constantinople. Date, July 11.

BULGARIA.

Iron Road Bridges.—Tenders are invited by the Bulgarian Ministry of Public Works for the construction of eleven iron road bridges. Tenders, accompanied by a deposit of 30,000 frs. (£1,200), will be received by the Direction Financière du District de Sofia, Sofia. Tenders must state price of work at the rate of one ton completed and in position. Local representation is necessary. Date, June 14.

GREECE.

Camp Kettles, Coffee Mills, Mess Tins, and Cans.—Sealed tenders will be received at the Ministère de la Guerre (Section du Matérial), Athens, for the supply of the following articles of military equipment:—4,000 tinned iron camp kettles for four men each (in one lot); 1,400 aluminium coffee mills (in one lot); 50,000 single tinned iron mess tins (in three lots); 30,000 aluminium camp kettles for two men each (in five lots); and 20,000 small aluminium cans in two lots). Local representation is necessary. A deposit of 500 frs. (£20) is required with each lot.—Date, June 19 (10 a.m.).

Supply of Cotton Cloth.—Tenders invited at the Ministry of War, Athens, for the supply of 700,000 metres of cotton cloth for shirts and drawers, in thirty-five lots. Deposit, 250 frs. per lot. Date, June 25 (10 a.m.).

HAIFA TRADE REPORT.

Mr. P. Abela, Vice-Consul at Haifa, reports that, despite cholera and the war, trade has not been unsatisfactory at Haifa. The Hedjaz Railway authorities are intending to build a line to Acre, which should be ready in a year's time. There is talk about the construction of a line from Elfouleh (a station on the Haifa-Damascus Railway) to Jerusalem. The bad crop of 1910 has somewhat discouraged cotton growers in the Jordan Valley. Should cotton-growing be taken up by a competent company the cotton yield would probably not be inferior to that of Egypt in quality. There is possibility of great agricultural enterprise in the fertile and extensive plains near Haifa, and arrangements have been made with some big proprietors to let the property for development. Were it not for the Turkish laws prohibiting foreign companies to hold land in Turkey great progress might have been made in this direction.

Engineering Notes.

PROBLEM OF ROAD SURFACES.

One of the most important questions which for many years has been engaging the attention of municipal authorities in the Near East is the formation and treatment of road surfaces in a way that will prevent or minimise the great nuisance of dust in towns. That dust, apart from the damage that it causes to public health and property, gives a bad impression to tourists and others who visit the countries during the summer, and often hastens their departure. Macadamised roads are in general use for towns and in highways, and although their construction and upkeep do not differ from those adopted in the western countries of Europe, their wear and tear is much greater—although the traffic is less and lighter—than in the latter countries. This may be attributed to the scorching sun, the very narrow wheels of vehicles—so used owing to the smallness of draught animals—and to the scarcity of water during the summer months. All these conduce towards transforming the road surface into a thick bed of dust, which the slightest breeze lifts and scatters about in dense clouds.

In the East.

Towns in the western countries of Europe are protected from such dust-nuisance by the use of various systems of road paving, such as wood, stone, asphalt, etc., which more or less answer the purpose, although none of them is without its defects. But in the Near East, where climatic, as well as financial, conditions have to be considered, such methods cannot be easily adopted. Therefore, the municipal authorities have been, and still are, trying to find a suitable way of dealing with road construction in towns, so as to secure the most efficient road, including dust prevention, at the lowest possible cost. Some methods of paving have been tried experimentally, but with little success, and the ever-increasing number of inventions and discoveries of new methods for street paving only make the problem more difficult. Athens, the worst sufferer from the nuisance of dust and the scarcity of water, has made a bold move lately, and accepted a system of street paving by asphalt, which, we hear, gives considerable satisfaction. This has attracted the attention of the neighbouring countries, and the Bulgarian Government has sent a competent official to Athens to study the system and see if the same can be adopted in Bulgaria.

The Problem in this Country.

Luckily for the municipal authorities of the Near Eastern countries, the same question, known as "dust-prevention," has been and is engaging the attention of road engineers and local authorities in this country. The question is how to prevent the dust that motor-cars create in highways, which are generally macadamised in the same way as the roads and streets of towns in the Near East. And as highways cannot be treated in the same expensive way as the roads and streets of towns, the authorities are trying to find a suitable way of dealing with macadamised road surfaces to secure efficiency at the lowest possible cost, which is exactly what the Near Eastern municipal authorities have been trying to find. Availing themselves of this opportunity, representatives of such authorities are now in England and on the Continent studying the various systems that are now in use.

Spraying and Coating.

There are many materials now on the market and numerous methods of treatment in use for dealing with dust prevention and road preservation, and these methods resolve themselves into one of the following classes: (1) Treatment by spraying of existing surfaces; (2) coating with ordinary material and using a preservative binder; (3) coating with material previously treated with a preservative. Amongst the various preparations and methods there are some which we consider suitable for the Near East, and these we will describe briefly.

(*a*) For spraying of existing surfaces there is a preparation which has been used in many places with success. It is a compound consisting of (1) coal tar creosote, 50 gallons; (2) coal tar pitch, 1 cwt.; (3) resin, 2 cwt. 1 qr. These are mixed together and melted until quite dissolved. Caustic potash or caustic soda (28 lbs. by weight or thereabouts) is dissolved in 18 gallons of water, poured into the compound and agitated until thoroughly blended. The result is an emulsion, which, when sprayed on the road, binds the surface thoroughly as soon as the water has evaporated.

(*b*) For coating existing surfaces there is a preparation (amongst numerous others which we will mention later on) which has taken a gold medal in the competitive tests, and, in our opinion, may be suitable for the Near East. It is a composition of purified coal tar, and so treated that it is as efficacious in winter as in summer. In consistency it is very thin, and can be applied without previous heating. It oxidises in from 5 to 15 minutes, according to climatic conditions, and after this takes place it should be dusted over with clean grit. It is nearly without smell, and non-injurious to tyres, horses' hoofs, and varnish on vehicles.

(*c*) Another method of coating which is used with much success in hot climates is a preparation of tar and fine granite chippings mixed together. This is laid on the old surface of the road to a depth of ½ in. to ¾ in. The broken road stone is then spread on top of this to a thickness not exceeding 4 in., and is rolled immediately with a steam roller. The roller forces the stone down into the matrix, and squeezes up the matrix into the interstices, and, if they have been laid in the right proportion, the little rolling will bring the matrix almost up to the surface, and after brushing and a final rolling will produce a thoroughly waterproof surface. The cost of road-making by this means exceeds only very slightly the cost of a similar coating of granite on the old water-bound system, but it is known to last at least twice as long.

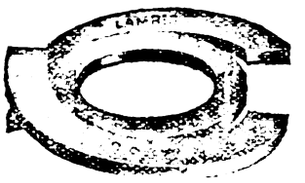
Labour-Saving Machinery.

The continuous rise in the price of labour in Turkey resulted in an increasing demand for labour-saving machinery. During the last two years the import of oil and hot-air engines, suction gas plants, and modern machinery for confectioners, joiners, weavers, and oil mills has doubled. A good number of these come from the United Kingdom, but more orders could be secured if manufacturers in this country displayed more activity.

THE RIGA-KHERSON SHIPWAY.

(From Our Own Correspondent.)

Odessa, May 26.



The consummation of the long-mooted project of constructing a shipway between Riga and Kherson would not appear to be quite so remote a possibility as "Commentator," in your impression of May 17, assumes. The *Russkoye Slovo* and the *Rigaer Zeitung* simultaneously announce the formation of a limited company which will forthwith apply for the concession to "construct and exploit" a shipway from Riga to Kherson, to be called the Nikolai II. Canal.

Among the promoters of the enterprise are two members of the Ministerial Council—MM. A. S. Yermoloff and N. S. Avdakoff. The company proposes to start operations with an initial capital of 5,000,000 roubles, subscribed by the shareholders themselves, and the issue of obligations to the value of 450,000,000 roubles guaranteed by the Imperial Government. The constructive capital is 337,500,000 roubles, and for interest on obligations and amortisation 110,000,000 roubles will be set aside. The new shipway, when finished, will be administered by the company to its own profit for a term of twenty-five years, and, on the lapse of eighty-five years from its inauguration, the canal will pass, free of cost, into the possession of the Crown. The Ministry of Ways and Communications is appointing a technical committee to decide upon the exact route, width, depth, etc., of the shipway. The actual total cost of the constructive work is estimated at 300,000,000 roubles, and the annual revenue at 33,900,000 roubles; the liquidation of capital obligations, etc., will be 30,500,000 roubles per annum. The constructive work will, it is stated, be commenced immediately the concession has been granted, and operations are to be initiated simultaneously from both the Dwina and Dnieper ends of the new waterway. No mention is made by the two journals quoted of foreign capitalists being invited to take a share in this great undertaking, although it is not unreasonable to assume that the project has attracted the attention of the Anglo-Russian Chamber of Commerce and the Anglo-Russian Bank in St. Petersburg.

ON ADMIRALTY LISTS.

The "Lamrig" Washer.

An Absolutely Reliable Washer.

MECHANICALLY SOUND.
SELF FIXING. CHEAP.

For Price List and Samples apply to:—

Near East Oil Notes.

LONDON, May 30.

Oil Fire in Roumania.

There has been a big oil fire at Moreni. On May 13 well No. 1 of the Concordia began to spout. It continued to spout until the 16th. Then at six o'clock in the morning it caught fire; in an instant the earthern reservoirs, where a large quantity of oil the result of the spouting was deposited, caught fire, and five wells of the Romana Americana and two wells of the Columbia were also involved. The head of the mining department, with the director of mines, at once arrived on the spot, and every effort was made to stop the fire. As a last attempt a subterraneam tunnel was bored into the hill about 60 ft. below the surface with the idea of reaching the tube of the well and shutting off the oil. At the time of writing it was not known whether this would be successful or not. But a Reuter's cable states that the fire is now extinguished. Up to the present oil to the value of about 100,000 frs. a day has been destroyed. It is believed that the fire was caused by a short circuit. One version declares that the well-sinker had left a light burning at the Columbia No. 1 well, which was only situated 30 metres away from the Concordia spouter. This was contrary to regulations, and the well-sinker and one of his men went to the well at six o'clock in the morning to switch off the light. A short-circuit took place, the spark exploded the gas with which the air was filled, and both men lost their lives. The Columbia people, however, say that they shut down all work on their wells the moment the Concordia began to spout, and they consider that the fire was caused by a spark produced by the spouter itself.

Pipe Lines.

The director-general of Roumanian Railways, who has in hand the question of the pipe lines to Constanza and the preparation of the plans, has decided to employ engineers to study the lines now in use in the United States and in Russia, consequently Monsieur Trancrede Constantinesco is going to America to make a careful examination of the systems in use there, and he will be accompanied by M. Cihodaru. MM. Mircea and Satmica will at the same time go to Russia and carefully examine the big pipe line between Baku and Batoum. It is believed that the reports of all the engineers will be ready to present to the directors of the Roumanian Railways by August 15.

Roumanian Production.

The Roumanian production for the month of April is 142,000 tons, or 2,000 tons better than that of March; but 3,333 tons lower than that of February. The Astra-Romana comes first with a production of 35,933 tons, most of which is obtained from its wells at Moreni. The Steaua Romana is second with 32,973 tons, obtained mainly from Campina and the Romana Americana, and Concordia each contribute over 20,000 tons. Both companies obtaining the bulk of their supplies from Moreni.

The English companies cut a very poor figure in the Roumanian statistics. The falling off in the month of April will probably be increased during May, in consequence of the big fire at Moreni, which will prevent both the Astra-Romana and the Romana Americana from pumping any of the wells in the neighbourhood of the fire, and the Concordia, the other big producer, will have a poor return for a like cause. On the other hand, both the Astra-Romana and the Concordia companies have good productions, the one from its well at Bana, and the other from well 311 at Bordeni, where a spouter has been struck which is going on steadily, giving a very big production, and at the time of writing shows no signs of falling off.

Roumanian Oil Exports.

The exportation of oil from Roumania, in spite of the difficulties of getting the produce of the wells to port appears to be on the increase. The total of crude oil and all the various products of the refineries amounted for the first three months of 1912 to 187,774 tons, which compares with 126,875 tons for the first three months of 1911. Now that the Dardanelles has been reopened it is probable that the export figures will be considerably increased. Great Britain takes more than any other country. Egypt and France run her very close, and the next largest consumer of Roumanian oil is Austria-Hungary, which, with 21,000 tons, comes fourth on the list. Turkey has increased her consumption to 10,500 tons, but Germany is not buying so largely, her demand having fallen from 21,000 to 12,000. All the reservoirs at Constanza are filled with oil waiting the arrival of tank steamers, which, in consequence of the closing of the Dardanelles, have been unable to reach the port. Now, however, one or two steamers have managed to get through, and June should witness a great revival in the export Roumanian trade.

Galician Oil Lands and Royalties Trust Ltd.

The Galacian Oil Lands and Royalties Trust, Limited, has a capital of only £100,000, but it has as complicated a system of finance as an American railway that has been through half-a-dozen reconstructions. £75,000 is set aside for 8 per cent. cumulative participating preference shares, the holders of which are entitled to divide the profits between themselves, and 20,000 5 per cent. income certificates, and the holders of 6,000 founders' shares of £1 each. Interest at the "guaranteed" minimum rate of 8 per cent. will be payable quarterly at the offices of Messrs. Hatton Morris and Company, Carlton House, Regent Street, but we are not told who guarantees the interest, and the name of Messrs. Hatton Morris and Company does not appear in the Telephone Directory; neither is it known to us. During the preliminary stage of the development of the company's properties the interest on the shares will be secured through the purchase of royalties on oil-producing wells, which will be vested in the company until such time as the minimum interest of 8 per cent. is secured directly from the company's properties. This is both wild and vague. We are told that there is room for 320 wells on the northern anticlinal of the property, and each well is valued at £6,000. How anyone can value a well that has never produced any oil is best known to the experts who have sent in their reports. The report of Monsieur Paul Legrand estimates that each well should give a profit of £6,336. If we multiply this by 320 we arrive at a figure which runs into well over two millions; which by no means small sum is given away without a murmur. We have seldom met with a less satisfying prospectus, and we can only advise our readers to have nothing whatever to do with the Galician Oil Lands.

Oil Information Bureau.

We have received from Monsieur Stefanescu, of Campina, a most interesting report upon the Roumanian oilfields of Bustenari, Bordeni, Baicoi, Moreni, and Filipesti-Padure. We hope next week to be able to give some short notes extracted from this valuable document. It will be remembered that M. Stefanescu is agitating for the establishment of a bureau of information that will be able to tell intending investors in the Roumanian oilfields all about oil properties. With regard to M. Stefanescu's *apercu générale*, he very modestly says in his letter: "I do not pretend to call it *un ouvrage*, but I believe, nevertheless, that in my note will be found all the principal points necessary to make your readers acquainted with the petroleum-bearing regions of Roumania." We quite agree with M. Stefanescu.

New Galician Combine.

The negotiations for the consolidation of various important oil interests in Galicia are practically completed, the Premier Oil and Pipe Line Company and the Central Carpathian Oil Company forming the nucleus of the new combine. The capital of the amalgamation will be £4,000,000, of which £500,000 is to be reserved for working capital, the latter being guaranteed by a group of German bankers. Large additional areas of petroliferous land are to be acquired, enabling the combine to carry out an extensive programme of drilling and development work.

OIL OUTPUTS.

Roumanian Consolidated—Report (week ended May 25):—Campina—Well No. 1, total depth 787 ft.; well No. 2, total 705 ft. Chiciura—Well No. 1, total depth 856 ft. Tonesti—Well No. 1, total depth 410 ft. Aggregate drilled during week, 93 ft. Bana—Well, No. 12, producing steadily and increasing; well No. 13 in fountain production, but now capped, whilst being fitted with safety conducts and proper arrangements made to handle large quantities of oil.

Moreni—Week ended May 25:—Moreni, well No. 5, total depth, 1,043 ft. Well No. 6, total depth, 889 ft. Production for week, 303 tons. Well No. 9, total depth 610 ft. Well No. 13, total depth 207 ft. Filipesti de Padure—Well No. 1, total depth 348 ft. Aggregate drilled during week, 247 ft. Total production to date, 7,285 tons. Delivered to purchasers, 6,734 tons.

Anglo-Roumanian.—Production for week ended 25th instant, 201 tons.

Produce Markets.

LONDON, May 30.

The suddenness of the dock strike had a bad effect on business generally, and holders of produce are very anxious, fearing a prolongation of the strike. The markets, however, remain steady, though quiet.

Sugar.

Beet Sugar.—Closing rates are: June, 12s. 1d.; August, 12s. 3d. to 12s. 5d.; October, 10s. 8½d.; November-December, 10s. 7d. to 10s. 7½d., f.o.b. Hamburg.

Refined Sugar.—English, Tate's cubes, No. 1 prompt, 22s. 3d.; June-August, 22s. 3d.; September-October, 22s.; November-December, 19s. 9d. No. 2, prompt, June-August, 21s. 9d. Foreign, Say's cubes, prompt, 19s. 10½d.; loaves, 18s. 10½d., f.o.b. Paris. Meyer's cubes, prompt, 17s. 9½d., f.o.b. Hamburg.

Coffee.

Small supplies were offered at auction and went off steadily. Colombian, low mid. to mid., 78s. to 80s.; bold, 81s. to 84s. East India smalls, 77s. to 77s. 6d.; low mid., 79s. to 80s. Futures closed steady; May sold 62s. 2d. to 61s. 9d., September 61s. 6d. to 61s. 3d.

Currants.

The market is very quiet, with fairly steady prices. Provincial are quoted 25s. 6d. to 27s.; Vostizza, 30s. to 38s.; Patras, 28s. to 30s.; Gulf, 29s. to 33s.; Amalias, 28s. to 29s.

Sultanas.

Smyrna are quoted: Common, 48s. to 50s.; fair, 52s. to 54s.; good, 55s. to 56s.; fine, 58s. to 60s.; choice, 62s. to 64s.: finest, 66s. to 68s.; old, 35s. to 45s. Greeks, 59s. to 65s.; Persian, 48s. to 53s.; Afghans, 49s. to 54s.

Figs.

Finest Eleme, 70s. to 80s.; fine ditto, 48s. to 55s.; good layers, 38s. to 42s.; naturals, bags, 20s. to 25s.

Dates.

Tafilat, 28s. to 40s.; Persian, Sieh, 12s. to 13s.; Khadrowie, 17s. 6d.; Hallowie, 18s. 6d.; Egyptian, none.

Cereals.

Wheat lower, Bushire 38s. 6d. to 39s. in bags, Karun 37s. 6d. in bulk, soft Bagdad 36s. France is offering to resell wheat, and with the opening of the Dardanelles over one million quarters have been released, mainly for Continental ports. With the reopening of the Dardanelles maize has come down 1s. to 1s. 3d. per quarter. Barley is much lower and difficult to sell. Persian, May-June, 23s. c.i.f. Dari, nothing doing. Millet, nominal value 25s. Paddy, firm, 6s. 4½d. per cwt.

Seeds.

Linseed.—The market is active and a little dearer. London: Calcutta afloat sold at 69s.; June-July, 68s. 6d. Cottonseed, quiet, Egyptian, June-July, £9 3s. 6d.; November-January, £8 12s. 6d. per ton.

Oils.

Linseed Oil.—Prices are a little higher. Spot pipes, landed, £42 10s.; barrels, landed, £43 5s.; June, £40 5s. 6d. Cotton oil, crude spot, £27 15s.; refined sweet, £32 10s. Petroleum oil, Russian, 8d. to 8½d. per gallon; Roumanian nominal.

THE NILE.

The level of the Nile this year, writes the *Sudan Times* on May 13, is much lower than it was last year at this time. At Khartum and Malakal it has been, during the last few days, from 30 to 40 centimetres lower, and at Roseiers from 1.30 metres to 1.40 metres lower than last year's level.

EGYPTIAN COTTON.

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, May 23.

Quotations of cotton have advanced. The old crop is exhausted, and the whole of the inquiry from spinners is concentrated on the new crop, which, however, cannot be gathered before November next. It is obvious that the demand for Egyptian cotton is practically unlimited. The crop is always readily absorbed abroad, no matter what the price is. This fact should induce Egyptian producers to demand a higher price for their staple; but, unfortunately, cotton here is scarcely sown before it is disposed of.

Liverpool Report.

Messrs. Reynolds and Gibson telegraph that owing to the holidays only a moderate business has been done in Egyptian spot cotton, but the market has been very steady, and prices are wholly maintained. The estimated sales for four days are 1,200 bales.

Upper Egypt Cotton.

In spite of the various objections which cotton growers of Upper Egypt have made to the scheme of preventing their unginned cotton from being sent to ginning factories in Lower Egypt, the Government is decided on carrying out its project, says the *Egyptian Gazette*. The scheme is now under the consideration of a committee at the Ministry of Justice. As soon as it comes before the Council of Ministers and is approved by the General Assembly and Legislative Council, it will be placed before the Mixed Court, so that foreigners as well as natives may come within its jurisdiction.

Cotton Congress in Egypt.

Sir Charles Macara, who has returned from Salzburg, Austria, where, as we announced, meetings of the Committee of the International Cotton Federation have been held, stated that it had been thought advisable, in the interests of the cotton trade of the world, that an international delegate should visit Egypt in the coming autumn. This decision, says the *Times*, practically means the holding of a Congress in Egypt.

CROP NEWS.

Reports from Milan state that conditions for the new Italian silk crop continue favourable (says the *Manchester Guardian*), and in the producing districts prospects are now regarded as very bright.

With regard to the Levant crop, it seems likely that the Syrian output will be better than last year, but the outlook in Anatolia and the other districts is not so good. The reports coming in regarding the Persian crop are rather disappointing.

The Consul-General at Canea, Crete, reports that up to the present, the weather and other conditions are favourable to the coming olive crop.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 17:—"We have nothing to report on opium, for last week's buyer, seeing that holders would not consent to sell at his limit of 15s. 6d. for 10.50 per cent., withdrew from the market, and no other buyer has come forward. Prices, therefore, continue to be maintained at 17s. to 19s. as to quality, crop, and morphine strength. The arrivals amount to 1,175 cases, against 4,541 at same period last year."

NEAR EAST MARKETS.

Special Weekly Reports.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Mitylene. May 18.

There is no change in the market, the stagnation continuing

The only shipments have been a small lot of oil, 210 barrels, valued at £1,500, which has been forwarded to London, and smaller invoices for Salonika.

Basrah. May 5.

The imports continue calm owing to the insecurity of the routes between Persia and Baghdad and the fighting between the Sheikh of Mohammerah and the Bakhtiaris.

Exports, on the other hand, are animated. The cereal stocks are being bought up hurriedly. In spite of the high prices exporters are doing a good business.

Nine thousand to 9,500 tons have been loaded during the past week, of which 5,000 tons were destined for Hamburg and the remainder for London.

Several lots of cereals have been loaded for British ports.

Beyrout. May 21.

There is no improvement in the market. The stock of Colonial produce is practically exhausted and very few operations have been completed, the few there were being directed to British goods.

There have been no imports, but important Russian arrivals—sugar, flour, and petroleum—are expected after the opening of the Dardanelles.

The prices of cereals have risen slightly, the quintal of wheat being quoted at P.B.310-350, and barley at P.B.210-225.

The gathering of cocoons has begun along the coast. The damage caused by recent rains is estimated at 25 per cent. of the crop. The Mount Lebanon gathering will begin next month. The prices quoted for cocoons of the new gathering are P.B.54-60 the oke.

Smyrna. (Received) May 25.

The opium market is stagnant, but the outlook for the new crop is good.

The recent rains have caused considerable damage to the vineyards, but not to the extent expected, being estimated at only 20 per cent.

Salonika. May 21.

No change is to be chronicled in the market, which is stagnant. Stocks of Manchester goods are sufficient for the moment.

The crop outlook is good.

Constantinople. May 20.

The prices of soft wheat remain the same, but recent transactions in hard wheat have been conducted during the past week at better prices.

Angora. May 22.

Inactivity reigns in connection with mohairs. The few arrivals of excellent quality from the neighbourhood are bought by speculators, the large exporting firms refusing to transact. The arrivals, however, are few, as the natives are still waiting for better prices. Last year's remaining stocks are estimated at 2,000 bales, and remain unsold. It was expected that the opening of the Dardanelles would improve the prices, but there has been no such change.

There have been fluctuations in the prices of wheat, but they are now where they were two weeks ago.

The crop outlook for cereals is excellent, and a record year is anticipated, because the sowings have been more important.

The ALIGARH INSTITUTE GAZETTE

A High-class Urdu-English Weekly Journal.

Founded by the Old Sage of Aligarh, the late Sir Syed Ahmad, in 1866 A.D.

It is now the leading and officially recognised Organ of the M. A. O. College, Aligarh, All-India Muhammadan Educational Conference, and All-India Moslem League, on politics, education, and society. An excellent medium of advertisement on account of its large circulation amongst educated and enlightened class of Muhammadans, gentry and nobility in all provinces of India and places beyond India. Annual subscription, 4s. Agents securing advertisements have good offers.

Apply to THE MANAGER, Aligarh Institute Gazette, India (U.P.).

OVER 5,000 SEPARATE ARTICLES

exclusive of cross references are included in

PITMAN'S COMMERCIAL ENCYCLOPÆDIA

AND DICTIONARY OF BUSINESS.

Edited by J. A. SLATER, B.A., LL.B. (Lond.), assisted by upwards of 50 specialists as contributors. Profusely illustrated. 4 vols. Crown 4to, each 450 pp., cloth 30/- net, half leather 42/- net. Vols. I. and II. now ready.

Complete prospectus post free.

BANKING IN SERVIA.

(From Our Own Correspondent.)

Belgrade, May 25.

The Franco-Servian Bank, with its immense influence in this country since it has been established, seems to have had the effect of animating Italians and Englishmen to found Italian-Servian and Anglo-Servian banks.

Two such proposals have been made to this Government, but the war between Italy and Turkey has hindered one combination, and in the other case it is supposed that the application is by intermediaries not possessing the necessary influence and capital for carrying out the project.

The Franco-Servian Bank is closely allied to the Servian Government, and in to-day's *Nam-Uprova*, the semi-official organ, this bank is loudly praised, the paper stating that the Franco-Servian Bank is of immense advantage to the country, and is in a position to furnish abundant capital for any purpose, and that this bank checks the impositions and undue influence of the German and Austrian banks.

SERVIAN STATE MONOPOLIES.

During the month of March last the receipts accruing to the Administrator of the Servian Autonomous State Monopolies were: Tobacco, 1,642,725 frs.; salt, 380,868 frs.; petroleum, 254,408 frs.; stamps, 588,748 frs.; matches, 99,648 frs.; cigarette paper, 120,192 frs.; Customs, 1,404,372 frs.—or a total of 4,770,435 frs.

PERSIAN LOAN.

Reuter learns from Teheran that the British and Russian Governments will shortly be occupied with the consideration of the loan to Persia. The matter is complicated, as, apart from the questions of adequate security, necessitating, possibly, an Anglo-Russian guarantee, there remains to be solved the difficulty presented by the Constitutional law, which requires the sanction of the Mejliss for the loan. Persia's present available security for the new loan is estimated at £350,000 annually, exclusive of the yield of the provincial taxes.

FINANCIAL ITEMS.

The *Financial News* announces, on the authority of its Constantinople correspondent, that a powerful French financial group has offered to the Ottoman Government a 125,000,000 frs. loan. The proceeds of the loan would be devoted to various public works, chiefly a railway line from Tschischle to Topkapu.

We have been informed that the well-known Beyrout firm, Messrs. Camille and Emile Elkouri, will in future trade under the title of Elkoury and Co., the former proprietors having been appointed directors of the new company.

The balance-sheet of the Credit hypothécaire agricole et urbain d'Egypte, on December 31, 1911, showed a balance of 35,168,122 frs., with profits amounting to 145,956 frs.

Messrs. Mocatta and Goldsmid, in their circular dated London, May 24, state: "During the week the Bank has received £452,000 in bars and coin, against which £470,000 in coin has been withdrawn, chiefly for Turkey."

The receipts of the Egyptian Markets for the week ending May 23 were £762, or a decrease of £249.

Messrs. Berninzone, Calamaro and Russell have been appointed by the creditors of Messrs. B. Tilche and Sons to examine the accounts and make a report. The next meeting of the creditors will take place on August 8.

The failure is announced, at Cairo, of Mahmoud and Youssef Mohamed Hanafi. The liabilities amount to about £E42,000, and among the privileged creditors are the Credit Foncier Egyptien for £E6,977, and Mamoud Ader and Company for £E2,000.

The coupons falling due on June 15 of the Greek Five per Cent. Loan of 1890 (Piræus Larissa Railway) should be presented at the office of Messrs C. J. Hambro and Son for payment of 68 per cent. in gold of their face value, being 32 per cent. ordinary interest and 18 per cent. per annum. augmentation payable on the coupon of the first half of the year.

HARNESSING THE NILE.

An Important Project.

We learn from a reliable source that the Egyptian Government has decided to employ two of the sluices of the Assouan Dam for the generation of power destined for the manufacture of nitrates. The Egyptian fellaheen now employ large amounts of artificial manure, in the composition of which nitrates play an important part, and it is therefore anticipated that the new undertaking will provide an important source of revenue for the Government.

GOLD ON ABYSSINIAN BORDER.

Mr. O. Panelli, a son of the head of the Alexandrian firm bearing that name, has left Khartum for the south en route for Gambela, in the vicinity of which, we understand, he has obtained a large concession from the Abyssinian Government. The tract of country acquired extends from a point near Gambela to within a short distance of the border of British East Africa, and is held on a fifty years' lease. Mr. Panelli, who is accompanied by nine other persons, intends to prospect this concession for various metals and especially for gold, in which it is believed to be rich. It is feared that the district to which the prospectors are going is at present in rather a disturbed state owing to the recent retreat of the defeated Anuaks across the Abyssinian border.

TURKISH MONETARY REFORM.

The Monetary Reform Commission, on which the Board of the Chamber of Commerce of Turkey was represented, presented its report to the Minister of Finance in June last. The main outlines were that the original value of the piastre as one-hundredth part of the Turkish pound should be restored and made effective.

The Commission, according to the Chamber of Commerce annual report, put aside various proposals which had been made for restoring this ratio by means of an alteration either in the gold coinage or in the silver coinage. It considered that both the gold and silver coinage should be maintained without modification.

The four objects to be aimed at in any reform of the currency were enumerated by the Commission as follows:—(1) Unification, that is to say, unification of the different kinds of piastre, and the removal of differences of rate between the different coins; (2) simplication, by the abolition of the complicated and nondecimal rates, including the various "piastres tchuruk" which are in use at Smyrna and elsewhere; (3) stabilisation, that is to say, the prevention of the fluctuations in value to which the various coins are subject, and the establishment, as far as possible, of a single, invariable rate, in every place and at every period; and (4) the adaptation of the quantity of each kind of coin in circulation in each locality to the actual needs of that locality.

The establishment of the ratio of 1 to 100 between the piastre and the Turkish pound, and the consequent abolition of the "Medjidie at 19," would also remove the cause of the steady flow of small change from places like Constantinople, where the Medjidie circulates at 20, to Smyrna, Salonica, and other places, where it circulates at 19.

SIDON TRADE REPORT

Mr. P. Abela, Acting Vice-Consul at Sidon, states in his annual report, just published, that oranges were extremely good in 1911 and fetched good prices. Lemons were also abundant, but such was the demand from Constantinople and the Black Sea ports that they fetched as much as £1 the 1,000; 100,000 cases of oranges and lemons were shipped from Sidon last year. No oranges belonging to the 1911 crop have been shipped to the United Kingdom. Tobacco was good, and a large quantity was taken by the Lebanon factories. The last crop of tobacco yielded over 1,000 tons. Shipments of more than 100 tons have been sent to Hamburg. A new variety of tobacco called Yenijé is being grown at Sidon.

The Imperial Ottoman Bank is about to open a branch at Sidon. It is hoped that this will result in the establishment of a regular service of steamers to the port.

NEWS FROM ALL SOURCES.

The *Egyptian Gazette* states that Mr. Victor Salama, the chief cashier of Messrs. Tilche, who tried to commit suicide after that firm filed its balance-sheet, by swallowing a dose of sublimate, expired after many days of suffering.

Messrs. Bondi and Co., one of the best known building firms in Cairo, are the successful tenderers for the contract of a *sahet* or port on the Nile at Cairo. The contract is for £E13,000, and states that the *sahel*, 860 metres long by 20 metres broad, is to be finished not later than the middle of August.

Judgment was given on May 21 by Judge Kraft, of the Cairo Mixed Civil Court, in the case of the Cairo Electric Railways and Heliopolis Oasis Company *versus* the Egyptian Government. Maitre Edmond Picard, leader of the Brussels Bar, and Maitre Merzbach appeared for the company. The company claimed exemption from taxes on its estates in its concession, and the Court upheld the company's claim. But the Appeal Court may reverse the judgment, as in the case of the Fontarce case.

According to the *Egyptian Gazette*, the State Railways have received 4,000 tons of Indian coal by special steamer. The order was given at the time of the coal strike in England.

The British trade returns of the first quarter of 1912 show an increase in imports from Bulgaria of £389,000, as compared with a previous total of only £37,000, and from Roumania of £667,000, against a previous total of £712,000. Egypt has sent us £662,000 more, and Persia £223,000 more from a previous total of £100,000.

So far as exports are concerned, Roumania has taken between £200,000 and £300,000 more than in previous years.

SHIPPING NEWS.

THE DARDANELLES.

From Our Own Correspondent.

Odessa, May 20.

Much anxiety is shown by the Black Sea shipping companies and grain exporters who have been warned by the Ottoman Consulates that should the Italians carry out their threats of occupying Mitylene and the more northerly islands of the Archipelago, the Dardanelles will not improbably be closed again.

Yesterday the local Press announced, on what it described as "indubitable authority," that, despite the Porte's clearly expressed intention of rejecting all claims for compensation for losses incurred by the closing of the Straits for over a month, the Imperial Government would support and energetically press the demands for damages preferred by Russian shipping companies and Black Sea grain shippers against the Ottoman Government. These claims are said to aggregate about £800,000. If the "indubitable authority" be correct, then the action of the Russian Government can only be regarded as persistent bluff, and it will assuredly not succeed. Turkey has unquestionably been fully justified in closing the Straits, in self-defence, against Italian aggression, and her action is just as unquestionably covered by International Law.

ITALIAN ACTIVITIES.

(From Our Own Correspondent.)

Salonika, May 25.

The Khedivial steamer "Ismailia," flying the British flag, coming from Alexandria, was twice stopped by Italian warships and searched for Turkish officials; once for a certain Fuad Bey, and then for a Mohammed Ali Bey. Many years ago, during the struggle of secession, Britain was on the verge of war with the Northern of the United States because two Southern States' envoys were forcibly taken out of a British ship on the high seas. The envoys were given up, and so war was avoided; but what would have happened had the Italians found Messrs. Fuad and Mohammed Ali on board this ship and carried them off? Have the maritime laws changed so much since then that such an act would be tolerated by a neutral power?

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912.)

SETTLING DAYS.

CONSOLS.
Monday, June 3.

STOCKS AND SHARES.

In Mining Shares the next carry-over is May 28.

Continuation Days.	Ticket Days.	Pay Days.
Wed., June 12.	Thurs., May 30.	Fri., May 31.
Wed., June 26.	Thurs., June 13.	Fri., June 14.

LONDON, May 29.

The Settlement looks like passing off peaceably. The bull account has been considerably reduced, and some of the more sanguine spirits in the Stock Exchange think that the forthcoming fortnight will be satisfactory. But we do not advise people to plunge. Gilt-edged securities rose on Wednesday, probably because the 3 per cent. Bank rate looks like lasting, for as soon as the strain on the Money Market caused by the Settlement is at an end we shall probably have ample funds in Lombard Street.

Internationals Dull.

The Foreign Market has been dull, but the Settlement disclosed a certain shortage in Italians. The Government has been supporting its market, with the result that the 3½ rose a point and are now quoted 95. They made up at 93¾. Japanese stocks were steadied, but no change occurred in Chinese. The result of the conference of the six Powers is awaited with great anxiety. Bulgarian 4½ made up at 90, which was a shade weaker than the quotation of the preceding week. Egyptian Unifieds are steady, and show no change since last week. German Threes are recovering. Greek Fours were carried over at 55. Russians also steadied. Turkish Unified were done at 89¼, but business throughout the whole market is stagnant.

Home Rails, as soon as the carry-over was concluded, improved, and it is clear that there is a small bear account. We are doubtful whether the improvement will last. Yankees oscillate according as the bulls or the bears obtain control. Nothing is likely to be done in American railways until it is seen how the elections will progress. Canadian Pacifics made up at 270¾, and promptly went to 274. There is a big gamble on here, but the price seems high to the ordinary human being who is not in the secrets of the Wall Street manipulator. Rubber shares continue dead, but the Oil Market is certainly stronger. A considerable number of bull accounts have been closed during the past fortnight, and, indeed, Urals were the only difficult share to carry over. The Stock Exchange is laughing very much at the Galician Oil Lands prospectus, which we allude to in another column.

Further Egyptian Liquidation.

The Egyptian market would appear to be suffering from further liquidation. Business in Egypt is good, but the actual market in stocks and shares still waits for a lead. It is said that nearly all the Salt and Sodas have been put into firm hands, and that the Land Banks, which are now quoted at 7, have also found a resting place. Beheras have improved to 14½; the little block of shares that was hanging over the market having been sold. There has been some further buying of Alexandria Water shares, on which a final dividend of 9s. 6d. is expected, making 12s. for the year. Gharbieh Lands are quoted at 2¾. The sales for the year amounted to 98½ feddans, and the profit was £3,971. Other sales are being negotiated, but were not concluded before the books were closed. Agricultural Banks have been offered and have weakened to 6. Markets are also a shade lower at 26s., but Nationals show no change. The past week has been one of very little interest in this market, and the transactions have been small.

COMPANY MEETINGS.

Compagnie du Chemin de fer Mersine-Tarsus-Adanu.—Constantinople, June 12.

Compagnie Ottomane des Eaux de Smyrne.—Smyrna, June 29.

Credit Ottoman.—Constantinople, June 13.

COMPANY REPORTS.

Land and Mortgage Co. of Egypt.

Sir Walter F. Mieville presided on Friday last over the ordinary general meeting of the above company. The Chairman, in moving the adoption of the report, remarked that he regarded the continuance for the year under review of the usual 10 per cent. dividend to be proof of the thorough soundness of their business. That result had been achieved in spite of the financial difficulties of the past twelve months. Fertile Egypt was absolutely sound economically, because her prosperity rested on the solid basis of agricultural productivity, but during the past year she had traversed an anxious period financially owing to the shock caused to her credit by the unexpected suspension of payment by an old-established British banking institution, and the failure of one of Alexandria's financial houses. Those failures, following so closely upon previous monetary troubles in the year 1906, had entailed much financial pressure, but the outlook for the future certainly seemed brighter. Lord Kitchener had taken up the agricultural drainage system in a wholehearted manner, and had outlined a vast scheme of canals, the first of which was actually being cut.

Suez Canal.

The *Times* Paris correspondent gives a summary of the report of the Suez Canal Company, to be presented at the meeting on Monday by the president, Prince Auguste d'Arenberg. We reproduce the following extracts:—"The total receipts for 1911 amounted to the sum of 138.038,224 frs. (£5,521,528), showing an increase of 4,334.012 frs. The increase produced by receipts of the transit service, which reach exactly 4,541,942 frs., has been weakened by a decrease of 207,930 frs. in the minor receipts of the company. The total expenditure amounted to 33,171,192 frs., showing an increase of 25,481 frs. After appropriation of 2,789,593 frs. to statutory reserve and of 3,000,000 frs. to extraordinary reserve, it is proposed to distribute 87,075,492 frs., and to carry forward the balance of 339,581 frs. Expenditure representing the cost of the construction of the canal is inscribed in the inventory as 662,033,560 frs., showing an increase of 5,855,289 frs., which corresponds to the works of improvement done during the year. The report shows that 4,969 vessels, representing tonnage of 18,324,794 tons, passed through the canal. This figure gives an increase of 436 vessels and of 1,742,896 tons."

Upper Egypt Hotels Co.

At the meeting of the above company, held on May 11 at Shepheard's Hotel, Cairo, the directors, in submitting the seventh annual report and balance-sheet, stated that, while it compared unfavourably with that of the preceding year, it is still, considering the circumstances, one which is not unsatisfactory. The following is the report read at the meeting:—

It is generally admitted by all concerned in such traffic that fewer visitors arrived in Egypt during the past season than for ten years past. It is difficult to assign any specific reason for this falling-off, but among other probable causes may be the mischievous and absolutely unfounded reports which appeared in some of the leading London and European newspapers as to the existence of political unrest and even of disturbances among the natives in Egypt, the war between Italy and Turkey in Tripoli, the fact of the German elections being in progress, and also untrue reports as to the prevalence of cholera. These may all have been factors in interfering with that success of the season which we reasonably anticipated. We, in common with others interested in catering for the accommodation of visitors to Egypt, have had to suffer, and to no light extent, but we have reason to think not disproportionately to others. You will no doubt join with us in hoping that a better condition of affairs may prevail during the season 1912-13, and you may rely upon it that we shall spare no effort to bring a more satisfactory result about by any means which may commend themselves to our judgment. Your directors deem it right again to point out that, apart from the redemption of debentures in accordance with the statutes, no provision is made for depreciation of buildings or furniture. It has not been considered necessary to do so, as the whole equipment of the hotels and upkeep of the buildings have been carefully attended to and everything maintained in first-class condition; renewals wherever necessary have been unsparingly made and paid for out of current revenue, no less a sum than £E14,900 having been expended during the past two years. The net profit on the year's working is £E11.580.019, which, with the balance of undivided profit brought forward from last year, £E4,232.587, gives £E15.812.606. Upon this amount your directors propose that a dividend of 5 per cent. be paid, which absorbs £E14,300.000, leaving a balance of £E1,512.606 to be carried forward to next year's account.

NEW COMPANIES.

Association Immobiliere du Caire.

Under the above title a company has been registered in Cairo with a capital of £E22,000, in 5,500 shares. The objects of the company are stated to be the purchase, sale, and otherwise exploitation of lands and house properties in Egypt, especially in Cairo. According to the *Journal Officiel*, the company is of Egyptian nationality, and has its head offices in Cairo.

Egyptische Egrenier Fabriken, A.G

Under the above title a German company has been formed in Egypt, with a capital of £E50,000, in 5,000 shares of £10 each. The objects are stated to be the acquisition, lease, establishment, and exploitation of ginning factories in Eypt. The first directors are Messrs. F. H. Lindemann, H. Hoffman, L. Schneider, F. Haeusgen, and Dr. O. Lindemann. The head offices are at Cairo.

COMPANY NOTES.

Imperial Ottoman Bank.—At the annual general meeting to be held next month it is understood that the directors will propose a dividend of 18s. per share, being equal to 9 per cent. per annum.

Imperial Bank of Persia.—It is announced that an interim dividend for the half-year ended March 20 last of 4s. per share, free of income tax, will be payable on and after June 10.

The Eastern Bank has opened a branch office, under the management of Mr. Portham, in Baghdad.

The offices of the Banque Commerciale et fonciere des Balkans were opened last week in Paris, rue Taitbout 48. Festivities were held in celebration of the opening of the new bank, and among those present were M. Stanciof, the Bulgarian Minister in France, M. Raffolovitch, representing the Russian Ministry of Finances, M. de Laskowsky, the managing director, M. J. Loste, the chairman of the board, etc. The nominal capital of the new bank is 10,000.000 frs

British and Egyptian Trading Company.—At a meeting held on the 21st inst. a resolution previously passed to the effect that the company be wound up, was confirmed, and Mr. E. Altaras, 4, South Street, Manchester, and another were appointed liquidators. A meeting of creditors will be held at the office of the liquidator on June 7 at 3.30 p.m.

Astra Romana.—For 1911, 5 per cent. per share.

Société égyptienne d'irrigation.—On and after May 24 payment of dividends for 1911-12, £E2 per share (coupon No. 16) and PT76.8 per founder's share (coupon No. 1).

Port Said Association.—Dividends for 1911, 10 per cent., or £1 per share (coupon No. 7).

Nile Cold Storage Company.—Dividends for 1911, 6 per cent. per share (coupon No. 2).

Société anonyme des eaux de Tantah.—On and after June 1, payment of dividends for 1911, £6 per capital share (coupon No. 11), £1 per drawn share (coupon No. 8), and PT3.8 per founder's share (coupon No. 8).

Ottoman Finances.

(From Our Financial Correspondent.)

Constantinople, May 20.

As already stated in these columns an arrangement has been arrived at between the Government and the Imperial Ottoman Bank regarding a loan of £T10,000,000. The understanding has taken the form of an option, and it is not likely that the loan will take a definite shape for some time to come. The signing of the contract, however, enables the Government to obtain an advance of £T1,500,000, and it is satisfactory to note that such an operation can take place while hostilities are still in progress, on terms which cannot be considered too onerous, and tend to show that Ottoman credit is so far unimpaired. It must be remembered also that while the greater part of the loan (£T7,500,000) is intended to cover deficits, the remainder (£T2,500,000) will be devoted to railway construction in Northern Anatolia.

Cost of the War.

The prolongation of the war is beginning to tell somewhat on the Treasury receipts, although up to the end of January there had been an increase of some £T2,000,000 over the receipts of the corresponding period of the previous year. Indications are not wanting, however, that the returns of the past three months will not be quite so satisfactory. This, of course, is partly due to the stagnation caused by the closing of the Dardanelles. The calling up of reservists, too, is a measure which deprives the land of labour, and this in a purely agricultural country is bound to influence unfavourably the receipts from the tithes. The war *per se* is not costing Turkey anything like as much as it is Italy. It is estimated that the extra expense involved is about £T50,000 a month or rather less than it is costing Italy a day to carry on operations.

The Public Debt Administration.

A good deal has been written in certain quarters concerning the desire on the part of the Ministry of Finance to restrict as far as possible the scope of the Public Debt Administration. This is hardly the case. At the outset of the Constitutional régime a series of attacks was made in the Press against the Debt Administration, but these were the expression of the extreme Nationalist section who were for abolishing all that savoured of foreign control. The attitude of the Ministers of Finance since the Constitution has been most appreciative and cordial, and at no time since its creation has the co-operation between the Council of Debt and the Ministry of Finance been closer or more friendly. As a single example of this, to show the regard in which the Debt Department is held, it is only necessary to state that quite recently the Ministry of Finance expressed the wish that the inspectors of that department who had been sent to France to study administrative methods should, on their return, serve several months in the provinces in the different branches of the Debt Department, under the orders of the chief inspectors of that Administration.

German and British Competition.

While not a purely financial one, a question has arisen which deserves to receive notice in these columns as showing how strong German commercial interests are growing and how many are the difficulties, some of them most unnecessary, with which British commerce has to contend.

It will be remembered that the electric lighting and power supply of Constantinople is in the hands of a powerful German syndicate, and British firms interested in private electrical work here are already beginning to feel the effects of this. Last year the "Prinkipo Yacht Club Company, Limited," decided upon carrying out some important electrical work. A committee was formed, composed of members of various nationalities, to decide the question, and out of many applicants for the work three firms were selected as being, in the opinion of the committee, the most capable of carrying out the work. Of these firms two were German and the other British.

A specification, upon which they were to submit their estimates, was sent to the three chosen contractors. This specification was based on German ideas of electrical work, German proprietary goods were stipulated for, and the work was to be carried out in accordance with the rules of the German Society of Electricians. The British firm protested, and after a good deal of negotiating the specification was modified so as to bring the work up to British standards and meet the requirements of the British Institute of Electrical Engineers and British fire insurance companies. On the other hand the British firm, one of the biggest in England, gave a guarantee that the work would be properly carried out. When the tenders were opened it was found that the British offer was the lowest; but nevertheless it was decided then and there, in spite of the protests of some of the members of the committee, to offer the work to the German firm who had made the highest offer, if they would consent to do the work at the same price as that tendered by the English firm. This the German firm agreed to do, and the contract was duly signed. The British firm, however, entered a strong protest on the ground that their price was the lowest and that the committee had committed a breach of confidence in divulging their prices to a competing firm. A lawsuit was only avoided by the German firm agreeing to give up half the work to the British firm. It was furthermore distinctly stated at a meeting of the representatives of the two firms and the Club Committee that the contract for the supply of fittings and glassware would form a separate contract. But when the time came for passing this contract the British firm was not asked to quote, and the order was given to the German firm without any competition.

The Prinkipo Yacht Club is a British limited liability company, in which British capital is invested, and it owes its very existence to the protection given it by the British flag under the old régime. Nevertheless, in spite of the moral obligation to support British interests, and more especially in this case where the British offer was the best, it has throughout these negotiations shown a distinctly anti-British spirit. Nor is this the only case in which British firms wishing to compete for other work have had difficulties put in their way.

AGRICULTURAL SYNDICATES.

We have already referred to the fact that the Agricultural Bank of Egypt intends making loans to agricultural syndicates. The terms and conditions under which the money will be advanced are, according to an Egyptian source, as follows:—Sums will be advanced not exceeding £1,000, at an interest of from 7 to 8 per cent. No mortgage will be required, but the bank will, before delivery of the money, make all the necessary inquiries as to the financial situation of its debtors, the area and condition of their properties and the soundness of the financial position of the men with whom it is going to deal. When these inquiries have been satisfactorily answered the bank will require the men or syndicates to draw up a contract, signed by them, and in which they undertake to give the money back in a year. A condition, which the bank will in no wise waive, is that the money lent be spent solely on the betterment of the crops and property, and on agricultural transactions in general.

ALEXANDRIA NOTES.

Banks and Restricted Credit.

[From Our Own Correspondent.]

Alexandria, May 24.

The position of the market has scarcely shown any change during the past week. Further judicial sales of shares have again unfavourably influenced the bourses, but, while the volume of business has been very restricted, it is nevertheless true that during the past few sessions the predominant note has been one of firmness. The temporary embarrassment in which the market is placed is due to the difficulty of procuring long-dated loans. Thus, while it is a simple matter to discount a three months' bill and obtain an advance on merchandise, it is, on the other hand, almost impossible to obtain loans on mortgage or raise the necessary capital to create industries or develop new lands. The policy adopted by the banks at present is to advance money only for short periods, and these advances must be easily and promptly realisable. This financial policy has been pursued since the failure of the Bank of Egypt, which has served as a severe lesson to local bankers. The Turco-Italian War, which is at our gates, and the dearness of money have also contributed to bring about this reserve of the banks.

The Situation in Egypt.

It may be said that the situation of the country can have had no influence on the present attitude of the banks. Egypt has never been so quiet as it has been since the arrival of Lord Kitchener, who has restored security, public order, and the prestige of authority. Never before have so many works been taken in hand to improve the cotton cultivation, regenerate the country, and increase its productiveness, and never before have the prospects for the future been more brilliant. The vitality of the country continues to progress, in spite of the crisis through which it is passing, and there is no doubt that in time Egypt will easily find the capital necessary for its agriculture and its industries.

Rice Cultivation.

The Egyptian Government intends to reduce the area under rice cultivation by one-fourth so as to save the water supply, and thus allow of the cultivation of cotton on a larger scale. This news has been very unfavourably received by cultivators. As a matter of fact, the cultivation of rice is not so profitable as that of cotton, but it is indispensable for improving the soil. After a crop of rice it is possible to have three or four crops of cotton, but without the cultivation of rice the salts rise to the surface of the soil, and the latter only produces a mediocre crop. This is a vital question for the country, and no doubt the irrigation engineers, before putting their scheme into execution, will consult the Department of Agriculture.

The Attar El Nebi Sahal.

I have already pointed out in your columns the importance of the transference to Attar El Nebi of the big cereal market of Rod el Farag. It is now announced that Lord Kitchener has ordered this transference, and the step has met with general approbation.

Cassa di Sconto and Comptoir.

A scheme for the reduction of the capital of the Cassa di Sconto, which will at the same time satisfy the holders of ordinary and of preference shares, seems difficult to find. At one time there was some talk of amalgamating the Cassa with the Comptoir Financier et Commercial. This would have allowed of getting rid of the preference shares, but the postponement of the hearing of the Cassa's case against the Bank of Athens and the Banque d'Orient till November, renders this project impossible of execution, at any rate, for the present. It is thought, however, that the amalgamation will be brought about towards the end of the year. The fusion of these two establishments will form a powerful institution which should render great services to the country. There is at present no bank in Egypt which can be considered exclusively local apart from the Cassa and the Comptoir, and since the recent crisis these latter have not been working regularly. It would, therefore, be a good thing if they would join forces and work for the benefit of the small traders.

NOTES OF THE WEEK.

The Mediterranean Conference that took place last week at Malta was very properly disguised in the pomp and pageantry attending the naval inspection of the Lords Commissioners of the Admiralty. As has been already pointed out in these columns, it is not to be expected that the results of the conversations will be revealed immediately, even if any actual decisions could be arrived at by the participants. The Admiralty, however, has lost no time in making a statement of interest and importance to Malta and its inhabitants. As a result of the recent inspection the British Government has decided to make "full use" of the island as a naval base. Such proportion of refitting and repairing work will be assigned to the dockyard as will keep it in a normal condition of activity and render it at all times capable of attending to the needs, in peace or war, of any fleet or naval force cruising or operating in the Mediterranean. The statement, it will be noted, does not imply the withdrawal of the Government's decision to base the Fourth Squadron on Gibraltar, and it is to be feared that Malta has seen the last of those palmy days when the presence of a strong fleet in its waters meant for Valletta an additional turnover of more than £1,000 a day. The island, however, is not to be left entirely to its own resources. Although the reference to the necessity for strengthening the submarine flotilla has been thought to conceal the decision that Malta is henceforth to be independent of the fleet, it is more than probable that an increase of the Cruiser Squadron together with the promised dock work will prove to the inhabitants that their important fortress is by no means to be altogether neglected. Strategic considerations must change from time to time, and Malta is now being called upon to bear its own peculiar share of the burden of empire.

The island will undoubtedly command a strong measure of sympathy in its present plight. Its prosperity depended almost entirely on the Imperial expenditure, but this had been for so many years a constant factor that there was some justification for regarding it as a permanent asset. Certainly both public and private expenditure were based at one time on this assumption. The withdrawal of British naval strength from the Mediterranean Sea to Home waters and the later decision to make Gibraltar the base of the Fourth Squadron, bring home to the islanders with uncomfortable force the artificiality of their former prosperity. In this connection, however, the publication of the report of the Royal Commission appointed to inquire into the finances, economic position, and judicial procedure of Malta comes at an opportune moment. While it may be poor consolation for the change in the island's fortunes, it offers at least a basis on which it can work out its own salvation, not without some hope of outside assistance. Malta lacks a river and even a permanent water supply. No timber grows on it, and neither coal nor iron is found. Agriculture is the largest and most important industry, and the Royal Commission well urges that more attention should be paid by the local administration to its development. On the other hand, the report recognises that the Imperial Government cannot regard with indifference the special circumstances that have led to the sudden diminution of the island's prosperity. The crisis, it points out, is purely industrial, consisting, as it does, in the blotting out of a large measure of the employment of the people. It recommends, therefore, a drastic adjustment of public expenditure to the altered circumstances; that public works which cannot be dispensed with should be assisted by Treasury loans, and that the military contribution now paid by the island should be remitted. Further suggestions deal with the question of supplementing or adjusting existing sources of revenue, and among the Commission's tentative proposals are a general *ad valorem* duty to take the place in whole or in part of the grain tax and a scheme for direct taxation. The statement now published by the Lords Commissioners of the Admiralty indicates that the Imperial Government is not altogether indifferent to Malta's embarrassment; but it is very necessary for the islanders to realise that no help from without is likely to be as efficacious as strenuous efforts on their own part to help themselves.

No military operations have been reported from Tripoli during the week, and the Italian fleet in the Ægean Sea has restricted its activity to a short bombardment of Scalanova, on the mainland opposite Samos, or at least of a military camp outside the town. The incident has caused some consternation in Smyrna, where it is feared that a blockade of the port by Italian

Digitized by Google

men-of-war or the closing of the channel by the sinking of Turkish ships may spell commercial ruin to the whole vilayet. As foreign interests are largely represented in Smyrna, it is possible that the Italian Government may consider it politic to refrain from an attack on Smyrna in the same way as it has confined its attention to those islands of the Ægean whose occupation by its troops does not constitute a direct menace to the Dardanelles. Meanwhile, the Greek inhabitants of the captured islands are seeking to improve the occasion by asking the Italians to grant them the same autonomy as has been granted to Samos under guarantee of the Powers, or, as an alternative, union with the Principality. If the Italian Government is well advised and wishes to consult the interests of the islands themselves, it will refrain from encouraging these ambitions, which may eventually prove embarrassing to the inhabitants.

The information that the Cretan deputies in Athens would refrain from any attempt to force their way into the Greek Chamber proved erroneous. Such effort as was made to give effect to their mission, however, was of a comparatively mild type. The streets had been cleared by patrols of gendarmes with fixed bayonets, and several cordons of soldiers occupied the approaches to the Chamber. Some thirty deputies collected in the main square a few hundred yards away, and, owing to the orders given that they were to be dealt with gently, succeeded in forcing a passage to the entrance of the Parliament enclosure. Here stouter resistance was offered them, and after a brief struggle they abandoned their efforts to enter the Chamber. They were then informed that the Prime Minister had consented to receive a delegation from their number, and four deputies were at once selected to wait on M. Venizelos within the Parliament building. M. Venizelos informed them that the Government had decided to prorogue the Chamber until October 14, in order to facilitate their return to Crete. This announcement was conveyed by the delegates to their countrymen outside, and a few minutes later the whole body returned to their hotel. While it is reported that both the deputies themselves and the population of Crete are satisfied with this dénouement, it appears that the Turks are no less pleased by the exclusion of the Cretans from the Greek Chamber. At best, the compromise is only a temporary one. The Cretans are likely to present themselves again when the Chamber meets in October, unless in the interval some solution of the Cretan question that satisfies their aspirations has been approved by the Powers. The latter have once more taken the islanders to task, and called upon them to return to legality and to respect the principles laid down for their guidance. But in the meantime the deputies detained at Suda Bay have not yet been released, and it is to be feared that the unnecessary delay may counteract the good effect produced by the course of events in Athens. The personnel of the Government responsible for the administration of the island for the current month is said to be more amenable to argument than its predecessors, and it would, therefore, be reasonable to hope that the Powers will abandon the policy of lecturing the Cretans by means of collective Notes in favour of the more persuasive method of personal diplomacy.

Salar-ed-Dowleh's threats to annihilate the Persian Government if it would not agree to a conference have been followed by swift retribution. The Government troops have occupied Kermanshah, and the Pretender is once more in full flight. Satisfactory as this information undoubtedly is, it does not of itself mark any definite progress in the settlement of the Persian problem. For some weeks it has appeared probable that Salar-ed-Dowleh's cause was hopeless, although his continued presence on Persian soil was a source of embarrassment to the Teheran authorities. With his final discomfiture the latter are freed from one distracting circumstance, but have their hands more than full in other directions. Their success, however, seems to make it more worth while for the British and Russian Governments to see that they have the best advice and assistance in dealing with the remaining problems. Any attempt on the part of the ex-Shah's brother to retrieve his fortunes at Persia's expense should at least be rendered impossible at this stage.

Turkish troops are virtually masters of the military situation in Albania, although the insurgents still hold the mountains. On Sunday an attack was made on Ipek, and the Turkish outposts were overpowered. After a struggle that lasted intermittently throughout the day and well into the night, the advance of the rebels was checked. The number of troops that have now been despatched to Albania would seem to preclude any serious extension of the disturbances, but the general situation can only be regarded as unsatisfactory. Repeated attempts to open up direct negotiations with the insurgents have met with very limited success, for the chief reason that the Albanians refuse to place any more confidence in Turkish assurances or pledges.

Speaking in the Turkish Chamber on June 5, Hadji Adil Bey, Minister of the Interior, made a statement on the situation in Albania. After describing the insurrection as local in character, he outlined the programme of reforms contemplated by the Government. These included a grant of £T50,000 for public works in the vilayet of Kossovo, an increase of the gendarmerie to 16,000 men for the whole of Rumelia, and the construction of 267 guardhouses. Nahiehs, or sub-districts, would be created in Northern Albania, the governing bodies of which would be selected from among the population, and would receive salaries paid by the State. A sum of £T100,000 would be assigned for these reforms and a similar amount for the construction of prisons. It remains to be seen whether the Government programme, which is set forth in fuller detail elsewhere in this issue, will satisfy the ambitions of the Albanians.

It is impossible to feel altogether satisfied with the news circulated by Reuter's Agency regarding the Trans-Persian railway scheme. According to this statement the British Government has now accepted as completely satisfactory the proposals made for the international control of the projected line. The Cabinet insisted upon the necessity for absolute equality of British, Russian, and French control in the undertaking, and the Russian promoters are said to have agreed to these terms. At a meeting held at the Board of Trade last week, at which the Foreign and India Offices were represented, His Majesty's Government appear to have given their consent to the scheme being formally launched under their auspices. There is, therefore, nothing to prevent the constitution of the Société d'Etudes, which will take in hand the completion of the survey and the work of obtaining the necessary concession from Persia. This body, as already stated, will consist of a council of administration of twenty-four members composed equally of British, Russian, and French subjects. In regard to the question of the break of gauge, it is stated by Reuter's Agency that no difficulty is likely to arise, as Russia is quite prepared to meet the views of India in this matter. The subject of the proposed railway has already been discussed in THE NEAR EAST. While there is much to be said for the contention that railway construction in a foreign country cannot be indefinitely postponed from purely selfish reasons, it is possible to display undue haste in espousing one particular scheme before its significance has been properly appreciated. Recent experience has shown that it is quite possible for a Government to be over-anxious to commit itself to an ill-considered venture. It is true, however, that there is still time for a full discussion of the details of the proposed Trans-Persian Railway, and we shall be mistaken if British public opinion does not call for a careful scrutiny of the report of the Société d'Etudes when it is published.

NOTICE TO SUBSCRIBERS.

"THE NEAR EAST" is on Sale in London every Friday morning. Foreign subscribers' copies are despatched in time to catch the Brindisi mail. Subscribers would oblige by reporting any irregularity in the receipt of the Journal to the Manager, 16 and 17, Devonshire Square, Bishopsgate, London.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 1.

Hadji Adil Bey's Return.

The Minister of the Interior and the other members of the Reform Commission returned on Wednesday morning after 102 days' absence from the capital, forty of which were spent "on trek." Their journey, especially in parts of High Albania, proved exciting and indeed perilous; their military escort was attacked outside Djakova, both when arriving at and when leaving the town, and the main body was ambushed and might have suffered severe losses but for the bad shooting of the Albanians, at the Vizier's bridge on the border between the provinces of Kossovo and Scutari. At a later period they experienced great difficulties in the crossing of the Thenbel pass in Northern Epirus. They suffered much hardship from a storm while crossing the lake of Ohrida, and had a fortunate escape from a bomb laid under a bridge on the Ohrida-Resna road. But they appeared to have the better of their experiences and hardships, and there is reason to believe that the two most troublous regions of the Ottoman Empire will benefit largely from their study of the local needs and grievances.

It is impossible to give the results already obtained in full, but it may be said that the strengthening of the gendarmerie, the adoption of a large programme of road construction, the enlarging or foundation of a great number of schools, the taking of a first step towards the settlement of the land problem in Epirus, the introduction of certain administrative reforms in Northern Albania, and last, but not least, the removal or transfer of a number of inefficient or tyrannical officials are among the first fruits of their journey. It is, moreover, certain that proposals for further important reforms will shortly be laid before the Cabinet by Hadji Adil Bey.

Situation in Albania.

There can be no doubt that the optimism of the central authorities with regard to the recent disturbances in northern Albania is justified. The outbreaks have been localised, and have, to use an expressive, if unliterary, phrase, "fizzled out" in a manner which must have surprised the pessimistic observers of the Near East, whose lucubrations have filled the columns of the *Neue Freie Presse* and other Austrian journals. No further fighting is reported from Kossovo, and the collisions which actually occurred did not amount to very much. The Mirdites—whose chief, Frenk Bib Doda Pasha, has regained not a little of his prestige among his clansmen by his successful intercession for the return to his clan of the rifles taken from them during the recent disarmament—are keeping reasonably quiet, and a certain amount of cattle lifting, without which many of the North Albanian hillmen would certainly starve, is all that can be set against them by the authorities, who are most unlikely to make this a *casus belli*. In Kossovo the local Government has been ordered to abstain from useless and very costly military expeditions into the mountains, and to confine itself to the protection of the workmen employed on the construction of roads, schools, and police barracks, and the repression of really serious cases of resistance to authority.

If Hadji Adil Bey can keep the theorists of the Committee, who think that Albania can be governed as Pera is, and the soldiers, who think that the sword is the only remedy for the internal troubles of the Empire, from causing fresh trouble and confusion, there is a good chance that the Albanians, however particularist they may be, will gradually become reconciled, not to "Turcification," but to Ottomanisation in its new sense of membership of a group of nationalities under the hegemony of the Turk.

The War and its Consequences.

Little news comes from Tripoli. There are reports of Turkish successes in the neighbourhood of Tobruk and Derna, but they are vaguely worded, and inspire little confidence. On the other hand, the Italians are obviously unwilling to advance from their bases on the coast, and so the African war has now reached a deadlock. The expected Italian attack on Chios has not yet taken place, though Italian warships have been taking soundings on the shores of the island. More important than the military aspect of the latest stage of the war are its economic consequences. The Government has still enough money to carry it on till the end of the current month. After that date a fresh advance will be required, and the rate of interest which the bank will demand is an interesting problem. The Customs receipts have fallen off of late, not only owing to the autoblockade of the Dardanelles, but also to the appearance of Italian warships in the vicinity of Smyrna and other Asiatic ports. Not a little loss is likely to be caused, especially at Salonika, by the expulsion of the Italian residents, who include many skilled workmen, whom it will be difficult to replace, and a considerable number of merchants, bankers, and other business men.

The Murder of Zeki Bey.

The trial of the persons accused of the murder of Zeki Bey has at last come to an end. The court found Mustafa Nazim and Ahmed Aga guilty, and sentenced them to fifteen years' imprisonment with hard labour. Counsel for the defence left the Court as a protest against this sentence, which is generally regarded as lenient. It is believed that the defendants will appeal. As for public opinion, it had grown so weary of this interminable trial, and of the attempts of the Press and of counsel to prove the unprovable—viz., the complicity of the Central Committee of Union and Progress, and especially of Talaat and Djavid Beys, in the crime—that the verdict has aroused little comment. In Turkey, as in other countries, the public requires a new sensation, and the *cause celèbre*, if spun out too long, tends to grow stale and tedious. It is difficult to comment on a case which is still *sub judice*. The impression left upon the writer is that the murder was the work of a small clique of turbulent and unscrupulous notables and swashbucklers who formed the Committee Club at Seres and used their influence to blackmail and terrorise their political or private adversaries. The Central Committee did not order the crime, but did not go out of its way to condemn it.

"Thou shalt not kill, but do not strive
Officiously to keep alive"

is probably a fair description of its attitude towards this and other crimes, which were no doubt deplorable, but extremely useful to the cause.

"The Comrade."

The leading weekly journal of India, conducted generally on the lines of the London **Spectator, Nation,** and **Saturday Review,** dealing with politics, education, literature and social questions of India, and the affairs of Eastern countries and Moslem governments, with great ability and independence. An excellent medium of advertisement on account of its large circulation among a select circle of readers in all provinces of India.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, May 29.

Egypt and the Malta Conference.

The Malta Conference, to take part in which Lord Kitchener left Cairo on Sunday, forms naturally the main topic of interest at present. The arrival of the latest newspapers from Europe and the more recent telegrams from London have indicated to the public that the questions to be discussed during the meeting of Lord Kitchener with the Prime Minister, the First Lord, and Sir Ian Hamilton will probably cover a much larger sphere than was generally supposed at first. In the European Press of Cairo a number of articles have appeared setting forth the reasons which might lead to the adoption of the decision to increase the numbers of the British Army of Occupation in Egypt, and with rare exceptions the same question is dealt with in a perfectly calm spirit by vernacular organs. As already stated, the principal preoccupation of the latter is the source from which the money to meet an eventual increase will come. Provided that the additional cost—should the increase take place—be not drawn from the Egyptian Treasury—which would indeed furnish a not unjustifiable ground for complaint, though there is no reason to foresee it—there is no reason why the conjectured step should be considered otherwise than calmly. The presence of the British garrison is but rarely noticeable; the troops are well behaved, and every additional soldier in Egypt would mean additional money coming into the country.

Lord Kitchener in the Provinces.

If further proof of the interest aroused by Lord Kitchener among the natives were needed, it was furnished during his second tour in the provinces at the close of last week. The towns visited on this occasion were Minieh, Beni Suef, Assiut, and Fayoum, and, as before, the British Agent, accompanied by Mr. Ronald Graham, Adviser to the Ministry of the Interior, and Mr. Ronald Storrs, Oriental Secretary at the British Agency, travelled from place to place in a special train. When it is realised that the party was absent from Cairo but little over forty hours and that summer temperatures are now becoming the rule, it will be clear that the British Agent does not permit the possibility of fatigue to outweigh his desire to see for himself how things are in the country. At each of the places visited streets were decorated and large numbers of people were present to welcome Lord Kitchener, whose arrival was in most cases heralded by the strains of the National Anthem. At Assiut the British Agent called personally upon a number of notables, and had thereby the opportunity of conversing with important Copts other than those who reside in Cairo. Schools of all kinds were visited in the course of the tour, and, as before, a number of questions of interest to the rural population were touched upon. A good criterion of the interest taken by the natives in these tours of the British Agent is afforded by the lengthy descriptions of the doings in each place which are printed in the vernacular Press. The inclusion among the guests invited to Lord Kitchener's garden party at the end of the "season" of a large number of Egyptians created, as remarked at the time, the happiest impression in native circles. It would seem that this impression is in a good way to being further heightened by the obvious trouble to which the British Agent is putting himself to come into personal touch with the inhabitants of the provinces.

The Law Relating to Antiquities.

During recent years frequent experience has shown that existing legislation with regard to antiquities in Egypt was not framed in such a manner as to attain the object aimed at. Accordingly, a new law, setting forth in a definite manner the right of the Government in the matter of antiquities, has been drawn up, and it is hoped thereby to protect efficaciously from commercial exploitation the monuments which form an important part of the historical, artistic, and archæological wealth of Egypt. The basis of the new law is the principle, already recognised in other countries, such as Greece, which possess historic monuments, that all antiquities in the widest sense—Pharaonic, Greek, Roman, Byzantine, and Coptic—are the property of the State. In the case of monuments of large size the Government will be able, either to remove them from the place where they stand, or to leave them in their original position, expropriating, for this purpose, the piece of land on which they are situated. The owner of the land in question will not, however, profit by the fact that his land contains antiquities, since the expropriation price will be fixed entirely without regard to the existence or the value of the monuments upon it. With respect to small objects, the finder must hand them over to the Antiquities Department, with whom he will go shares in equal parts. As hitherto, permission to carry out excavations will be given to private persons, who may be allowed to retain some of the objects discovered. Finally, in order to make the law as efficacious as possible, the penalties for the contravention of its provisions have been increased, since it has been found that the punishments hitherto inflicted have not been heavy enough to prevent the robbing of monuments and the sale, in many cases for very large sums of money, of the stolen objects.

The Capitulations Again!

A modification, in the direction of increased severity, of existing legislation regarding antiquities has long been felt to be desirable. In its present form, however, the new project is necessarily of limited scope, since, without the concurrence of the foreign Powers, its provisions can only be enforced as regards natives. In a recent discussion of the project by the Committee of the Legislative Council and the Minister of Public Works, the former laid stress upon this point. To this Ismail Pasha Sirry replied that for the moment the law must be looked upon as experimental, and that experience of its working would enable further modifications to be introduced and gaps to be filled in. At the meeting of the Legislative Council to-day the Minister of Justice announced that the Government was already considering the question of taking steps in the competent quarter, with a view to making the law applicable to Europeans, while several members put forward the suggestion that a similar measure should be introduced for the protection of Arab monuments. The strict enforcement of the law, should similar provisions be made applicable to Europeans and natives alike, would mean the cessation of a lucrative trade with tourists, since one of the articles forbids the export of all antiquities without a special permit from the Government.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes le 31 Mai.

L'ouverture de la chambre et les deputes cretois.

Nous voilà arrivés au moment tant redouté. Vingt-quatre heures nous séparent à peine de l'ouverture de la chambre qui tient en émoi l'opinion publique à cause de la présence des députés crétois.

Dimanche dernier les députés crétois ont été invités à un banquet donné à Phalère par les réprésentants de certaines corporations professionnelles avec quelques hommes de lettres et d'anciens politicens. Au dessert le fameux professeur Mistriotis, le politicien crétois M. Pologiorgis et autres ont pris successivement la parole et ont salué l'arrivée des réprésentants crétois par des discours brûlants de patriotisme qui, tout en interprétant le chagrin légitime de deux peuples congénères qu'on empêche de s'unir, avaient le tort de ne pouvoir point changer la cruelle réalité des choses. Ce sont ces patriotes exaltés, qui sont poussés aussi par quelques adversaires de M. Vénizélos, qui excitent les Crétois. On leur dit que c'est une honte pour eux de retourner en Crète sans avoir accompli leur mission; qu'ils doivent opposer de la résistance et provoquer au moins une perturbation quelconque.

Mardi soir les dits députés ont été reçus par M. Vénizélos au ministère de la guerre. Cette entrevue s'est prolongée pendant une heure et demie; on a discuté, mais sans arriver à aucun résultat. MM. Lymbritis et Pologiorgis, ainsi que deux autres Crétois, ont soutenu que le moment était très opportun pour effectuer l'union avec la Grèce et que c'est dans ce but qu'ils ont été envoyés par l'assemblée révolutionnaire pour siéger dans la chambre hellénique. M. Vénizélos leur a encore assuré que, s'il les admettait à la chambre, la Turquie déclarerait la guerre à la Grèce, et il a fait à ses compatriotes des communications confidentielles pour leur démontrer que le pays n'est pas en état d'entreprendre une guerre à l'heure actuelle. D'ailleurs, aurait ajouté M. Vénizélos, en supposant même qu'on évite la guerre, on ne pourra éviter le *boycott* du commerce grec ni les autres mesures vexatoires que la Turquie s'empressera de rétablir contre les Hellènes et tout cela sans profit aucun pour l'union qui n'a rien à gagner à leur entrée dans la chambre. En dernier lieu le président du conseil les a adjuré au nom de la patrie de ne pas insister et d'attendre des circonstances plus favorables.

Ces paroles ont produit un certain effet sur l'esprit de quelques-uns des députés, mais les autres sont restés intransigeants. Pourtant ils se sont réservés d'envoyer le surlendemain une commission pour lui donner une réponse définitive.

Ce même jour de mardi une commission de députés crétois a remis aux ministres des puissances protectrices la note dont je parlais dans ma lettre précédente. Par cette note les Crétois, rappelant aux puissances leur promesse d'examiner avec bienveillance leurs aspirations, qu'elles reconnaissaient comme légitimes, à la première occasion favorable, ils demandent que, conformément à cette promesse, elles veuillent bien sanctionner leur participation à la chambre grecque.

Hier soir une commission composée de neuf députés crétois s'est rendue chez M. Vénizélos, mais malheureusement il n'a pas été possible d'arriver à une entente. Les plus modérés parmi les députés avaient été entraînés par les autres. Aussi les membres de cette commission lui ont-ils déclaré que les députés insisteront à entrer à la chambre à tout prix; lui de son côté leur a également déclaré qu'il est décidé à leur empêcher à tout prix l'accès. A onze heurs du soir les ministres se réunissaient en conseil de cabinet au cours duquel il a été décidé de mobiliser toute la garnison d'Athènes, s'élevant à environ 2.000 hommes pour occuper militairement tous les accès autour du parlement et suspendre la circulation, excepté par la rue Stade. Le ministre de justice, M. Dimitracopoulos, n'ayant pas voulu s'associer à ces mesures, a donné sa démission. Il était d'avis qu'on devait les laisser entrer comme de simples particuliers et ensuite lever aussitôt la séance et ajourner la chambre jusqu'en octobre.

Ces mesures de rigueur sont moins dirigées contre les Crétois que contre ceux, parmi les adversaires de M. Vénizélos, qui, comme je le disais précédemment, tâcheront de tirer parti de cette difficulté pour le mettre dans l'embarras. Ainsi on assure que des hommes des vieux partis parcouraient hier la ville et demandaient aux marchands de signer une déclaration les engageant à fermer leurs magasins pour suivre les députes crétois et les aider à entrer dans la chambre.

Les ordres donnés aux troupes sont, à ce qu'on affirme, de refouler d'abord avec douceur les députés crétois qui pousseraient les soldats pour entrer dans la chambre et ensuite, en cas de résistance, d'user graduellement de la violence. On craint cependant que les troupes ne refusent d'exécuter ce dernier ordre. Malgré tout cela dans les cercles compétents on continue à être optimiste, estimant qu'il n'arrivera rien de grave. Demain nous le saurons. Mais quoiqu'il arrive, il n'est pas moins évident que, si par suite des mesures militaires prises pour demain, on parvient à empêcher toute perturbation de l'ordre, il ne serait cependant pas prudent que la chambre continuât à siéger dans ces circonstances si périlleuses. Aussi M. Vénizélos procédera-t-il, aussitôt après la cérémonie religieuse, à l'élection du président et du bureau de la chambre et ensuite, une fois qu'elle sera ainsi légalement constituée, il la fera ajourner, probablement *sine die*, pour pouvoir agir suivant les circonstances. Le cabinet sera prochainement remanié presqu'entièrement. M. Bactivan, un des meilleurs avocats d'Athènes, a été nommé ministre de la justice.

Les puissances protectrices ont fait remettre avant hier, par leurs consuls à la Canée, au gouvernement crétois une note par laquelle elles font savoir qu'elles ne sont pas disposées à admettre le système adopté de destituer les fonctionnaires musulmans qui ne consentent pas à prêter serment au roi de Grèce et à les remplacer par des Chrétiens, vu que cette pratique constitue une atteinte aux droits de la population musulmane et une violation du *status quo*.

Les manœuvres de l'armee hellenique.

Les manœuvres de l'armée, qui ont commencé dimanche sur les plaines de la Béotie, sont suivies avec beaucoup d'intérêt. Sauf deux ou trois jours de chaleur, elles ont été favorisées par un temps superbe et par une température agréable.

La division d'attaque venant du nord marchait sur Athènes et faisait reculer tous les jours la division de la défense. Après avoir occupé Thèbes elle est parvenue près de Tatoï avec quelques pertes, un de ses régiments ayant été un jour cerné et fait prisonnier par la division qui figurait l'armée de défense.

A l'issue des operations de chaque journée le général Eydoux réunissait autour de lui les officiers supérieurs et leur faisait la critique du combat, relevant les fautes commises. Il a remarqué que l'infanterie ne profitait pas toujours des accidents du terrain pour se dérober au feu ennemi, que la cavalerie dans certains cas est restée immobilisée et inactive, que l'artillerie a perdu un jour la division à laquelle elle appartenait et, dans un autre cas, qu'elle tirait à une distance trop grande et hors de portée de l'ennemi, enfin que le service du train des équipages se faisait avec une certaine confusion et laissait à désirer. Par contre le service d'intendance, qui était dirigé par l'officier français M. Bonnier, a été fort satisfaisant.

Le général Eydoux a néanmoins loué les qualités des officiers et l'endurance des soldats et il a trouvé que tant l'artillerie que les autres armes avaient fait des progrès remarquables.

Après un repos d'un jour les troupes continueront aujourd'hui et demain des manœuvres de division. Dimanche matin les deux divisions réunies marcheront contre un petit corps de troupes figurant une armée d'occupation; vers midi les troupes se concentreront à Tatoï, où elles défileront devant le prince royal.

Le premier aéroplan militaire a fait son apparition aux manœvres mercredi. Le lieutenant Cambéros, qui le montait, a pu y arriver non sans beaucoup de difficultés à cause des violents remous causés par le voisinage des montagnes et qui l'ont obligé de se tenir constamment à une hauteur de 1.100 mètres. Exécutant l'ordre qu'il avait reçu de jeter deux bombes sur l'armée ennemie, il laissa tomber deux paquets de dragées qui sont venus pleuvoir sur la tête des soldats provoquant de vives acclamations.

L'idée de constituer une flotte aérienne qui puisse contrebalancer l'infériorité numérique des forces militaires de la Grèce, lancée par le prince Constantin et le président du conseil, a rencontré un accueil euthousiaste et des sommes d'une certaine importance ont déjà été offertes dans ce but par des patriotes grecs.

TEHERAN LETTER.

(From Our Own Correspondent.)

Teheran, May 27.

The Death of Yeprem.

The great Yeprem, as he himself predicted but a short time back, died a soldier's death. He was shot during the last fight with the Salar-ed-Dowleh's forces at Shurijieh, whilst directing an operation which resulted in the abandonment by the enemy of a point of vantage. It has been said that he unnecessarily exposed himself to the enemy's fire at short range. Be this as it may, a commander of a force in action must be the best judge as to the need of his presence at any particular spot, and whether or not in this particular case the advantage gained was not too dearly purchased is not for us to say. All we can say is that he died fighting a successful action, and we cannot ask more of any soldier.

The Rout at Shurijieh.

The action at Shurijieh appears to have been a severe one. It is impossible to obtain accurate information regarding the numbers engaged, but we gather that the Government force amounted to something in the neighbourhood of 1,000 men, as against about 1,500 on the side of their opponents. Similarly, in the matter of casualties, no reliable information is to be obtained. Acoording to the official reports the enemy lost 300, and the Government five or six! After Yeprem's death the command was taken over by Gherrie, the next best officer in the Armenian ranks. Once defeated the enemy was kept on the run. His dispersal is apparently complete, for the last news we have is that the Government force has arrived at Kangavar en route for Kermanshah, which town they expect to reach in about two days from now. In his last official despatch the commander states that he had received a report from Kermanshah to the effect that the Salar-ed-Dowleh has been murdered in the house of his chief supporter, Daoud Khan. Whether the report be true or not, it is not unreasonable to believe that the problem of the rebel Prince is one of the past. The reoccupation of Kermanshah by the Government troops will deprive this troublesome individual of the main source of his funds. Further, the bulk of his supporters has already left him. In these circumstances the only sensible course open to him is to leave the country.

Cabinet Changes.

The Cabinet is at the present moment undergoing another shuffle, and during the process the work of Government is suspended. The Kawam-es-Sultaneh, Minister of the Interior, has resigned, the result of his objections to the use of a secret telegraphic code by the Prime Minister in his communications with the Kawam-ul-Mulk in Shiraz. The Vusugh-ed-Dowleh, Minister of Foreign Affairs, is also resigning out of sympathy, it is said, for the Kawam-es-Sultaneh, who is his brother. There will now be a general shift round, but it is quite impossible at present to predict with any accuracy who the new Ministers are to be.

NOTES FROM JERUSALEM.

(From Our Own Correspondent.)

Jerusalem, May 20.

The New Deputies.

The elections are now over, and, as anticipated, the Committee here, as elsewhere, have won the campaign. Rowhy Bey Al-Khalidy, Vice-President of the dissolved Parliament, was re-elected. He is one of the ablest members of the Committee, and it was to him that the latter entrusted its fate in Palestine. He is a grandson of Yussuf Pasha Al-Khalidy, deputy for Jerusalem in Midhat's Parliament thirty-six years ago, and was formerly Turkish Consul in Bordeaux. He is well versed in Arabic literature, and knows Turkish very well also. The two other successful candidates for this Mutesarrifiat are Othman Effendi. An-Nashashiby, and Ahmed Arif Bey Al-Husseini. The former is also a native of Jerusalem, and is a rich landowner. He is an advocate of European civilisation, and is able to explain to any of his hearers the recent discoveries and inventions in science, but he has not used the new methods and implements of agriculture on his own extensive lands. He does not know enough Turkish to enable him to share in the discussions of Parliament. The third deputy is the Mufti of Gaza, a sheikh and an eloquent speaker, but he also does not know Turkish well.

Sports Committee.

Owing to the steady growth of interest in sports (mainly football and cricket) in Jerusalem, a want has been felt for a central committee, or board, which should devote some time to the furtherance of such sports here and to the arrangement of matches. The different institutions in the town were asked to nominate two representatives each, who should meet to consider the formation of such a committee. A good number, representing institutions of all nationalities, responded, and after several sittings and due discussion a code of rules has been drawn up, the adoption of which is to be proposed at a general meeting of all the representatives. It is only a subject of wonder that some action of this sort has not been taken before. But better late than never!

The Bishop Gobat School.

The eighth annual field-day of the Bishop Gobat School took place on Saturday, the 4th inst., when a good number of spectators were present on the playfield of the school. The boys gave a very creditable exhibition of gymnastics, as well as making a good show in the usual races and different jumping contests. Mr. Satow, British Consul, who has always been greatly interested in these annual sports, was unfortunately not able to be present, but he sent 20 frs. to be given as prizes to the two boys most efficient in athletics. Miss Keightley distributed the medals and prizes.

THE BAGHDAD RAILWAY.

Writing upon the subject of the Baghdad Railway—and Baron Marschall von Bieberstein—in the *National Review*, Mr. Lovat Fraser asks:—

Why are Baron Marschall von Bieberstein and his friends so eager for British participation? Why is the founder of the Baghdad Railway to weave the last strands of his web in London? Is it money? Germany, with all her savings banks and her abounding prosperity, says she does not want money. Is it to "please" us? Whatever the faults of German statesmen may be, they never proffer a slobbering affection. Is it to remove difficulties? We have seen that there are no difficulties and never have been. The way to the Persian Gulf has always been open to the Baghdad Railway. Not the slightest explanation has ever been offered by the German promoters why British co-operation has been sought, sometimes with cajolery, sometimes with veiled menaces. There is nothing more mysterious in international politics than this fervid German desire to secure as a partner in building a railway the nation which is violently abused in the piles of pamphlets now displayed in every bookseller's shop in Berlin. If it does not mean that we shall find ourselves entangled in a dangerous complication, then some of us have studied in vain the last forty years of German diplomatic history.

The article is of particular interest at the present time, in view of conflicting rumours about the negotiations.

NOTES FROM ROUMANIA.

(From Our Own Correspondent.)

Bucharest, June 1.

Centenary of the Loss of Bessarabia.

An anniversary of a painful character was celebrated by Roumania on May 29. In answer to the festivities organised by Russia at Kishineff to celebrate the anniversary of her first annexation of Bessarabia in 1812, the Roumanians organised counter demonstrations on this side of the River Pruth. The Roumanian Government took no part in the proceedings, in order not to excite the resentment of a powerful neighbour; but nevertheless the people succeeded in giving the demonstrations a national, dignified, and solemn character. Most of the shops were closed in the morning, and all of them had hoisted the national flag draped with a piece of black crêpe. A Te Deum was sung at 11 a.m. in the principal church of every town, and this was followed by a procession through the streets, in which the students and organised societies took a leading part. In the larger towns lectures on Bessarabia were given in the afternoon, under the auspices of the "Ligue Culturale," and at Bucharest, Jassy, and Galatz exhibitions of Bessarabian industry and art were organised. There were no excesses against Russians to be recorded; but at Jassy a Russian shopkeeper was requested by a party of students to hoist the Roumanian flag draped with crêpe; he complied immediately, and was not molested in any way.

Conservative "Concentration" Postponed.

The Prime Minister, M. Mairoresco, has left for Western Europe on leave, and the negotiations between the Government and the Conservative-Democrats with a view to a re-union of the two branches of the Conservative party remain in abeyance. It is said that pourparlers will be resumed early in the autumn.

Royal Cruise on the Danube.

The King and Queen, the Crown Prince and Princess, together with Prince Carol and Princesses Elizabeth and Marie, left Bucharest on Sunday and embarked at Giurgevo on the Royal yacht "Stefan cel Mare" for a few days' cruise on the Danube. The Royal party first went to the Crown Prince's shooting box on the Machin Canal, opposite Braila, and visited the State fisheries, which are situated in the vicinity. The party is now at Toulcha, and will eventually reach Constantza, on the Black Sea, through the St. George's branch of the Danube.

THE UNREST IN CYPRUS.

(By Our Cyprus Correspondent.)

The Legislative Council re-assembled on May 14, and closed almost at once. Owing to the continued absence of the Greek members—who had previously withdrawn in a body in consequence of differences with the Government—several useful measures which had been introduced were not proceeded with.

The disturbances which have recently taken place at Limassol and, to a lesser extent, at Nicosia, leading to bloodshed between Turks and Greeks, have probably been due in part to the feeling of irritation and tension brought about by the Turco-Italian war. The seizure of Rhodes by the Italians has brought the war rather close to our doors, and has, possibly, helped to rouse the dormant animosity of both races. The *Times* Supplement of Friday, May 24, contains much significant information regarding the colonies and dependencies of the Empire, and the columns devoted to Cyprus are particularly instructive to those interested in the island. Special and emphatic reference is made to the burden of the Tribute, and to its effects in retarding the economic and industrial development of the island. The conditional tenure, under which the island is administered by Great Britain, remaining as it does an integral part of the Ottoman Empire, makes foreign capital shy of investing in the island, nor is this reluctance likely to diminish so long as present conditions of British occupation prevail; and these are determined by the terms of the original Convention.

NOTES FROM SMYRNA.

(From Our Own Correspondent.)

Smyrna, May 28.

The Expulsion of Italians.

The order from Constantinople for the expulsion of the Italians resident in the vilayet of Aidin expired on Saturday, May 25, but a few influential merchants succeeded in obtaining a week's delay. The order recently issued regarding the Italians in the other parts of Turkey, giving them ten days to quit Ottoman territory, caused some confusion here, and several of the local newspapers interpreted the order as applying also to Smyrna, thus giving the Italians in this province other ten days' delay. This morning the authorities promptly pointed out that they were wrong, and issued an official notice to the effect that those Italians who still remained without permission would be expelled by force and that anyone harbouring Italians would be severely punished. All persons knowing the hiding-place of any Italians are also called upon to give information to the police. The authorities are apparently determined to carry out the expulsion order as completely as possible, and there is no doubt that the Italian Government will reply to these measures.

Two well-known Greek editors are also being expelled, and newspapers publishing articles likely to excite public feeling are promptly dealt with. This is well in one sense, but the Press should certainly be allowed to point out the dangers of the present situation.

Foreign Governments Petitioned.

Yesterday a great meeting of all the business men of Smyrna was convened by the British Chamber of Commerce, and an international committee was appointed to draft a petition to the various foreign Governments, exposing the danger to Smyrna commerce in the event of a blockade by the Italian fleet and asking them to take all steps possible to guard against such an action on the part of the Italians. There are eleven different countries represented on this committee. The export season will soon be commencing, and the effects of a blockade would be disastrous.

IRRIGATION IN THE NEAR EAST.

By Sir William Willcocks, K.C.M.G.

Mr. Webb, of the Karachi Chamber of Commerce, lately wrote an article in the *Nineteenth Century* on "The Coming Deluge." He meant a deluge of gold, which was being poured into the markets of the world at a rate of £100,000,000 per annum. To the fact that the profitable expenditure of this money did not keep pace with its production he attributed much of the present-day worries and troubles. It struck me, as I read the article, that one might go back to the oldest science in the world to enable us to spend some of this money profitably. There are many irrigation fields in the Near East which might be profitably worked. Egypt could spend on:—

1. A thorough drainage scheme for the country.....	£6,000,000
2. A canalisation to irrigate all the lands to be reclaimed without injuring the higher lands.....	6,000,000
3. Escapes into the deserts to insure the country against floods	6,500,000
4. Reservoir and training works and power stations in the Sudd region of the White Nile.....	5,000,000
	£23,500,000
The Cilician plain consisting of 1,000,000 acres might be thoroughly drained and canalised for...	£8,000,000
The Babylonian plain of 5,000,000 acres of reclaimable land might be provided with irrigation and drainage and agricultural works for	£50,000,000
Escapes into the deserts for the two rivers.....	7,000,000
	£57,000,000
The Karun and Kerkha deltas, containing 1,500,000 acres of reclaimable land, might be canalised and drained, and provided with agricultural works for	£15,000,000

Here we have a total sum of £124,000,000 which might be spent, and, if judiciously managed, might prove itself as profitable as a gold mine and as permanent as water power depending on the melting snows of the Alps. Europe has thoroughly learned the value and permanency of water used as power; it has only just begun to grasp the value and permanency of water used for irrigation. In realising these truths England is far behind America and the rest of Europe. The Institution of Civil Engineers in Westminster classes irrigation as a sub-section of sewerage, while our Australian cousins go back to pre-Adamite times and conserve the waters of their rivers for navigation instead of "wasting" it on irrigation, even in years of drought when there is scarcely a ton of stuff to transport by boat on its then God-forsaken and barren plains.

In the early days of the world (and we must remember it was a Near Eastern world) there were giants on the earth who diverted the deluges of water into the mighty irrigation works of Egypt and Babylonia. Our world of to-day is waiting for some financial giant to divert some of the deluges of gold into the same channels as the ancients did, and so bring back the prosperous days of 2,500 years ago in the four best known deltas of antiquity.

ALBANIAN AFFAIRS.

A Servian View.

(From Our Belgrade Correspondent.)

In a long article, published to-day (June 1), the *Trgovniski Glasnik*, the most highly esteemed Servian paper, gives renewed warnings, and puts forward fresh suggestions on a subject which seems to haunt and terrorise all Servians. It is always that nightmare, the foe of Servia, it is said, that threatens complications in the Balkan peninsula, always the existence of Servia which is threatened. This is an incubus that no Servian can shake off.

Foreign Influences.

The present unrest in Albania does not accord with the wishes of the more enlightened Albanians. These local uprisings are not the spontaneous movements of an oppressed people. They are instigated by the local chiefs, who receive support from abroad, which renders suppression all the more difficult.

Before 1910, says the *Trgovniski Glasnik*, when it was of frequent occurrence that Servians were killed and deprived of their property by Albanian bands, no European paper mentioned the subject. Nor did Europe take any notice when the Turkish Government seized a large quantity of arms that came from Herzegovina, or when an Albanian band obtained ten thousand small arms from an Austrian magazine, which it was supposed they had stolen. Europe ceased to be deaf and blind to these foreign interventions only when Turkish guns began to thunder against the revolutionaries, when the ordinary combats developed into a species of civil war, and autonomy was demanded for Albania. Only then is it discovered that the demands of Albanian plunderers are justifiable, and that they also have a right to freedom—which, according to Albanian ideas, represent disorder, violence, and anarchy.

The Source of Trouble.

The present uprising in the districts between Petch and Prizrend, the journal continues, has a grave aspect, because Turkey is now engaged in a war. When it is borne in mind that Austrian and Italian propagandists are actively at work in Albania and Old Servia, and when one considers that Italy and her allies do all they can to stir up the Albanian element, it is easy to perceive the source of serious complications in the Balkans!

THE MALISSORS.

Proposed Government Reforms.

The following are the decisions taken by the Ottoman Government in execution of the measures adopted towards the Malissors:—

1. A general amnesty has been extended to all those who took part in the disorders and have since submitted. There has been no prosecution of any Malissor of this category.

2. It has been decided that the Malissor conscripts would do their military service in the Constantinople circonscription or in the vilayet of Scutari. There has been no necessity for carrying this decision into effect, as all the vilayet of Scutari has been exempted from military service this year.

3. The present Kaimakam of Touz speaks Albanian, and henceforward officials knowing that language will be chosen for the post of Kaimakam. The Mudirs of the communes will be chosen from among the Albanian Bairaktars, and their salaries will be paid by the Government. To prevent strife the Sub-Governor had requested the Bairaktars to choose from their own numbers those who ought to be appointed Mudirs in the different nahiehs, but as they could not agree upon their choice he has had to choose himself those who were most qualified for the positions of Mudirs. Thus three Mudirs have already been appointed to the Caza of Touz, and nomination of the others will take place in the same way. Since the members of the Administrative Councils are elected by the population, the latter are free to choose those they think best qualified for the above posts.

4. Considering the precarious situation caused by the disorders, the Malissors will be exempt from taxation for two years. The taxes will then be assessed according to the economical condition of the population.

Digitized by Google

5. A Bill will be introduced in Parliament for the levying of one piastre only per head of sheep from the Malissors, to take effect from next year, as a sheep tax (Aghnam).

6. Leave is granted to the Malissor shepherds to carry arms, except in the towns and market places. As almost all the Malissors are shepherds, this measure practically extends to the entire Malissor population.

7. The opening of primary schools at Chale, Chouch, Kastrati, Groda, Hoti, and Clementi has been decided, where the language taught will be Albanian, and the masters employed will be paid by the Government. Insuperable difficulties have, however, been encountered in the selection of masters. It was then decided to open in Scutari itself a boarding school for the young Malissors, but the Bairaktars refused to send their sons to that institution. It was then thought of opening one class-room, where the priests would teach; but the Malissors refused this solution as well. It was then decided to open two primary boarding schools—one at Touz and another at Zagora—so that the pupils will not have to go a great distance from home. The erection of three primary day schools has begun in three communes, and the Scutari boarding school, moreover, will serve as a public school for the young Malissors. Credits have already been allowed for all the schools.

8. The Government will construct roads and ways in all the communes inhabited by the Malissors.

9. Immediate orders have been given for the construction of these roads as soon as the Malissors return. Those already commenced are nearing completion. A thousand Turkish pounds have been allowed for the building of the causeway at Touz, where Malissor workmen will be employed.

10. A commission, having at its head an official from the vilayet of Scutari and a representative of the bishop, will be formed in each commune to fix the assistance to be extended to everyone who has suffered from the disorders, and those whose houses have been burnt down.

11. His Imperial Majesty the Sultan has granted 10,000 Turkish pounds assistance to the Malissors, and the Government will add the necessary sum towards their relief.

12. Every Malissor returning to his home will receive a certain quantity of maize seeds and certain help in money proportionate to his needs.

The following sums have been allowed up to March 26 by the Imperial Government as regards the expenses mentioned in paragraphs 10, 11, and 12:—

	Piastres.	Paras.
For those houses which have been burnt down	4,802,284	14
Maize and other food reliefs	1,787,109	06
One pound relief per individual	763,754	16
Rewards to the Chiefs	12,414	24
Weighing, costs of carriage by land and sea, warehousing, porters and other similar expenses	69,776	32
Indemnities paid for losses experienced by that part of population which did not join the insurrection and for damages caused to the churches and to the priests' belongings	326,572	31
Officials' travelling and other expenses	60,305	31
Total	7,822,217	34
Price of maize to be distributed until the end of June	700,000	00
Grand total	8,522,217	34

The following are fresh decisions on the part of the Inquiry Commission presided by Hadji Adil Bey, and of which Mr. Graves is a member, as regards the further demands of the Malissors:—

1. Upon the presentation of a list by the archbishop a sum of 4,200 Turkish pounds had been allowed for the damage caused to the religious objects of the churches and to the priests' belongings, of which sum only 2,200 Turkish pounds had been paid for the religious objects. It has been decided to pay the remainder of the above sum.

2. As the inhabitants of Touz had asked for an indemnity of 300,000 piastres for their shops, which had been looted by the Malissors during the disorders, and had afterwards accepted 40 per cent. of the said sum, a credit of 1,260 pounds has been allowed for the purpose.

3. As the insurgents at Kastrati had asked for an indemnity of 1,700 pounds for the loss of their cattle and chariots left at their habitations during the disorders, the said sum has been allowed by the Ottoman Government.

4. Some tribesmen who had not joined in the insurrection, and claimed no indemnity for damage suffered, have asked for relief as paupers. The Government have, in consequence, decided to grant them assistance also, in the form of maize out of the sum of 7,000 pounds allowed for that item.

The total expenses necessitated by the four above-mentioned demands amount to 11,946 Turkish pounds.

As the Ottoman Government have thus received kindly the demands drawn up after the disorders as well as the last four mentioned claims, the inhabitants of these districts having no longer any cause of complaint, have since returned to their respective occupations.

LETTERS TO THE EDITOR.

PERSIAN AFFAIRS.

To the Editor of THE NEAR EAST.

Sir,—The return of Lord Lamington to London leads one to ask what the next move of the "Persia Committee" will be with regard to Persia.

It cannot be expected that his lordship has been favourably impressed by the condition of affairs which were brought under his immediate notice—now and then somewhat rudely—during his travels through Persia.

During the course of his brief journey across the country the chaos prevalent in all the southern provinces has become more chaotic; rapine, plunder, and murder have increased; and there is now no safety in all those parts, and trade and travel are at a standstill.

Throughout the country, north, south, east, and west, the conditions of life are onerous to a degree; in many parts the bare necessaries of life are wanting, or are almost out of the reach of the poorer class, entailing a degree of misery and distress only to be equalled by a veritable famine. The cultivators are unable to convey what little produce they can save from destruction to the markets, and a wail, deep and poignant, goes up through the length and breadth of the land for peace—peace and plenty—and for a return to the happy days of pre-mashroota memories when tranquillity and prosperity reigned in all the land.

With his able experience and, we hope, an open, unbiassed mind his lordship can scarcely have failed to note the pernicious effect exerted on the country by the party of Ultra-Nationalists, and we may justly hope that he will put the "Persia Committee" right on many points of their convictions and propaganda.

Having now the Zaigham ud Dowla, as paramount Chief of the Qashqauee tribes, working in harmony with the Qavom ul Mulk (both of whom are in friendly sympathy with the Central Government and the Bakhtiari chiefs), it ought not to be a matter of much difficulty for the British Government to concert measures (even to the avoidance of actual interference) in agreement with these authorities for bringing the province of Fars, and the southern provinces generally, into order and tranquillity.

It is not too much to hope, and expect, that Lord Lamington will bring his wide experience and present knowledge to bear in trying to induce a more active and beneficial policy on the part of the British Government (and at the same time to exercise a restraint over the "Persia Committee" in preventing them from mischievous intermeddling) to the betterment (and lasting benefit) of the present deplorable condition of Persia.—Yours obediently,

B. W. STAINTON.

Horndean, June 5.

TRUTH AND RUMOURS.

To the Editor of THE NEAR EAST.

Sir,—Will you permit me to comment upon the first two paragraphs in the article from "A Correspondent in Turkey" dealing with Truth and Rumours?

The truth about the barbarous treatment of Arabs in the Oasis of Tripoli by the Italian soldiery (particularly from October 23 to 29, 1911), and of the wholesale massacres of unarmed men, old men, boys, women, and children was fully reported by eye-witnesses and confirmed by independent evidence. The main facts can easily be *proved*, despite Italian *official* versions and denials. I only wish that I could agree with your correspondent, "that there has been some mistake," but the evidence in my possession is altogether conclusive and indubitable.

Your correspondent's inference is drawn from the fact that "all the leading papers, which were so ready to blame the Italians at the start, have now ceased to find fault with them." Thus, he argues, the atrocities were but rumours. *Sancta Simplicitas!*

To my mind, the change in the attitude of the Press can be accounted for in a much more obvious and rational way. The European States interested in the *partition* of North Africa and the *exploitation* of its resources and peoples, are not at all likely to approve

Digitized by Google

a Press that tells inconvenient truths, militating against the character of one member of the great conspiracy.

No, sir, the Italian Ambassador could, if he were at liberty to tell the truth, explain to your correspondent the real reasons why the Press ceases to find fault with Italy and makes clumsy efforts to suppress even the memory of the atrocities committed, and which were faithfully recorded at the time of their occurrence "in the interests of humanity."—I am, yours obediently,

CHARLES ROSHER.

74, Church Street, Chelsea, S.W.
June 4, 1912.

THE SITUATION IN CYPRUS.

To the Editor of THE NEAR EAST.

Sir,—The impartiality with which your paper is conducted, and the great interest displayed all along by it in whatever appertains to the questions of the Near East countries, prompt me to ask you again the favour of assigning me a small space in your columns so that I may accurately explain the present situation in Cyprus. I have noticed that several papers confuse a simple disturbance between Greeks and Turks at Cyprus with the political anomaly created there some two months ago, the cause of which has no connection whatever with any occasional opposition or disagreement between the two elements in the isle. Moreover, I have observed that all those who have discussed in public the present crisis are apt to ascribe its cause solely to the dissatisfaction of the Cypriots, engendered by the tribute.

There exist at Cyprus two serious political questions, which brought about the resignation of the Greek members of the Legislative Council, since which the Greek population kept completely away from any co-operation with the Government. One of these questions is of a constitutional nature, the other is purely financial. The Cypriots are asking for the introduction of certain reforms with respect to the Order in Council, which forms the Constitution of the isle, such reforms to give in the first place more political liberties to the country, and, secondly, that the representation of the population in the Legislative Council be in proportion to the numbers of the two elements in the isle. It is, however, confessedly admitted that when—viz., in 1882—the Constitution was granted to the isle, this was considered by the inhabitants as adequate. In that period the Cypriots were not so far advanced in education, nor were they sufficiently mature in politics, as they are at present. Things have changed since then, and assuredly they have changed, thanks to the freedom of spirit with which the British administration of the island is carried on. It is natural, therefore, owing to that advancement that the Cypriots should aspire to somewhat greater political extension, and to be allowed to have a voice in the administration of the affairs of their country. To these aspirations, moreover, they are encouraged by the liberality of the Constitution granted to the British colonies in South Africa, and by the open sympathy of H.M. Government shown towards Home Rule for Ireland.

Besides, there is the number of the elective members of the Legislative Council, which was fixed in 1882 at nine Greeks and three Turks, taking as a base the then population of the two elements of the isle. The census, however, which took place in April, 1911, proved that the Greeks form four-fifths of the population, and the Turks the other one-fifth; consequently it is on this proportion that the Cypriots want the representation in the Legislative Council.

The financial question embraces the tribute to Turkey and the surplus money derived from the revenue of the isle and kept in London. As regards the question of the tribute, I have nothing to add to what was so ably and fairly written on the subject in the columns of the *Times* on May 24 last, and I am sure that there is no Englishman who does not sympathise with the efforts of the Cypriots to free themselves from an obligation imposed upon them by the Treaty of 1878, in which they did not take any part. Taking all this into consideration, I do not hesitate in concurring with the suggestion of Mr. Harris, as stated in his letter of May 17 last addressed to THE NEAR EAST, viz., that the only correct and just solution would be for Great Britain to undertake the payment of the whole amount of the tribute.

I wish now to add another word as regards the surplus money of the revenue of Cyprus kept in London. This surplus is treated as a reserve fund to fall back in case of failure of the crops of the isle. This is correct from one point of view; but it has the great disadvantage to deprive the isle of the only means it possesses for the construction of public works, such as harbours, railways, development of agriculture, afforestation, etc., by which public works it could greatly develop its resources and become prosperous. For these reasons I firmly believe that a reconsideration of the decision of the Secretary of State for the Colonies on the Cyprus questions, or even the sending out to the isle of a Royal Commission for an impartial and accurate investigation of the grievances and requests of the Cyprus people, will not only greatly contribute to smooth the present situation there, but it would, on the other hand, respond to the charm of the colonial policy of Great Britain.—Yours faithfully,

D. TH. STAVRINIDES.

28, Dorset Square, N.W., June 5, 1912.

To the Editor of THE NEAR EAST.

Sir,—While fully endorsing what you say with regard to the tribute paid by Cyprus, and admitting that the allocation of the tribute to the payment of the English and French bond holders is quite indefensible, it is still a little difficult to understand what it is exactly that the Christian Cypriots want.

Some years ago, I recollect, while residing at Limassol, going down to my work one morning and finding people standing about in small groups, evidently engaged in discussing some news. Upon making inquiries, I was informed that news had been received to the effect that England was about to give up Cyprus, and the Christians were in deadly fear of the island being taken over by Austria, France, or some other Catholic country.

The antagonism between the Roman and the Greek Church has been very acute for centuries, and although it is not easy to say in which of the two prejudice is more rampant, there is, I believe, evidence that some Greeks were guilty of calling in the Turks in the first place to rid them of the Venetians!

The wish of the "Greek" inhabitants to be united to the kingdom of Greece is natural, and must call forth sympathy, however impossible such union be in present circumstances, but their behaviour in resigning their seats in the councils and making trouble generally in the government of the country does not commend itself to their well-wishers, and can only injure their own cause.—I am, Sir, yours, etc.,

"CYPRIOT."

Authors' Club, June 4, 1912.

NEAR EAST IN PARLIAMENT.

The Turco-Italian War. June 4.

In the House of Commons Mr. King asked the Secretary of State for Foreign Affairs whether he was in a position to state whether recent negotiations had taken place aimed at bringing to an end the war between Turkey and Italy; and, if so, with what result.

Sir E. Grey: Informal discussions have taken place with the desire of discovering an acceptable basis of accommodation; up to the present no definite result of a satisfactory nature has been attained.

TURKEY'S ARAB PROBLEM.

Progress in the Yemen.

[The interview referred to in the following article was granted by Colonel Ihssan Bey some weeks ago. Its publication has been delayed owing partly to pressure upon our space, partly to other causes, which need not be specified. It throws some light upon events that are happening in a part of the Ottoman Empire from which it is somewhat difficult to obtain reliable information at the best of times, and from which, owing to Italian action in the Red Sea, but little news of any sort is now to be had.—Editor, NEAR EAST.].

In the course of an interview with Colonel Ihssan Bey, of the Etat Major of the Yemen Corps, some statements were elicited that are certain to interest your readers, who cannot be indifferent to the political destinies of Arabia. Colonel Ihssan Bey, who knows personally Aziz Bey, the Egyptian leader of the Derna forces that have fought so valiantly against the Italians, declares that it is mainly due to his loyalty and wisdom, and to the peaceful intentions with which he has been able to inspire General Izzet Pasha, that the entente between the Ottoman Government and the Imam Yahya has at last been concluded. It is, moreover, thanks to Aziz Bey's personal charm of manner and persuasive powers, that the Imam has been influenced in the direction of peace, thus further facilitating the progress of the negotiations between him and the Turkish General.

The Caliph and Authority.

The principal reason of the conflict that developed into open and prolonged warfare between the Imam and the Ottoman Government is alleged to have been connected with the Imam's seal. Before the entente the seal bore the inscription: "May Allah make him victorious," and at the bottom, in the shape of a crescent, "As Sayed Yahya Ibn Mohammed Hamid Eddine, the Prince of the Faithful (Emir El Mu'meneen) who lays his trust in Allah, the Lord of Creation." Now the seal has been modified thus: "Imam of the Zaidiehs, Es Sayed Yahya Ibn Mohammed Hamid Eddine." And it is not strange that for this mere inscription the Ottoman Government risked such onerous and bloody wars; for it implied an actual disavowal of the spiritual, if not of the temporal, authority of the Sultan as Caliph; and, but for the declaration of war by an infidel nation, such a renunciation of spiritual claims, supported by historical and traditional evidence, might have never been made. As it is, out of the 60,000 soldiers sent by the Ottoman Government to subdue the Yemen revolt, about 6,000 are acknowledged to have perished, mostly from epidemic diseases.

By virtue of the new treaty of peace the Imam now receives £T1,100 per month, and the leading sheikhs of the Yemen tribes also receive allowances according to the degree of their influence. As soon as the treaty was concluded the Imam distributed a manifesto among the friendly tribes warning them against rebellion and aggression, and counselling them to relinquish any hostile action against the Ottoman Government and to devote their energies to the tilling of the soil. It may here be parenthetically remarked that the Ottoman Government has been seeking, with special interest, to get the Arabs both in Arabia and Syria to settle down in fixed localities for agricultural pursuits, because it realised that so long as the Arab led the nomadic life he remained an invincible, elusive, and unavailable force. According to Ihssan Bey, Turkish troops now move about throughout the Yemen Province in perfect security. The tax collectors are appointed by the Imam, and constitute at the same time a force of gendarmerie; and it is said that since the entente there has not been a single recurrence of the old quarrels between the tax gatherers and the people, which used often to lead to sanguinary combats.

The Yemen's Resources.

The Ottoman Government is eager to develop the rich resources of the Yemen now that security reigns therein. A Government railway is being constructed between Hodeida and Jamile, and, though only three kilometres of rail have been laid, the embankment works are progressing; but, of course, with the blockade of the Red Sea coast in existence, the transport of all railway material is suspended for the present. Although this line was originally designed purely for strategic purposes, yet Colonel Ihssan is so optimistic about the results of the entente that he believes that, if the Government pursues the conciliatory policy of Izzet Pasha, its eventual use will be purely economic. Much seems to be expected from the Yemenite's intelligence; for it is generally recognised that in the matter of astuteness he surpasses his Bedawi brother of the Sahara. In certain parts of the Yemen the land yields four crops, and in others two; but the patriotic Colonel could not help deploring the fact that a lot of agricultural machinery sent out by the Government has rusted and decayed simply because no agricultural experts were sent with the machines.

It seems that a whole month elapsed before the treaty made by Izzet Pasha with the Imam was ratified by the Government, and Colonel Ihsan severely criticises the latter for its dilatoriness, especially in this matter, because he believes it to be very damaging to its influence and prestige with the Arabs, who often fell out with the Turks for want of open dealing. Colonel Ihssan confirmed the rumour, published some time ago in the papers, that, in return for the privileges and concessions granted him, the Imam has offered to place at the disposal of the Ottoman Government an armed force of about 100,000 men. In this connection may be mentioned the following anecdote, published recently in a local paper. In the course of conversation between Izzet Pasha and the Imam, the former is said to have paid a special tribute to the prowess displayed by the Albanians in the recent revolt, whereupon the Imam exclaimed, "You could not see much of our prowess. Wait till you see us engaged with the real enemy"—meaning the infidel Italians—"and you will know then what Arab mettle is!

Seyyid Idriss.

As regards the Idrissi, the Colonel is in favour also of a conciliatory policy, involving, however, concessions far inferior to those granted to the Imam, for the claim of the Idrissi is only recent. Izzet Pasha, while acknowledging the sacred descent of the Imam, which is established by historical evidence, seems to consider the Idrissi as an upstart in Mahdism, and believes that, should his claim be acknowledged in any way, the Government would incur the risk of seeing a legion of other pretenders cropping up. Colonel Ihssan's personal opinion, however, is that, after attempting a war with the Idrissi, Izzet Pasha is likely to incline to a more lenient policy. Being asked whether there are other chiefs in those parts whose influence has to be reckoned with, he said that to the east of the Yemen are some smaller potentates ("sultans") whom Izzet Pasha is anxious to win over in view of the dangers that threaten the Government, especially as a foreign Power has been trying to attract them and secure their allegiance by means of liberal grants and offers of arms. According to the Colonel, two of these minor potentates, on hearing of the entente between the Imam and Izzet Pasha, came to offer, of their own accord, their allegiance to the Ottoman Government. At the same time, they told the Pasha of the intrigues of certain European Powers, confirming their statements by the exhibition of documents sent them by the agents of those Powers. Izzet Pasha is said to have given a cordial welcome to these chieftains, and to have acknowledged their local authority in Eastern Yemen, and, after delivering an Ottoman flag to each of them, to have sent them away with handsome presents.

THE MUSSALMAN.

An up-to-date English Weekly, conducted by a Mussalman Editor of liberal and independent views. Though all topics of special interest to the Mussalmans are discussed in its columns, social, political, and economic questions of general interest always receive due attention. It is entirely free from sectarian bias and is a true exponent of the catholic principles of Islam, but it advocates the Mohammedan cause boldly and fearlessly when such advocacy is necessary.

Annual subscription (inland), 4 Rs., (foreign), 8 shillings.

THE PRESS ON THE NEAR EAST.

The Reform Commission.

In the course of a recent tour through Macedonia and Albania, Mr. M. H. Donohoe, the *Daily Chronicle's* enterprising correspondent, came across Hadji Adil Bey's Reform Commission at work at Okhrida. Some particulars of his own adventures and experiences, which he gives in an article published on May 28, show that travel in these parts is not without excitement, but perhaps the most interesting part of his letter is that in which he reports the opinions of Hadji Adil Bey and Mr. Graves, the financial expert and English member of the mission, upon the result of their tour. "Albania," said the Minister, "was reconciled and grateful, for she had been set upon the road that led to peace and progress."

Touching upon Macedonia, he asserted that no Turkish Cabinet would ever be found willing to discuss the question of autonomy. However much agitators might endeavour to incite the people to revolt, he felt that the influence of the bands in the various vilayets was diminishing. Administrative reforms were being carried out, and the Government was acting in a firm but, at the same time, conciliatory spirit. By this means they hoped to alienate the public sympathy that had hitherto been shown towards the revolutionary organisations. When this had been accomplished Bulgarian bands would cease to exist in Macedonia, for when not killed or captured they would die of inanition resulting from public indifference to their propaganda.

Mr. Graves, when asked for his opinion regarding the work of the mission, was even more enthusiastic than the Minister, and unhesitatingly declared that it had accomplished a great deal of good. The results so far had exceeded his most sanguine anticipations. He had nothing but admiration to express for the way the Minister had grappled with the various economic and administrative problems encountered on the journey. From avowed enemies he had converted the Malissores into ardent friends. By reason of the present treatment of the Albanians it was clear that the Government had seen the errors of its ways, and was now by wise and generous measures attempting to make reparation for past administrative neglect. The Government had taken a great step forward in the handling of the Albanian question, and he felt convinced that the ultimate results would prove that it was well worth the price the experiment was costing.

"The New Mediterranean."

In an article with the above title appearing in last Friday's *Daily Graphic*, Mr. Lucien Wolf writes:—

The political situation in the Mediterranean has changed, with the territorial and the naval, far more adversely to ourselves than is generally realised. Until a few months ago we could count on our traditional friendship with Italy as an element in our Mediterranean policy as valuable in its way as our entente with France. The Triple Alliance had no concern with the Mediterranean, and on that side Italy's hands were free to clasp our own. That calculation can no longer be relied upon. Our old Agreement with Italy to defend the *status quo* in the Mediterranean came to an end eleven years ago, and since then France has become our chief confidant. This little breach has been permanently widened by the present war. The maritime ambitions of Italy have kindled in France the profoundest jealousy, which the correctness of the relations of the two countries has not succeeded in hiding. On the other hand, Italian megalomania does not disguise its impatience at a French naval supremacy supported by England. At the same time Italy, with a hundred thousand men in Tripoli and her fleets dispersed in the Middle Mediterranean and the Ægean, finds herself compelled to lean more than ever on the Triple Alliance, the while, with characteristic flirtsomeness, she seeks a reinsurance in an "extra dance" with Russia. The result is that at the very moment when we are abandoning the Mediterranean the Triple Alliance is formally establishing itself in that sea. Consequently the dreaded war in the North Sea, against which we are concentrating all our naval resources, is likely to find its counterpart in a naval attack on our Imperial communications in the abandoned Mediterranean.

The practical bearing of this state of things on our new naval arrangements has been well pointed out by M. Jacques Delimal, the able London correspondent of the *Temps*, who is also an ex-naval officer of considerable competence. "From the north of the Adriatic to Port Said," he says, "the distance is just 1,200 miles; that is to say, in eight or nine days—six days of steaming at nine knots and two days for disembarkation—a convoy of forty transports could without difficulty land 30,000 men in the Delta. Hence England cannot think of losing the mastery of the Mediterranean even for a few days."

And yet it is precisely this loss of a few days which even the optimists among the naval experts admit and declare to be of no consequence.

Lord Kitchener's Report.

Lord Kitchener's first Report does not contain the classic touches which made Lord Cromer's long series of despatches unique, but it affords a clear and statesmanlike survey of Egyptian and Sudanese conditions which is in every essential respect most encouraging to read. . . Lord Kitchener's régime is clearly to be marked by a special care for the interests of the fellah, who must for his own sake be kept upon the land. The importance of the land and its development is equally emphasised in the Sudanese report, in which the figures for population present an amazing index of the work we have done. . . . The tone throughout the Report is one of optimism, and it presents in solid facts and figures a striking illustration of what the Empire has done to meet its great responsibilities in that quarter of the world.—The *Times*.

In the sphere of government, as on the field of battle, it is the man that counts. As one reads Lord Kitchener's masterly account of existing conditions in Egypt and the Sudan, it is difficult to realise that the Egypt of this report is the land which two years ago was in a state of dangerous ferment and unrest, and which seemed likely to give a painful demonstration of the theory that a democracy is incapable of ruling an Empire. . . . What has produced the state of calm and confidence that has succeeded the short era of agitation and disquiet? The firm declarations of Sir Edward Grey and the sudden reversal of Sir Eldon Gorst's policy no doubt produced a considerable impression. But it was the appointment of the victor of the Atbara and of Omdurman which made it clear to the trader in the bazaars and the fellah in the field that British rule in Egypt was to continue, and that all thoughts of plotting and scheming for its overthrow must be abandoned. Nor did the sudden awakening from the wild dreams that had held the minds of the native politicians create any discontent and bitterness of feeling. Eastern races have their faults, but they do not seek to struggle against fate. Lord Kitchener is able to report that, in spite of the natural excitement created by the struggle in Tripoli, the public mind in Egypt is calm, and that the people have displayed during a trying time an admirable devotion to duty, law, and order. —The *Morning Post*.

The first report of Lord Kitchener, on the finances, administration, and general condition of Egypt and the Sudan, is a far more hopeful document than the last report of Sir Eldon Gorst, issued just a year ago. . . . Lord Kitchener found Egypt a hotbed of Nationalist faction; he did not pander to it, he took strict but just measures, and the Nationalist propaganda—stained as it was with murder and deep-dyed with intolerance—has been driven underground. The report is less concerned with constitutional questions than with the realities of life; the industrial advance of Egypt and the Upper Nile is its main text. . . A testimony to good government of the solid kind, which is worth a whole ream of paper reforms and paper constitutions; and it must be remembered that this work which is being done in Egypt is a continuance on the same lines of work that has been done in restoring Egypt to prosperity by Lord Cromer and his associates.—The *Globe*.

He writes as one who thinks well of the people over whom he has to rule, who can sympathise with their point of view, and can see deep enough into Islam to appreciate its essential democracy resting upon the brotherhood of man. There is the statesman in Lord Kitchener as well as the soldier, as those who remember his handling of the Boer generals during the peace negotiations will call to mind. . . . It is plain that Lord Kitchener means to carry on the spread of education. At present education is almost wholly in the hands of the Provincial Councils; but a grant of £100,000 has been made by the Central Government. That is only a commencement, but a commencement of this kind is notable enough.—The *Daily News*.

Though those who would have wished to see some reference made to the Army of Occupation and to the international position as it affects Egypt, will be disappointed, they cannot fail to be interested in the note of virile optimism which marks the Reports and proves once again that progress in Egypt and the Sudan under British rule is one of the brightest pages of our Imperial history. Unfortunately, as regards Egypt, the Capitulations have been, and continue to be, an obstacle in the national development of the country, but even this vexed question is only cursorily referred to by Lord Kitchener as a "clog to the progress of Egypt," though he hopes "that some alleviation may be the outcome of a protest made by Egypt at the last International Sanitary Congress, which was well received by the experts assembled in Paris." Though we doubt if sanitary experts will abolish the Capitulations, nevertheless the mere expression of this hope, coming from Lord Kitchener, means much.—The *Outlook*.

Lord Kitchener's first report upon Egypt and the Sudan is on the whole thoroughly optimistic in tone.—The *Spectator*.

NEAR EAST BOOKSHELF.

THE CALL OF HELLAS.*

If Professor Seeley was right in holding that everything which sweetens and adorns our life, except the blind forces of nature, has come down to us from ancient Greece, that little peninsula's fascination is easily explained. Europeans who obey the call of Hellas are flocking thither in ever-increasing numbers. A few of them adopt the time-honoured method of independent travel, which is costly and laborious, but enables the tourist to view scenes hallowed by early association apart from the idle chatter of the crowd. The great majority are content to share in co-operative cruises, which have the advantage of economy with the drawbacks of lost independence and an uncomfortable feeling that one's schooldays have returned.

Mrs. Russell Barrington took the former course, which certainly commends itself to the artistic temperament, and the biographer of two great painters is well qualified to discourse on Hellenic culture. She landed at Patras in early autumn, a season when the scenery of Greece has shed the vivid colouring of springtime. Thence she took the railway to Athens, thus losing the unrivalled view of the Acropolis which fills all travellers by way of the Piræus with rapture. Megara suggested the eternal sameness of human nature. It was the birthplace of Theognis, a sixth century B.C. precursor of Schopenhauer, who proclaimed that "the best thing for a man is not to be born at all, and the next best thing is to die." This sentiment has a curiously modern ring, while the burden of the following verses is heard at many a London dinner-table: "Everyone honours the rich and slights the poor; you must fix your mind on wealth alone; wealth is almighty." It is difficult to say of Athens anything that has not been said a thousand times before; but Mrs. Barrington's impressions of the Acropolis are well worth quoting in times when comfort is mistaken for civilisation:—

> All that makes Greece so beautiful—her lovely skies, land and sea, rivers and sculptured mountains—were so many gracious influences reverenced with awe which was inspired by religion. Was it a feeling of nearness to those they worshipped that made these giants in art rise to such perfection in the work of their own hands? In short, was not this perfection the result of the unquestioned reality of the spiritual life within them?

Most tourists, Mrs. Barrington not excepted, are so absorbed by the thought of Greece's ancient glory that they are inclined to treat the existing human element as a negligible quantity. Yet all who know the modern Athenians will admit that they descend in a direct line from the generation of Pericles. Despite successive waves of immigration, the old stock survives, and if the population of Greece had increased *pari passu* with that of Europe, Athens might now be the hub of a world-shadowing empire. Its people are still eloquent, keen politicians, eager for novelties, intensely patriotic, and animated by measureless ambition, which stands in pitiful contrast to their puny resources. Alas! their æsthetic instinct has been almost destroyed by a form of religion imported from Byzantium in its decadence.

Our authoress has some pregnant remarks on the latter-day craze for delving and restoration:—

> Oh that the great value of preserving an *atmosphere* could be taught as part of our modern education! Then, perhaps, the hand of the excavator and restorer would be taught more restraint than it is apt to exercise. Atmosphere is the unwritten poetry of the world. A rare and precious atmosphere infuses into the perceptions a fine and delicate aroma, elevating and drawing them up from the coarser material world we generally have to live in, just as Keats and Shelley tune the mind to the more ethereal side of our thoughts and ideas. That very undistinguished quality, curiosity, is allowed far too much free play, and has to answer for the spoiling of many romantic and old-world atmospheres.

This passage should be taken to heart by rifflers of Egyptian tombs and palaces.

After visiting Sunium and Olympia Mrs. Barrington returned to Patras, and thence took steamer for the Dalmatian ports. It is impossible to read her glowing description of the architectural glories of Ragusa without longing to visit that little-known region. They are the work of a republic which flourished apace in the fifteenth century, and their calm dignity has survived the death of Ragusan independence. Monarchies are less apt to produce monuments of enduring beauty than are oligarchies. As in ancient Greece so here the splendour of a capital depended on public buildings which were the common property of its citizens.

The "Proceedings of the Hellenic Touring Club†" in 1911 reveal a more popular method of travel in the Near East than fell to the lot of Mrs. Russell Barrington. Its guiding spirit is the indefatigable Sir Henry Lunn, who has effected a peaceful conquest of the two most indomitable countries in Europe—Greece and Switzerland. The s.s, "Dunottar Castle," chartered by his Co-operative Cruising Company, Limited, periodically conveys cargoes of bishops, headmasters, church dignitaries, and less distinguished tourists to the chief points of interest in the Levant. They are lectured to by specialists, and possibly return home with broader views of life than they possessed at starting. It is to be feared, however, that twenty-four hours at Athens, with glimpses of Marathon, Thermopylæ, the Vale of Tempe, and Ephesus thrown in, must leave on the insular mind a somewhat blurred impression of that wondrous land "where grew the arts of war and peace."

F. H. S.

NEAR EAST BOOK NOTES.

M. Morgan Shuster has just completed a book in which he describes his experiences in Persia as Treasurer-General, and gives a narrative of the events that led up to his resignation. It is to be published immediately, and will be entitled "The Strangling of Persia."

We have received from Messrs. Marlborough and Co. a copy of the third edition of their "Travellers' Practical Manual of Conversation." The book contains English, French, German, and Italian vocabularies, travel notes, tables of weights and measures, money, etc., and a great deal of useful information in a remarkably small compass. It is, in fact, one of the best works of its kind we have seen, and its remarkably moderate price will certainly make it a good investment for any traveller who requires help of the sort that such manuals give. In a paper wrapper it costs 1s., in cloth 1s. 6d., and in leather 2s 6d. net.

"Prehistoric Thessaly," by A. J. B. Wace, M.A., Fellow of Pembroke College, Cambridge, and M. S. Thompson, B.A., Craven Fellow in the University of Oxford, has been issued by the Cambridge University Press. This work gives some account of recent excavations in North-Eastern Greece, from Lake Kopais to the borders of Macedonia. It is an attempt to collect in a convenient form all the archæological evidence as yet available for the prehistoric period in North-Eastern Greece.

CURRENT COMMENTS.

A military correspondent, writing in the *Manchester Guardian* on the report that Lord Kitchener was appointed to Egypt in order to facilitate the Italian descent on Tripoli, denies the accuracy of the rumour. He states that he heard Lord Kitchener say in Simla in 1908 that the home authorities could give him no further military appointment that could offer any attraction—that his proper place was Egypt, which was really his first and only love. It is now common knowledge that before Lord Kitchener was appointed to Egypt the present Government made an effort to make him Ambassador in Constantinople. There is, therefore, no reason to consider Lord Kitchener's appointment as in any sense a military appointment.

***

It is indeed very much to be regretted that friendly counsels have not prevailed upon Saad Pasha Zaghlul to desist from the action which he has brought against Abaza Pasha. We can quite understand that the ex-Minister of Justice was keen on piercing the identity of the anonymous writer who, under the *nom-de-plume* of "El Aref," made such astounding statements anent the circumstances of his retirement from public affairs. But, once he had ascertained who his unknown enemy was, his sense of duty to himself, his country, and his colleagues, should have prevented his taking any further action. From the many and important witnesses—some of them ex-Ministers—who have been summoned it is evident that a deal of dirty linen will be washed during the course of the case. The Court's intention to hear the case *in camera* is an ominous sign, but under the peculiar conditions as to the keeping of State secrets that reign in Egypt this will not prevent all the details leaking out, with added embroideries which will, in all probability, not improve matters.

***

No good can possibly come of the reviving of events which have been forgotten or of the stirring up of the political mud-heap of the past few years. Whichever way the cat, so to speak, jumps it can but result in accentuating old animosities and creating fresh ones. Egypt has suffered sufficiently in the past from the political quarrels of her sons, and however much we may have admired Zaghlul Pasha for his able direction of affairs during his tenure of office we cannot refrain from expressing bitter disappointment that he should have placed his own desire for personal revenge before the interests of his country. He should have remembered that a public career, such as he has had, carries with it certain obligations, from which the fact that he has retired into private life cannot liberate him. The truest service a man can render his country is to sacrifice himself when any action in his own defence might prejudice the true interests of his fellow-countrymen. From Zaghlul Pasha's attitude it is unfortunately only too evident that even Egypt's ablest sons have not as yet acquired that sense of public spirit which is so necessary to the welfare of a nation.

***

The somewhat alarming news has been reported that the boll-worm has already been detected in Egypt, and that it has made an extensive attack in the province of Sharkieh. At first sight this would appear to be a serious matter, threatening the cotton crop in its earliest stages. But we think we can reassure all those who have taken alarm. Like the poor, the boll-worm is always with the Egyptians. That it has never been reported so early in the season does not disprove its existence in preceding years; the ignorance and apathy of the fellaheen and the absence of an adequate staff of inspectors are the real causes of its never before having been reported in May. The Department of Agriculture has, as we recently pointed out, a veritable army of permanent inspectors scattered over the country, and it is owing to the vigilance of these officials that the presence of the boll-worm has been notified. Lancashire and all those interested in the welfare of Egypt's cotton crop may therefore take heart, for the campaign which has followed the discovery of the pest will undoubtedly result in a great diminution in the ravages which the boll-worm habitually makes on the cotton plants later on at the most important period of their existence.

***

Apropos of cotton it is interesting to note that the Sudan authorities are following in the footsteps of the Egyptian Department of Agriculture and are taking steps to improve the quality produced. The Governor of Kassala Province has ordered the cultivators to cut down all the plants after picking, to export all the seed that they obtain from their cotton, and to plant entirely fresh seed. From what we know of the relations that exist between Governors and governed in the Sudan those orders will be implicitly carried out, and the cotton cultivators will derive the benefit of their faith in and obedience to those set in office over them. Would that the same relations existed in Egypt, where half the Government's energy is wasted, not in devising new remedies for the amelioration of the crop as much as in seeing that the remedies already introduced are carried out and are not stultified by the pig-headed apathy and fatalism of the fellaheen!

***

It is to be hoped that the movement which is at present on foot to obtain a pardon for George Zervudachi will not be successful. Not that we have any personal animus in the matter. We speak *pro bono publico*. That financier, who at one time enjoyed such a great reputation both in Europe and Egypt, but continued to trade on the credit which he had enjoyed in spite of the fact that both he and his firm were in a bankrupt state, richly deserved the sentence that has been passed on him. It is no extenuating circumstance or valid reason for obtaining a remission to say that there are others equally guilty who have as yet not been brought to book. To our mind's eye that does not detract from his guilt one whit. And yet there are people, highly placed too, who have let sentiment run away with them, and who are moving heaven and earth to obtain a pardon for this man, who has ruined so many of their own intimates and associates.

***

In the past too many rogues have gone unpunished on the banks of the Nile, and the manner in which they have evaded the clutches of the law—or in which the law has been unable to touch them—has simply served as an encouragement to others. Egypt's reputation is at stake, not financially—although indirectly she is affected in that connection—but as a country where wrong-doing meets with its just retribution. It is to be hoped that those who will be called upon to consider the petition will remember that, however much they may pity this man, who has fallen so ignominiously from his high estate, they have a solemn duty to perform *vis-à-vis* the rest of the commercial community of Egypt, and that that solemn duty demands that a striking example shall be made.

***

Our Cyprus correspondent writes:—Sympathetic and eulogistic references have been made in the local Press to Captain C. W. Orr on his resignation of the post of Chief Secretary for reasons of health and on his departure from the island. Captain Orr has been little more than a year in Cyprus, during which time he administered the Government for four months before the arrival of the present High Commissioner; but, short though his stay has been, it has been full of useful, strenuous work, and he leaves the island with the sincere regret of the great majority of his colleagues and the inhabitants.

***

The appointment of Mr. J. S. Bucknill, King's Advocate, Cyprus, to the post of Attorney-General at Hong Kong, deprives the Government at an important moment of one of its ablest officials. Mr. and Mrs. Bucknill will be a serious loss to the small English community, where they are deservedly popular, and the ability and sound judgment which he has shown in private, as well as in public, affairs will be greatly missed. Mr. Bucknill is a keen naturalist, and was mainly instrumental in founding the Cyprus Natural History Society, which for some four or five years has been doing unostentatious but excellent work in regard to the study, collection, and classification of local objects of natural history. In this respect Mr. Bucknill's departure is much to be deplored, as there is no one at present in the island with his store of accurate knowledge and power of stimulating the interest of others in his favourite study. It is to be hoped that ere long facilities will be given by Government for extending and assisting the work of this society, and that the labour and thought already expended on it will not be thrown away now that its chief pillar is about to be removed.

***

"J. C.," of Janina, whose letter upon the need of protection for man as well as beast in certain parts of the Orient we printed last week, is evidently blessed with a sense of humour. But clearly he finds it difficult to wear a smile that "won't come off," and, judging by a second epistle that we have received from him, there are probably not a few people who find life at Janina no smiling matter at all just now. Writing on May 31, our correspondent declares that things are going from bad to worse, and that robberies of the most daring description are the order of the day.

***

"Certain people," he says, "amongst the many who, in this unfortunate country, style themselves 'Captain,' 'Lieutenant,' and so forth, recently held up some poor Christians of Tsamouria, who were travelling to Janina, and robbed them of everything they had that was worth taking. One of the unfortunates, a teacher, was in possession of only a few small coins, worth altogether about one shilling, and the 'Captain' who was searching him was much amazed to find that a man of learning could be so poor. Unfortunately however, instead of prompting him to recognise the value of the pedagogic calling, the 'Captain's' emotions led him to have the luckless schoolmaster soundly beaten." Happily this exhibition of spleen brought the ruffianly "Captain" no further profit. But travel in that part of the world is clearly not lacking in excitement.

***

Our correspondent tells us also of another mail robbery, the post from Bostina to Janina being attacked, the postman and another man being killed, and a considerable sum of money being taken. This outrage, he remarks, was perpetrated "by persons unknown—to the Government only." He adds that the authorities have issued notices, in Turkish and Greek, that all Italian subjects must leave the country within a fortnight. And he seems to think it strange that any such notice should be required. It is, in fact, easy to believe that, in view of such happenings as those described, some people might not be altogether heart-broken at bidding farewell to Janina.

PERSONAL & SOCIAL

The Khedive will be accompanied on his visit to London by Lewa Watson Pasha, his first A.D.C.

Sir Reginald Wingate, Governor-General of the Sudan, left Khartum on Thursday of last week on leave of absence.

The Hon. G. H. Fitzmaurice, Chief Dragoman at the British Embassy, Constantinople, has returned to the Turkish capital from Tripoli, in Barbary.

Mr. Satow, the British Consul at Jerusalem, has arrived at Tripoli to replace Mr. Fitzmaurice, the Acting Consul-General.

Mr. and Mrs. Henry D. Beaumont have arrived at 22, Thurloe Square from the British Legation, Athens.

Baron Slatin Pasha, Inspector-General of the Sudan Government, left Egypt on the 25th ult., for Europe, on leave.

M. Ponafidine, Russian Consul-General at Constantinople, has, at his own request, been placed on the retired list.

The Marquis Pallavicini, Austro-Hungarian Ambassador at Constantinople, has been on a visit to Vienna in order to be present at the marriage of his son with the Countess Harnoncourt.

Prince von Hatzfeldt-Wildenburg's successor as German Diplomatic Agent and Consul-General at Cairo will, it is believed, be Dr. von Miguel, Second Secretary to the German Embassy at Constantinople.

During the absence from Egypt on leave of Adib Pasha, Mr. T. B. Etherington Smith is acting as Director-General of State Accounts.

Mr. J. R. Holmes, President of the District Court, Nicosia, has gone on vacation leave with his family; his duties will be undertaken during his absence by Mr. A. L. C. Stuart, president of the Limassol Court.

Mr. G. Foumis, recently appointed Inspector of Agriculture, Cyprus, has arrived and assumed his duties. Mr. Foumis has been engaged in an official capacity in agricultural work in Crete.

During the absence on leave of the Governor, H.E. El Lewa Jackson Pasha, Kaimakam Jackson Bey, Senior Inspector, will be Acting-Governor of Dongola Province.

Miralai Leveson Bey, who commanded the recent expedition against the Anuak tribe, is now in England, on leave of absence.

Mr. Walter Morrison, M.A., Balliol College, has offered the University of Oxford a sum of £10,000 for the promotion of the study of Egyptology. A decree will be introduced in Convocation on June 18 gratefully accepting Mr. Morrison's offer and decreeing the establishment of a Readership in lieu of the Readership in the same subject at present maintained out of the Common University Fund.

Santo Semo Bey, a well-known member of the Young Turk Party, is to be England's guest within the next few weeks. It is the Bey's intention to give a series of public lectures on the Turkish view of the war and its issues.

Moukhtar Bey, the new Turkish Minister at Athens, presented his credentials last week to the Regent.

Sir Henry Babington Smith returned from Constantinople on Sunday last, in order to be present, as British delegate, at the deliberations of the International Wireless Congress now sitting in London.

Sir Leslie Rundle, Governor-General of Malta, Sir Ian Hamilton, and the principal military officers, dined on the "Enchantress" last Friday night.

At Malta on Saturday Mr. Asquith, Lord Kitchener, and Mr. Winston Churchill witnessed a grand review of 5,000 troops and 1,600 men from the Fleet. After the march past before General Sir Ian Hamilton, Mr. Churchill and Prince Louis of Battenberg, accompanied by Admiral Sir Edmund Poe, carefully inspected the naval contingent.

Lord Kitchener left Malta for Egypt on board the "Hampshire" on Sunday evening, and arrived at Alexandria on Wednesday.

Mr. Asquith and Mr. Churchill sailed from Malta on board the "Enchantress" on Saturday night for Bizerta.

General Sir Ian Hamilton and Lady Hamilton also left Malta on Saturday, on board H.M. torpedo-gunboat "Hussar," for Naples.

King Ferdinand of Bulgaria, accompanied by Queen Eleonor and their two sons, Prince Boris and Prince Cyril, paid a State visit, lasting three days, to Emperor Franz Joseph at Vienna on Saturday last.

King Nicholas of Montenegro left Antivari yesterday for Vienna. He is accompanied by the Montenegrin Minister for Foreign Affairs.

A rumour is current in Egypt that Sir Paul Harvey, the Financial Adviser, will retire shortly from the Egyptian Government's service, when Lord Edward Cecil Pasha will take his place. According to the same rumour, Hunter Pasha, Director of the Coast Guards Administration, will then succeed Lord E. Cecil as Second Secretary to the Ministry of Finance.

Captain S. T. Grigg, Adjutant of the 1st Battalion West Yorkshire Regiment, has been selected for employment with the Egyptian Army.

We regret to announce the death of Lady Sykes, wife of Sir Tatton Sykes, of Sledmere, Yorkshire, and mother of Mr. Mark Sykes, M.P., which took place on Sunday at 2, Chesterfield Street.

It was rumoured last week that Sir John Jackson was leaving London for Constantinople in connection with the Mesopotamia Irrigation adjudication, but the journey has apparently been postponed.

Mr. E. G. Hemmerde, K.C., the newly elected member for North-West Norfolk, is the son of Mr. James Hemmerde, late manager of the Imperial Ottoman Bank.

A marriage has been arranged and will shortly take place between Mr. Bernard Losco, agent, National Bank of Egypt, Luxor, second son of the late Miralai Losco Bey, and Mrs. Adelaide Catherine, widow of the late Mr. Jack Somers Summers, London.

King Peter of Servia has conferred the fourth class of the Order of St. Sava upon Dr. Georges Samné, the Director of the *Correspondance d'Orient*. Dr. Samné, by the way, was married on May 18 to Mlle. Yvonne Thomas, the daughter of M. Auguste Thomas, Director of the Marché de Paris.

The marriage of Doris Kathleen, daughter of Mr. and Mrs. A. J. Tweedie, with Mr. St. J. ffrench Blake, 21st Lancers, took place on the 1st inst., at Holy Trinity, Brompton. The Ven. Archdeacon Spooner, cousin of the bridegroom, officiated. The bride was attended by three bridesmaids: Miss Lysaght, cousin of the bride; Miss Nora ffrench Blake, sister of the bridegroom; and Miss Lyal Wood. The bridegroom was attended by Mr. Keith Barlow as best man. Mr. and Mrs. ffrench Blake afterwards left for Ireland.

We regret to announce the death, on May 31, of Mrs. Maltass, the wife of Mr. N. E. Maltass, London manager of the Imperial Ottoman Tobacco Régie. Mrs. Maltass, who was in her fortieth year, was a daughter of the late George Bishop Marshall, who was well known in Constantinople.

It is rumoured that General the Hon. J. H. G. Byng, now commanding the East Anglican Division, will succeed Sir John Maxwell, when the latter vacates the post of General Officer Commanding-in-Chief of the Army of Occupation in Egypt. General Byng has had a most distinguished career, and served in the Sudan Expedition 1884, and in the South African war.

Lord Lamington arrived in London on Thursday of last week on his return from the tour that he has made in Persia in order to study the situation in that country. As mentioned by our Odessa correspondent, his lordship returned by way of Batum, where he met Lady Lamington. Lord Lamington said that he had had a very interesting trip, but at the present moment he did not feel free to discuss the political situation in Persia further than to say that the country was in a very distressful condition.

Reuter's Agency is informed that the new mission which the British Red Crescent Society is about to despatch to the Turkish forces in Tripoli will be constituted as follows:—First surgeon, Mr. R. Gordon Hill, of the Great Northern Central Hospital; second surgeon, Mr. Martin Turnbull, Birmingham General Dispensary; assistant surgeon, Mr. Percy Wallace, London Hospital. They will be assisted by five male nurses. The director of the mission is Mr. C. C. F. Dixon-Johnson, of Darlington.

Captain H. G. Ramsay, who has been serving with No. 100 Company, Royal Garrison Artillery at Malta, has succeeded Captain J. B. Currie as Staff Captain for Royal Artillery, South-Western Coast Defences, at Plymouth.

Mr. George B. Cardona, Assistant Secretary to the Government of Malta and Clerk to the Councils, has retired from the public service, and is succeeded by Mr. Edgar Bonavia. Mr. Cardona was for several years Deputy Assistant Secretary and Chief Clerk, and succeeded Lieutenant-Colonel E. P. S. Roupell as Assistant Secretary, when the latter was promoted Postmaster-General of the Island.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTH.

BRAMHALL.—On 3rd inst., at Valetta, Malta, the wife of Colonel Bramhall, of a son.

DEATH.

MALTASS.—On May 31, at 1, Howley Place, Maida Hill, W., Helen Beatrice, the beloved wife of Neville Edward Maltass, and daughter of the late George Bishop Marshall, formerly of Constantinople, in her 40th year.

IRRIGATION IN MESOPOTAMIA.

In the mental perspective of many people an irrigation scheme is an engineering feat pure and simple. They can appreciate the technical difficulties, and not the less because the works involved are of a kind with which they are, generally speaking, unfamiliar. Railways and roads and buildings and other works, household words in the West, are universal, and vast numbers of the ablest intellects are perpetually engaged in bringing all matters connected with them to the highest state of perfection. Irrigation projects differ, however, from works of this description in that they are the product of the East, and the East has therefore to rely on herself alone; but it is an error to suppose that the difficulties end there. In no country has irrigation science made such enormous strides of recent years as in India, where in the many tracts with deficient rainfall the need for an artificial supply of water is so imperative, and the opportunities for meeting the demand so unparalleled. But, if the past history of irrigation in India teaches us anything, it proclaims the great complexity of the administrative problems brought into play, of which the engineering works and their cost are only a solitary item. From the figures given by Sir William Willcocks, elsewhere in these columns, of the sum that could advantageously be spent in Mesopotamia, and the area of land that could be reclaimed, it may safely be inferred that he has taken a sweeping view of the potentialities of the case into consideration; and this is only right, and what would have been expected of an engineer of his mature knowledge and experience. In any scheme a complete and comprehensive hydrographic survey of the possibilities is essential. It should be held that the water supply available represents so much capital to invest, and that not a drop of it must be wasted if it can possibly be avoided. It is futile to urge that such a policy, entailing works of enormous cost, would tend to reduce the percentage of return. No doubt smaller projects within the commanded area concerned, selecting those offering the greatest facilities and the best prospects of early income, might prove more remunerative in themselves. But no capitalist would be satisfied to lay out a portion of his capital in investments yielding satisfactory returns, and to lock up the balance. It would obviously be of more advantage to him to invest his whole sum at 5 per cent. than a quarter of it at 10. Nevertheless in that businesslike view of the situation lies a danger.

It is right that the utmost utilisation of the available supply over the maximum possible area should be from the outset always borne in view; it is, in fact, the only scientific procedure; but it is not necessary that the complete project should be carried into execution with incautious haste. Estimates of capital expenditure and revenue receipts, which look so well on paper, are apt to be entirely vitiated if the development of irrigation is not rapid. In India the definition of a productive irrigation work is a work that can be shown to yield a net revenue, ten years after completion, sufficient to cover interest charges on the sum at charge at that date; and, consequently, although it may be satisfactory from the engineering point of view to complete a project of great magnitude with despatch, if the receipts are not correspondingly rapid the scheme is doomed to financial failure. Rapid development of irrigation depends on various considerations. It depends for one thing on a sufficient number of agriculturists, and holdings of such extent, that the hitherto unculturable lands are brought under cultivation in accordance with the provisions of the estimate within a reasonable time. It is understood that agricultural labour is scarce in Mesopotamia, the laziness of the Arab is proverbial, and it almost seems impossible that the marvellous success which attended the irrigation and colonisation schemes of India should be repeated here. It means, in addition to the works usually constructed by the State, an ample provision of watercourses to deliver the water to the fields. An irrigation system resembles the reticulations of a leaf, the mid-rib of which represents the main canal supplying the arterial distributary channels, all of which are a part of the project; but in addition there are the vast number of minor veins, the small watercourses, from which the actual irrigation of crops is effected, and for the construction of which the cultivators are responsible. It is probable that in Mesopotamia these channels also would have to be provided by the State, unless they were constructed by the State at the cost of the people under some system of recoveries by instalments, otherwise they would certainly not be conducive to the economical distribution of the water. It means the provision of railways and feeder railways and roads, in order that the produce of a large area may be promptly and efficiently conveyed to the market. It means a regular and recurring expenditure on maintenance to admit of all channels being maintained in first-class order, not as a matter of eye-wash, because a well-kept channel looks nice and a badly-kept one the reverse, but because every deviation from perfection in regimen entails absorption, and water absorbed is first wasted and then, as a rule, it goes where it is not wanted, and tends to do injury. It demands an expert establishment of trained canal officers for the regulation and distribution of the supplies, and legislation in the shape of an Irrigation Act, by means of which they can enforce their orders, as well as a revenue establishment for the assessment and recoveries of the land and water rates, free, as far as possible, from the abuses of corruption. The practical effect of a good or bad establishment on the revenue earned is only appreciated by those accustomed to deal with the many intricate questions of canal management.

It is useless to urge that these are all matters of administration to be dealt with in due course as necessity arises. It is essential that they should be thought out from the start, so that each operation follows the next with the precision of clock-work, and with no irritating delays bringing monetary losses in their train. That the lands adjacent to the Tigris and Euphrates were successfully irrigated in ancient days, the ruins of the old canals and the former opulency of the cities of Opis and Baghdad and Ctesiphon and Seleucia, and great Babylon itself, are sufficient testimony. Protected on the west by the Median Wall, possibly also by a canal bank, and on the east by the embankments of the great Nahrwan canal, the country on both banks of the Tigris was safe from hostile incursions, and long possessed the reputation of the richest and most coveted possession of the East. If it were solely a question of engineering, the abilities of Sir William Willcocks, who has devoted so much study to the subject, could without question devise a project which would restore the agricultural wealth of the past. The point, however, it is desired to emphasise is that engineering alone will accomplish very little: and, unless it is accompanied by sound irrigation administration, it is a moral certainty that a scheme of abundant promise will be a gigantic financial disappointment, and the grave, however inequitably, of the reputation of those who advised it.

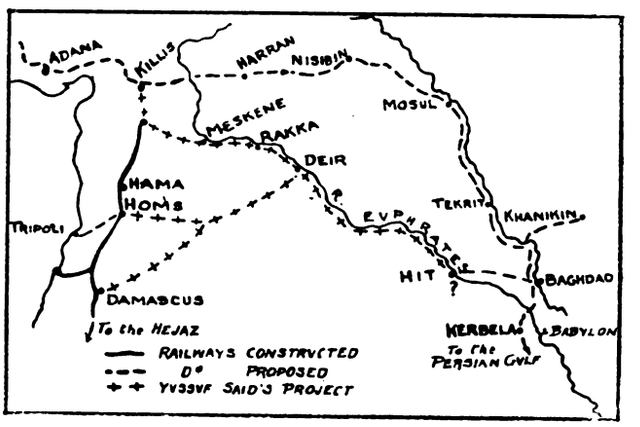
THE HOMS-BAGHDAD RAILWAY SCHEME.

We have lately received a pamphlet published in Paris giving some interesting details regarding the project for a railway from Homs to Baghdad, which at one time found favour with the French Foreign Office, but has since been dropped. It is not our intention to enter into a lengthy discussion of the circumstances that led to the abandonment of the scheme, which were of a highly controversial nature. But as the project may yet be revived in some form or other some particulars concerning it will not be without interest at the present time, when negotiations concerning the Baghdad Railway are in active progress in London.



Early in 1909 a certain Yusuf Said Bey, who held the position of Keeper of the Archives to the Turkish Government, made application for a concession to construct a railway from the Syrian coast to the Persian Gulf, and after some negotiations the project for a line from Homs to Baghdad gradually took shape. At Homs the proposed line would connect with the French-owned Syrian lines, and it was to strike across the desert by way of Palmyra to the Euphrates Valley, which it would reach at Deir, thus following the same route now taken by caravans. At the request of the Turkish Government a connection between Palmyra and Damascus was incorporated into the proposals, and it was also stipulated that there should be no kilometric guarantee. Yusuf Said Bey, having agreed to these points, next set to work to find the necessary capital, and eventually invested Bernard Maimon, whose name has since become well known, with full powers and authority to conduct negotiations with foreign capitalists.

Maimon was soon in touch with several well-known financiers and public men in London. In 1910 he was in close communication with a firm of civil engineers, with a member of which he, early in that year, visited Constantinople. This visit appeared to promise well for the scheme's chances of success; and it must be admitted that Maimon displayed considerable powers of diplomacy. He recognised clearly that any proposal for a line that would compete with the Baghdad Railway must inevitably encounter strong opposition from Germany, and he laid his plans accordingly. The Germans were anxious to obtain an increase in the Turkish Customs duties for the sake of providing revenues for their own scheme; and before such an increase could be obtained the consent of England and France would have to be obtained, both those countries having well-established rights in the matter. Maimon worked upon the lines of endeavouring to secure German complaisance in regard to his own proposals by means of obtaining the consent of Great Britain and France to an increase in the Customs dues. Reckoning also—somewhat strangely, but, as it seems, rightly—that the Baghdad Railway promoters were hostile to Sir William Willcocks's "Irrigation of Mesopotamia" project, he played his cards accordingly. After an interview with the director of the Baghdad Railway, he proposed to those who were working with him in the matter in England and France that the Homs-Baghdad line should throw off a branch from Deir to Aleppo, joining the German system at that point, and that this branch should be constructed by the Germans. His co-workers assented to this proposition, and matters appeared to be progressing in the most favourable manner.

On approaching the British Foreign Office the English promoters of the project appear to have met with a reception which they found distinctly encouraging. They were informed, however, that M. Cambon, the French Ambassador, had already approached the Foreign Office on the subject of a Homs-Baghdad line; and that in any case, owing to an existing arrangement with the French Government upon the subject of railways in Turkey, it would be necessary for them to afford French capital a chance to participate in the scheme to the extent of one-half. The suggestion put forward at this time by our Foreign Office was that the western half of the line should be constructed by French, and the eastern half by English capital.

Maimon had in the meantime not been idle in Paris. He had approached M. André Tardieu, the foreign editor of *Le Temps*, who, having taken the matter up, in turn approached M. Pichon, the French Minister of Foreign Affairs; and in a letter, dated April 15, 1910, addressed to M. Pichon the history of the project up to that date was given, and the proposals for future action were set out in detail. The principal points to be noticed now were:—(1) The line was to be constructed by an Anglo-French company, with a French President of the "Conseil d'Administration," an English Director-General, and an equal number of English and French directors. (2) The construction of the Homs-Deir section and the Palmyra-Damascus branch was to be undertaken by French, and of the Deir-Baghdad by English industry; and (3) the material was to be supplied in equal quantities by France and England. In short, England and France were to benefit equally in all respects. M. Pichon approved the suggestions and promised that the French Ambassador in London should see Sir Edward Grey, and endeavour to arrive at an understanding on the matter.

The scheme, which seemed to promise so well, was, however, destined to fall through, owing, one feels bound to admit after reading the documents published in the pamphlet, to opposition on the part of M. Bompard, the French Ambassador at Constantinople, and to an extraordinary lack of co-operation between the French Foreign Office and its representatives abroad. On arriving in London to discuss the matter with M. Cambon, M. Tardieu heard that the Ambassador had

The Homs-Baghdad Railway Project. Sketch Map.

been negotiating with the Foreign Office on the basis that the railway from Homs to Baghdad should be a French one and from Baghdad to the Gulf a British one, though French capital might participate in the British section and *vice versa*. Naturally much disappointed, M. Tardieu promptly applied to our Foreign Office for information. He found that M. Cambon's interpretation of the matter was upheld, with the exception of the question of the participation of foreign capital in the British section of the line, which was still open.

M. Tardieu appears to have behaved with the strictest loyalty to his English associates, and he made it clear that if M. Pichon upheld M. Cambon's views he personally would prefer to stand aside entirely from the business. The English promoters, however, seem to have favoured an arrangement—on the basis of French predominance in the administration and of British on the technical side. M. Tardieu, it was proposed, should be the first chairman.

M. Bompard, however, gave the project its deathblow. He objected to it not only in form, but in principle. In his opinion, by promoting the project French diplomacy would inevitably be inviting trouble for itself at the hands of Germany, since the execution of the scheme would certainly operate unfavourably upon the receipts of the Baghdad line. Moreover, the Turks themselves did not want the line, the Turkish Government would not be willing to provide the guarantees that would be required, and so forth. M. Bompard went to Paris and urged these objections personally. And apparently his opposition proved the last straw that broke the camel's back. The scheme fell through, as so many others for a Euphrates Valley railway have fallen through. Whether it will ever be revived in any form time alone can show.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Authentic financial news from Constantinople is very scant this week, but its place is being taken by a swarm of *canards* and mild *ballons d'essai*. I have seen no less than five loans, or rumours of such, ventilated in the Press, both here and abroad, but very little faith need be attached to any of them. Further loans to Turkey are very unlikely, and none are known to be on the *tapis*. As for advances, they are, in the words of a financier, "never *not* on the *tapis*" in Constantinople.

***

Similarly, the report that Nail Bey had resigned in connection with the recent financial agreement with the Imperial Ottoman Bank is unlikely to be true. It is far more probable that the Minister resigned owing to the difficulty which he encountered in repleting the Exchequer. Whatever other opinions may be entertained of his successor Djavid Bey, there is no doubt that he is a strong man—stronger, perhaps, than his predecessor. But that does not alter the circumstances governing the contracting of loans, namely, that there is a limit to the lending powers of London and Berlin—a limit that the continuation of the war is hardly likely to extend.

***

Before leaving the subject of Djavid Bey's occupation of the Ministry of Finances, I should like to remind my readers of a statement which I made some time ago to the effect that the new Minister is known to be opposed to the extension of the powers of the Commissioners of the Ottoman Debt. It is hardly likely, therefore, that he will favour the project whereby the Commission is to take over the Regie's tobacco monopoly at the expiration of the latter's contract. On the other hand, the Regie has refused to prolong its contract unless radical governmental measures are taken to suppress smuggling. The matter is thus held in abeyance, and any statements to the contrary are devoid of foundation. It is as well, however, to bear these facts in mind when the time comes for the Government to decide what system to adopt. Beside the systems referred to above, there is a third, the banderole or stamp system, which, with Djavid Bey at the ministry, will perhaps regain favour.

***

I note that the British Government has accepted as completely satisfactory the proposals now made for the international control of the projected trans-Persian line for linking up the Russian and Indian railway systems.

***

Great Britain, Russia, and France are to participate equally and to enjoy absolute equality of control in "all companies to be formed for carrying out the trans-Persian railway scheme." The Société d'Etudes is to meet next week in Paris. Its business consists in completing the surveys of the line and in obtaining the necessary concessions from Persia (this latter will offer no insurmountable difficulties). It is to be hoped that these preliminaries will be completed "within a few months." The Société d'Etudes will consist of a council of administration of twenty-four members, eight to each nation. M. Raindre is to be the president and Sir William Garstin and M. Homiakoff the two vice-presidents.

***

From a purely commercial point of view, the Trans-Persian Railway is perhaps an excellent scheme. Financially, also, it may prove a paying investment. But there are other considerations in an international project of such dimensions, and the question is, have they been carefully weighed? Lord Curzon warned us, in THE NEAR EAST, to be on our guard. The *Pall Mall Gazette* is "inclined to deprecate premature excitement about the strategic aspects of the Trans-Persian scheme." That is what we did as regards the Baghdad Railway, until it was too late to expostulate. I prefer Lord Curzon's warning.

***

On Tuesday the triennial Congress of Chambers of Commerce of the British Empire meets at the Guildhall, under the auspices of the British Imperial Council of Commerce. Mr. Asquith has accepted the honorary presidency, and Lord Desborough, President of the London Chamber of Commerce, will subsequently preside over the deliberations, which are to last four days. Among the subjects to be discussed are two motions, already referred to in these columns, and put forward by the Constantinople Chamber of Commerce—namely, Ottoman Lights and Ottoman Sanitary Dues. The arrangements for the congress, which promises to be another valuable step forward in the organisation, so sorely needed, of British trade, are in the hands of Mr. Charles Charleton and Mr. Stanley Machin. I wish the Congress every success, and hope that its deliberations—perhaps more particularly those under the heading of "Imperial Consular Service"—will be carefully considered by the powers that be and translated from the realm of words into that of deeds at a not very distant date.

***

I am pleased to see that the current number of the London Chamber of Commerce *Journal* devotes a lengthy article in support of a movement which I have frequently championed in these columns—namely, the participation of British manufacturers in the permanent exhibition of exclusively British products about to be established at Smyrna by the British Chamber of Commerce at that port. Unfortunately, an adequate response has not been made by those whom it is intended to benefit, and the Chamber is now sending its secretary, Mr. J. McDowall Russell, on a mission to England to persuade exporters to take part in the exhibit. Mr. Russell is expected in London during the present month.

***

In the course of its article on the above exhibition, the *Journal* echoes our constant contention that Smyrna offers excellent trading opportunities for British manufactures. It says:—"No district of Turkey can compare in wealth to the Smyrna region. The last few years have seen the springing up of new industries in a degree not approached in any other town of Turkey. An industrial boom is starting, and we are destined to see, despite any temporary setbacks, a huge commercial development. It is the moment in which, quietly, but determinedly, to get a footing in the country and be represented there, ready for the future. If a large group of British manufacturers were now to join hands in setting up (each paying his moderate quota) a big show-hall of their goods, such action would have far-reaching results. Temporary setbacks are to be normally looked for in Turkey for some little while to come; but the paramount truth remains that the expansion of the country's trade and industry has begun. If we hang back now, we shall later on be supplanted."

***

Tuesday's useless objections in the House to sums allotted to Consular and diplomatic buildings abroad caused sometimes "a mild amusement, but more often a gentle boredom." Two of the objections were a sum of £6,000 for a ballroom at the Cairo Agency and a sum of £20,200 for the erection of a new house at Therapia for the British Ambassador, the old house having been burnt down. Personally I had expected objections from the Little Englander side of the House, but, as it happened, Unionist M.P.'s attacked these sums as being too extravagant—or perhaps merely because they were put forward by the Government. Party politics ought, I think, to stop before reaching questions involving our shred-worn prestige in the Near East. An investment of £26,200 in realisable house property in Greece and Egypt is not excessive considering that it involves our "social standing"—in other words, our trade, industries, and, generally speaking, our commercial prospects. Incidentally, I take it that the above constructions will be essentially British in their installations, furnishing, and decoration.

***

Last week's fire in Constantinople—or, to be more accurate, the conversion of that fire into a conflagration—is inexcusable. It is barely eleven months since the flames raged in Stamboul, and the effect ought to have been enough to warn the authorities that the most immediate preventive measures would have to be adopted to provide against the recurrence of the disaster. These measures—the acquisition of numerous fire-engines, extinguishers, etc., and the thorough reorganisation of the department—seem to have been sadly overlooked, with the result referred to above. No time must be lost now, however, to remedy matters, and the authorities must be urged upon to introduce such reforms as will make property in Constantinople more secure than it is at present.

***

In this connection it may be pointed out that the carelessness of the Constantinople authorities is driving insurance companies out of the country, the risks being far too great for profitable business. Fortunately, however, all Near Eastern cities are not afflicted as is the capital of the Ottoman Empire, and Servia, Roumania, Greece, Bulgaria (and, of course, Egypt) redeem the reputation, which Turkey seems anxious to kill, of the Near East. Needless to say, the premium on insurance in Constantinople will not be lowered until an adequate supply of fire-engines has been acquired and the entire department has been thoroughly modernised.

COMMENTATOR.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, May 31.

New Tramway Lines.

A convention has just been signed between the Minister of Public Works and the Tramway Company, by which the latter is granted a concession for fifty years for a chain of new lines of a total length of 20 kilometres, thus exactly doubling the length of the existing lines worked by the company. The first 10 kilometres of the newly ceded lines must be completed within a period of three years, and the remaining portion in two years from the approval of the plans, which must be presented within a year from the date of the Imperial Decree granting the concession, and approved by the Prefecture of the city in four months from date of presentation. The company now undertakes to build the two optional lines conceded by convention in January, 1906, connecting Samboul with Eyoub at the head of the Golden Horn, and Ortakeui with Bebek about midway up the Bosphorus. The track is to be a double line, and the traction power electricity. The company contributes to the Prefecture £T25,000, as its share towards the expropriation in certain streets through which the lines must pass, and will further advance a sum of £T50,000, without interest, for the same purpose, against the Prefecture's share of the profits on the new lines. In the case of these two sums proving insufficient, it undertakes to make a further advance of £T35,000, against security, payable in ten years. The company is bound by previous conventions, which are also applicable to the present extension, to pave the streets through which its lines pass over a width of 50 ft., and to maintain these in repair as long as its concessions last. The advantages to the Prefecture of this convention are at once manifest, both as regards the company's contribution in the matter of expropriations and the maintenance of the main thoroughfares as well as the new source of revenue when once these lines commence working, but even these considerations are insignificant when compared with the benefit conferred upon the city by the increased means of communication provided, the lack of which is now so very evident, and to which I have had occasion to refer in a previous letter.

Forests in Turkey.

I take the following figures from a recent publication of the Ministry of Agriculture, Mines, and Forests for the year 1323 (1907-8), which is the first attempt at compiling any statistics on this subject. The superficial area of the forests covered by the statistics are 8,803,765 hectares (one hectare equal 2.47 acres), and represent 9.66 per cent. of the total superficial area of the provinces under consideration. The figures cannot be considered to be in any way complete, as they do not include the provinces of Erzerum, Janina, Mâmuret-ul-Aziz, Diarbekir, Mosoul, Van, Baghdad, Basrah, and the Arabian and African provinces. Of the enumerated forests, 88 per cent. are owned by the State, only 6 per cent. are the property of private individuals, the remainder being divided between the Ministry of Pious Foundations, the Communes, and claimants in litigation in regard to ownership. The highest percentages of forest land to superficial area, are in the provinces of Salonika, Castamuni, and the Districts of Ismidt (in the Gulf of the same name), Bigha (Dardanelles), and Carassi (Brussa). Pine is predominant in the provinces of Castamuni, Salonika, and in the districts of Carassi, and Bigha; oak and beech in the district of Ismidt. The principal countries to which timber is exported are Egypt, Bulgaria, Greece, and France; the exports to the first two countries consist of pine, and to the latter two of oak. The total value of the wood sold for fuel in the period referred to amounted to £T809,640, and charcoal to £T634,540. The total revenues accruing to the Government in tithes, and for the privileges of cutting wood only amounted to £T295,800.

Ottoman Drug Store.

A société anonyme, under the style of Droguerie Centrale Ottomane, with a capital of £T25,000, has just been formed to carry on the business of wholesale druggists. Amongst its founders are the proprietors of two of the largest pharmacies in this city. This new venture may not have been altogether uninfluenced by the rapid development of a British firm of wholesale druggists representing a house of "tabloid" fame.

Government Ad udications.

As bearing upon the subject of the short time allowed for putting in tenders for Government requirements referred to in my letter of May 17, I would mention that an official notice appears for the first time this morning inviting tenders for 2,200 to 2,500 pairs of "Wellingtons" of camels' skin for the police, the sample to be seen at the Administrative Commission of the Prefecture of Police. The preliminary adjudication closes on June 17, and if the prices are acceptable, the final adjudication takes place on June 20. This notice is too short to permit of home firms taking part.

GREEK MINERAL INDUSTRY.

H.M. Consul at the Piræus, Mr. C. J. Cooke, reports that, during 1911, a large number of Greek mining companies either suspended or else greatly reduced their output, whilst no new works of any importance were undertaken during the year. The principal causes of this state of affairs were the low price of iron ore due to the fall in the rate of exchange in 1910, the increased cost of freight for minerals, and the lack of capital for new development work. There are, however, indications of coming improvement. The total value of the mineral production in 1910 was £930,729. Iron is chiefly produced in Laurium, Marathon, Locris, Seriphos, Syros, and Kythnos; lead in Laurium, Mykonos, Siphnos, and Seriphos; zinc in Laurium, Antiparos, and Siphnos; magnesite in Locris, Megaris, Hermione, and Euboea; and sulphur in Milo.

Laurium Coaling Station (Ergasteria).

A coaling station was opened at the end of the year by the Laurium Mining Company for supplying bunker coal to steamers, with plant of a total capacity of 20,000 tons with appliances for loading and unloading, which, in conjunction with its lighters and tug-boat, enables it to load at the rate of 100 tons per hour.

The harbour of Ergasteria, which is well known and safe—the entrance to which is possible and easy at any time either of night or day—is free from heavy charges, and is on the direct course of vessels sailing from the Ægean to the Black Sea and vice-versâ, and the proximity of the town of Laurium, with its market well supplied with provisions and other articles, its post and telegraph offices, direct railway communication with Athens and other Greek towns, facilitates business.

The machinery workshops of the Ergasteria Coaling Station at Laurium are in a position to undertake any repairs which steamers entering the harbour may require. These shops have a staff of over 100 workmen and are well equipped in every way, possessing forty-eight machines worked by electricity, a foundry, a special plant for the autogenous soldering of metals by means of oxygen and another for use with thermite.

TRADE WITH ABYSSINIA.

The following article is culled from the May *Journal* of the Sudan Chamber of Commerce:—

The trade between the Sudan and Abyssinia is, although slowly, steadily increasing, especially in coffee.

The value of the total quantity of coffee imported into the Sudan in 1910 was £39,791, out of which £25,646 was imported from Abyssinia. In 1911 the total imports of coffee amounted to £55,364, of which the imports from Abyssinia were £45,058, an increase of about £20,000 or 44 per cent. This proves that the Abyssinian coffee can easily compete with Brazilian coffee when the price of the latter is as high as it is this year. The Abyssinian coffee grows wild, and there are immense forests in the provinces of Gimma, Guma, Anna, Emniarea and the great kingdom of Kaffa, whence the name of coffee, Arab slave traders having taken to Arabia berries of the tree and calling it the tree of Kaffa.

The Gallas collect this wild coffee after it falls to the ground, and not from the tree as is done in Arabia, Harrar, Brazil, etc. This is one of the reasons for the bad smell which this coffee has sometimes, and another reason is the manner in which the Gallas husk the coffee. In Arabia they hull it through handmills of stone, like those used for the wheat, in Harrar they use large wooden mortars and pestles, but the Gallas make holes in the ground and with wooden pestles husk the coffee. If the Abyssinian coffee, half-an-hour before it is roasted, is well washed and dried it loses the bad smell taken from the ground.

If the Gallas collect the coffee from the tree, it will compete not only with the Brazilian in the Sudan and Europe, but even with the inferior qualities of the Arabian, owing to its flavour and aroma. The quality of the coffee imported through Gedaref is not so good as that of the other provinces, the forests in that district being too dense and not well ventilated, and for lack of air and sun the fruit cannot ripen well and loses its value. To-day there is not being exported from Abyssinia even one-thousandth part of the coffee because the Gallas are only collecting the coffee found on the ground outside the forests. They do not enter the forests, being afraid of the wild animals, especially the black panthers, so this valuable produce is the food of the monkeys. These immense forests are all dense, and the coffee trees covered with large creepers. When Abyssinians decide to clean those forests and develop their country an enormous quantity of coffee will be exported to Europe.

There is not any increase of the ivory trade from Abyssinia, owing to the prohibitive law that the small and female tusks are not allowed to be imported into the Sudan even in transit, so the Abyssinians take their ivory to the market of Adis-ababa.

It is hoped that the Sudan Government will see its way to allow this female ivory to pass through this country in transit.

Beeswax also finds a good market in Adis-ababa, whence it is exported to Europe through Djibouté, the French railway making great facilities to the merchants, and when this railway is completed up to Adis-ababa it is very doubtful if half of the beeswax exported now through the Sudan will continue, although it is produced in provinces much nearer to Gambela than Adis-ababa.

Cattle trade could be developed very well, if to prevent the spread of cattle disease into the Sudan and Egypt, which is always prevalent in Abyssinia, the Sudan Government would establish on the Abyssinian border some veterinary stations for the examination of cattle and detain the animals for a fortnight before allowing them to pass into the Sudan.

CLOTH SUITINGS.

H.M. Consul at Sarajevo, Mr. F. G. Freeman, reports that a local tailor at Sarajevo desires to get into communication with British manufacturers of cloth for men's suitings, with a view to the establishment of a depôt for these goods in Sarajevo.

The name and address of the firm, says the Board of Trade *Journal*, may be obtained by British manufacturers on application to the Commercial Intelligence Branch, Board of Trade. Any further communications regarding the inquiry should be addressed to the British Consulate, Sarajevo.

Openings for Business.

PUBLIC WORKS IN ROUMANIA.

With reference to the municipal loans for public works to be constructed in Roumania, to which we have repeatedly called the attention of our exporters, the U.S. Minister at Bucharest quotes Curtea, Bacan, Botosani, Gorj, Tulcea, and Cernavoda as smaller cities and towns to take advantage of the authorisation. The loans are to be applied to the construction of schools and other buildings, to provide water supply, public fountains, sewers, electric lighting plants, etc., and to other purposes. Military casinos are to be constructed at Bucharest, Constantza, and elsewhere.

Much of the material and practically all of the fittings to be used in the contemplated construction work will be imported from abroad, and although the difficulties of transportation are considerable (especially in view of the existing situation at the entrance of the Dardanelles), it would be worth while for manufacturers to pay some attention to the question of their supply.

Work is to commence at once on improving the railway freight yards, station, and docks at Galatz, on constructing a dry dock at Sulina, and on completing the railway from Piatra-Neamtz to Schela-Bistritza on the left bank of the River Bistritza.

BOOT LEATHER IN SMYRNA.

The Ottoman Empire constitutes a very important market for boot leather, the total importation of which represents the value of eight million francs annually, according to the *Bulletin Commercial de Bruxelles*. The principal ports which receive this article are: Constantinople, Salonika, Beyrout, Smyrna, Trebizond, Alexandretta, Baghdad, etc.

Smyrna imported 453,986 kilog. in 1908; 553,630 kilog. in 1909, and 408,506 kilog. in 1910 of sole leather. The principal countries supplying this article are: France, Belgium, Austria-Hungary, Italy, Great Britain, Germany, Holland, etc. France provides more than half of the total, French leathers tending, as regards the superior qualities, to preserve their old reputation in the region of Smyrna and to predominate in sales. Competition has made great efforts to supplant them, but without obtaining brilliant results, owing to the preference which French products enjoy.

The industry of the country interferes with foreign importation to a certain extent, since it has greatly developed within the past few years. Competition is especially keen in light cow hides of 2 to 4½ kilogs, as also in buffalo skins emanating from China and Rangoon, and weighing from 9 to 19 kilogs.

Smyrna possesses three large tanneries and a certain number of small ones producing different kinds of leathers, which are much appreciated. The systems of mixed tannage and of pit tannage are both employed in the country, the latter being the more common. A tannery, founded in 1878, and thoroughly brought up-to-date in 1897, turns out products which generally do not resemble those made by other Smyrna tanneries since it has adopted European methods. Tanners in Anatolia have also been obliged recently to improve their system of working. Nevertheless, the tanning in this region leaves very little to be desired.

The purchasers of leather are somewhat difficult to please. It is necessary to conform with their wishes as much as possible, not only as regards the quality of the goods supplied, but also in regard to the question of credit to be allowed and the faithful execution of the order. Much importance is attached to beating, which ought to be thorough, and the leather should also be as rigid as practicable.

THE NEAR EAST PRESS, Ltd.,
16-17, Devonshire Square, E.C.

TRADE OPPORTUNITIES.

We take the following items of trade openings from the current number of the *Journal* of the London Chamber of Commerce:—

Cashmeres, etc.—The following goods are reported to be in good demand at Scutari in Albania:—Cashmeres 50 to 65 cm. wide, woollen cloth, cotton stuffs known as "domestics," cotton thread in qualities 14, 18, 22, 24, and 40, 50, 60, 80, and 90. Turkey-red thread in qualities 8 and 10 are particularly sought.

Paper.—According to Mr. Consul-General G. Grahame there appears to be an increasing demand for paper, chiefly for printing purposes in Ispahan, Persia. There are at present three newspapers published—somewhat irregularly—in Ispahan. Three roller and several lithographic printing presses find work. Hitherto the paper imported has been of Austro-Hungarian and Russian manufacture, in about equal proportions.

Cretonnes.—Italian manufacturers of tissues are endeavouring successfully to find an opening for their goods in Bulgaria. The Italian tissues most in favour are cretonnes and cotton flannels. Cretonnes are sold in widths of 68 to 70 centimetres at 0.38 c. a metre c.i.f. Varna with 90 days' credit. Cotton flannels are delivered at 0.41 c. a metre on the same conditions.

Iron Plates, etc.—Most of the black iron plates imported to Bulgaria are supplied by England. Those of size 30 ins. by 60 ins. are sold in packages of 8 to 14 at £10 to £12 a ton f.o.b. Varna. Galvanised iron plates comes from England and Germany. Axletrees, complete, for carriages, are imported from Germany. Nos. 5, 6, and 7 are mostly in demand and are sold at 22s. 4d. to 27s. 3d. c.i.f. Varna.

Lingerie.—The *Moniteur Officiel du Commerce*, of Paris, states that underlinen of the best quality, finely worked, finds a ready sale in Roumania. French hosiery also sells well in spite of the competition of the Chemnitz factories. Stockings and socks from Troyes are well liked. Flannel vests and flannels are also in good demand, but as they are now manufactured in Roumania the imports have diminished.

Window Glass.—Window glass is stated to be in very good demand in Bulgaria on account of the activity in the building industry. During the month of February last large orders were given abroad, and it is stated that orders for 10,000 cases went to Austria Hungary. It is recommended that only glass of excellent quality should be sent, and the packing should be irreproachable.

Wool, etc.—The *Moniteur Officiel du Commerce* states that materials for the textile industry finds a good opening in the factories for knitted goods and cloth at Bucharest, Azuga, Ploesti, Buhusi, Piatra, and Jassy in Roumania. The factories use woollen and cotton yarns, as well as raw, washed and combed wool. About half the wool required is purchased in the country and the other half is imported. Payments are generally made in cash with 3 or 4 per cent. discount, or by drafts at four and six months.

Miscellaneous.—Zinc white is reported to be in good demand in Bulgaria. The quality preferred is that delivered in cases. Gum arabic delivered in casks of 100 kilos. is also very much in demand; it is sold at 45s. per 100 kilos., c.i.f. Varna with four months' credit. Camphor, which is imported in "loaves" or in tablets of 250 to 300 grams, finds a ready sale. Prices are from 4s. 1d. to 4s. 4d. a kilo, c.i.f. Varna, payable in cash with 2 per cent. discount.

TRADE IN TURKEY.

Writing of American trade opportunities in Turkey, Mr. Heizer, the Deputy Consul-General, says that the principal lines of goods which may find a most profitable market in the Ottoman Empire are cotton and woollen textiles, tools and hardware, agricultural implements, boots and shoes, cutlery, furniture, leather, cotton and mineral oils, and builders' hardware. The Turkish buyer prefers the cheaper grades of these American products. Credit conditions are good, and the war with Italy is not doing any great injury to Turkey's commerce.

NEW RAILWAY CONCESSION.

A Bill has been introduced in the Roumanian Parliament, writes the United States Minister in Bucharest, Mr. John Jackson, in the *Daily Consular Reports*, authorising the district of Prahova to grant a concession for constructing and operating an extension of the private railway from Ploeshti to Valeni de Munte as far as Maneciu-Ungureni, and to contract a loan of 2,500,000 frs. (franc = 19.3 cents) for the purpose, which is to be issued as necessary. The new line is to be built in two sections, from Valeni to Homoraeni and from Homoraeni to Maneciu-Ungureni, and work on the second section is not to begin until after the first is in operation. The estimated cost of the first section is 1,800,000 frs. and of the second section 1,200,000 frs., the income derived from the whole line from Ploeshti being applied in connection with the proceeds of the loan. The object is to open up additional petroleum lands.

TENDERS INVITED.

EGYPT.

Sanitary Fittings; Water and Pump Installations.—Tenders invited by the Egyptian State Railway Administration for the supply of sanitary fittings, including water closets, urinals, cisterns, filters, brass cocks, iron and lead pipes, pumps, etc. Copies of the specification and form of tender, with drawings, and a list of the articles required, may be obtained, price 8s., from Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster, S.W. Tenders, enclosed in two covers, the inner marked "Tender for the supply of Sanitary Fittings" and the outer one addressed to the General Manager, Egyptian State Railways and Telegraphs, Cairo, will be received by him up to 10 a.m. on July 22.

Supply of Sponges.—Tenders in sealed envelopes will be received at the office of the Director, Coast Guard Stores, Arsenal, Alexandria, for the supply of 700 sponges. Conditions and specification at the office of the Director of Stores, Arsenal, Alexandria. Tenders (on stamped paper) to the Director, Coast Guard Stores, Arsenal, Alexandria, and marked on the envelope, "Tender for the Supply of Sponges." Provisional deposit, as indicated in the conditions of tender. Date, July 15 (noon).

Supply of Oils and General Stores.—Tenders will be received at the office of the Inspector of Irrigation, 3rd Circle, Alexandria, for the supply of oils and general stores, for the season 1912-1913. Prices to be quoted for delivery free at the Government Pumping Station, Mex. Specification and the list of stores at the office of the 3rd Circle of Irrigation. Tenders (on stamped paper) to be addressed to the Inspector of Irrigation, 3rd Circle, Alexandria, in a sealed envelope bearing the inscription: "Tender for Stores for Government Pumping Station, Mex." Date, June 15 (11 a.m.).

Supply of Olive Oil.—Tenders will be received at the Economat Central of the Ministry of Finance for the supply of 7,390 okes and 272 drachmes of genuine olive oil. Persons wishing to tender should apply to the Economat Central at the Ministry of Finance in order to consult the conditions and specification of the supply. Date, July 10 (noon).

TURKEY.

Coal.—Tenders are invited by the Hedjaz Railway authorities for the supply and delivery, at Caiffa, of 10,000 tons of best quality Cardiff coal. Tenders will be received at the Direction Générale du Chemin de Fer du Hedjaz, Constantinople. Date, June 8.

BULGARIA.

Locomotives.—Tenders invited by the Directorate General of Bulgarian Railways and Ports for the supply of 20 express locomotives with tenders. Estimated cost 1,850,000 frs. Offers, accompanied by certificates of competency, will be received at the Direction Générale des Chemins de Fer et des Ports de l'Etat Bulgare, Sofia, where also copies of the form of tender, with specifications and drawings, may be obtained on payment of 30 frs. (£1 4s.) per set. Date, June 24 (3 p.m.).

New Coinage.—Sealed tenders will be received by the Section de la Comptabilité

Digitized by Google

Publique, Ministere des Finances, Sofia, for the minting and delivery of 80,000 gold coins, of the nominal value of 2,000,000 frs. (£80,000), for the Bulgarian Treasury. Deposit equal to 5 per cent. of the amount of the offer. Date, June 19 (3 p.m.).

[Note.—A copy of the *cahier des charges* (in French) may be seen by British firms at the Commercial Intelligence Branch of the Board of Trade, 73, Basinghall Street, London, E.C.]

Supply of Rolling Stock.—Tenders invited by the Direction General of Bulgarian State Railways for supply of (a) 200 goods waggons, covered, capable of taking 15 tons; (b) 75 goods trucks (tare, 20 tons); (c) 100 ballast trucks (tare, 15 tons); (d) 40 long goods trucks (tare, 18 tons); (e) 20 covered trucks for bulky merchandise (tare, 15 tons); (f) 15 poultry vans; (g) two eight-wheeled vans, and (h) interchangeable parts for all these trucks. Tenders must be for the whole of the stock. Estimated value 1,860,000 frs. Deposit, 5 per cent. Deliver by February 28, 1913. Date, July 2.

Steel and Armoured Concrete Construction.—Tenders, accompanied by certificates of competency, will be received at the Bureau des Finances, boulevard Graf Ignatieff, 12, Sofia, for the construction in metal and armoured concrete of the superstructure of hangars at Varna and at Bourgas. Estimated cost, 195,000 frs. Deposit, 9,750 frs. (with Bulgarian National Bank) required from the contractor. Tenders to be marked, "Offre pour la construction de la superstructure des hangars No. 3 aux ports de Varna et de Bourgas." Specification, price 10 frs., from Direction General of Railways and Ports, Ministry of Railways, Posts and Telegraphs, Sofia. Date, June 29.

Supply of Colours.—Tenders invited at the Bureau of District Finances, Sofia, for supply of colours, etc. Estimated value, 22, 900 frs. Date, June 11.

Supply of Locks.—Tenders invited at the Bureau of District Finances, Sofia, for the supply of locks. Estimated value, 8,996 frs. Date, June 13.

Supply of Boilers.—Tenders invited at the Bureau of District Finances, Sofia, for supply of two boilers and accessories. Date, June 14.

Supply of Electric Hoists.—Tenders invited at Bureau of District Finances, Sofia, for the supply of two double-electric hoists, with steam engines, dynamos and accessories, for the Pernik collieries. Date, June 13.

SERVIA.

Supply of leather sheaths.—Tenders invited at the Ministry of War, Belgrade, for the supply of 6,000 leather sheaths for shovels used by the infantry. Date, June 23.

ROUMANIA.

Supply of copper tubes.—Tenders invited by the Direction of Roumanian State Railways for the supply of 3,020 jointed steam tubes in copper for portable engines and boilers, and of 10,000 kil. of pig lead in one lot. Date, June 11.

Town Water Supply and Drainage.—Tenders invited by the Municipality of Tirgul-Frumos (Jassy) for the provision of a water supply and drainage system. Date, June 17.

Drainage Works.—Tenders are invited by the Municipal Administration of Focsani for the installation of a drainage system. Date, July 29.

GREECE.

Supply of Horse Blankets.—Tenders invited at the Ministry of War, Athens, for the supply of 6,000 horse blankets. Date, June 29 (10 a.m.)

Supply of Waterproof Sheets.—Tenders invited at the Ministry of War, Athens, for the supply of 4,650 waterproof sheets. Date, July 1 (10 a.m.)

Engineering Notes.

Irrigation in the Sudan.

Referring, in an interesting article on "Irrigation in Egypt and in the Sudan," to the proposed schemes for cotton growing in the Sudan, the *Manchester Guardian* considers that perennial irrigation will certainly be required. As regards the Gezira plain above Khartum, the present proposal is to irrigate from the Blue Nile and drain into the White Nile, so as to reduce the loss of water to Egypt to a minimum. This water could either be brought by a canal tapping the river higher up, or by pumping. The average pumping head would be about 50 ft., and, although estimates of costs are necessarily only approximate, the cost of pumping apart from distribution would probably be between thirty and fifty shillings an acre, which is more than the usual tax on irrigated land in Egypt. It would be interesting to know whether wells would give a supply of water. This would depend on the geological arrangement of the strata. There is no special reason to anticipate that artesian wells would produce a supply of water, but the matter is so important to Egypt and the Sudan that a preliminary investigation might be worth making. In Australia valuable water supplies are obtained from artesian wells.

Engineering in Tripoli.

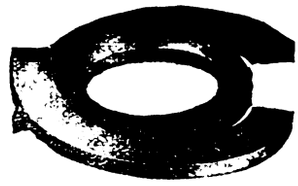
Considering that the Italian occupation of Tripoli and the surrounding district has only just reached the period of six months, says a contemporary, remarkable progress has been made in the railway and harbour works. The railway has now reached a distance of 7½ miles from the town, while the first 2½ miles of line has been laid across the oasis. Very little difficulty has been experienced in laying the line, due to the adoption of a broad gauge, enabling the line to be laid on sand without the necessity of ballasting. The first work of the railway constructors was to build three jetties, as the port had no means of disembarking the materials, including engines, carriages, and trucks, and other goods. The harbour is so shallow that the steamers were obliged to anchor over half a mile from the shore, and discharge into flat-bottom barges. A large floating crane sent to assist in the disembarking of the locomotives only arrived long after the engines were due on the track. The water by the jetty was found to be too shallow to allow the floating crane to come alongside when loaded with a locomotive, so that two pontoons were secured under the hull to reduce the draught. It is expected that the railway will advance at much greater speed now the locomotives can haul the material used in construction. Draught animals are scarce, and camels were tried, but it was soon evident that they were unsuited for the work. Mules proved slightly better, but cannot compare with the facilities now possessed in the locomotives, which are now running regularly with four trains every day.

Problem of Road Services.

Beside the preparations and methods mentioned in last week's issue as suitable for the treatment of road-surfaces in the Near East, we may mention another which has been tried and has given excellent results, and may prove also very economic in districts where the necessary materials can be obtained locally. It is a mixture of cotton-seed oil treated at a high temperature with sulphuric acid. This product, after being washed, is mixed with four times its weight of crude tar. The mixture is further treated with hot caustic soda, and agitated until thoroughly emulsified, and afterwards diluted with water until it contains 20 per cent. of tar. Thus it is a soapy solution containing emulsion of tar and a little free oil. Its price, in England, is £10 per ton, and it is said that one ton will cover a road six yards wide, one mile in length.

Extraction of Citrus Oils.

It will interest growers and merchants of citrons, lemons, and oranges in the Near East to learn that the new machines, recently invented in England for extracting oils from the rinds of limes, lemons, oranges, etc., have met with great success. It is known that most of the citrus oils coming into the market from Italy and Sicily are produced by a hand-pressing process, and are considered to be of greater value than similar oils obtained by steam distillation. Owing to the high price of labour in certain countries, and to the difficulty of finding skilful hands in others, pressing by hand is impossible, and so far there has been little competition with Sicilian trade in these oils. With the new machines a very profitable trade may be developed in the Near East where great quantities of lemons and citrons are exported in a rather primitive way of packing, while by the new mechanical means of extracting the oil from the rinds the value may be doubled and trebled.



Electric Lighting of Patras.

The town of Patras, in Greece, second in importance to Athens, is still lighted by gas, although there are electric trams, and electricity is used for motive and other purposes. A gas company has the privilege of lighting the town by gas for a number of years, and until that period expires the rights of the municipal authorities are limited in the question of changing the system of lighting. The Commercial Association "Hermes," however, has taken up the matter with a view to promote the change, and proposed the formation of a company to undertake the electric lighting of the town by making arrangements with the gas company and inviting tenders for the plant, etc.

Near East Oil Notes.

New Pipe Line.

LONDON, June 6.

Another attempt is being made to build a pipeline from Grosny to either Novorossisk or Touapse. The Baku oil people are opposing this, as they think it will hurt their pipeline from Baku to Batum. We must confess that, when we remember the wonderful things that were prophesied as to what would happen when the Baku Batum pipeline was opened and the very little good that the line has done to Baku, we are rather surprised that Grosny should be so keen on a pipeline. Two other attempts were made to get the money to build a pipeline from Grosny to the Black Sea, but both failed. The fact is, the cost of piping oil from Grosny would be so great that unless there was a boom on, it would hardly pay. Roumania can easily compete with Baku for the export trade. It certainly does not pay to pump crude oil long distances, and it is doubtful whether it is wiser to refine the oil at the wells or pump it to the sea and refine it there. Pumping oil is an expensive process. We should be very glad to see a pipeline built from Grosny to Novorossisk, but we very much doubt whether it could be made into a commercial success. The promoters declare that as the Government is going to open up about 250 acres of new oil fields at Grosny, that the production of that field will be largely increased in the near future, and that although the present production of Grosny is not perhaps big enough to support a pipeline to the sea, it is expected that when the new lines are drilled the amount of oil offering will be sufficiently large to keep a pipeline going.

Galician Combine.

The official statement of the big combine of the Galician companies is now issued. The capital of the company is to be £3,750,000 divided into 1,250,000 7 per cent. participating preference shares, and 2,500,000 ordinary shares of £1 each. £869,000 preference shares are to be given in part payment of refineries, wells and territories, and Tustanowici and other places; £100,000 in part payment to the Amalgamated Pipelines of Galicia and £181,000 to provide working capital. This leaves 100,000 preference shares in reserve. Of the ordinary share capital, £953,000 goes to the Premier Oil and Pipeline Company, £446,875 to the Amalgamated Oil Pipelines of Galicia, £500,000 to the Central Carpathian Oil Company, £125,000 to the Alpha Petroleum and £275,125 in part payment of refineries, wells, etc., at Tustanowici. 200,000 ordinary shares are held in reserve. Thus it will be seen that £181,000 is found for working capital, and the stocks of oil and liquid assets are expected to reach another £100,000, and after paying expenses, about £250,000 would be left for the purpose of the company. In future, the company, instead of dealing through the Union of the Crude Oil Producers, will have its own refineries, and will, therefore, take the whole of the profits available, instead of paying over about 1 kr. to the Union of Crude Producers. The production of the company is now about 300,000 tons, and the 8s. 4d. per ton obtained by the new arrangement will considerably increase the new profits. It is not, however, intended to fight the union, but to come to some peaceable arrangement with them. Four refineries will be taken over, and their capacity will be increased to 200,000 tons. The estimated income from crude oil is set down at £304,000. The revenue from pipelines at £60,000, the revenue from refineries at £198,333. Thus the total revenue is £562,333. The dividend on the preference shares will take 80,500, and a 12 per cent. dividend on the ordinaries, £276,000. This would leave over for depreciation, reserve and administrative expenses, £206,833. The 181,000 preference shares required for working capital have been taken at par by the Deutsche Erdol Aktien Gesellschaft in Berlin, who, it is understood, work under the ægis of the Deutsche Bank. However, in order that shareholders in the Premier Oil and Pipeline may subscribe a proportion of this issue, it has been arranged to pay a part of the first consideration in cash. Shareholders in the Premier Oil and Pipeline would, therefore be entitled to subscribe at par in the proportion of one preference share for every three shares held by them. Mr. Boxal will remain chairman until the end of 1915, and the German company will appoint the deputy chairman. After this date the preference shareholders have the right of appointing one half of the board of directors. The scheme is one of the most important amalgamations that has ever taken place in the oil trade.

Royal Dutch.

The Royal Dutch has reduced its dividend from 28 to 19 per cent. Considering that for months past the price of Royal Dutch has been weak, it looks as though the news had crept out in Holland and had caused holders to sell. The ostensible reason for the reduction in dividend is not a falling-off in profits, but in order to warn the Dutch Government against granting concessions in the Dutch Indies to the Standard Oil of America. The Royal Dutch is very heavily interested in the oilfields of the Near East. Therefore, every move of the Royal Dutch is followed with great anxiety throughout the whole of middle Europe. It is a curious thing, and one that has not yet been explained, that the company that was to work the Dutch Indies Oil concessions had on its board one of the Royal Dutch group, and this was supposed to mean that Standard Oil and Royal Dutch had at last come to terms. Indeed, it is quite possible that the whole thing is one of those magnificent pieces of bluff that seem inseparable from the oil industry. We cannot help thinking that these two companies have found it much more profitable to make a secret compact and pose before the world as enemies. The Royal Dutch Shell combined in Roumania, it will be remembered, the Astra Romana and the Regatul Romana. These two companies were joined up and the control placed in the hands of the Geconsolideerde Hollandsche Petroleum Company. The Astra Romana reduced its dividend from 10 to 5 per cent., and it is believed that the Geconsolideerde will also have to pay a smaller dividend. In Amsterdam, it is expected that a 5 per cent. reduction will be made.

Anglo-Hungarian Petroleum Co.

The Anglo-Hungarian Petroleum Company now issues a circular setting forth the agreement that has been made between this company and the British and Foreign General Securities and Investment Trust. The trust sent its expert to examine the oilfields, and agreed to find the necessary funds to enable the Anglo-Hungarian to carry on its business whilst the examination was going on. The report of the expert was satisfactory, and the trust obtained additional concessions from the Hungarian Government. It is, therefore, now decided that it shall take over the management of the oil company, first putting up £8,000 as fresh working capital and receiving £45,000 fully-paid shares as a remuneration for the services it has already rendered. A new company is to be registered with a nominal capital of £350,000. The Anglo-Hungarian will sell to this new company for £150,000 shares of the new company, and the other £150,000 is to be underwritten by the trust, 50,000 shares being held in reserve. This gets the Anglo-Hungarian out of an awkward difficulty, and as the new company will be provided with ample working capital, and be under the management of first-class oil people, the whole deal seems to be satisfactory. The British and Foreign General Securities is largely interested in oil, Mr. Greenway being the chairman, and the managers and secretaries are Messrs. C. T. Bowring and Co.

Central Carpathian Oil Company.

Since it was known that this company was to take part in the proposed new Galician Oil Combine the demand for the shares has increased, and although the present quotation is not higher than 16s. 3d.-16s. 9d., the shares are expected to rise above par in the near future. As is known, the company has been actively producing since its formation last year; it has paid its shareholders quarterly dividends of 10 per cent. per annum, and the value of the profit now earned will probably be considerably larger in the near future. In every respect the company's prospects are most promising.

Egyptian Refinery.

The *Bourse Egyptienne* states that the Anglo-Egyptian Petroleum Company has purchased in Suez 107 feddans of land with a view to erect a refinery. The company is, moreover, contemplating the construction of a pipeline from Gemsah to Suez.

PORT SAID MUNICIPALITY.

Lord Kitchener refers in his report to the newly constructed mixed municipality at Port Said, and says that it has proved successful. Its revenue for 1912 is estimated at £E23,639, of which £E12,364 represent the Government contribution to the town expenses. The arrangements for the drainage scheme are being pushed on rapidly, and it is hoped that the actual work will be commenced this year. The town expenditure has been kept well within its revenue, and by the end of 1912 there will be a reserve fund of £E10,500 to meet the interest and sinking urges on the loan which will be necessary for the drainage project. It was the urgent necessity for such a scheme which persuaded the many and various elements composing the population of Port Said to unite for the creation of a municipality, and to accept a voluntary system of taxation.

SERVIA AND BULGARIA.

The *Daily Telegraph* Bulgaria correspondent, wiring on Monday, states that the second Serbo-Bulgarian Economic Congress was opened on Sunday. Delegates were present from the universities, chambers of commerce, and various industries. After several reports on different economic questions had been read, a discussion was opened, and a resolution unanimously adopted recommending both Governments to conclude a Serbo-Bulgarian tariff union, and to nominate immediately a special mixed committee to prepare the necessary legislation for such a union. The resolution is sympathetically commented on by all the papers, which consider that it represents the most practical and the soundest basis for Serbo-Bulgarian independence and prosperity. Many politicians are convinced that Serbo-Bulgarian differences about Macedonia should be smoothed away by solid economic ties, so that European peace might have one guarantee more.

Produce Markets.

LONDON, June 6.

There has been little animation in the markets during the past week, business being materially interfered with by the dock strike. This led to prices remaining in most instances firmer. Sugar, owing to the difficulty of obtaining delivery, has stiffened for refined. Coffee is unaltered. Currants move very slowly. Sultanas are in favour of sellers, except Smyrna fruit, which is neglected. Seed oils are easy. Petroleum oil is dull.

Sugar.

Refined is 3d. per cwt. higher, owing to the labour difficulties, but beet is unchanged. Beet sugar: German 88 per cent. is quoted, June 12s. 2½d., July 12s. 3½d., August 12s. 4½d., September 12s. 0½d., October-December 10s. 7½d., f.o.b. Hamburg. Refined sugar: English, Tate's cubes No. 1, spot 22s. 6d.; June-August 22s., September-October 21s. 9d.; French, Say's cubes, prompt 19s. 10½d. and second half October-November 16s. 7½d., f.o.b. Paris; Dutch cubes, prompt 18s. to 18s. 1½d., f.o.b. Amsterdam; German and Austrian cubes, prompt 17s. 11½d., f.o.b. Hamburg.

Coffee.

It has been impossible to obtain delivery of goods at the docks, consequently small quantities were offered at the market, which were taken at previous rates. Costa Rica low to ordinary, 76s. to 80s.; Mexican, 76s. to 88s.; Brazil, 68s. to 86s.

Currants.

The strike seriously interferes with the ordinary course of deliveries from the public warehouses, and business has been generally curtailed. The demand for currants has been very quiet, with provincial quarter cases at 26s., bags 25s. 6d., Patras 27s. 6d., Gulf 28s. to 29s., Vostizza 30s. to 32s., smalls 27s. to 29s. The new crop does not show, so far as can be judged up to now, that it will be a big outturn, but it is too early yet to make forecasts.

Sultanas.

Smyrnas are somewhat neglected, but prices are steady. Much of the stock here and in Liverpool is of common quality and attracts little attention. Prices are from 50s. to 65s. Persians have met with attention at higher prices. Samarkand large bags are quiet, but good business has been done in small bags at 45s. to 46s., showing good value against Smyrna. Afghan sultanas in moderate request at 47s. to 50s. Greeks are in favour of sellers.

Figs.

Next to nothing is doing in figs, but bags genuine naturals are quoted 20s. to 23s., good layers 38s. to 42s., common layers 32s. to 35s.

Dates.

Tafilat are quoted 28s. to 40s. Persian Siek 12s. to 13s., Khadrowie 17s. 6d., Hallowie 18s. 6d.

Seeds.

There is very little doing in this market, but prices are firm. Beans and peas are in fair request in full prices. Canary seed realises extreme rates. Linseed, English 72s. to 74s. per quarter, Russian 72s. to 74s.

Oils.

Linseed oil: A large business has been done, and prices have rapidly advanced. Great scarcity prevails on the spot owing to the strike. Spot pipes nominal £46, barrels £47, June £42s. 15s., July-August £40. Cotton oil has been very scarce, and prices were dearer, but with little inquiry. Ordinary pale refined spot £28 to £29, sweet edible £31 to £32. Olive oil inquiries are very limited and prices are steady. Spanish £44, Levant £42.

Oil Cake.

Linseed: London made per ton £9 to £9 5s., Calcutta made £8 17s. 6d. to £9, Russian £9 to £9 2s. 6d. Cotton: London made £5 17s. 6d. to £6, Bombay £5 5s. to £5 7s. 6d., Egyptian £5 12s. 6d. to £5 15s.

Gum.

Animi: Zanzibar washed £12 to £14 10s., bean and pea £3 15s. to £9 10s. Arabic: East Indian £1 13s. to £2 5s. Gamboge £1 12s. to £14. Kowrie: Common 50s. to 75s., scraped 95s. to 250s., selected 280s. to 345s, olibanum drops 35s. to 50s.

NEAR EAST MARKETS.

(FROM OUR OWN CORRESPONDENTS.)

Braila. June 1.

Crop prospects continue to be very favourable. We have had warm weather, with occasional showers, and this is exactly what is wanted during the present season. Harvesting, however, is likely to be about ten days or a fortnight later than in previous years, owing to the lateness of spring.

Nicosia. May 28.

It is understood that the Government has just purchased from England 6 cows, 2 bulls, and 2 stallions of superior breed. These will be for service for the improvement of the native stock. Suitable accommodation is being erected for them at the Government Farm, Athalassa.

The destruction of locusts is being undertaken as usual, the Government paying for the live insects at fixed rates. A new method of destroying them with a compound of arsenic is also to be tried.

Special Weekly Reports.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Larnaca. May 16.

Heavy rains having fallen, it is feared that the barley already reaped will be discoloured, but wheat, locust beans, and oats have benefited considerably, and it is hoped that the crops will be very good. Sales of wheat to Italy at good prices continue.

Stocks of cotton yarn are still below requirements. The demand is good. About 15 bales were imported during last week.

Baghdad. May 17.

Communications with Persia have improved, but as unrest still continues, the market awaits developments. The stock of cotton goods is increasing, but sales are suspended.

The British Consul at Kermanshah is registering the complaints of merchants whose caravans going to that place were pillaged. Salar-ed-Dowlh has offered to refund 50 per cent of the value of the goods stolen, but it is hoped that the Persian Government will refund 100 per cent.

Important exports of cereals for Bombay, London, Marseilles, and Hamburg, have taken place. There has also been activity in the exports of wool, goat and sheepskins.

Jaffa. May 20.

Price of sesame is rising at PB 3,35 the oke. The stock is small. 60,000 kilos were loaded during the week for Trieste at 56.00 frs. per 100 kilos.

900 cases of oranges and 250 cantars of soap were shipped to Egypt during the week. The price of oil is moderate at PJ. 101-103 the jar of 16 okes.

Mitylene. May 25.

The opening of the Dardenelles has produced a certain amount of activity, and exports have improved. 1,050 barrels of oil valued at £T6.300 were shipped, of which 305 barrels, valued at £2,000, for London. 1,000 bags of soap, valued at £T2,000, were also loaded.

There have been no imports.

Constantinople. May 25.

There are no new features in the market. Sales of mohairs are practically nil, England refusing momentarily to buy. This will produce a change in the quotations.

The European boats which have entered the port with the opening of the Dardenelles, have not yet been unloaded, and consequently no opinion as regards the situation can be expressed.

"Castor seed does not yet appear as a Sudan export. It is somewhat surprising that a trade in this oil seed has not sprung up in view of the ease with which it is grown in practically every province in the Sudan.

EGYPTIAN COTTON MARKET.

(FROM OUR OWN CORRESPONDENT.)

Alexandria. May 31.

Prices of cotton are very firm and speculation is active. There is little business doing in the "spot" market, owing to there being very little offering. Spinners are buying the next crop on a large scale.

Liverpool Report.

Messrs. Reynolds and Gibson telegraph that there has been a fair inquiry for Egyptian spot cotton during the four days of this week, and the sales, which include several hundred bales of Sudan cotton, are estimated at 2,500 bales. Quotations are unchanged except for Fair and Good Fair, which have been advanced one-sixteenth per lb.

Egyptian Cotton Crop.

The Alexandria General Produce Association has published its May report on the condition of the cotton crop (says the *Manchester Guardian*), and states that in Lower Egypt the temperature at the beginning of May was somewhat irregular, but towards the end of the month it became favourable. The young plants are in good condition and strong and healthy, but the variations in the weather have somewhat checked their normal development and slightly reduced the advancement, which at present is not more than ten to fifteen days earlier than last year.

Cotton in the Sudan.

According to the *Egyptian Morning News*, the Governor of the Kassala Province (Sudan) has issued orders to all cultivators of cotton to cut down all plants after the picking is over, and to leave no seed in the country, but to ship it all abroad and use fresh seed for planting the new crop. The object is to improve the quality of the cotton produced at Kassala.

COTTON GOODS IN EGYPT.

Decrease of Imports.

The latest bulletin to hand from the Egyptian Bonded Warehouses shows that the stock of Manchester goods (in bales) on March 31 was 2,452. Arrivals in April were 526 bales, and 733 bales were withdrawn during the same month, leaving a stock on April 30 of 2,245 bales.

Referring to this report, the Alexandria correspondent of the Imperial Ottoman Bank states that the stock on April 30, 1911, was 2,224 bales, and then says:—"The arrivals during April of this year were £40.000 less than those for the corresponding month of 1911, and for the four months from January to April £280,000 less than the same period of 1911. The reason of this is that high prices prevail at home and the importer has restricted his purchases in consequence."

The same bank's Cairo correspondent, in his monthly report on Manchester cotton goods, writes as follows:—

The imports of Manchester cotton goods are dwindling, and the opinion prevails that, in view of the fact that manufacturers will not sign engagements for immediate delivery, this state of affairs will continue until August.

The decrease of the stock, and the rise in the price of the raw material, combine to maintain the price of the manufactured article, and merchants are more exacting in their sales.

There were no important failures or suspensions of payment in the cotton line during the month of April.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 24:—Nothing has been done on our market this week, although from various centres some inquiry has come forward. Constantinople's high estimate of the coming crop keeps business back, so until consumers see more clearly what the yield will be, we do not think any activity will set in. Prices continue nominal, 16s. to 20s. per lb. as to crop, strength, and appearance. The arrivals to date amount to 1,177 cases, against 4,558 at same period last year.

Digitized by Google

TRADE WITH BEYROUT.

Mr. Flecker, the Acting Vice-Consul at Beyrout, has published the report on the district for 1911, and states that Belgian iron still rules the market owing to its cheapness and to facilities of payment. Zinc comes from Germany in barrels of 250 kilos. each and tin plates in cases of 110 lbs. each. Galvanised sheets and tin plates are the sole articles in which other countries are unable to compete with the United Kingdom. The Belgian barbed wire has been abandoned on account of the irregularity of the barbs.

Two thousand tons of iron pipes and tubes arrived in 1911 from Belgium and 1,100 tons from the United Kingdom, of all dimensions, by contract, for the waterworks at Aley on the Lebanon. These are sold by metre. Four motor engines for mills came through Beirut for the Hauran and four for Aleppo of 16 horse-power each, from the United Kingdom, average price £700. Four others for Aleppo came from Germany of 30 horse-power, price £500 each, with credit of one and a-half years.

Imports of coal have decreased owing to high prices due to the war. The railway company are the chief importers. German competition in foundry coke is facilitated by the direct communication of a line of steamers with Essen, and German patent fuel is sought after for silk factories and smiths' forges on account of its quick firing, but it is not so durable as British.

If the United Kingdom were to give the long terms of credit given by other countries, foreign competition in textile, except in a few specialities, would be killed. Owing to the war with Italy, British imports in textiles have increased 10 per cent.

In conclusion, Mr. Flecker admits that the usual trade report remarks—that catalogues and prices should be in languages that people understand, that personal representation is necessary (there are not half-a-dozen Englishmen trading in Beirut), that British traders will not give credit, and that German firms, being exemplary in these ways, are driving British trade away—are particularly pertinent to Syria; but their effect seems to have been lost by repetition.

TRADE WITH TRIPOLI.

Mr. Harris, the Acting Vice-Consul at Tripoli (Syria), in his report on the district, quotes the following opportunities for trade:—Olive oil for mixing with butter, shoes and boots, gasolene lamps, articles of dress, lime and cement, tinned goods, nails for cases for the orange crop, agricultural machinery (needed to supply the place of manual labour, which is dear), coal and oil stoves, cheap clocks and watches, stationery, carpenters' and masons' tools are some of the numerous articles which would be welcomed. Travellers must be sent, however, otherwise the prospect of business is slight.

Care should be taken that goods are sent in strong cases.

JAFFA TRADE.

Mr. Fiani, the Acting Vice-Consul at Jaffa, writes that the points which must not be lost sight of if British trade is to continue to advance and to keep pace with foreign competition, are:—More commercial travellers; correspondence should be in French or German; some credit must be granted, but with discrimination; the market requires a cheap and showy article; prices should, wherever possible, be quoted c.i.f. Jaffa; and goods must be strongly packed.

There may be an opening or a chance of increasing British trade in the following lines:—Cloth (cheap smooth-faced), ladies' dress material (thinner, mercerised kinds), cheap hosiery and underclothing, ready-made clothes, cheap cutlery, tinned butter, boot polishes, and cheap notepaper.

Shipping Intelligence.

CONGESTED DANUBIAN PORTS.

(From Our Own Correspondent.)

Braila, June 1.

There is a congestion of tonnage at all the three Danubian ports, as all the steamers that had been waiting outside the Dardanelles arrived at the same time. There are at present nineteen vessels at Braila, seventeen at Galatz, and thirty-four at Sulina. At this last port the line of steamers berthed alongside the quay extends to the third milepost, and there are several steamers awaiting their turn in the roads, as there is no further accommodation in the harbour. Unfortunately, corn markets are low and inactive, causing a complete stagnation in the spot freight market. The only inquiry that exists is for Mediterranean ports, and more especially for the Adriatic, the current rates paid being 17 frs. from Braila or Galatz to Venice, Trieste, or Fiume, 16.50 frs. for Marseilles, and 1 fr. less from Sulina. There is no inquiry at Braila for either Antwerp or Rotterdam, rates being practically nominal at 12s. As there are many liners now discharging which will be ready to receive cargo in a few days, thus increasing the amount of available spot tonnage, it is anticipated that the competition that they will create will result in a further fall in freights. At the beginning of the week there was some business done for Hamburg at 12s. 9d., but the demand from that quarter has also ceased.

Sulina Bookings.

Sulina harbour is very busy, as steamers are loading old engagements, but little new business is reported. Early this week it was still possible to book at 11s. 9d. for Rotterdam May loading, but now that pressing May engagements have been shipped, steamers have had to accept 10s. 6d. for either Antwerp or Rotterdam, and a further fall is certain.

The present stagnation cannot possibly last very long. There are large stocks of grain ready for shipment, and as soon as the corn markets show any signs of activity and freights attain a steadier though lower level, shippers will come forth with their cargo, of which there is sufficient to keep the port busy until the new wheat crop is ready for shipment.

The depth of water in the Danube remains unchanged. Steamers can load at Braila or Galatz down to 22 ft., and can cross Sulina Bar drawing 23 ft.

PORT SUDAN.

The following are some of the principal shipping companies calling at Port Sudan:—Khedivial Mail, Austrian Lloyd, Union Castle, Hamburg American, British India, Ellerman Combine, Clan, Bucknall, T. J. Harrison, Temperley, Carter and Darke, F. Strick and Co., Odessa S.S. Co., and the Societa Nazionale de Servizi Marittimi.

According to the April report of the Central Economic Board (Sudan Government) the registered tonnage of vessels calling at Port Sudan in 1911 amounted to 574,367 tons (Great Britain 398,658 tons for 233 vessels), as against 354,894 tons (Great Britain 287,751 tons for 205 vessels) in 1910 and 299,976 tons (Great Britain 218,882 tons for 204 vessels) in 1909.

S.S. "CHRYSOPOLIS."

The West Hartlepool steamer "Chrysopolis" (2,931 tons gross register), which went ashore on Dolga Bank, near Taganrog, on her voyage from Genoa for Black Sea ports, has refloated with assistance, and the vessel is therefore withdrawn from the overdue list.

PORT OF JAFFA.

(From Our Own Correspondent.)

Jaffa, May 31.

I called attention in a previous letter to the urgent need for the construction of a port in Jaffa. Steamers anchor at about 1,000 yards from the shore, and during bad weather, not only are the mails delayed, but the merchants incur serious inconvenience and loss.

The construction of a safe harbour has now been decided, the sum necessary being about 65,000,000 frs., which amount has, I understand, been subscribed by several financial companies, the chief being the Jaffa-Jerusalem Railway Company. Among the contractors are several wealthy Jews.

It is said that the length of the quays will be about 3,000 metres, so that sixty vessels, large and small, may be anchored in the port at one time.

JAFFA SHIPPING.

British steamship companies—viz., the Ellerman and Moss Lines and especially the Prince Line—writes Mr. Fiani, the acting-vice-consul at Jaffa, in his annual report, have had almost a monopoly for orange shipment to Liverpool, but competitors have succeeded in obtaining a share of the shipments by chartering Danish, Norwegian, and other steamers at the rate of freight of 1s. 0½d. per box from Jaffa to Liverpool, in competition with the British lines.

The shipping returns at Jaffa show a decrease on the figures for 1910. The number of steamers was seventy-four less, with a decreased tonnage of 90,000 tons, the diminution being to a considerable extent due to the cessation of Italian shipping owing to the war. The United Kingdom to a trifling extent lost ground in numbers (three steamers less), but it gained considerably in tonnage (42,000 tons more). Italian shipping shows a decrease of thirty steamers and 84,000 tons, while Russian and, to a small extent, German shipping have also declined. Austro-Hungarian shipping has gained ground.

The average displacement of the steamers touching at Jaffa was as follows:—British, 1,600 tons; Austro-Hungarian and German, about 1,900 tons; French, about 2,300; and Russian, 1,350 tons.

TONNAGE FOR TRIPOLI.

According to the *Manchester Guardian*, tonnage is required by the Italian Government for the transport of supplies to Tripoli, including cattle and straw from Algeria. A boat with refrigerating apparatus has also been in request for the carriage of ice over a period of three months, but all efforts to secure a new tank steamer—and the inquiry has been in the market since December last—for the conveyance of fresh water for the use of the troops have so far been without success. The demand by oil shippers for vessels of the type is now brisk, and the freights offering are so remunerative that boats are actually being chartered long before completion.

SUEZ CANAL SHIPPING

The six leading shipping companies traversing the Suez Canal in 1911 were: The P. and O., with a tonnage of 1,205,000 and 244 voyages; the Ellerman lines, with 1,158,200 tons and 286 voyages; the Alfred Holt and Co., with 1,002,800 tons and 224 voyages; the Hansa Line, with 847,000 tons and 215 voyages; the Messageries Maritimes, with 603,400 tons and 172 voyages; and the Norddeutscher Lloyd, with 595,200 tons and 102 voyages. The P. and O., it will be seen, continues to head the list in tonnage, and the Ellerman lines in the number of voyages during the year.

The ALIGARH INSTITUTE GAZETTE

A High-class Urdu-English Weekly Journal.

Founded by the Old Sage of Aligarh, the late Sir Syed Ahmad, in 1866 A.D.

It is now the leading and officially recognised Organ of the M. A. O. College, Aligarh, All-India Muhammadan Educational Conference, and All-India Moslem League, on politics, education, and society. An excellent medium of advertisement on account of its large circulation amongst educated and enlightened class of Muhammadans, gentry and nobility in all provinces of India and places beyond India. Annual subscription, 4s. Agents securing advertisements have good offers.

Apply to The Manager, Aligarh Institute Gazette, India (U.P.).

"Leicestershire."—Left Liverpool for Rangoon May 30. "Staffordshire."—At Rangoon June 2. "Warwickshire."—Rangoon for London. At Colombo June 2. "Worcestershire."—Rangoon for London. Left Port Said June 3.

The s.s. "Gloucestershire," for Egypt, Colombo, and Rangoon, will close for cargo at Birkenhead on June 12.

City Line.

"City of Athens."—At Bombay May 31. "City of Benares."—At Calcutta May 31. "City of Calcutta."—Liverpool for Calcutta. Passed Perim May 26. "City of Delhi."—Left Karachi for Birkenhead June 1. "City of Edinburgh."—At Calcutta May 20. "City of Glasgow."—Bombay for Liverpool. Left Perim June 2. "City of Madrid."—Liverpool for Karachi. Left Perim May 29. "City of Manchester."—At Liverpool. "City of Poona."—Calcutta for London. Left Port Said June 1. "City of Sparta."—Liverpool for Calcutta. Passed Sagres May 28.

The s.s. "City of York," for Bombay and Karachi, will close for cargo at Birkenhead on June 15.

NEWS FROM ALL SOURCES.

A Roumanian law has been promulgated extending to imports from the United States the rates of the conventional tariff. For several years past there has been discrimination against American products in Roumania, and the passage of the present law marks the success of the continued efforts on the part of the United States to secure the application of the rates of the conventional tariff to American imports.

The Ottoman Government has forbidden the sale in the Empire of a new map of Turkey published in Paris. In this map Tripolitania is shown as an Italian possession.

A decree has been issued establishing customs duties on goods imported to the territory of Tripoli and Cyrenaica. Customs duties will be collected on all imported goods at a fixed tax of 11 per cent. ad valorem; except barley, wheat, flour, paste, rice, dried fish, sugar, coffee, tea, and petroleum, on which goods the tax is reduced to 4 per cent. ad valorem.

The Consolidation Coal Company has despatched two steamers from Baltimore with 5,000 tons coal each for the Egyptian State Railways. This is the second contract for coal from that source. This contract calls for 50,000 tons, the first having been for 40,000 tons.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912.)

SETTLING DAYS.

CONSOLS.
Monday, July 1.
STOCKS AND SHARES.
In Mining Shares the next carry-over is June 11.

Continuation Days.	Ticket Days.	Pay Days.
Wed., June 12.	Thurs., June 13.	Fri., June 14.
Wed., June 26.	Thurs., June 27.	Fri., June 28.

LONDON, June 6.

The liquidation continues, and is likely to continue, at any rate, for some weeks. The Stock Exchange, however, is optimistic and believes that business will soon improve. But we must not forget that we have had a long and exhausting boom, and it will take some time before the punter recuperates. One thing is in favour of a revival of speculation, and that is cheap money. In spite of the gloomy prophecies of the Lombard Street people, money will remain cheap, and this always helps the gambler.

Internationals Improve.

The Foreign Market has improved all round, without any business of any importance having been done. Bulgarian Four and a-Half, however, weakened to 88½, having made up at the last account at 90. Very contradictory rumours are afloat with regard to the situation in China. The Six Powers have advanced considerable sums to the Chinese Government, and this looks as though they were quite certain to carry the day. At the same time, the feeling in China is very strong, and until everything has settled down it would be most unwise to purchase Chinese bonds. Egyptian Unified are strong at 100½. There are orders on the market that cannot be executed. Greek Fours have improved during the last few days, and are now quoted 55. On Wednesday they rose ½. Hungarian Rentes are also firm, and Italians continue to improve on strong support. They are now 96. In the opinion of good judges the war is costing the Italian Government very large sums, and there seems little chance of its coming to a speedy end. However, the Italian Finance Minister is determined to keep up his market, and he is aided by the large bear account that exists. Russians remain unchanged, and Turkish Unified at 89½ are the turn better.

Fall in Home Rails.

As we anticipated, Home Rails have fallen, and, in spite of the fairly good traffic returns for the Whitsuntide holidays, almost all the leading railways show a fall on the week. The Yankee Market is practically dead, no business of any importance having been done. Amalgamated and Anaconda are strong, and all Copper shares are likely to go higher. There has been a large business in Canadas, which closed at 274½, at which price they look dangerous. Rubber shares are hardly mentioned, but the Oil Market has shown some signs of improvement, Urals having been bid for. They are talked to 4½. We discuss the surprising reduction in the Royal Dutch dividend in another column. British Maikop improved from 1s. 4½d. to 2s. on the news that oil had been struck, but they have since relapsed.

Egyptians Idle.

No business has been done in the Egyptian market. National Banks are a shade better at 17⅞. Aboukirs are unchanged. Agriculturals look cheap at 6½. There has been no further business in Behera, but the talk of winding up Abdy's still continues. Some of the shareholders think that the company would return about 12s. and that as little business is being done it would be better to make a division of the assets. It appears to us an unreasonable suggestion. Salt and Sodas are weaker. It is declared that the whole of the Zervudachi holdings have been sold. This, we take leave to doubt. There has been no business in Ghanbieh Lands. Khedivial Mails remain at 8s. 6d. without buyers. The investing public are afraid that the company has been seriously injured by the war, and that the next report will be a bad one. New Egyptians have been dull, and were offered down to 12s. 6d. Sidi Salems have also been weak. Union Foncière are quoted 2½, the report not having helped the market in any way. 577 feddans have been sold during the fifteen months covered by the accounts for £41,667, which compares unfavourably with 489 feddans sold during the twelve months previous for £42,922. The company was mixed up with the firm of Zervudachi, and will, no doubt, lose money by the failure. United Egyptian Lands are now quoted 3s. 1½d. The report states that 370 feddans have been reclaimed during the year, and that most of this land will be fit for the cultivation of cotton in 1913. The money for the reclamation of these lands is advanced by the Mortgage Company of Egypt. During the year the company has sold 75 feddans at Kom El Akhdar, and various other plots of uncultivated land. The profit for the year is only £802, which, of course, is carried forward. The United Egyptian owns some good land at Kom El Akhdar, but the 39 feddans at Rodah Island now stand in the books at £165,000, and appear over-valued.

FINANCIAL NEWS IN BRIEF.

It is stated that the Ottoman Government has granted a French group the concession of 50,000 hectares of cotton land in the province of Adana. The company will have a capital of at least 7,500,000 frs., and is authorised to issue debentures. After a period of three years the Government receives 40 per cent. of the net profits.

The Agricola Insurance Company, Bucharest, is to increase its capital by 1,100,000 frs. An issue is shortly to be made and will be covered almost entirely by the Riunione Adriatica and in smaller proportions by the Wiener Bankverein, the Banque Balcanique de Smyrne, the Banque Romanesca, and by the Bank of Roumania.

The receipts of the Canal de Corinthe for 1911 amounted to 534,132 dr. as against 516,348 dr. in 1910, and expenditure 389,916 dr. as against 369,295 dr. in 1910, leaving a profit of 144,216 dr. as against 147,210 dr. in 1910. The dividends are maintained at 3 dr.

The net profits of the Port de Salonique for 1911 amount to 134,163.59 frs., as against 134,442.77 frs. in 1910 and 120,066.00 in 1909. The dividends, as announced by us, have been fixed at 15 frs. per share.

The capital of the Crédit foncier franco-bulgare, Paris, is to be raised from 12 to 20 million francs owing to the absorption of certain mortgage banks established in Sofia by the Banque balkanique et la Banque générale.

Mr. James La Fontaine, paper merchant, of Constantinople, announces that his business will be conducted in the future by an English private limited liability company with a nominal capital of £7,500, of which the whole amount is fully paid up. The title of the new company is James La Fontaine, Limited.

Messrs. C. J. Hambro and Son and Messrs. Emile Erlanger and Co. announce that in accordance with the terms of the Greek Four per Cent. Loan of 1910 the amortisation for April 1, 1912, has been effected by purchase in the market of 704 obligations.

The coupons of the Constantinople Municipal Five per Cent. Loan, falling due on June 14, 1912, on the bonds, should be presented on that date in London at the offices of the National Bank of Turkey, 50, Cornhill, E.C.

Société des Usines du Laurium Five per Cent. Bonds.—The Comptoir National d'Escompte de Paris, 52, Threadneedle Street, E.C., have received instructions to pay on June 17 the coupons and drawn bonds of the Société des Usines du Laurium Five per Cent. loan at the rate of exchange of the day.

The total receipts of the Ottoman Public Debt Service for January, 1912, amounted to £T247,178.71 as compared with £T220,215.51.

The city of Braila has concluded with the Banque de crédit roumain at Bucharest a loan at 4½ per cent., of 10,200,000 frs. at 92. The loan is to be devoted to public works.

It is announced that the Coupons due on June 14, of the Ottoman 4 per cent. Loan of 1909, may be presented for payment at the Offices of the Imperial Ottoman Bank and of Messrs. Morgan, Grenfell and Co.

NOTES FROM ALEXANDRIA.

Summer Torpor.

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, May 31.

The departure for Europe of our leading financial lights, the recent failures, and the torpor which characterises the Bourse in summer, have been the principal causes of the present inactivity in the share market. Speculators for the time being are holding aloof and are not likely to operate on any large scale for some time, as they see no likelihood of an upward movement before the autumn. The dearth of business is mainly due to the scarcity of offers. It is almost impossible, in fact, to buy shares at the officially quoted prices. These quotations are for the most part purely nominal, and the slightest inquiry would be certain to bring about a marked recovery. It is true that, as a result of the liquidation of big dossiers, such as that of Zervudachi, Rodocanachi and Reynolds, Bartau Pasha, etc., there is a considerable amount of floating stock, which cannot be definitely "classed" for two years, but it is none the less true that the present holders of this stock are determined not to liquidate their holdings before a substantial rise in prices takes place. Thus, those who are able at present to discreetly pick up bargains in Egyptian shares are practically certain to double their capital in three or four years. People should not allow themselves to be too greatly influenced by the crisis we are passing through, as the latter is due, not to the condition of the country, but to the abuses of credit practised by unscrupulous or imprudent financiers. Lord Kitchener's report should reassure all those who have interests in the country and strengthen the confidence which Egypt should undoubtedly inspire.

The Quarantine Board.

The Egyptian Government is taking steps for the suppression of the International Sanitary and Quarantine Board of Egypt and its amalgamation with the Sanitary Administration of the country. The suppression of this international institution is much to be regretted. It has in the past rendered inestimable services, not only to Egypt, but also to Europe, by protecting both against the ravages of cholera and plague.

North Egypt Land Company.

The Mixed Court of Appeal has held a special sitting to discuss the point whether Mr. Baker, the English liquidator, or Mr. Berninzoni, the syndic appointed by the Mixed Tribunals, should proceed with the liquidation of the North Egypt Land Company, Limited. This is a question of principle which affects all British companies operating in this country, and the decision of the Appeal Court, which will be made public in a week's time, is therefore of considerable importance.

Big Contracts.

The Industrial Building Company of Alexandria has obtained the contract for the building of the workshops and stores of the Suez Canal Company at Port Said, the price being 800,000 frs. It is expected that the Société du Creusot will obtain the contract for the construction of the new breakwater for the sum of £93,000.

Mariout Railway.

Since the occupation of Tripoli and Cyrenaica the Khedive's railway line from Alexandria to Mariout has assumed considerable importance from a strategical, as well as a commercial, point of view. It is now announced that the Egyptian Government is about to acquire this line, which it has the intention of extending to Solloum. The Khedive will receive in exchange the large estates of Korachieh and Santa, which are amongst the finest lands in Egypt.

The Tilche Failure.

There is little hope of an arrangement with the creditors of the firm of Tilche, who will only receive 40 per cent. of their claims.

Salt and Soda.

On Monday next 8,120 shares of the Salt and Soda Company, Limited, will be sold by public auction. It is, nevertheless, expected that this company will declare a good dividend this year.

Company Notes and Reports.

Suez Canal Company.

The annual meeting of the above company was held in Paris on Monday. Prince d'Arenberg presided, and Mr. Carnegie, the Councillor of the British Embassy, represented the British Government. The president submitted the annual report, which showed that the year's operations had been brilliantly successful. The loss entailed by the reduction of 50 centimes in the tariff being far more than made good, and justified a similar reduction to come into force on January 1 next. Thus, in three years, the tariff will have been lowered by 20 per cent. In recent years the rapidity and safety of transit have been greatly enhanced. A significant illustration was afforded by the passage of the Royal yacht conveying the King and Queen to and from India. The transits occupied only 12½ and 12 hours respectively. Referring to the contributing sources of traffic, the report states that there was a falling-off in cargoes of rice, of oleaginous grains, and still more notably of soya beans, the trade in which practically ceased owing to the plague in Manchuria. Again, business with China, from which such great things are expected in the future, was much hampered by the unsettled state of the country politically. On the other hand, there was great activity in the export trade of India, the consignments of grain reaching a figure never attained before. Trade with the Dutch Indies also developed largely, while Japan continued to extend her commercial relations with Europe. Australia and the Oceanic Isles likewise contributed to the increased traffic. Brilliant as were the results of 1911, they have been more than maintained in the opening months of the present year.

Oriental Carpet Manufacturers.

The Report for 1911 (just published) shows a net profit of £113,626, raised to £135,411 by last year's carry-over. After the deduction of £100,000, payment of dividends at 20 per cent., of £25,000 placed to reserve, and of sundry commissions, the balance in hand is 6,911.

Gaz de Beyrouth.

The general meeting of the above company, held on May 29, accepted the resignations of MM. Sabagh, Misk, and Nouridjan, and reserved the right to investigate the management of the outgoing board. A vote of confidence was passed in the new board, and it was authorised to issue, when necessary, debentures to the amount of 1,500,000 frs Negotiations are on foot for an amalgamation with the Tramways de Beyrouth. A reconstruction of the company seems imminent.

Alexandria Water.

The report of the above company for 1911 is very satisfactory, continued progress being shown. Consumers number 31,431, against 27,989 last year. Two new "Jewell" filters have been ordered, and will be completely ready for work about July. During the year pipes have been laid for a further 15,000 metres, and 1,880 old pipes replaced by new ones. Pipes have also been laid over a distance of about 6½ kilometres in connection with fire-extinguishing apparatus for commercial uses, the complete installation of which is expected to be finished towards the beginning of July. Nineteen thousand three hundred and ninety-two pounds have been spent in new construction. The total receipts amount to £131,238 (increase £6,269) and the expenses to £41,773 (increase £2,997), leaving a profit of £39,465. The directors propose in future to pay by way of interim dividend, on December 15 in each year, 4s. per share instead of the 2s. 6d. hitherto paid. The shares at 12½ cumulative dividend yield 4 15-16 per cent. per annum on the basis of dividends of 12s. per annum—that is, on the basis of the dividends paid for 1911.

Union Fonciere.

The report for the fifteen months to March 31, 1912, is just to hand. As anticipated, no dividend is to be paid. The total receipts were £E19,255 (decrease £E1,756). Interest paid amounted on balance to £E3,249 (increase £E2,378); depreciation of live stock, plant, and furniture absorbed £E1,199 (increase £E25); loss through Zervudachi failure £E5,754, and loss on land sales cancelled £E6,442. The total deductions were £E18,647, leaving a net profit of £E608, which, added to the £E1,671 brought in from 1910, makes a sum of £E2,279 to be carried forward. As regards the balance-sheet, the capital remains at £E487,500 and the statutory reserve at £E4,055. On the assets side of the balance-sheet the unsold lands, comprising 10,458 feddans, stand in at cost £E625,330 (viz., £E59.80 per feddan); live stock, plant, and furniture, £E27,415; cash and credits with Land Bank of Egypt, £E11,028. During the fifteen months to March 31, 1912, land sales were effected to the extent of 577 feddans for £E41,667 (£E72.187 per feddan), as compared with 489 feddans for £E42,922 (£E87.744 per feddan) in 1910. The lower price obtained was chiefly in consequence of the lands sold being of a somewhat different category. A further 250 feddans have been sold at similar prices, but do not figure in the accounts, as the sales have not yet been legally completed. The company, excluding these 250 feddans, has now sold up to date 2,772 feddans for £E237,220 (averaging £E85.57 per feddan).

Bank of Egypt.

Under the liquidation of the Bank of Egypt, Limited, Mr. H. Brougham (Senior Official Receiver and Liquidator) notifies that he is able to make a further payment in part redemption of the loan certificates of 2s. in the pound on their face value, representing a further 1s. in the pound on the amount of the original debt. This will make a total dividend to date of 14s. in the pound on the original debt, and a redemption of the loan certificates to the extent of 8s. in the pound. The present payment of 2s. in the pound will be made on June 10 to the holders of the loan certificates.

Egypt Delta Light Railways.

The traffic receipts of the Delta Helouan and Cairo Quarry lines of the Egyptian Delta Light Railways for the ten days ending May 20 were £E6,370, as against £E6,393 in 1911. The decrease was due to cattle plague restriction and decrease in the stone traffic of the Eastern districts. The total receipts from the commencement of the financial year (April 1)) were £E34,058, as against £33,344 in 1911, or an increase of £E714.

EGYPTIAN BOURSE REGULATIONS.

Owing to the numerous inquiries which have reached us in connection with the new Bourse regulations obtaining in Egypt, we reproduce below the essential modifications recently promulgated by Khedivial Decree.

Settlements.—Fortnightly settlements are substituted for monthly settlements of time bargains. The limit for time bargains has been extended to four fortnightly settlements. Thus the maximum is two months, which will enable arbitrage business to be continued. Settlements of differences are to be made on each intermediate settling day. In the words of the Judicial Adviser, "this obligation constitutes a salutary check on rash and hazardous speculation, and should prove a safeguard to client and broker alike."

Suspension of Transactions in "Futures."—This can now only be done by a decision of the Boards of Management of all the Stock Exchanges in general meeting, and by a two-thirds majority of the members of such boards.

Quotations for "Futures."—The original rules excluded any share of a lower denomination than 400 frs. This restriction has now been removed, and all shares of foreign companies of which the face value is not less than 25 frs. will be admitted to the Official List.

Admission to the List of Quotations—Under the previous rules the exchanges were bound to give a quotation, on application, to any company which fulfilled the condition imposed by the regulations. Boards of Management may now by a decision, for which reasons must be given, refuse such admission, subject to a right of appeal by the company concerned to the Commercial Chamber of the Mixed Tribunals, which decides the question finally, in chambers. A similar right of appeal is accordingly conferred on the Government commissaries against admissions to quotations authorised by the Board.

NEW COMPANIES.

Sinaia Trust Syndicate.

Under the above as title, a company has been registered with a capital of £260,000 in £25 shares. The object is stated to be to adopt an agreement with Edgar de Marcay, Edmond de Marcay, and Yvan de Marcay, whereby they agree to pay to the company from time to time all the net benefits in money accruing and payable to them from the profits earned in carrying on the business of the casino belonging to the Société des Grands Etablissements de Sinaia, situate at Sinaia, Roumania. The first directors are MM. Edgar de Marcay, Edmond de Marcay, Yvan de Marcay, and J. Ganshiv. Qualification, ten shares.

Bishopsgate Syndicate.

A company has been registered under the above title with a capital of £25,000 in £1 shares. The objects are stated to be: to acquire and turn to account any oil, petroleum, and mineral mining lands, mines, mining rights, options, concessions, metalliferous land or other property in Roumania or elsewhere.

SERVIAN STATE MONOPOLIES.

During the month of April last the receipts accruing to the Administration of the Servian State Monopolies were: Tobacco, 1,596,348 frs.; salt, 448,514 frs.; petroleum, 211,599 frs.; stamps, 572,509 frs.; matches, 106,560 frs.; cigarette paper, 126,614 frs.; Customs, 1,428,359 frs.—or a total of 4,716,809 frs., being an increase of 444,000 frs. over April, 1911.

DIVIDEND ANNOUNCEMENTS

Alexandria Crown Brewery.—Dividend for 1911 9 frs. per capital share (Coupon No. 13), and 4 frs. per drawn share (Coupon No. 12).

Société anonyme d'irrigation de Baliana, Alexandria.—Dividend for 1911, P.T. 27.3 per share (Coupon No. 2).

Banque française commerciale et agricole de Egypte.—Dividends for 1911:—6.50 frs. per share, the net profits for the year having been 528,675 frs.

COMPANY MEETINGS.

Imperial Ottoman Bank.—June 27, at 1 p.m., at Winchester House, Old Broad Street, E.C.

Société des Mines de Balia, Karaïdin.—Galata, June 27, at 2 p.m.

Société des Mines de Kassandra.—Galata, June 27, at 3 p.m.

Société du Chemin de fer de Moudania, Brousse.—Paris, June 29, at 3 p.m.

CAISSE HYPOTHECAIRE D'EGYPTE

(Société anonyme).

Il est porté à la connaissance de MM. les obligataires de la Caisse hypothécaire d'Egypte que les coupons d'obligations à l'échéance du 15 juin 1912 sont payables aux établissements suivants:

EN BELGIQUE:

A Bruxelles:
A la Société Générale de Belgique;
A la Banque de Bruxelles;
A Anvers:
A la Banque d'Anvers;
A la Banque de reports, de fonds publics et de dépôts;

NOTES OF THE WEEK.

The Italian army in Tripoli, after a long period of inaction, has once more assumed the offensive. On June 8 an advance was made on the Turco-Arab position at Zanzur, and a fierce engagement, extending at one time over a front of nearly eight miles, was fought from daybreak until the afternoon. The objective of the Italians was a range of hills dominating the oasis, and their force comprised fourteen battalions of infantry, with artillery, and a brigade of cavalry. Leaving his mounted men and some of the infantry in reserve on his left flank at Gargaresh, General Camerana succeeded in carrying the enemy's trenches by a series of bayonet charges, and within less than four hours his troops had begun to entrench themselves on the ground that they had won. In the meantime the Turks had received large reinforcements from the south, and made a determined attack on the Italian lines at Gargaresh. With the help of the reserves on the right wing of the Italian force this attack was successfully repulsed, and soon a general rout of the Turco-Arab forces resulted all along the line. It is estimated that 12,000 Turks and Arabs were engaged, and that their losses amounted to more than 500 killed, although the Turks themselves do not confirm this figure. The Italian losses have been returned at thirty killed and 260 wounded.

It is possible that the battle of Zanzur may prove to have been the best exploit of the Italian troops since the occupation of Tripoli. To assume the offensive, even on a small scale, after they had allowed it to be supposed that they had abandoned serious operations until the autumn, will not fail of its effect upon the native population in the occupied territory, while the decisive victory over the enemy may serve to damp some of the Arab military ardour, which has probably battened on the apparent helplessness of the Italian forces in Tripoli. Whether as a result of the engagement the Arabs will find themselves compelled to evacuate Zanzur without further opposition remains to be seen; but it may be expected that the Italians will not remain content with less than the occupation in force of that oasis. The effect in Italy itself is assured, and as soon as Zanzur has been occupied it is probable that no further complaints of inaction will be made throughout the summer. Unfortunately, we have no means of gauging the feelings of the Arab fighting forces in Tripolitania. There would appear, however, to be but little slackening of their energies, for skirmishes are being continually provoked at various points of the Italian zone. On the day of the engagement at Zanzur fighting was reported in the Mergheb territory, where a body of Arabs, numbering about 500, were dispersed by the Italian artillery after a sharp conflict.

The Press of Great Britain has shown striking unanimity in expressing misgivings over the Trans-Persian railway scheme. Even organs friendly to the Government have not hesitated to condemn the secrecy with which the preliminary negotiations are being conducted. When interrogated on the subject at the beginning of May, Sir Edward Grey said that there was no urgency at that stage, and that the matter was not "far enough advanced for us to be able to put any proposal before anybody. We do not even know it ourselves." In one sense this statement may be true; but it is clear that a project which has been discussed before representatives of the British Government and has been modified at their suggestion does not remain quite as much in the air as the Foreign Secretary would have us suppose. Between the preliminary survey of the line and the actual construction of a railway linking Russia and India there may be a very wide interval of time. The British Government, however, is surely adopting a strange attitude in lending its official support to any scheme so nebulous that it has to admit ignorance of the nature of the proposals. Unfortunately, the statement issued last week regarding the progress of the negotiations for the establishment of the Société d'Etudes prevents the nation from interpreting Sir E. Grey's words in their literal sense. Even if a good case can be made out for a Trans-Persian line from the Indian point of view, and the Indian Government is able to show that it is not only safeguarding but actually promoting Imperial interests by pushing on the scheme, there remains the point of view of Persia, to whom we stand in the position of trustee. Few people can be brought to believe at this stage that Persia's first need in the matter of railway construction is for a line that will pass through Teheran more or less direct to the Baluchistan border. The advantages to northern trade are apparent, but the commercial prospects of the southern portion of the line are difficult to indicate. On the other hand, the Indo-Russian railway, as the proposal is understood to stand at the present moment,

Digitized by Google

ignores the large trade of southern Persia that finds its way from the head of the Persian Gulf to the capital. This trade is not only a factor in Persian affairs, but represents a large portion of the sum total of British interests in the country. No one will deny that the condition of Persia will be considerably improved by the introduction of railway communication, but some discrimination should be shown for Persia's own sake in the programme of railway construction that seems likely to be forced upon her.

In contradistinction to the Trans-Persian Railway, in which Sir Edward Grey acknowledges only a distant interest, it is clear that the question of the Basra section of the Baghdad Railway is engaging the closest attention of the British Government. So far no final decision has been reached, but it is understood that the negotiations are pursuing a satisfactory course. It is the British desire that the Baghdad-Basra section should be internationalised, but Turkey has expressed a preference for restricting participation to Great Britain, France, Germany, and herself, to the exclusion of Russia. The latter Power, however, has undoubted claims to association with the other countries, both from her general interest in the Baghdad Railway as a whole and in view of the fact that she has undertaken to build a line from Teheran to Khanikin on the Turco-Persian frontier, which will connect with a branch of the Baghdad Railway from Sadijeh, near Baghdad, to Khanikin. Among the points that have to be settled between the Governments concerned are the question of the southern terminus of the line and the extent of the liability to the Baghdad Railway Company under which the new Turkish company takes over the Baghdad-Basra section. While it is hardly likely that any other terminus than Basra will ultimately be agreed to, the negotiations may well be utilised to settle outstanding differences of opinion between Turkey and Great Britain in regard to the status of Koweit. Our interests in the Persian Gulf, which compelled us to take part in any scheme for extending the railway south of Baghdad, call for an adjustment of this disputed point. If, as is hoped, Turkey finds herself in a position to place on record her recognition of the Sheikh of Koweit as an autonomous ruler under British protection and to agree to a final definition of the boundaries of his territory, there is little reason why the last section of the Baghdad Railway should not be speedily constructed under the joint auspices of the five Powers concerned, to the satisfaction and advantage of all. The railway now has a length of approximately 150 miles, and for 1911 the net receipts showed a slight improvement over those of the previous year. New sections, amounting to over sixty miles, will be opened during the year. The plans for the Mediterranean port of the Baghdad Railway at Alexandretta have been approved; construction work on the branch line has been begun, and it is expected to be finished next year.

The military situation in Persia shows marked improvement. Firman Firma is now established at Kermanshah as Governor of Kurdistan and Luristan, and is said to have received the submission of the majority of Kurdish chiefs who were recently in rebellion. The Government troops are at Kermanshah, and are to resume operations against Salar-ed-Dowleh, who has not yet withdrawn himself altogether from the scene of his late defeat. In the capital, however, where a Cabinet crisis is in progress, the political situation is less satisfactory. The Regent has chosen this moment for carrying into execution his long-expressed resolve to go to Europe, and started on June 11. He is accompanied by his family, and it is generally believed in Persia that he does not intend to return. If a reconstruction of the Cabinet becomes necessary, the absence of the Regent may add to the political embarrassment. Meanwhile, M. Mornard has been confirmed in his appointment as Treasurer-General for a period coterminous with his existing contract as Director-General of Customs. Present conditions in Persia invest him with considerable moral power and a corresponding degree of responsibility. The use to which he puts his opportunities for promoting the material welfare of the country will be watched with the closest interest.

A second Cretan problem is threatened in the Mediterranean, but it is not likely that it will cause the same degree of anxiety to European chancelleries as the fortunes of the larger island have. Certain Greeks in Alexandria who are natives of the Turkish islands captured by the Italians have formed a committee with the object of demanding autonomy for these islands as a federated republic. They are also said to be contemplating the despatch of a deputation to the Greek and Italian Governments to press their claims. The proposal, however, does not hold the field alone, for other Greeks are inclined to agitate for the union of the islands with Greece. Whatever may be the ultimate fate of the Ægean Archipelago, it is safe to say that the proposals of the Alexandrian committee and of the islanders themselves are somewhat premature. It would be thought that they would be better advised to leave the matter in abeyance until the war is nearer its conclusion and some knowledge has been obtained of the intentions of the Italian Government. The request put forward by another committee at Athens that the Powers should adopt measures for the protection of the inhabitants after the evacuation of the islands by Italy displays at least more political foresight. At present the policy to be adopted by Italy in regard to these islands can only be a subject of speculation. No offensive action, beyond a brief bombardment of Scalanova, has been taken by the Italian fleet for some weeks, but a forward movement, in which both military and naval forces will be engaged, is anticipated by the Turks. Future developments of this nature will tend to obscure still further the fate of the islands, which may find that they will receive comparatively minor attention when the whole question of the balance of power has to be regulated in the light of the new situation brought about by the Turco-Italian War.

King Ferdinand of Bulgaria and Queen Eleonora have been paying visits to the Emperor Francis Joseph and to the German Emperor. Both in Vienna and in Berlin their reception was of a most cordial character, but it would be difficult to read into the hospitality shown them more than what the occasion and international courtesy required. At the Austro-Hungarian Court the visit of Bulgaria's rulers was followed immediately by the arrival of King Nicholas of Montenegro, who met with an equally warm welcome, and afforded the same opportunity for reiteration of the pacific intentions of the Balkan States. These visits would have attracted even less attention if rumours had not been current previously of a Balkan alliance, to which a militant policy was attributed. In view of the growth of a better feeling among the States concerned it would be strange if the present situation in the Near East did not give rise to an exchange of views between the respective Governments. To what extent these conversations have been carried we have no means of knowing, but it is unlikely that the Balkan States will find encouragement in Europe at the present moment for any other than a pacific policy. The future depends largely on Turkey, who can do much by means of internal reforms to cut away the ground from under the most bellicose alliance of two or more of the Balkan States.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 8.

Situation in Albania.

The news from Albania is much more satisfactory. It is true that the Ipek district is still disturbed, but the signs of effervescence which were recently noted in the Djakova, Lyuma, and Vuchitrn districts have ceased to be visible, while the strength of the Albanian forces in the field, or rather in the mountains, does not exceed 2,000 men, not all of whom are well armed. The Reform Commission has evidently inspired many of the more reasonable Ghegs with the belief that the Turkish Government has at last made up its mind to do something for Albania, while even the suspicious Malissors of Scutari seem to have been placated by gifts of seed corn and other concessions, and South Albania is perfectly quiet.

Foreign Advisers.

The employment of foreign officials in the Ministry of the Interior is still being canvassed by the Press, and the *Stamboul* announces that the Council of Ministers will soon take an important decision on this subject. Constantinople seems to favour the idea, but the Chauvinistic Press of Salonika is engaged in baying loudly against the proposal, the *Silah*, a peculiarly ill-conditioned and ferocious sheet, even asserting that if the foreigner is allowed to "meddle" with Turkish internal administration all true patriots must again take to the hills. One wonders whether the Turkish Chauvinists of Macedonia carry the weight that they did in the palmy days of 1909-1911. It is doubtful.

The War.

The appearance of Italian warships off Gullek and Mermeris and a few skirmishes in Tripoli are the only military happenings worth recording, but it may be noted that the War Office is clearly under the impression that the Italians intend to use Rhodes as a "jumping-off place" for an attack on Smyrna, and are concentrating large forces in the neighbourhood of that town. One Nizam division and three reserve (Redif) divisions have left or are now being entrained for Smyrna, and it is believed that 50,000 men will before long be concentrated there. On the other hand, there are soldiers who believe that the rumours of an Italian attack on Smyrna are being put about in order to divert the attention of the Turks, and of neutral observers, too, from the real objective, which may be the Dardanelles and may be some town such as Mermeris or Adalia on the southern coast of Anatolia, which is ill-garrisoned and too far from the Anatolian railway and other lines to be reinforced in time to prevent its capture. It is, however, more than doubtful whether the Italians can effect more than the capture of a port or so in Asia Minor. Even granted that the comparative failure of Italian military operations in Tripoli is due to the hesitancy of the higher command and to natural difficulties rather than to any military weakness in the Italian soldier, whom Turkish officers contemptuously describe as a "terrassier" (a mere navvy), an offensive campaign in Asia Minor would require a force which would tax the capacity of any military power save Russia, and perhaps Germany, to provide. Assuming that the Italians capture Adalia or Mermeris, they will no doubt irritate the Turks and force them to spend a good deal of money for the mobilisation and transport of troops, but they will inevitably be blockaded on the coast as they are in Tripoli, and will be quite unable to strike that series of heavy blows without which success is impossible, especially against a low political organism like the Turkish Empire, which can survive amputation *ad lib.*, and, before it perishes, must be drained of its blood, not merely deprived of some of its limbs.

The Fire.

Another very destructive fire occurred on Monday, when the greater part of the quarters between the mosque of Sultan Ahmed and the sea were swept by a wind-borne conflagration and over 1,200 buildings destroyed. The financial losses caused by the disaster are unknown, but it is to be hoped that the first estimate of £T1,000,000 is exaggerated. There was no loss of life, but from 10,000 to 12,000 people, mostly Turks of the poorer class, are homeless. The Ahmedié mosque had a narrow escape, but got off with injuries to one minaret. One wonders what will become of the burnt quarter. Since the revolution there have been four great fires, the Tchirtchir fire in 1908, the Aivan-Serai and Balat fires in 1911, and now this last fire. Some 12,000 houses have been destroyed, but no effort has been made to rebuild, and the remark of the *Jeune-Turc*, that Stambul will gradually diminish and have to surrender pride of place to Pera and Galata, may be justified if this state of things continues.

The Cabinet.

Rumours of Ministerial changes continue to be disseminated, but they rest on no sure foundation, and there seems to be no reason to anticipate any change in the near future. Nail Bey's successor has not been appointed, and it looks as if his colleagues and his party will be obliged to request him to return to office. Djavid Bey, who is well pleased with the Ministry of Public Works, does not relish the prospect of being offered the portfolio of finance at a moment when the Exchequer is short of ready cash and foreign capitalists are expected to ask 8 per cent. on advances. The departure of a Reform Commission to the Asiatic provinces seems to have again been postponed, to the natural annoyance of the Armenians.

Baron Marschall von Bieberstein.

Baron Marschall von Bieberstein left on the 3rd for his estates in Baden, where he will stay for a few days before proceeding to London to take up his new appointment. He had a moving send-off from the German colony, which admired and loved him, and from his many Turkish and European friends.

THE TRIPOLI ARABS.

In connection with the appeals that are being made on behalf of the Arabs of Tripoli, Mr. G. F. Abbott, who has spent several months in that country as correspondent to various journals, writes:—"The condition of those poor people is pitiable beyond description. I have never in any part of the world seen poverty like theirs. Day after day during all the months I spent on the spot women and children might be seen going about the various Turkish camps picking up the grains of barley which the horses had dropped, or even searching in the dung, and when they had collected a handful eating it. When human beings have come to live on the droppings of beasts I think the limit of misery has been reached. The Turks are doing their very best to alleviate this misery. Food is doled out to the sufferers at each camp, but the quantity of these doles is necessarily limited by the necessities of the troops, and varies according to the arrival or non-arrival of provision-bringing caravans. In spite of all the assistance rendered locally, there still is ample room for help from outside, and I earnestly hope that such help will not be withheld in a country which is always ready to succour the distressed."

ALLIANCE

ASSURANCE COMPANY, LIMITED.

Head Office: BARTHOLOMEW LANE, LONDON, E.C.

Assets Exceed £23,000,000

Chairman: The Right Hon. LORD ROTHSCHILD, G.C.V.O.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 5.

King's Birthday Parade.

In consequence of the absence of Lord Kitchener, who arrived back in Cairo from Malta at noon to-day, the King's Birthday was not celebrated in any way at the British Agency on Monday, though, as usual, there was a parade of the troops of the Army of Occupation in Abdin Square in the morning. In so far as the principal personages were concerned, it was—if the phrase be permissible—a parade by proxy. The Khedive, who is now in Constantinople, was represented by Mohammed Pasha Said, the Prime Minister, in his capacity as Regent, the troops were under the command of Colonel Pinney, commanding the Army of Occupation in the absence on leave of Sir John Maxwell; while, although the *personnel* of the British Agency were present, the salute was addressed to the flag. There were, however, a large number of people present, and a new and interesting feature of the parade was the inclusion for the first time of the British Camel Corps, who went by at a trot.

A Cause Celebre.

The law suit between Saad Pasha Zaghlul, ex-Minister of Justice, and Ismail Pasha Abaza, which has been pending for some weeks, was heard before the Native Court of Assize last week. The hearing of this action, brought by Saad Pasha Zaghlul for defamation of character, had been eagerly looked forward to as likely to afford an occasion for the public of seeing behind the political scenes. But those who were greedy of "revelations" have been disappointed, inasmuch as the case was heard behind closed doors. As readers of the Cairo letters of The Near East will remember, the charges against Abaza Pasha, who on Saad Pasha's resignation wrote under an assumed name a series of articles in a native paper directed against the ex-Minister, were that he alleged, firstly, that Saad Pasha had been nominated by Lord Cromer with the object of working against the Khedive; secondly, that a member of the Khedivial family was requested by Saad Pasha to intercede with the Khedive on his behalf; thirdly, that the ex-Minister had been appointed in order to sow discord, and that his retirement tended to bring about harmony; fourthly, that Saad Pasha had influenced the Press in order that it might eulogise him at the expense of the truth; and lastly, that Saad Pasha had calumniated a Government official, and, being unable to prove his charges, had thereby lost the confidence of the authorities. Such a string of accusations had naturally whetted the public appetite, which was further increased when it became known that the witnesses were to include a Prince, two ex-Ministers, an Under-Secretary, the Governor of Cairo, and the Administrator of the Wakfs. But the President of the Court having declared a "*huis clos*," the public has had to content itself with gossip as to the course of the proceedings. It would not appear, however, that anything of great interest was brought to light, while all the witnesses, it is said, gave evidence in favour of the plaintiff. The charges being, therefore, unsubstantiated, judgment was given against Abaza Pasha, who was condemned to pay £E1 damages demanded by Saad Pasha and a fine of £E10 and costs. Further, the judgment is to be published in three newspapers. In so far as keeping himself before the public eye is concerned, Abaza Pasha has succeeded in his object; but the fact that none of the witnesses were apparently ready to support his accusations would seem to indicate that this and, perhaps, also personal reasons were the principal motives for bringing the action, the net result of which must be to tend to strengthen in public opinion the position of the ex-Minister of Justice. A similar action brought by Saad Pasha against the editor of a vernacular newspaper, *El Saaka*, in consequence of an alleged defamatory article, was likewise settled in favour of the plaintiff, the defendant being sentenced to two months' imprisonment. Saad Pasha has, therefore, triumphed all along the line.

Egypt and Syria.

The bonds which unite Syria and Egypt are stronger than those of mere geographical propinquity. Large numbers of Syrians enjoy the hospitality of Egypt, and, making their homes here, have built up the foundations of their fortunes in this country. While, therefore, it is natural that Syrians should be interested in Egypt, the reverse is not so obvious. The recent great fire at Damascus has, however, furnished a proof that such an interest and sympathy does exist in this country for the people of Syria. Under the presidency of Prince Omar Toussoun a committee has been formed for the collection of subscriptions and for the organisation of dramatic performances in Arabic, the proceeds of which will go to assist the sufferers by the fire. According to private advices which have been received the extent of the damage sustained by the inhabitants of Damascus must be enormous. The pecuniary loss, difficult enough to bear at any time, falls with double severity at the present juncture, when, in consequence of the war, the whole of Syria is in the throes of an economic crisis. In this connection it is of interest to note the opinion, as recorded in a local journal, of an eminent financier with regard to the development of Syria by means of land companies. With a view to investigating the possibilities of the country in this direction M. Miriel, the managing director of the Crédit Foncier Egyptien, recently made a tour throughout Syria. The fertility of the land leaves, in his opinion, nothing to be desired, and *per se* the country offers excellent opportunities for the operations of land companies. But in view of the slight guarantee afforded by the Turkish Government in respect of the acquisition and exploitation of land, M. Miriel, and the financiers whom he represents, have decided, it is stated, to postpone any schemes of this nature which they may have contemplated.

Sudan Railways.

A report, it seems, has recently reached London to the effect that a project is under consideration for the linking up of the French Congo with the Upper Nile by means of the extension of the El Obeid line. So far as can be ascertained here such a scheme is not, for the present, contemplated at all, nor, in the near future, likely to be, since railway activities in the Sudan will probably be directed for some time to come, at all events, to opening up the territory to the east of the Nile.

THE EGYPTIAN ARMY.

War Office Regulations.

A memorandum on service of British officers in the Egyptian Army has been issued from the War Office. Only officers on full pay in the British Army are eligible for appointment, and applicants are to send their requests to the Sirdar, War Office, Khartum, through their commanding officer. Unmarried officers and those who have passed for promotion to the rank of captain, and, if of more than two years' seniority as a captain, that he has passed for the rank of major, are taken. They must also have five years as a commissioned officer of the Regular Forces, and be twenty-five years of age.

Officers joining the Egyptian Army will sign a contract for two years, which is renewable as each period expires, with the consent of the Sirdar, for two years, to complete four years' total service; then for three years, to complete seven years' total service; then (in exceptional cases) for three years, to complete ten years' total service.

All officers joining the Egyptian Army are considered staff officers, available for any service in the Army, or under the Sudan Government. They join with the rank of bimbashi (major), or any higher rank that the Sirdar may appoint them to. The annual rates of pay are kaimakam (lieut.-colonel), £720; bimbashi (major), after three months' probation, £540. Officers of superior rank receive special rates of pay.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athènes le 7 juin.

L'ouverture du parlement et les deputes cretois.

Samedi dernier la Grèce a passé par une dure épreuve telle qu'elle n'en a pas vue souvent. Le gouvernement aussi bien que le peuple a eu à lutter entre le sentiment et le devoir, entre les impulsions du cœur et celles de la prudence, et il a fini par se soumettre à la dure nécessité des choses. Le triste spectacle des baïonnettes croisées par les soldats pour empêcher les députés crétois d'avancer a causé une profonde douleur. Cette mesure a été pénible surtout pour M. Vénizélos qui, comme chef du gouvernement de Grèce et comme Crétois, a dû sévir contre ses compatriotes pour accomplir consciencieusement les devoirs qu'il a assumés dans ce pays et lui épargner de nouveaux mécomptes. Et il y est parvenu en effet sans coup férir. Mais ce service signalé qu'il a rendu à la Grèce et à la paix en général a été payé par un affaiblissement de son influence, de cette influence même qui lui a permis de prendre des mesures d'une telle rigueur qu'aucun autre politicien n'aurait osé employer contre des députés crétois. Il a perdu en effet un de ses meilleurs collaborateurs, le ministre de la justice, M. Dimitracopoulo, à qui sont dues toutes les réformes judiciaires accomplies par le cabinet libéral. M. Dimitracopoulo n'a pas voulu souscrire aux mesures projetées, craignant qu'elles ne mènent à une éffusion de sang. On affirme que sa défection sera suivie, à la rentrée de la chambre, par celle de ses amis personnels, une quinzaine environ, avec lesquels il formera un nouveau parti, dit "du centre."

Les événements de cette journée mémorable se sont déroulés de la façon suivante: Quelques minutes avant l'heure fixée pour l'ouverture officielle de la chambre, les députés crétois, suivis d'une foule très nombreuse, se sont dirigés vers le parlement par la rue du Stade. Le gouvernement avait eu la précaution d'échelonner sur la dite rue quatre cordons de soldats, dont le premier était placé à une distance considérable de la chambre. Arrivés à ce premier cordon les députés crétois n'ont rencontré qu'une faible résistance et ont pu le franchir sans peine. Mais dès qu'ils eurent passé, les soldats et les gendarmes à cheval qui formaient ce cordon ont barré le passage à la foule qui les suivait. Les deux autres cordons s'étant laissé rompre sans opposer beaucoup plus de résistance, les Crétois ont pu ainsi parvenir devant l'entrée du jardin de la chambre. Mais là ils se sont trouvés en présence d'une résistance sérieuse. Une centaine de soldats croisèrent les baïonnettes en criant: "En arrière!"

Se conformant strictement aux instructions qu'ils avaient reçues la veille de la Canée, les Crétois étaient absolument sans armes. Il se sont donc bornés à protester, à pousser les soldats et chercher à redresser leurs fusils pour forcer le passage, et à un moment donné ils sont même parvenus par leur intrépidité à refouler les soldats, ce qui a amené une bousculade indescriptible.

Devant une telle insistance le commandant de place qui était à la tête des troupes est intervenu auprès de M. Vénizélos, qui a consenti à recevoir une délégation des députés. Les Crétois, ayant accepté avec satisfaction, ont choisi sur le champ quatre d'entre eux parmi lesquels le général Limbritis. M. Vénizélos, entouré des autres ministres, a reçu cette délégation et lui a déclaré, en réponse à une question analogue, que les raisons pour lesquelles il ne lui était pas possible d'admettre les députés, et par tant d'accepter l'union, continuent à être celles—là même qui n'ont pas permis d'accepter l'union à tous les autres gouvernements qui l'ont précédé au pouvoir.

La délégation a été alors reconduite par le préfet et quelques officiers jusqu'à l'endroit où attendaient les députés crétois au milieu de la rue du Stade. Le général Limbritis ayant communiqué à ces derniers la décision prise par le gouvernement d'ajourner la chambre, ces déclarations ont été accueillies par les députés avec un vif plaisir et ils se sont décidés de se retirer. Alors a eu lieu une scène émouvante. Les Crétois s'en allaient, les larmes aux yeux, aux cris de "Vive la Grèce! Vive la Crète! Vive l'union!" Le préfet, le commandant de place et les autres officiers, non moins émotionnés, leur serraient la main, tandis que du haut des balcons on applaudissait et on jettait des fleurs sur leur passage. Lorsque les Crétois eurent franchi le dernier cordon militaire ils ont été l'objet des plus chaleureuses ovations de la foule.

Un député crétois qui ne portait pas le costume national de l'île (pantalon noir très bouffant et fez noir), étant au contraire élégamment habillé, a pu se faufiler dans la salle des séances et, après avoir prêté serment avec les autres sans être aperçu, s'est mis à crier "Vive la Crète! Vive l'union! Je suis député crétois!" Mais M. Vénizélos l'a fait aussitôt sortir et consigner dans la bibliothèque pendant toute la reste de la séance.

Ainsi ce moment critique qu'on redoutait depuis deux mois a passé sans le moindre incident. Cela est dû en premier lieu aux instructions données aux députés par la commission crétoise révolutionnaire qui, tout en leur enjoignant de s'efforcer d'entrer dans la chambre, leur recommanda d'autre part de "ne pas profaner leur haute mission nationale en la souillant de sang hellène et de laisser au besoin les troupes les frapper et verser leur sang plutôt que de lever leur main contre leurs frères." Ces généreuses instructions ont été en effet scrupuleusement observées et il est juste d'en rendre hommage tant à ceux qui les ont données qu'à ceux qui les ont suivies. Mais ce qui a sauvé la situation, ce fut l'excellente et ingénieuse mesure de tenir la foule loin du parlement, car si on avait permis à la foule, électrisée par la présence des Crétois, de les suivre jusqu'à la chambre, rien n'aurait pu retenir l'explosion du sentiment patriotique, si ardent dans ce pays, et, malgré les nobles efforts des Crétois d'éviter une effusion de sang, il est certain que la lutte contre la force armée aurait pris des proportions tout autres, étant donné surtout que les adversaires de M. Vénizélos comptaient sur cette occasion pour le renverser. Il aurait suffi, en effet, qu'un député crétois fût tué dans la terrible mêlée qui s'en serait suivie pour que ce fait, exploité par l'opposition, fit perdre à M. Vénizélos sa popularité et les sympathies qu'il a dans le pays. Cette prévision est tellement exacte que certaines organes d'opposition, escomptant une telle éventualité, publiaient le matin du même jour des articles fulminants contre M. Vénizélos l'appelant d'avance "le Caïn venu en Grèce pour faire massacrer ses frères." Mais heureusement ils sont restés désappointés, M. Vénizélos ayant su encore une fois échapper à leurs pièges. Une seule chose cependant aurait pu manquer. Du moment que la foule avait été tenue à distance et qu'on n'avait àfaire qu'à une trentaine de Crétois (les autres députés n'ayant pu passer), contre lesquels les soldats avaient reçu des ordres sévères de ne pas faire usage de leurs armes, il était absolument inutile d'employer les fusils et les baïonnettes. Cinq fois plus nombreux comme ils étaient, les soldats auraient pu beaucoup plus facilement les refouler et même s'emparer à bras le corps des Crétois, s'ils avaient eu les mains libres et débarrassés de toutes ces armes dont ils ne pouvaient pas de servir. De cette façon, tout en agissant plus efficacement, on aurait évité le spectacle lamentable de voir tourner les baïonnettes contre les Crétois avec le danger qu'il se produise quelque accident par un malentendu.

Il convient cependant de ne pas perdre de vue que, bien que M. Vénizélos soit parvenu à faire respecter le prestige de l'autorité et ait empêché que l'ordre fût troublé, il n'en a pas moins cédé aux exigences des Crétois, puisqu'il a dû ajourner les travaux parlementaires. On se demande maintenant que fera-t-il si en octobre la question se trouve au même point. La chambre devra-t-elle être de nouveau prorogée et tout l'œuvre de rénovation suspendue et jusqu'à quand? Mais, en fin de compte, on peut se poser cette question: Est-ce que la Grèce est obligée, sous peine d'être laissée à la merci d'une invasion turque, de faire le gendarme des puissances et chasser par les baïonnettes, au risque de provoquer une revolution dans le pays, les représentants d'une île sœur sans pouvoir le laisser entrer un seul instant dans son parlement, dont d'ailleurs ils ne pourraient faire légalement partie? Si M. Vénizélos comme Crétois a voulu et eu le courage d'arriver à cette extrêmité afin de dissiper le plus petit doute sur sa bonne foi, il est certain que, s'il vient à être renversé, aucun autre politicien, comme je le disais plus haut, ne sera capable d'en faire autant. Dans cet ordre d'idées, si les puissances ne se soucient de régler la question crétoise pour l'amour de la Crète, qu'elles le fassent au moins dans l'intérêt de la Grèce pour lui éviter de nouveaux malheurs et lui rendre possible de poursuivre et de mener à bonne fin son relèvement.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, June 8.

Expulsion of the Italians.

We have been hoping to the very last that the expulsion of the Italians would not be carried out, but adverse counsels have prevailed, and a general exodus is now going on, as to-morrow is the last day of the term allowed, after which any Italians found remaining here will be arrested and forcibly expelled by the police, who are not noted for their gentle methods of compulsion. The belief is very general that our Vali, and even the more enlightened of the central government authorities, would have acted in a generous spirit, but the Union and Progress Committee here would listen to no appeals, and insisted upon the pound of flesh, blood and all; and as they are the actual rulers of the State they got their way. There would seem, too, to be some considerable foundation for this view from the fact that the German Ambassador has all along instructed the German Consul here that doctors are not included in the expulsion order, but the Salonika authorities maintain that the doctors must likewise go. So now we are losing several of our best, together with bank managers, merchants, tradespeople, skilled artisans, etc. It is impossible to estimate the harm that will be done in this town alone by the closing of so many business places, and the number of people that will be thrown out of work thereby.

Effect of the Measure.

The Porte has published the text of its circular note showing the excuses for this expulsion, but it is a poor production. It lays far too much stress on the Hague Convention and on the different ways in which Italy has violated the rules therein laid down, and the laws of humanity. It would be better reading could we forget, not to tax one's recollection too far, the massacres in Armenia, and of Armenians in the capital itself, Adana, together with all the brutalities committed during the last three years in Macedonia, Albania, and elsewhere. But the die being cast and the Italians leaving, it may safely be said, with the most sincere regret, that the rabid promoters of the expulsion are doing far more harm to Turkey than to Italy. While fully realising all the great provocation given, one cannot help looking upon this form of petty retaliation as an altogether mistaken policy and unworthy of a great State.

The Unrest in Albania.

Although the Minister of the Interior in his place in Parliament minimises the gravity of the situation in Albania, and reduces it to two or three unimportant "incidents" in different places, considerable fighting continues, and there is a large movement of troops in that direction. Notwithstanding the Government's expressed intention to begin at once in Albania the reforms recommended by the late Commission, and to push them on most energetically, the insurgents do not seem impressed nor to have much confidence in them. Either they look upon the reforms as insufficient, or they have no further faith in official promises; at any rate, it cannot be denied that there is again a considerable amount of unrest in the country. It is said the military commanders have strict instructions to deal with the insurgents as gently as possible, to conciliate rather than provoke, and not to attempt the crushing-out policy which has hitherto prevailed. We can only hope these instructions will be carried out, and that they will prove more successful than old methods.

Death of Greek Archbishop.

A few days ago the Greek Archbishop of this town died from heart disease, and, after being embalmed, his body was borne in great state from his residence to the Church of St. Minas, thence to the cemetery, seated in a chair, fully robed and mitred, in the attitude of blessing the people. The funeral was attended by a huge concourse of people. Archbishop Joachim Sgouros, a native of Scio, was only forty-six years of age at the time of his death, but he had seen considerable service, and was a most active politician. He is to be succeeded by the present Archbishop of Lemnos, Monseigneur Guenadios Alexiades.

ARMENIAN LETTER.

(From Our Special Correspondent.)

Constantinople, June 5.

Requiem Service.

A requiem service was held at the Armenian Church of St. Trinity, in Pera, for those who lost their lives in the "Titanic" disaster. The British Ambassador and other diplomatic representatives attended the service. Mgr. Arsharouni officiated.

Memorial for Yeprem.

Several thousand Armenians and Persians assembled on Sunday last at the Union Française to commemorate the great Yeprem Khan, chief of the Persian Police, who fell in the fight against Salar-ed-Dowleh. This memorial mass meeting was organised by the Armenian Dashakists, to which tribe Yeprem belonged. The Persian Ambassador, the Consul, and the leading Persian residents in this city were present. Zohrab Effendi, deputy for Constantinople, who presided over the meeting, in delivering his opening speech, compared Yeprem with Lafayette, both of whom fought for the liberty of another nation. A life-size portrait of Yeprem, decorated in colours and flowers and circled in a mourning frame, had been placed on the platform. Several addresses were delivered by Armenians, Persians, and Young Turks, all of whom eulogised the unfortunate hero. Some Armenian speakers had known Yeprem personally, and gave some interesting details of his life. At the close of the meeting the following message was telegraphed to the Regent of Persia: "The memorial mass meeting organised by the Armenian Dashnagtzutiun took place on June 2, in presence of 3,000 persons, several delegations, and representatives of Armenian, Turkish, and European communities, and also in presence of the Persian Ambassador and the Persian colony, heard eleven speakers, and resolved to express their deep sympathy with the work and person of Yeprem Khan, the hero of Persia's liberty. We are convinced that this historic sacrifice will give a new move to his comrades and successors to increased interest in the constitution, which will guarantee the prosperity of all elements in Persia." Signed by the President, Zohrab.

The New Patriarchate.

During the building of a new Patriarchate at Koom Kapon, work on which was started this week, the Patriarch has removed his residence and offices into temporary quarters in the vicinity.

SIR W. WILLCOCKS ON MESOPOTAMIA.

Sir William Willcocks read a paper on Monday evening before the Royal Geographical Society at Burlington House on "The Garden of Eden and Its Restoration," Earl Curzon being in the chair. After stating his belief that the Garden of Eden would eventually be found just north of Ur, at the ancient junction of the Tigris and Euphrates, he described how the shifting of river beds must have resulted in migration. He described himself as sharing the views of nearly every engineer in Upper India on the subject of navigation. In the arid regions of the earth water should be monopolised for irrigation and railways for transport. It was impossible to leave the waters of the rivers in their channels and irrigate the country with them. A discharge of 10,000 cubic ft. a second was needed in the Tigris to allow of navigation between Basra and Baghdad; but that quantity of water would irrigate 750,000 acres of cotton, worth £7,500,000. It was his firm trust that works carried out on the broad lines submitted by him to the Turkish Government, provided they were executed with the expedition and liberal supervision which were their life, would secure a firm foundation for the resuscitation and future prosperity of this once famous land. Perennial irrigation with regulating works on the two rivers would be widely different from the irrigation of the ancients in the upper parts of the delta, where tens of thousands of captives laboured at the unending task of clearing silt from the waters of Babylon, by which they sat down and wept. The proposed irrigation would bring back a return to the happier days of the early settlement in the marshes, when the waters were comparatively free from silt, and when they created gardens of Eden, of which memories had lasted so long.

Mr. King, of the Assyrian Department of the British Museum, who took part in the discussion, referred to a recent acquisition of the Museum—a tablet recording the grant of a site in Eden upon the Eden canal. The document was of the greatest interest, he said, because the site was described as bounded on the one side by the sea, that was, by the Persian Gulf. If the Babylonian and the Biblical Eden were the same place, this tablet was the only extant record derived from the Garden of Eden.

THE BRITISH COLONY AT ODESSA.

(From Our Own Correspondent.)

Odessa, June 1.

The British community in this city now numbers close upon 400 souls. It has its own Anglican church, and retains its own chaplain, who receives a yearly stipend of 300 guineas. The present incumbent is the Rev. R. Courtier-Forster, M.A. Like nearly every other British colony abroad, it would be singularly unhappy without its national adjunct of a cricket, football, and tennis association. The Odessa British Athletic Club, founded thirty years ago, deservedly enjoys an excellent reputation throughout the native sporting world of South Russia, and it is directly in emulation of its football prowess more particularly that that lively and exhilarating outdoor game has latterly been taken up with great enthusiasm by all the senior Russian gymnasia both in this city and in many of the neighbouring and populous centres. Football promises very soon to have quite as wide a vogue in this country as it has of late years acquired in France. The first cricket team has played several challenge and return matches with the Galatz club, and once with the senior club at Constantinople. The O.B.A.C. leases a spacious and enclosed suburban park, pleasantly situated, closely adjacent to the French Boulevard. The Britishers are socially closely allied with the smaller American colony, which numbers about thirty, and is rapidly increasing. The British-American club is a well-equipped establishment, with billiard-rooms, reading-room, and library, an excellently furnished buffet, lounges, etc. During the winter months a series of social gatherings are held in the club, including bridge drives, whist drives, concerts, suppers, and dances, and all reunions on colonial matters are held on the club premises. The subscription is £4 4s. per annum; there is no entrance fee; the members number about 100, British and American. The president of the British-American Club is his Britannic Majesty's Consul-General, Lieutenant C. S. Smith, R.N., and the vice-president John H. Grout, Esq., United States Consul.

British Residents' Occupations.

In business affairs the British colonists are engaged in various branches of local and foreign trade and commerce, but chiefly in shipping, agricultural machinery and appliances, and engineering work. In agricultural machinery Messrs. Kay Shuttleworth, Ransome, Sons and Head, Robey, Marshall, and a few other British firms are represented by their own agents, and have their distributing depôts here. There is scarcely any large engineering or metallurgical works in South Russia that does not employ British managers, foremen, or chief workmen. The Sunlight soap firm of Messrs. Lever, Messrs. Cammell, Laird and Co., and Messrs. Thomas Robinson and Son, of Rochdale, have within the last twelve months established their own agencies here, as have also Messrs. Russell and Macfarlane, cloth merchants, of London and Glasgow. Two years ago Messrs. John Cook and Co., agricultural machine agents, started a taxi-cab service, but it has not so far proved very successful; at present it has only thirteen taxi-cabs on the city streets. The Russians have not yet somehow taken very readily to taxi locomotion. The middle-class Slav is wont to look as closely at the copeck as the Scotsman proverbially regards the bawbee, and he objects, on economic principle, to pay thirty copecks per verst (three-quarters of a mile) for taxi-cab transport when he can charter an ordinary droschky at twenty copecks for three times the distance—that is, between any two points within the urban boundaries. The taxi-cab service is also heavily handicapped by that of the electric tramways, which is second to none on the Continent, and possibly the cheapest of them all.

Telegraphic Traffic.

Odessa forms one of the chief intermediate stations of the Indo-European Telegraph Company; but the British staff of operators is now reduced to half a score, and the Government will not allow any more English telegraphists on the Russian section of the line—that is, between Alexandrovo on the western frontier and Djulfa on the Persian frontier, so that eventually the British line through this country will be worked exclusively by Russian operators; by the terms of the company's concession the Crown has the right of imposing this prohibition. The Indo-European also work the Odessa-Constantinople cable, although the cable itself remains the property of the Eastern Telegraph Extension Company (British). Of late years the Indo has been permitted to accept for transmission, both ways, South Russian telegrams to and from the United Kingdom; this traffic averages about 500 telegrams a day. Formerly the Indo's Indian and Trans-Indian traffic was transmitted at Emden, Odessa, and Teheran; now it goes both ways direct, by Wheatstone's automatic apparatus, between London and Karachi, and vice versâ. It is really a marvellous performance. The current is carried through some twenty relays between London and the Persian Gulf, and the average attained is about sixty words per minute.

The Indo-European.

The Indo-European line is a great boon to British merchants, traders, and shipping agents in South Russia. It is also extremely convenient for the rapid transmission of telegrams from South Russia or from the Caucasus to the British Press—that is, since the Government censure of foreign telegrams was abolished. Formerly a Press message, no matter from what outlying centre of the Empire it might be despatched, was first forwarded to St. Petersburg for the imprimatur of the Censor, and that detour meant, of course, a very considerable delay in the despatch reaching its destination; as a matter of fact, the correspondent never knew whether his message had been forwarded until the next day, and that knowledge was conveyed to him by the absence of any telegraphic intimation from the Censor. Not infrequently he would be informed that so many words had been expunged, or that the entire message had been disallowed. The department refunded the cost of telegrams so treated.

For the abolition of the censure on Russian telegrams to the foreign Press British correspondents in this country have to thank the present managing director of the American Associated Press. When that gentleman was temporarily in charge of the Associated Press bureau in St. Petersburg some seven or eight years ago he obtained an audience of the Tsar, to whom he explained the mischievous effects of the foreign Press censure, and with such persuasive success that His Majesty there and then issued a peremptory order for its immediate abolition.

NOTES FROM PERSIA.

(From Our Own Correspondent.)

Meshed, May 24.

Affairs at Meshed.

Since my letter of April 4, published in your issue of April 26, the city of Meshed has returned to a condition of more or less normal quiet, not by any means because everything has been put right, but simply from force of circumstances. The people were obliged to resume their daily employments in order to gain the necessities of daily life. The masses of people in Persia are poor, and any interruption of their means of livelihood is very serious. No doubt the larger part of Persia's population is indifferent to the political condition of the country, except in so far as it affects them personally, and would be entirely satisfied with either monarchical or constitutional government if they could only be guaranteed safety of life and property and be reasonably sure of the necessities of life.

The Shah is a child; the Regent is a splendid character but a very timid man; the Treasury is worse than empty, and the country has no one who can develop its financial resources. Most men in power use their position to accumulate money for themselves. The Constitutionalists have lost their best soldier by the death of Yeprem Khan. The likelihood of Persian independence and self-development has passed away, and the sooner it is acknowledged that Russia has taken over Northern Persia the sooner the country will settle into what is to be its future normal condition.

After the Bombardment.

Some days after the bombardment the Russian soldiers were withdrawn from the mosque and shrine, and the whole property was handed back to the "Chief Keeper," who gave a receipt for the safe return of the sacred buildings, the priceless historical jewels, and other treasures; but there seems to be doubt in the minds of some as to whether all the valuables which disappeared from the mosque and shrine at the time of the bombardment have been replaced. The repairs have not yet been done, and I am told that the damage amounted to 70,000 tomans, which is about £14,000 sterling. This is rather more than it was at first supposed to be. Some of the damage done cannot be made good at any price, because the work belonged to the lost arts.

Before the bombardment there were extensive bazaars in proximity to the holy precincts, which were included in the area to which only Moslems were admitted. The entrances to these bazaars were marked by chains or timbers; but these barricades were destroyed during the bombardment and have not been replaced, and these bazaars are now open to non-Moslems, and the area to which only Mohammedans are admitted—commonly known as the Sacred Precinct or "bast"—is much smaller than before.

The Persian police force, which was dismissed by the Russians when they took over the city, has been restored with its former chief, Munshi-i-Nizam, at its head, and the whole department is under the supervision of Colonel Kharanoff, of the Russian garrison.

Rukn-ed-Dowleh, the Governor-General, who resigned when the Russians took the city, left for Teheran, and a few days ago was robbed near the western border of the province, and some of his men in attendance were killed.

Governor-General Elect.

Nayyar-ed-Dowleh, the new Governor-General elect, started from Teheran, and has arrived in Sabzevar, on the western border of the province. Twice before he has been appointed Governor-General of this province, but in neither case did he enter upon his office. For many years the lucrative Governorship of Nishapur, a flourishing city about seventy-five miles west of Meshed, has been in the family of the Nayyar-ed-Dowleh, and doubt is commonly expressed as to whether he will on this, his third appointment, personally come to Meshed and take up the duties of Governor-General. Meantime, he has placed a deputy Governor-General here.

Yussuf Khan Herati.

At the time of the bombardment it was supposed that all the leaders of the agitation who were in the mosque and shrine got out alive, and also some of their followers. This supposition has been confirmed. Talib-el-hagh and about a dozen others are in custody in the Russian garrison. Yussuf Khan Herati, the chief agitator, and Mohammed Nishapuri soon appeared in the region of Nishapur, and committed such depredations that the Russians were obliged to place a garrison of their own soldiers with a strong battery of artillery in the city of Nishapur. Mohammed Nishapuri is still murdering and plundering in the district; but Yussuf Khan Herati and some of his followers turned south and east toward the trade route to Afghanistan, and began operating in that district.

Sheer Ali Khan, who, with a force of men was sent to capture Yussuf Khan Herati, reported a few days ago that he had captured his man, and would bring him into Meshed on a certain day. A scaffold was erected in the public square, the band played, and crowds collected; but at noon report was circulated that the whereabouts of Yussuf Khan Herati were not known, and, therefore, he would not be brought into the city that day. Various rumours then became current. One was to the effect that he had been captured and would be executed, and his body brought in and displayed in the public square. It was said that if he were brought into the city alive and given a trial there would be unnecessary delay and complications. It is commonly said that he was a paid agitator, and was only a tool in all that he did. Had he been brought in alive he might have escaped, or if he had been given a trial embarrassing information might have come to light. I was told to-day that certain ecclesiastics offered 20,000 tomans (which is about £4,000) for his escape. I do not know by what authority he was captured and executed. But dead men tell no tales!

An Example for Wrong-doers.

It seems that after Sheer Ali Khan had captured Yussuf Khan Herati a counter-attempt was made to liberate him, during which Sheer Ali Khan was shot through the leg. Yesterday Yussuf Khan Herati was executed, by shooting, a few miles from Meshed, and this morning the body was brought in and suspended on the scaffold in the public square, with much music and spectacular ceremony, in the presence of a large crowd of people. Four of his followers were exhibited in chains at the foot of the scaffold, and thirteen criminals from police headquarters, arrayed in clothes of many colours, stood in a row close by. Sheer Ali Khan was present in a carriage, and several photographers were on the spot, and doubtless preserved the scene for posterity.

There is a Russian garrison at Kuchan, about a hundred miles north-west of Meshed on the military road leading to the Russian frontier. A few days ago the Russian Army Chaplain of the garrison in Meshed went to Kuchan to administer to the troops there. While returning he was attacked by robbers near Chinaran, about forty miles from here, and barely escaped with his life. I am told that the Russians sent a punitive expedition, and destroyed several villages in the neighbourhood.

The Beloochis are murdering and robbing in the district of Neh in the southern part of this province, a hundred miles west of Seistan. The Afghans, taking advantage of the weakness of the Persian Government, are raiding in the undefined boundary between Persia and Afghanistan, south of Karez. The whole province is in a state of lawlessness, and there is not one road safe and free from robbers.

THE MUSSALMAN.

An up-to-date English Weekly, conducted by a Mussalman Editor of liberal and independent views. Though all topics of special interest to the Mussalmans are discussed in its columns, social, political, and economic questions of general interest always receive due attention. It is entirely free from sectarian bias and is a true exponent of the catholic principles of Islam, but it advocates the Mohammedan cause boldly and fearlessly when such advocacy is necessary.

Annual subscription (inland), 4 Rs., (foreign), 8 shillings.

THE DISTURBANCES IN CYPRUS.

Communications from Cyprus give full details regarding the late disturbances. On Monday, May 27, took place the annual "Kataklysmos," or "Festival of Aphrodite," which carries us back to a far distant past. It is a very popular one, and is celebrated on the coasts, especially at Larnaka and Limassol, both Turks and Greeks taking part in the holiday. Crowds of people assemble on the shore, sitting in the open cafés, and amusing themselves in various ways. Villagers come down in large numbers to share in the festivities. One of the principal attractions is found in taking short sea trips in the numerous lighters, which are decked out and carry native music. It is a bright and gay scene. Vendors of various commodities carry on a brisk trade.

Origin of the Outbreak.

About 4 p.m. on that day a disturbance arose in a coffee-house in one of the Greek quarters of Limassol, between a few Turks and Greeks, who came to blows. The excitement soon spread to other quarters, the cry being raised that Turks were attacking Greeks. It speedily reached the central spaces close to the pier and Government offices, where most of the holiday-makers sit, stroll, and watch the "fun of the fair." The scene was at once changed to one of panic, and the riot assumed a serious character. The local police, an excellent force, were unable to cope with the rioters, who became so violent that the local Commandant of Police, Captain Gallagher, D.S.O., gave orders to fire upon the mob, which would probably have swept on and wrecked the Turkish quarter. The result was that one Greek was killed, and a boy of fourteen so wounded that he died the following day. Eight other persons, including a woman, were wounded. Meantime, in the riot two Christians and one Turk were killed by knives. There were numerous other casualties, about seventy to eighty persons, mostly Turks, being more or less seriously injured, by sticks, stones, and other means. The Commissioner, Major Bolton, was in the district, but returned the following afternoon.

The detachment (a company of the Devonshire Regiment) quartered at Polemidia Camp, about three miles from Limassol, was called in. The town has since been patrolled by the military, and it was deemed advisable to send a patrol to some villages in which disorder might be expected. Shops were closed, but quiet was very soon restored.

This is the first occasion on which there has been actual conflict between the two races, which have lived peaceably together, although this has often been due to Turkish forbearance. What in ordinary cases would have amounted to a petty breach of the peace became a serious riot because matters are not normal. What happened was doubtless due to the state of unrest which has been recently created by the Greek Members of Council and other leaders of opinion, to which we referred last week. The Greeks, when what they term their just demands were not at once granted, were annoyed with the Turks, who, having no cause of offence, kept their seats and worked with the Government. The attack by some Turks on schoolboys at Nikosia aggravated these feelings. The Turks, on the other hand, have been irritated by the action of the Greeks, by their provocative attitude, and by Greek sympathy with the Italian cause, and with Italian refugees who have landed in Cyprus. A state of tension has thus been caused, and a spark in such cases may lead to a conflagration.

The Garrison of the Island.

The "troops" in Cyprus consist of one detachment, generally from a regiment in Egypt. Another detachment of the Devonshires has since the riot been landed in the island. There have been, on more than one occasion, proposals to withdraw the small British force. In 1894 it was reduced from half a battalion to one company, and it was then stated that even this small force might at any moment be withdrawn. Present events show that it was wise to leave this handful of troops, and in view of recent happenings in the Mediterranean there seems some likelihood of an increase.

The conclusion to which events point seems simple enough. A new situation, a "forward movement," has no doubt been created by the Greek representatives. But while full credit may be given to them for a desire to promote Cypriot interests, it cannot be denied that they are apt to take an insular view of certain questions, which they hardly appreciate in their right proportion. To ask for what is obviously impossible is not to help the Government along the path of progress, but is sometimes tantamount to obstruction. At present, moreover, municipalities and other local bodies are refusing to take part in any Government-aided movements, such as exhibitions, shows, etc. If those responsible for the present crisis will take a more far-seeing and practical view of local problems well and good. If not, and should matters point, as they did some years ago, to deliberate obstruction, some other line would have to be taken. Meantime, it is clear that a firm hand is needed, the hand of one who, having full information at his command, will deal with the situation as required, with the assurance that he will have the support of the Colonial Office.

It is generally believed that the present High Commissioner, Sir H. Goold-Adams, is one who will be fully equal to the occasion, and that he combines firmness with a sincere desire to promote progress in the island for the benefit of all communities and classes.

CYPRUS AND EGYPT.

A Cairo correspondent writes:—

"The troubles in Cyprus and the dispatch of a small force of British troops from Egypt to assist in maintaining order came peculiarly apropos. The incident occurred at the very moment that all eyes were centred on Malta, where Mr. Asquith, Mr. Winston Churchill, and Lord Kitchener were meeting in conference on the situation in the Mediterranean. No more practical illustration of the inadequate strength of the Army of Occupation could have well been wished for. Cyprus comes under the Egyptian command, and depends for support entirely on the forces stationed at Alexandria. If the naval base is transferred from Malta to Gibraltar Cyprus could certainly be captured by a foreign and hostile Power long before help could be forthcoming from the west or from Egypt, for the latter could, under the circumstances, ill spare a battalion and artillery for the defence—and an inadequate one at that—of the island, which has up to now been garrisoned by a mere handful of redcoats. It is plainly evident that any modification of our naval position in the Mediterranean makes Egypt more than ever an important link in the military scheme, and the Cyprus troubles have undoubtedly lent force to the arguments in favour of an increase in the Army of Occupation."

A SIGN OF PROGRESS IN AFGHANISTAN.

We have culled the following quaint and interesting report from the columns of a Kabul newspaper, the *Saraj ut Akhbar*, dated 15th Rabi ut Alwal, 1330 H.:—

"There are many things which, to a casual observer, seem trivial and unimportant, but in reality are undoubted signs of civilisation and progress, for example, a "clock tower." Fortresses and high towers are chief amongst the buildings which ornament the large cities of the world, and when the latter are fitted with large clocks they are doubly decorative; besides this, the people living in the vicinity enjoy the sweet melody of the silver-toned bells, and are kept informed of the correct time of day.

"Our own famous and beloved city (Kabul) has just been decorated in this way by a beautiful and priceless clock tower, erected in front of the Dilkusha Palace, through the munificence of our progressive King. This clock tells us the hours of our prayers and devotions, the time for work and business, and the sweet melody of its bell charms our hearts and replaces the grating sounds of our old gongs by sweet music. Those who have no watches—and there are a great many—no longer feel the want of them. Only through the profound generosity and liberality of our progressive and beloved King could we enjoy all these advantages.

"Mr. Miller, who designed and erected the tower, and through whom the clock was ordered, has given us the following particulars:—Height of tower, 100 ft.; height to centre of dial, 80 ft.; diameter of dial, 8 ft. The tower measures 12 ft. square inside. The clock is of the best possible material and workmanship by Messrs. Joyce and Co., London, and cost, along with the bell, approximately Rs.9,500. The clock has four dials, fitted with opal for night illumination. The bell weighs 21 cwts., and has an exceptionally loud tone, which harmonises with the dignity of its position. In spite of the loudness of its tone, its long-drawn-out 'boom' makes it as pleasant to the ear as a note on the piano, and is the means of enabling the citizens of Kabul—rich and poor—to praise God in unison."

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, June 8.

The bulk of the Servian peasants are still without any education; more than half of the men serving as soldiers are unable to read and write. There is also at present a dearth of teachers for the Government board schools, several hundred schools in the interior of the country being entirely without teachers.

Serbo-Bulgarian Congress.

The resolutions adopted by the delegates and to be recommended to their respective Governments are: A Customs Union, a treaty for the extradition of criminals, and a treaty for the execution in Servia and Bulgaria of judgments of the courts of law rendered in either country.

A convention for uniform postage and telegraph rates already exists between the two countries.

In connection with the resolution to recommend to their respective Governments a Customs Union, it must be remembered that the realisation is impracticable in consequence of the existing commercial treaties with Austria-Hungary and other countries. In 1905 a similar proposal was under consideration between Bulgaria and Servia, and was in fact voted by the Bulgarian Parliament. But Servia refused publicly to entertain the idea, as she was on the point of negotiating a commercial treaty with Austria-Hungary. The latter country heard of the proceedings through the publicity given it by the Bulgarian Chamber, and brought so much pressure to bear on Servia that this country was compelled to renounce the project of a Customs Union with Bulgaria.

During the late discussions here, at the meetings of the Servian and Bulgarian delegates, the futility of this project was clearly demonstrated, and it was then suggested that these two countries should await the expiration, three years hence, of the commercial treaties with Austria-Hungary and then present themselves jointly to Austria-Hungary, and as one corporate body, and make a uniform treaty of commerce with that country. Many persons are, however, sceptical as to the results of the proposed proceeding.

The advantages that would accrue to Servia are much greater than they would be to Bulgaria, the geographical position of the two countries being so very different. Bulgaria, with its many river and sea ports, has nothing to fear from the antagonism of Austria-Hungary with reference to her exports and imports.

THE DARDANELLES.

(From Our Own Correspondent.)

The Dardanelles, June 4.

The men of the last ban of the Army Reserves, who were mobilised in the autumn, but disbanded at the end of January, have now again been summoned to the colours. The present levy, it is understood, is confined to this one province, and is made in view of the large military forces reported to have been despatched from Italy in this direction. It will be the cause of great hardships and loss to the peasants, for the harvest is at hand, and they who were to have reaped it were already too few before this levy further diminished their numbers. It speaks well for the prosperity the country has begun to enjoy under the new regime, that fully 20 per cent. of the men now called out have been able to escape active service by paying the exemption fee of £T30. Now that non-Mussulmans and Mussulmans alike are liable to conscription the amount thus realised will be no contemptible windfall for the war chest. That this fund is still well provided is attested by the fact that all local commissariat payments are punctually met, which was never the case, even in times of peace, under the late Sultan. Yet more significant of the financial stability now for the first time witnessed in Turkey is the great forbearance exercised in collecting the taxes. The first instalment of these, legally due nearly three months ago, has not yet been even asked for, and people are wondering how much longer it will remain unclaimed.

LETTERS TO THE EDITOR.

THE BALKAN COMMITTEE.

To the Editor of The Near East.

Sir,—May I recur to the gentle criticism which your correspondent at Salonika lately administered to the Balkan Committee?

He criticised the committee's statement that nothing less than European control of the Roumelian vilayets would satisfy public opinion in Great Britain, and the deduction that if Turkey wished to obtain British sympathy she could only do it by voluntarily establishing European officials; and he pointed out that Young Turkey was not likely to accept such advice. The Balkan Committee had not thought it necessary to explain that its hopes were not placed upon voluntary Turkish action, but upon the Turk's dependence on European goodwill. However, the event has proved that neither your correspondent nor the Balkan Committee gave due credit to the Young Turks. An effective appeal has now been made by a section of the Turkish Press for the appointment of European advisers, for the diplomatic purpose of obtaining European sympathy:—

A recent article in the *Tanin*, advocating the appointment of a foreign adviser to the Ministry of the Interior and an additional number of gendarmery officers in Macedonia, has provided a certain amount of criticism in the Press, the writers considering these proposals wounding to national pride. The *Tanin* replied, reaffirming the necessity for foreign experts. "If," it says, "we complete that which is wanting, if we imitate the Japanese in having recourse for a time to the experience of specialists, we shall reap the benefit, but if we allow ourselves to be carried away by harmful pride to undertake things which we are unable to carry out, it is we who will have to support all the consequences. The want of European specialists in all branches of the administration is just as urgent to-day as at the beginning of the constitutional era, especially in the affairs of the Roumelian provinces. We should no longer hesitate or lose time. It is our object to attract European public opinion to our side, and to convince it that we want to ensure justice in Macedonia.

Again, the *Sabah* has stated that the Government intends to nominate a European at the head of the Reform Commission for the European vilayets, and says the post will probably be given to Mr. Graves, formerly British Consul-General, and now member of the Commission of Financial Control.

If reactionary prejudice has so far subsided that statesmanlike action of this kind is actually carried out, the Young Turks may yet regain the sympathy which they have so nearly forfeited through the unwisdom of certain Chauvinist elements among them.—Yours faithfully,

Noel Buxton.

House of Commons, June 7, 1912.

ITALIANS v. TURKS.

To the Editor of The Near East.

Sir,—In your issue of the 7th inst., in referring to the efforts of the Ægean islanders to detach themselves from Turkey, you state that Italy should not encourage these "ambitions," as they may eventually prove embarrassing to the islanders hereafter. I do not think it is right to call these efforts "ambitions." They are simply the outcome of an ardent and legitimate desire for freedom from a Government which has no regard for the welfare of its Christian fellow citizens, but on the contrary nourishes the "ambition" to exterminate them. Is it denied that such is the feeling of the Turk towards his Christian fellow citizen? Some days ago a telegram appeared in the *Morning Post* reporting that in Egypt, where he then was, Enver Bey, one of the heroes of the new *régime*, stated that the Italians killed Arabs and took away Greeks, thus clearing the Turkish empire of its enemies. A more diabolical sentiment than that one should rejoice over the death of men who lay down their lives for his benefit has never been expressed. That is the sort of friend whose company the islanders have the ambition to part with.

With regard to the "ambitions" being likely to prove embarrassing to them, no one need have any anxiety. The islanders are freed for ever. The Italian Admiral has pledged his word for their deliverance, and an Italian Admiral's word of honour is a word of honour indeed. Here is what he said to the inhabitants of Rhodes in his proclamation:—"Noi, Vice-Ammiraglio Amero d'Aste Stella, nel *liberare la vostra isola della dominatione turca*," etc. And again to the inhabitants of Sinei:—"S.E. il Vice-Ammiraglio Amero d'Aste Stella . . . *nel liberare l'isola del dominio turco*," etc. The islanders therefore are rid of the Enver Beys, thank goodness, et "*chi vivrà verrà*."—I remain, etc.,

Simplex.

NEAR EAST IN PARLIAMENT.

The Baghdad Railway. JUNE 6.

In the House of Commons, Captain Faber asked whether Koweit was to be abandoned as the terminus of the Baghdad Railway, and, if so, why; and what terminus was to take its place.

Sir E. Grey: No decision as to the terminus beyond Baghdad has been arrived at, but negotiations on the subject of the Baghdad Railway are still in progress between His Majesty's Government and the Turkish Government, and until they are concluded I can make no further statement with regard to the question.

The Trans-Persian Railway. June 10.

Mr. Ginnell asked the Secretary of State for Foreign Affairs if he could state the personnel of the British and other groups of financiers who undertook the finance, construction, and equipment of the proposed Trans-Persian Railway, their terms of participation, the nature and extent of the British Government support, and the present condition of the negotiations.

Sir E. Grey: The Société d'Etudes, consisting of British, French, and Russian members, who will undertake the preliminary investigation connected with the railway, is not yet definitely constituted, but it is expected that the three groups will shortly be completed, after which a meeting will be held in Paris for the purpose of constituting it. The financing, construction, and equipment of the line will be undertaken by a company or companies to be formed later, and the control of those operations will be equally divided between the representatives of the three Powers concerned. As regards the extent to which His Majesty's Government are supporting the enterprise I have nothing to add to the reply returned to the member for the Hornsey Division of Middlesex on March 19 last.

Mr. Morrell: Can the right hon. gentleman say whether the negotiations have reached a stage when they may be conveniently discussed?

Sir E. Grey: Of course the question is one that can be discussed at any time, but with regard to the negotiations themselves and the stage at which they are there is really very little to be said because so little is definite.

June 11.

Mr. Barton asked the Foreign Secretary whether in the interests of trade he will cause full inquiry to be made and, if approved, will use his influence to secure the joining up of the proposed Trans-Persian trunk line with a branch line to the Black Sea in the North through Tabriz, and also with a branch line to the head of the Persian Gulf in the South.

Sir Edward Grey wrote in reply: The question of the alignment of possible branches of the Trans-Persian railway is occupying the careful attention of His Majesty's Government, and the commercial point of view is, of course, receiving due consideration.

June 12.

Mr. Mitchell-Thomson asked the Secretary for Foreign Affairs whether the proposals for the representation of each of the three Powers on the Société d'Etudes for the construction of the Trans-Persian line had been accepted as satisfactory in principle by His Majesty's Government; and, if so, when papers would be laid.

Mr. Acland: The answer to the first part of the question is in the affirmative. With regard to the second part, I think that no useful purpose would be served by laying papers at present, because, as stated on the 6th instant, in reply to a supplementary question asked by the hon. member for Burnley, there is so little that is definite to be said on the subject.

The Malta Conferences. June 11.

Mr. A. Burgoyne asked whether any alteration was to be made in the scheme for the reorganisation and redisposition of the Fleet as the result of recent conferences at Malta.

Mr. Churchill: I am not in a position to make any statement.

Mr. Burgoyne: When will the right hon. gentleman be in a position to make a statement?

Mr. Churchill: There are regular stages in the session when the Naval Estimates come before the House. It might perhaps be that such an occasion might be found useful for a statement in reference to the subject.

Italy and Rhodes Island. June 11.

Mr. King asked the Secretary of State for Foreign Affairs whether he was aware that the island of Rhodes was included in the Turkish possessions in Asia, and that the integrity of the Ottoman possessions in Asia was guaranteed by this country under the Cyprus Convention of 1878; and whether, in view of the recent seizure of Rhodes by Italy, this country was prepared to carry out its treaty obligations.

Sir E. Grey: The island of Rhodes has been militarily occupied, not annexed, by Italy in the course of her hostile operations against Turkey. In relation to such operations a neutral Power has, in international law, no obligation or right but that of neutrality. The Cyprus Convention of 1878 refers only to the eventuality of the occupation of further Turkish territories in Asia by Russia. It does not, therefore, apply in this present case.

June 12.

Mr. Fell asked the Secretary of State for Foreign Affairs if the Italian Government claimed to have annexed the island of Rhodes and the other islands in the Ægean Sea which had recently been occupied by Italian troops.

Mr. Acland: So far as I am aware no such claim has been made by the Italian Government.

Army of Occupation. June 12.

Sir J. D. Rees asked the Under-Secretary for War whether, in view of the normal requirements of the situation and of the difficulties the Italians were experiencing in Tripoli, the Government proposed to raise the strength of the army of occupation in Egypt to a division with a brigade of cavalry, the strength formerly foreshadowed by Lord Haldane.

Mr. Tennant (Financial Secretary to the War Office) said that no statement could be made on the matter.

THE TRANS-PERSIAN RAILWAY.

In a letter to the *Times* Mr. H. F. B. Lynch states that when sounded by one of the promoters of the scheme for a railway from Russia across Persia to India he expressed the view that the principle which should govern the construction of railways in Persia was consideration for the needs and resources of Persia. "As the railway could not be built without a guarantee of interest, and as the only revenues appropriate for such a purpose were, so far as I knew, the Customs duties which had been appropriated for the service of loans, I inquired," he adds, "to what other revenues recourse would be had. To this question I have not yet received any satisfactory answer; but it is rumoured that a guarantee by the British and Russian Governments may be forthcoming. If so, will the British guarantee be derived from Indian or from Imperial funds, and will it require the sanction of Parliament? Has the Russian Government withdrawn from the decision, announced last year, that the scheme must not involve an obligation upon the Russian Treasury? We ought to have an answer to these questions as soon as possible."

Mr. Lynch then points out that the *tracé* of the railway in its present form contemplates junction with the Russian railways either at Julfa on the Araxes or just south of Baku, and with the Indian railways at Karachi; that from the Russian frontier the line is to be taken through Teheran, Isfahan, Yezd, Kerman, Regan, and Bampur to Charbar on the Indian Ocean, and thence along the coast to Karachi, and that this *tracé* brings the line fairly close to the borders of Seistan and British Baluchistan. He continues: "From the commercial point of view it is obvious that such a railway by itself would satisfy the needs neither of Persia nor of Great Britain. Unless British trade is to be swept out of Northern and Central Persia, the trunk railway will have to be joined up with the Black Sea on the north, through Tabriz, and with the head of the Persian Gulf on the south. From the commercial point of view our approval of the scheme would seem to be impossible unless it provides for these two arms. They are no less essential to Persia than to ourselves. There is already a large trade between Northern Persia and the Black Sea, and between Central Persia, through Isfahan, and the Persian Gulf.

"The immediate needs of Persia in the matter of railways would seem to be best met by a railway connecting her capital and most productive districts with the Russian frontier on the one side and the head of the Persian Gulf on the other. This would not preclude an extension eastwards of the railway system as the resources of the country develop. It would greatly assist the Persian Government in the task which lies immediately before them of restoring order in the south. Proposals for a Persian State railway of this nature, with which I was myself in part associated, were laid before the Persian Government last year. They provided that the northern sections of the line should be financed by Russian and the southern by British capital. After protracted negotiations, with the course of which the Russian Government were kept acquainted, the contract for the southern sections was completed and only required the sanction of the Persian Parliament. Now that this Parliament has been swept away, the more ambitious and much more costly scheme for a railway across Persia seems for the moment to be in the ascendant. But its promoters will have to answer the questions which I have indicated above before we can regard it as a practical scheme, alike acceptable to Persia and in consonance with the commercial interests of our own country."

THE PRESS ON THE NEAR EAST.

Lord Curzon's Letter.

Directing attention to Lord Curzon's letter to THE NEAR EAST on the subject of the Trans-Persian Railway, a writer in *United Empire* says:—

Many people fail to realise how greatly British policy in the Near East has been modified by events in Turkey, Persia, and India. The traditional belief that direct railway communication with India would menace the security of our Eastern possessions is giving way to a feeling that India must eventually be linked by railways with the rest of the world, and that as we cannot stop the march of progress, the best thing to be done is to secure the most favourable terms possible. As Lord Curzon remarks, the construction of an Indo-European railway across Persia may have vital consequences not merely for Persia, but for British dominion in Asia. There is, however, a strong party in this country in favour of the proposal, and negotiations are already far advanced. In Russia the position is entirely different. Russian interests urgently demand an extension of the Imperial railway system into Persia, and there is little doubt that, with or without the consent of the Persian Government, trains will soon be running as far as Ispahan. It is an open secret that much of the material for construction is already available on the Persian frontier. The approval of a Trans-Persian railway came from the Russian ministry as a matter of course. Last year Colonel Yate, whose knowledge of the subject cannot be questioned, read a paper before the Central Asian Society in which the various routes were discussed, and the political and commercial aspects considered. There can be no doubt that before long much more will be heard of this important project.

The Baghdad Railway.

Last Saturday's *Times* contained a leader on Great Britain and the Baghdad Railway, which puts the position very clearly. The writer points out that the present negotiations obviously differ widely from those of 1903, and that the renunciation of exclusive German interest in the last section of the line has produced an entire difference in the situation. He believes that when the question is fully understood the public will come to the conclusion that it is preferable for us to participate on the basis now propounded; and he is of opinion that the desire that Russia should also participate is perfectly natural, and that there are many reasons why Russia's claims should receive an endorsement. As to the terminus and the Koweit question:—

Turkey has declared in favour of Basra—a choice which has our strongest support. In our belief it is absolutely essential, if this question is to be lifted out of the cloud of misconceptions which have surrounded it in England and Germany alike, that there should be a general agreement in favour of Basra as the terminus. Basra is the chief centre of trade in these regions, and the ancient and chosen port of Mesopotamia; if the railway went elsewhere, all shipping would still concentrate at its wharves; it is approached by a noble waterway, far easier to navigate than the Hoogly, and the difficulty of the bar below Fao can be readily overcome; it is capable of unlimited development; it is situated in territory unquestionably Turkish, and its choice would remove the only serious British objection to the Baghdad Railway scheme. There remains the question of Koweit, upon which differences exist between Great Britain and Turkey, which have remained far too long unsettled. Koweit is no more necessary as a terminus for the line than the muddy shores of the Khor Abdullah, which, we may say, was never seriously suggested. The choice of Basra would leave Turkey free to recognise the position of the Sheikh of Koweit as an autonomous ruler under our protection, without prejudice to such titular rights as the Sultan may claim. The boundaries of the Koweit territory might be amicably defined, the irritation of a Turkish outpost on Bubiyan Island removed, and the Sheikh freed from harassing restraint regarding his private date-groves within the Turkish boundary.

The Bombardment of the Dardanelles.

The *Quarterly Journal* of the British Chamber of Commerce of Smyrna is guilty of having broken the unwritten laws, which state that such publications should be as dry as a grocer's bin. For in the current issue the Dardanelles correspondent publishes a spirited and most interesting description of the attack by the Italian fleet, as the following extracts will show:—

"On April 18, at about 11.45 a.m., the bombardment began, and when the Governor was asked by the Consuls what was happening, he very coolly replied that 'Yesterday the telegraph wires were cut by the Italians, and to-day they are evidently attacking the Dardanelles. There is no need to be afraid, as we cannot consider this attack anything but a demonstration. Let all the inhabitants of the Dardanelles remain quiet, and our soldiers will take good care to protect them.' Of course, no heed was taken of this friendly advice, and in about an hour's time the town was almost deserted, with the exception of some grocers, butchers, bakers, and consuls. The latter went messing about in search of information, and were probably carried away by their feelings. I have since read in the papers that such and such consuls had seen all their subjects on board the salvage tugs and made themselves generally useful, when, as a matter of fact, they did not even attend to their own families. The only man who behaved exceptionally well was the French Consul, who not only remained quietly at his post, but was also backed up by his wife, who refused offers to take her on board one of the steamers in port.

"The Turks opened fire on the Italian ships, and the first shots fired went very close to the mark, some, it is said, having taken effect. Eye-witnesses have told me that the shells were flying about in all directions, but the Italians somehow could not hit the guns. Their shots in some cases went very wide of the mark, but many buried themselves in the embankments which constitute the defences. Some pieces about the size of a hand must have weighed at least two okes. The Turks, seeing the danger of exposing themselves, ordered their men behind the trenches, and every now and then fired a shot at the fleet to show that the forts were active.

"The morale of the Turks was excellent, and the cool way in which the tug carrying the contact mines allowed three mail-boats to pass through the Straits on their way to Constantinople before laying the mines is worthy of all praise. The Turkish fleet within half an hour of the commencement of hostilities was ready to do its best to protect the entrance. The little torpedo boats very bravely stationed themselves near each fort, and the larger ships were kept ready to make a raid on any ship of the Italian fleet that happened to come within range of their guns."

The Tangle in the Mediterranean.

In an article on the above topic, the *Saturday Review* of this week's issue refers to the seizure of islands in the Ægean, and opines that

"Italy has betaken herself to a further development of policy which is as astute as some of her previous proceedings. The seizure of islands is intended less to put pressure on the Sublime Porte than on the neutral Powers to induce them to force Turkey to peace.

Speaking of our own position in the Mediterranean, the same journal considers that we have to prepare for all contingencies, or the outcome may be fatal.

"One thing is certain—we can no longer count unreservedly on Italy for what she is worth as a potential ally in the Mediterranean. It has always been supposed that Austria and Italy in any struggle between ourselves and Germany would balance one another, and would hardly take part in any Mediterranean conflict on the same side. In fact, the war has strengthened the ties of the Triple Alliance. It is generally assumed that in the revision of the Alliance she will expect her allies to guarantee her position in the Mediterranean, and probably to promise her some more of the spoils of Turkey in return for her help in a European war.

Articles to Note.

"Lord Kitchener on Egypt," in the *Saturday Review* of June 8:—

"Lord Kitchener's report is not very long. It is impressive because it is no different from what Lord Cromer used to give us. Lord Cromer had the synthetic mind. He never allowed his readers to miss the wood because of the trees. Lord Kitchener's way is just the opposite. He makes us look at the trees till we are conscious of the wood only as something very large and mysterious."

"Lord Kitchener on his Work in Egypt," in the *Pall Mall Gazette* of June 11:—

"Whilst the report does not display the same literary style as characterised the reports of Lord Cromer, who had contrived to bring report writing to a fine art, it conveys by its conciseness, its directness, and its plain language, a true impression of the energy and strength of character of the man who has been called upon to shape the destinies of Egypt. One foreign Cairo journal went so far as to liken Lord Kitchener to that other great warrior administrator—Julius Cæsar—adding that if he had lived in the days of the Romans he would have used the same curt expressions—*Veni, Vidi, Vici*—to record his achievements."

"Egypt and the Soudan," in *Engineering*, June 7:—

"The latest report of His Majesty's Agent and Consul-General in Egypt will be welcomed as indicative of renewed progress. It is a confidently written document in contrast to the apologia of recent years, and must needs carry conviction with it, since it is the production of a man who is acquainted, as but few men are, with the country, and who has gained the confidence and deservedly won the admiration of all sections of the people whose interests it is his duty to befriend."

"The Baghdad Bargain," in the *Pall Mall Gazette* of June 10:—

"It is clear that the basis of the negotiations upon the Baghdad Railway has been very largely changed. Instead of a scheme of control in which the only audible voice would be Teutonic, we have an arrangement by which the three Powers of the Triple Entente will preponderate. (?) The least that can be said for this proposal is that it is far less objectionable than the old."

[The value of the Triple Entente is hypothetical, however. What is to hinder Russia from joining Turkey and Germany in a vote against Great Britain? Nothing, and consequently we do not see why the new order is less objectionable than the old.—ED. "N.E."]

NEAR EAST BOOKSHELF.

WAR?

Mr. Francis McCullagh wields a powerful pen. The subject he writes about is not a pleasant one, and the result is a picture, or series of pictures, that impress themselves on the mind of the reader with the force of an etching by Goya, one of those cruel, bitter etchings illustrative of the horrors of the Spanish War of Independence.

We should like not to believe in the massacres of October last in the sun-swept oasis between Tripoli and Sidi Messri. We would fain believe that the Italian Red Cross fulfilled its higher duties towards friend and foe alike, that Arabs approaching the Italian lines under a flag of truce were not shot down by entrenched Bersaglieri, that wounded foemen were not despatched ruthlessly or else left to lie where they fell, unattended, thirsting, and in extreme agony, that defenceless women and children were not slaughtered like cattle in a South American farm, that—but why continue, why insist on the gruesome pictures of a nightmare, and strengthen their lines so that they stand out, never-to-be-forgotten? We repeat it: we wish that all these horrors were but the imaginings of a febrile brain. But are they? Mr. McCullagh is not a Nonconformist Little Englander who holds brute strength in abhorrence and thinks that nations, like infants, should be brought up swaddled in cotton-wool. The roar of cannon and the rattle of musketry are not unknown to his ears, nor is he unacquainted with the severity of the military code as obtaining in time of war. He rode with the Cossacks through the Russo-Japanese War; he was at Lisbon when the Republic was proclaimed, and, if we remember rightly, at Constantinople when Shefket Pasha put an end to Abdul Hamid's reign. We can expect, therefore, that he was hardened to the unavoidable horrors of war, to the tragedies that, being merely personal, are drowned in the collective movement of armies. Moreover, he went to Tripoli hailing the Italians as deliverers, and in his first article to the *Westminster Gazette* he asks, "Where is the heart that would not have gone out to Italy in her new crusade?" Why, then, this sudden change after the "repressive" measures taken in October in Arab huts among smiling palms? We have it in the following paragraph:—

> After what I had seen on October 26, I decided that I could not stay with an army which went in for murder on such a large scale as the Italian Army, and accordingly I determined to send back my papers as correspondent to General Caneva. I was disgusted with the massacres, and especially with the way in which the Italian authorities had allowed the sick women and children of the Arabs to die on the ground.

But we shall not insist on the massacres, nor the causes thereof. In the words of a Turkish leader, "the war is a question of extermination, the extermination of the Arabs or the extermination of the Italians; there is not room in Tripolitania for both."

But there are numerous other features of "Italy's War for a Desert,"* that make the book interesting. There is an impartial criticism of General Caneva's tactics, and a stirring word of praise for the Turco-Arab attack of October 23 on the Italian flank. Unfortunately, the material at the author's disposal has not been arranged with methodical precision, and there is a lack of continuity in the story, which is frequently broken by annoying repetitions. The political deductions, interesting though they are from the student's point of view, are open to controversy, and the statement that the distinguishing feature of Sir Edward Grey's foreign policy is "a morbid dread of Germany" will not be freely accepted as axiomatic, or characteristic of the Liberal era.

Of a non-controversial nature are, however, many of the shrewd observations indulged in by Mr. McCullagh. He compares, for instance, the Tyrolese troops with those of Italy:—

> The excellent Tyrolese troops of Austria-Hungary would reach Venice in a couple of days after the outbreak of an Italo-Austrian war. During a walking tour in the Dolomite Alps a few years ago, I was enormously impressed by the efficiency of the Austro-Hungarian soldiers in the south-east Tyrol. But on the other side of the frontier the Italian garrisons live on those vain delusions of their prowess which have cost them much in Tripolitania.

A wave of hyperbolical Jingoism seems to be drenching Italy, and, according to the author under review, a reaction is bound to set in.

> It is only too probable that the Socialists and Terrorists, in the production of whom Italy enjoys such an ill repute, will eventually be the only gainers by this war. . . . To the gentleman with the bomb belongs the sole credit of having remained cool. . . . Nobody would deplore more than myself the triumph of the revolutionists in Italy and the overthrow of the monarchy, but it is undeniable that this Tripoli adventure tends to bring us nearer to such a consummation. The revolutionists know that, though their friends are now few, the pendulum is sure to swing their way before long. It is significant that they continually tell of Lloyd George having been once compelled to escape in a policeman's clothes from a pro-war mob, and being now the most powerful Minister in the British Cabinet. It would be more to the point, however, if they dwelt on the almost successful revolution in Russia which followed the Tsar's unfortunate Manchurian War. Indeed, the probabilities are that, for the future, every successful campaign waged by a Continental State will be invariably followed by a revolutionary upheaval in that State itself.

In conclusion, reference may be made to a touch of unconscious irony that did not escape the author's observation. General Caneva, in imitation of Napoleon in Egypt, began his proclamations with a stereotyped Mohammedan phrase, "and quoted freely from the Koran in order to show that the Arabs should obey him." In a footnote we find the following:—

> The Sheikh of the Senussi can quote Scripture, too. In a recent letter to Enver Bey he only cited one short text, but every word was a ton weight. It was this: "God will destroy the murderers."

As for the part played by the Church in the present war, Mr. McCullagh states that "the Vatican is impartial, and even opposed to the conflict, but, unfortunately, a great number of the bishops and priests, acting on their own responsibility, have warmly approved of it." Thus, in a circular letter to his clergy and people, the Bishop of Sarzana hopes that "the blessed flag may be terrible to the enemies of the Christian name." This is but one instance out of many, and it is this feature of the unjustifiable descent on Tripoli, this desire to pit Moslem against Christian—at the instigation, be it admitted, of Christians and not Moslems—that makes it even less acceptable than it might otherwise have been. Perhaps—though we dread to think of it—this crusade-like adventure on the part of a Catholic Power may partly explain the atrocities of October last?

C. R.

CURRENT COMMENTS.

This age is, indeed, lacking in a spirit of reverence. We referred not long ago in these columns to a report that an American Egyptologist was about to "trepan the Sphinx," and now we have to note that Mr. John Hassall has been poking fun at the once awe-inspiring monument. Speaking at a dinner at the Belgrave Club last Saturday, the famous poster artist declared that: "The Sphinx was only an advertisement for the adjoining temple, and it was not with any idea of keeping the thing quiet that they made it with such a huge head, for if the rock had been larger the Sphinx would have been bigger." If this sort of thing goes on the poor Sphinx will surely have to break its long silence!

***

By most people Turkey would have hardly been considered a promising field for the collection of sanitary statistics; but we learn from the *Family Doctor* that a French official of the Bureau of Mortuary Statistics of Paris recently made a brave attempt to gather such information through "an official in Constantinople, holding a similar position under the Turkish Government." The enterprising Frenchman forwarded forms containing a number of queries, which the Constantinople official duly endorsed and forwarded to certain cities named by his Parisian confrère. The results, if not of any great scientific value, were at least amusing. Thus, from Damascus, in reply to the questions: "What is the average annual rate of mortality in your city?" and "What regulations exist in regard to your water supply?" came answer typical of the East. They were: Here, in Damascus, everyone dies according to the will of Allah—some old, some young, as he appoints"; and "As long as the memory of man runneth backward, no man or woman or child hath died in Damascus from want of water."

***

It is all very well for the West to shrug a shoulder and smile the smile of conscious superiority when reading such items as the above. But after all, is the East quite so foolish in such matters as we may be tempted to think it? True, the collection of statistics sometimes—and not infrequently—leads up to some useful purpose; but sometimes it is surely a mere vexation of the spirit. What of Mr. Lloyd George's famous "Form IV?" If only the replies of the Damascus sage just referred to had been available at the time that irritating document was being circulated amongst hapless property-owners in this country, many of them might have been tempted to quote his concluding observations, which ran: "Oh then, my lamb of comfort, the apple of the eye of the West, hearken unto me and cease to question. It profiteth neither thee nor me, nor anyone else soever. It is not good that man should trouble himself about things that belong to Allah alone to know! Salaam Aleikum—peace be with thee." In view of the rapid increase in the number of "forms" of one kind and another that we are nowadays called upon to fill in, it might not be a bad idea to have these words printed on gummed slips ready for affixing to the said "forms."

***

A somewhat amusing story was told by Sir John Jackson at the discussion which followed the reading of Sir William Willcocks' paper at the Royal Geographical Society on Monday. He said that when some men on the irrigation works in which his firm was engaged were offered wheelbarrows as being more suitable for carrying earth than the sacks ordinarily used, the only reply of the workers was: "Is it likely that you people of the West, who have only come into existence comparatively lately, should know better how to handle earth than we, who have been doing it for thousands of years."

***

The release of Menshawi Bey from Tourah prison, where he has spent a good part of his life in punishment of his complicity in many brutal acts of brigandage, recalls the famous incident in which his father was concerned just ten years ago. It was a case in which the Khedive was indirectly interested. His Highness, whose estate in the Delta adjoined that of Menshawi Pasha, had been robbed of his prize bull in a most mysterious manner. Suspicion rested on certain fellaheen, who came under the Pasha's direction. They were arrested, but no direct evidence of their complicity could be obtained. The Khedive was much annoyed, and in an interview which his neighbour had with him, he did not spare the expression of his displeasure.

***

Menshawi Pasha, piqued by this, returned post haste to the district, prevailed upon the Governor to release to him the suspected fellaheen and had them taken to his estate. There he subjected them to unmerciful flogging and extracted a confession from them, which was duly recorded by the authorities. They were returned to the prison, but at the trial they recounted their experiences and declared their innocence. Medical examination proved the accuracy of their statements as to the brutal treatment they had undergone, and Lord Cromer, as soon as he was apprised of the affair, ordered that the Pasha should be tried for torture.

***

To this day, Anglo-Egyptians can remember the ferment which this case caused in native circles. Menshawi Pasha was one of the wealthiest landowners and most influential pashas in Egypt. Such a thing as trying such a man, like an ordinary felon, for ill-treatment of a fellah, came as a tremendous surprise to the natives, and every attempt was made in high quarters to get the case stopped. But Lord Cromer held his ground, and Menshawi Pasha was duly sentenced, after a sensational trial of a week, to three months' imprisonment. The carrying out of this sentence was one of the first outward and visible signs that the masses had that Great Britain does not tolerate oppression of the humblest subject even by the highest in the land. Menshawi Pasha received a terrible shock from this injury to his pride, and he emerged from prison a broken man. His character had undergone a most remarkable change, and in the short period which intervened between his release and his death he astonished everyone by his kindly acts and his extraordinarily liberal donations to all religious, educational and benevolent institutions.

***

The real significance of a locust plague is beyond the comprehension of a stay-at-home Englishman, but the following extracts from a letter written to the *Quarterly Journal* of the British Chamber of Commerce of Smyrna by a traveller last May will serve as an eye-opener:—"The journey overland from Smyrna was most agreeable (!!). After leaving Oushak, we came across the locusts about which we had heard a good deal but hesitated to believe much. There were millions and millions of them. The ground so far as the eye could reach appeared to be carpeted with them, and the smell was awful. The country happening to be uphill all the time our train could not go on, as the engine's wheels would not grip. Men had to get out and sweep the line clear while the train crept on, stopping every few minutes. In this way we lost fully two hours or more before we got into country free of the insects."

It is, forsooth, a curious paradox that the institution of a strong Government in Egypt should have coincided with a rise in the crime statistics, and especially with a recrudescence of armed bands of robbers. The incident which has occurred at Mansura was one of the most daring on record, and since two to three score men, armed to the teeth, are said to have been concerned in it, it savours very much of brigandage. Recently a somewhat similar affair took place at Massara, near Cairo, and unless the most drastic measures are taken we shall not be surprised to hear that residents in the suburbs have attracted the unpleasant attention of these bands of marauders.

***

Brigandage is no new growth in Egypt. In the first years of the Occupation it flourished to an alarming extent. The Penal Code had no terrors for the brigands; the native tribunals were impotent to stamp out this branch of crime, and it became positively unsafe to travel about in the districts. At length, the Government was forced to resort to unconstitutional means. The law courts were set aside, and in 1884 the famous "Commissions of Brigandage" were instituted. Full powers were accorded them, and they undoubtedly did their work thoroughly. It would not do, however, to enquire too closely into their methods. They obtained evidence and confessions in a typical, mediæval and Oriental manner, and there are many still domiciled in Egypt who can remember the appalling tales which were current at the time. Serious ills demand drastic remedies. By the time the Commissions were abolished the reign of terror which pervaded the country at their institution had come to an end, and acts of brigandage were exceedingly rare; so in this instance the end clearly justified the means, though we would be the last to advocate such methods for the reduction of crime in Egypt to-day.

***

Verily, some of the journalistic profession are blessed with a courage which we envy them. Undaunted by the ill-success which has attended so many ventures in Egypt's capital, another attempt has been made to supply a much-felt want, and Cairo is now possessed of an English daily paper, the *Egyptian Mail*. Whether this enterprise will meet with the success which its initiative merits remains to be seen. Of late years, British journalism has, we regret to say, not flourished particularly in Cairo.

***

The running of an English daily in Cairo is fraught with many difficulties. It should, however, be possible to surmount them, seeing that other nationalities, with far less at stake in the country, possess powerful organs, which support in a most able manner their respective interests. France, Italy, Germany, and Greece are all represented fittingly in Egypt. There is little doubt that a first-class English daily is much needed on the banks of the Nile. The enormous interests, commercial, political, and financial, which we have in the country demand it, and the existence of such a paper, run on proper lines, would be of the very greatest assistance to the Empire. We have only to look at what Germany has done to realise the truth of that statement. Both at Constantinople and Cairo there exist organs which champion the Teuton cause for all it is worth, and have been exceptionally successful in their efforts. Of course, in their case, they are substantially assisted from Berlin; but there is no gainsaying the fact that the German residents and the community in the Vaterland interested in Turkey and Egypt have accorded them whole-hearted support.

PERSONAL & SOCIAL

His Highness the Khedive, the date of whose projected visit to England was recently exclusively announced in THE NEAR EAST, will proceed to Windsor Castle on Saturday week, the day after his arrival, and will remain as guest of their Majesties the King and Queen until Monday morning. His Highness left Constantinople by the Orient express on Wednesday night on his way to England.

Princess Zubeida Hanem, second wife of the Khedive, has arrived in Europe.

King Charles of Roumania left Bucharest on Saturday evening for Jassy, to unveil the statue of the late reigning Prince Cuza, the author of the union of Moldavia and Wallachia, and the liberator from serfdom of the Roumanian peasants in 1864.

King Nicholas of Montenegro, who was received with full military honours by the Emperor and Archdukes at Vienna on the occasion of his recent visit, has arrived in Montenegro on board the Austrian warship "Gäa."

Princess Natalie, the wife of Prince Mirko, second son of the King of Montenegro, has given birth to a son.

Prince Arthur of Connaught and Prince Luis Fernando de Bourbon honoured Major-General Sir John and Lady Maxwell with their presence at dinner at 90, Eaton-square on Monday night. The dinner was followed by a dance, at which Princess Louis of Battenberg and Princess Louise of Battenberg were present.

Prince Hatzfeldt-Wildenburg, late German Diplomatic Agent and Consul-General in Cairo, has, as presaged in our columns recently, been succeeded by Dr. von Miquel, Councillor of Embassy at Constantinople.

The grand cordon of the Order of the Imtiaz, set in diamonds, and the grand cordon of the *Shefakat*, were conferred by His Majesty the Sultan of Turkey upon Baron Marschall von Bieberstein prior to his departure from Constantinople.

The German Colony in Constantinople has decided to open a subscription for the purpose of erecting a pavilion in the grounds of the German Hospital there to be named the "Marschall von Bieberstein Pavilion," in recognition of the constant solicitude displayed by the late German Ambassador and Baroness Marschall on behalf of the hospital.

In the absence of both Sir Reginald Wingate and Lewa Asser Pasha, from Khartum, Lewa Crawford Pasha will act as Governor-General of the Sudan.

Jackson Pasha, Governor of Dongola, is on his way to England on leave.

Major and Mrs. Elgood have arrived in Europe from Cairo on leave.

The Hon. Arnold Keppel has left for Teheran to take up his post as honorary attaché at the British Legation.

Lord Kitchener has just completed an inspection of the irrigation pumps at Mex, near Alexandria. His visit was in connection with the drainage scheme for the Western Delta.

Colonel Phipps, Civil Secretary, Sudan Government, is leaving Khartum on leave for Europe this week.

Sir Roper Parkington distributed the prizes on Saturday at the Business Exhibition in the Agricultural Hall.

A Belgrade message of the Agence Telegraphique Bulgare states that General Poutnik has been appointed Minister for War *vice* General Stefanovitch.

On the 3rd inst., Sir Gerard Lowther, British Ambassador at Constantinople, gave a dinner party in honour of the King's birthday. The following guests were present: Sir Adam Block, Rev. R. F. Borough, Judge Cator, Dr. Clemow, Sir Richard Crawford, Mr. Dormer, Mr. Consul General Eyres, Rev. R. Frew, Mr. P. Graves, Mr. R. Graves, Mr. Kingham, Admiral Limpus, Dr. MacClean, Mr. Marling, Dr. Lewis F. Mizzi, Mr. Mounsey, Mr. Molloy, Mr. Nias, Major Nye, Mr. Nicolson, Dr. Paterson, Sir Edwin Pears, Mr. Ryan, Mr. Consul General Shipley, Alfred Silley Bey, Mr. Skrimshire, Major Tyrrell, Mr. A. Vere, Mr. Consul Waugh, Mr. Werndel, Mr. F. E. Whittall, and Captain Wrightson.

Mr. Constance van Ackere, the new Belgian judge of the Mansourah Mixed Courts, has arrived at Alexandria from Europe.

Dr. Ira Harris, American Vice-Consul at Tripoli (Syria), is about to sail on a visit to the United States, the first he will have paid in eight years.

The death occurred in Cairo on June 5 of Miss Ella O. Kyle, who for twenty-nine years was a missionary of the American Mission in Egypt.

The Rev. M. McCreery and Dr. Lambie, of the American Mission, have left Khartum for the Sobat, where they will take steps to start mission work among the Nuers.

Mr. M. A. Canney, M.A. (Oxford), who in 1910 was appointed lecturer in Semitic Languages and Literatures in Manchester University to assist Professor Hope Hogg, has now been appointed Professor of Semitic Languages and Literatures.

Scander Pasha Fahmy, member of the Superior Board of the Egyptian State Railways and Telegraphs, will leave Egypt about the middle of July for Europe, where he intends spending the summer.

Captain H. G. Lyons, who has been appointed Assistant Director of the Science Museum, has, since his retirement from the Royal Engineers, done much useful work in Egypt as Director General of the Geological and Survey Departments. Last year, it will be remembered, he was the recipient of the Victoria Research Medal of the R.G.S.

Major E. V. Turner, Director of Posts and Telegraphs, Sudan Government, who, as recently announced in our columns, will not return to the Sudan on the expiration of his leave, is now on his way to England. Prior to his departure from Khartum Major Turner was entertained at an "At Home" given by his fellow officers of the Royal Engineers. He joined the Sudan service in 1904, twelve years after he had obtained his commission, and now takes up an important post in the Irish command.

At the funeral of Lady Sykes, which took place at Sledmere Hall last Friday, Mr. Mark Sykes, M.P., and Mrs. Sykes were the principal mourners. Sir Tatton Sykes, who was not well enough to travel to Sledmere, attended the Requiem High Mass held at Farm Street Church, at which Lord Cromer was also present.

Captain D. A. Fairbairn, 2nd Battalion Duke of Wellington's West Riding Regiment, and Captain Claud G. Jeffery, who for two years was adjutant of the 2nd Yorkshire Regiment, Blackdown, have been seconded for service with the Egyptian Army.

Captain W. O. Gibbs, 10th Hussars, has been selected for employment with the Egyptian Army.

Mr. J. McDowall Russell, secretary of the British Chamber of Commerce in Smyrna, has arrived in London, and is attending the Congress of British Chambers of Commerce.

Mr. H. F. B. Lynch will give a lecture to the members of the Persia Society on "The Importance of Persia," this afternoon at five o'clock.

The *Gazette* announces that Lieutenant Claude C. Marshall, The King's Own Royal Lancashire Regt. is seconded for service with the Egyptian Army, to date April 12.

Mr. Windham, whose death from acute tuberculosis occurred in Cairo on the 5th inst., was formerly in the service of the Delta Light Railway at Damanhour. He has recently, however, held a temporary position in the Irrigation Department. He was a son of Major Windham, of the Isle of Wight; his brother is in the Sudan Government Railways.

A marriage is arranged, and will shortly take place, between Lambert Bond, of Gorten House, County Tyrone, and Vancouver, Barrister, Middle Temple, and Maud, youngest daughter of the late Keith Edward Abbott, H.B.M.'s Consul-General, Persia, and Mrs. Keith Abbott, and granddaughter of the late Sir S. Osborne Gibbes, Bart.

The marriage of Horace Edward Wilkie Young, his Majesty's Vice-Consul at Cavalla, with Margaret, daughter of Mr. and Mrs. F. A. Anson, of Piraki, New Zealand, will take place at St. James's Church, Sussex Gardens, Hyde Park, on Thursday, the 27th inst.

The six probationers passed for the Civil Service of Egypt and the Sudan have been placed by their examiners in the following order:—Class I.—L. F. Nalder (C.C.C., Oxford), W. S. Roberts (Gonville and Caius, Cambridge). Class II.—Ll. A. Hugh Jones (St. John's, Oxford), N. Field (B.N.C., Oxford), W. P. D. Clarke (King's, Cambridge), T. McNeill (Trinity, Cambridge). The examiners were Professor E. G. Browne, Professor D. S. Margoliouth, Mr. M. A. Gad al-Maula, and Mr. A. A. Khayru'd Din.

DOMESTIC ANNOUNCEMENTS.

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

HOPKINS.—On the 6th inst., at 69, Royal Parade, Eastbourne, the wife of James F. G. Hopkins, El Ma'adi, Cairo, of a son.

PULLEY.—On the 5th inst., at Damascus, the wife of Capt. Harry C. Pulley, XII. Pioneers, "The Kelat-i-Ghilzai" Regiment, of a son.

STANTON.—On June 7, at Glenmore House, Wraysbury, Bucks, the wife of Major E. A. Stanton, of a son.

WALSH.—On the 10th inst., at Broad Oak, Groombridge, Sussex, the wife of Frank Peregrine Walsh, P.W.D., Cairo, of a daughter.

DEATH

HEPBURN.—On the 6th inst., at Wau, in the Sudan, Jonathan King Hepburn, of the Sudan Forest Service, son of the late James Smith Hepburn, aged 26.

RAILWAYS IN THE BALKAN PENINSULA.

At a time when negotiations for an extension of the Baghdad Railway are bringing railway connection between the Sea of Marmora and the Persian Gulf within measurable distance, when a scheme is even on foot for an unbroken line from Calais to Calcutta, it must seem an anomaly that a country on the continent of Europe that marches so near to the beaten track as Greece should still remain unconnected by rail with the outer world. Many years have passed since the first railway in Greece was built, and although the country does not lend itself to extended railway construction, its aspirations from the earliest moment have been set on through communication with the Europe that lies beyond the Danube. Turkey, however, bars the way, and relations between Constantinople and Athens, even when correct, have hardly ever been cordial enough to produce mutual concessions for the good of the two countries. Under the Hamidian régime all attempts on the part of the Greek Government to secure a favourable hearing from the Porte for its railway schemes failed. So long as the Greek railway system had not been carried across Thessaly, there may have been some excuse for the Turkish Government's refusal to regard the question as one of urgency. Railway construction in Greece itself in connection with the northern system had encountered sufficient difficulties to cause through communication with Europe to be regarded as a remote possibility. The Greek Government, on the other hand, was anxious, before it undertook railway construction in Thessaly, to be sure of the alignment that would commend itself to Turkey as the route of the trunk system. When the northern railways of Greece had reached Larissa, efforts were again made to induce the Porte to agree to a scheme for linking up the Turkish railways with the Greek line, but without avail. Accordingly the Greeks, in order to eliminate the excuse which had previously served the Ottoman Government, that it would be time to think of through communication when the Greek system was complete, decided to carry the line to the frontier to the point that was obviously the most suitable for a junction with the Turkish system.

With the advent to power of the Hilmi Cabinet the Porte changed its policy towards the question of railway construction in Macedonia. A short line connecting Gida, on the railway from Salonika to Monastir, with the Greek system at Platamona was sanctioned, and Greece at last found herself, as she thought, within sight of the attainment of her cherished desire. But before the proposal to effect a junction between the two systems could assume a concrete form the Young Turks had taken alarm, or had altered their mind regarding the advisability of railway communication with Greece. Under the guise of a comprehensive programme of railway construction, which was to include junctions with both the Bulgarian and Greek systems, the decision to build a line from Gida to Platamona was rescinded, and in its place the Council of Ministers in July, 1911, gave its sanction to a line from Verria (Karaferia) through Elassona to Tirnova and Larissa. This line, for which the Greek Government was asked to give a kilometric guarantee, had nothing to commend it except its military advantage to Turkey. It was to be a hundred miles in length, instead of the sixty miles of the Gida-Platamona Railway, and was to cost 65,000,000 frs. instead of 12,000,000 frs. While the latter line would encounter no natural difficulties, the Elassona route would pass through an arid, mountainous district, and its construction would entail the piercing of numerous tunnels. Traffic, it was also pointed out, would be liable to interruption from snow in winter, and the route to Salonika from Athens would be considerably lengthened. It was impossible for the Greek Government to approve of the Porte's alternative scheme, and from that moment the question has remained in abeyance. From the attitude of the Turks in other matters it has to be inferred that the Elassona route was submitted merely as a device to block an uncongenial proposal. It is true that the Gida-Platamona line must pass for a large portion of its total length along the coast, and would be directly under the guns of any fleet cruising in the Gulf of Salonika. The Turks, who must be expected to regard the proposed railway connection from the point of view of their own interests rather than those of Greece, may not unnaturally argue that a line so placed is deprived of nearly all its strategic value, and may feel tempted to insist upon a route for the portion of the line in Ottoman territory safely out of the reach of naval guns. To what extent these objections can be met without sacrificing the principle of the Platamona-Gida route we have no means of knowing, but if the whole question were made the subject of a round-table conference with the goodwill of both parties, there can be little doubt that a satisfactory solution of the difficulty could be found.

The prospects of Athens being linked up with Europe by a through line of railway depends upon Greek diplomacy. Relations between the Turkish and Greek Governments have once more been placed on a friendly footing, and the Porte has been duly impressed by the scrupulously correct attitude of M. Venizelos in his handling of the Cretan problem. The return of the Greek Minister to his post at Constantinople should find the circumstances favourable for a reopening of the railway negotiations. A month ago it was announced that a Turkish Commission was visiting Sofia for the purpose of discussing the proposed junction of the Bulgarian and Macedonian railway systems. The step was held to indicate a more reasonable attitude on the part of the Porte—whether under pressure or not was a matter for speculation—in regard to a question on all fours with the Greco-Turkish railway junction. As with their southern neighbours, so with the Bulgarians, the Turks had succeeded in thwarting all efforts for the construction of a line from Kumanovo to Kustendil, a town on the Turco-Bulgarian frontier and a terminus of the Bulgarian railway system. In this case it may be harder to sympathise with any Turkish military scruples, if they exist, and it may be conjectured that political considerations alone have determined the Porte's hostility to the proposed line. If a railway from Kumanovo to Kustendil represented the first attempt to link the Bulgarian and Turkish systems, the hesitation of the Porte could be understood. The actual degree of danger that its construction might be held to entail upon Turkish defences could hardly weigh against the ease which the line could be defended or destroyed in the event of the outbreak of war between the two countries. Such considerations, however, are hardly in keeping with the position that the new régime claims to have won for Young Turkey in Europe. A policy based on suspicion and mistrust was to be expected from the Government of Abdul Hamid, but it accords ill with the protestations of the Young Turks. The failure to meet Greek and Bulgarian railway schemes at least with an open mind and readiness to discuss alternative proposals gives the critics of the new régime in Constantinople ground for the contention that little real change in the Porte's administrative policy has followed the constitutional revolution. They can urge that, with the exception of the passing phase of enlightenment shown by the Hilmi Cabinet, the Young Turks have displayed in respect to this question of railway enterprise no improvement on the attitude of the Hamidian administration. A genuine attempt to meet the reasonable aspirations of Greece would seem at once a more sensible and dignified course for the Turkish Government to adopt, and the friends of Turkey will hope to see such an attempt made when the railway negotiations are reopened.

THE NUERS AND THE ANUAKS.

ON THE AKOBO RIVER.

(By Our Cairo Correspondent.)

The recent expedition against the Anuak tribe, who dwell astride the River Akobo, partly in Abyssinia, partly in the Anglo-Egyptian Sudan, has furnished some valuable information concerning the little-known tribe of the Nuers and the hitherto wholly unknown country south of the Akobo. Concerning the Anuaks themselves not a great deal of information was obtained, inasmuch as their villages had been deserted at the approach of the expedition. From what was seen of them during the fight at Odongo, in the course of which the two British officers, Captain Kinnahar and Captain Lichterberg, lost their lives, they appeared to be very similar in appearance to the Nuers. That is to say, they are fine, well-built, every man of dark-brown colour, and stark naked. They were armed with either shield and spear or with rifles, but it was noticed that none carried both rifle and spear. The rifles, as had been suspected for some time past by the Sudanese Government, had obviously been got from Abyssinia. They were mostly of the Gras pattern, and were probably rifles that had been discarded by the Abyssinian Army on rearmament. Another indication of trans-frontier traffic was furnished by the number of empty French absinthe bottles which were found lying about the deserted villages. To put a stop to the suspected importation of arms from Abyssinia was, in fact, one of the objects of the expedition, the main purpose of which, however, was to punish the Anuaks for their perpetual raids upon the Nuers, a tribe which is entitled to British protection.

The Nuer Country.

Roughly speaking, the Nuer country may be described as the region on either side of the River Sobat upstream from a point about fifty miles above Taufikia, and extending southwards to the Bahr el Zeraf. It is an absolutely flat country without vestige of hill or of rock. The inhabitants, who live in villages made of circular huts of the usual African type, with mud walls and conical grass roofs, are practically savages. As has been said, they are a fine race, destitute of any clothing, though occasionally the women wear a few beads. By nature of a dark-brown colour, they generally appear quite white in consequence of their habit—as a protection against flies and other insects—of rolling every morning in wood ash, a pit for which is dug before every house. On great occasions they mix the wood ash with cow dung, and then smear themselves with this paste. The result is that they then have the appearance of being painted with white enamel, while the general effect is heightened by their hair being dyed red and dressed sticking straight out behind, where it is kept in place with mud. After their morning roll in wood ash, the men, who are absolutely lazy, do nothing the whole day long. The little patch of *durra* (millet) and sometimes of tobacco that there is round the village is cultivated by the women; while the care of the cattle, of which there are considerable numbers of good breed, is left to the boys. They put much faith in witchcraft, and there are, accordingly, many medicine men among them. At the same time, they believe in the existence of a Supreme Being, who created the world, and in an after-life. They never pray, they are polygamous, the maximum number of wives being six, and they bury their dead beneath their dwellings.

A Game Hunter's Paradise.

At the junction of the Akobo and Pibor Rivers a small post has been established for some time. Having reached this by marching along the Sobat, Major Leveson's column set out on March 4 across quite unknown country for Odongo, which lies some sixty miles to the south-east. This district used to be Nuer country, but, with the acquisition of rifles, the Anuaks became too strong for the Nuers, who, having suffered perpetual depredations of women and cattle at their hands, retreated northwards. At present, therefore, the country, which is covered with high grass and occasional patches of forest, is almost uninhabited. During the rainy season, which lasts from May to October, the black cotton soil becomes a quagmire, and during the dry season it is scored by gaping cracks. Cultivation on an extensive scale would, therefore, seem to be out of the question, though there were indications that cotton grows wild. Enormous quantities of game were seen, including giraffe, zebra, buffalo, roan antelope, white-eared cob, water buck, and wart-hog. This region is absolutely flat and stoneless, and possesses a somewhat mysterious river, the Oboth, which disappears abruptly into the ground.

The Punitive Expedition.

The march across this region was facilitated to some extent by the presence with the column of an Anuak girl of considerable intelligence, who acted as guide, though, the Anuak and Nuer languages being quite distinct, communication had to be carried on by means of two interpreters, one to translate from Arabic into Nuer and another from Nuer into Anuak, since no one was found who could speak both Arabic and Anuak. In the fight at Odongo, near the River Oboth, the Anuaks made a stubborn resistance, and proved themselves to be good fighters. The punitive force numbered about 350, with seven British officers; while it was estimated that there were 600 of the enemy armed with rifles and first-class ammunition and an unknown number of spearmen. The latter, according to custom, kept in the rear, the usual tactics being to wait until the enemy is thrown into confusion by the rifle fire, when the spearmen dash out and complete the rout. The heavy casualties among the Sudanese troops are explained by the fact that the mounted infantry, which formed the advance guard, when attempting to turn the Anuak flank, found itself surrounded by the enemy in high grass. Before the fight was over, however, the Anuaks were so severely punished that they fled in panic through their villages, and it is hoped that they have received a lesson which will not require repetition. The next step is to get into administrative touch with the people, and to this end a comparatively large force will probably be sent into their country next winter, whose work, as it is hoped, will be of a peaceful nature.

HAVE YOU SEEN THE WONDERFUL MACHINE THAT WRITES, ADDS AND SUBTRACTS?

This is the latest Remington Typewriter equipped with Wahl Adding and Subtracting Mechanism. Let us tell you of the many wonderful things it does. No charge, and no obligation to purchase.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

Latest advices from Constantinople, reaching me at the moment of going to press, announce definitely that the Ottoman Cabinet has decided not to renew its engagement with the Ottoman Tobacco Régie. Discarding, therefore, this solution of the monopoly question, one of two remains to be selected, as I pointed out last week—namely, the banderole system or the working of the monopoly by the Debt Commission.

***

I have every reason to believe that the Anglo-Turkish conversations in connection with the Baghdad Railway extension to the Gulf are progressing favourably. Turkey is doing all in her power to accede to British wishes, and Great Britain, on the other hand, to take into account certain susceptibilities of Turkish public opinion. The outlook, therefore, is optimistic, as, once the Baghdad and Gulf difficulties have been overcome, no important Anglo-Turkish differences remain to be settled. The road will then be clear for the growth of a healthy rapprochement between both countries.

***

In the words of my informant, "Turkey is, and has been since the beginning of the present régime, anxious to improve her friendship with Great Britain. The war has opened her eyes to certain friendships, and has helped to clear the atmosphere at Constantinople." The Baghdad negotiations are the direct outcome of the new order. Economically also, Turkey to-day is eager that Great Britain should share very considerably in the opening up and exploitation of her resources.

***

A welcome to the delegates of the British Chambers of Commerce, sitting in conclave at the Guildhall to discuss matters of trade interest to Great Britain and the Empire!

***

Of course, the weightiest problems to be discussed affect trade and trade organisation between the members of the Empire. Apart from these, however, are other questions affecting the Empire's trade with foreign countries—with Turkey, for instance, or Persia, etc. There is scope here for serious discussion, and, though the agenda containing the proposals to be put before the delegates is limited in this respect, there is one motion, as I pointed out last week, that covers a considerable amount of the ground alluded to, namely, that dealing with our Consular service. Up to the moment of going to press this motion had not been put to the assembly, so that I shall withhold comment until next week's issue of THE NEAR EAST.

***

The event of the month in the Balkans is, or has been, the Serbo-Bulgarian commercial congress at Belgrade, to which we referred in last week's issue. Our Belgrade correspondent points out that the proposal for a common tariff between both countries is impracticable on the ground of existing treaties. The *Vetcherna Posta* of Sofia goes much further, and states that even a Serbo-Bulgarian entente is impossible, owing to "Servia's economic dependence on Austria."

***

That this economic dependence did exist prior to the Bosnia *coup* not even the most patriotic Serb would deny. But since then, and owing to Austria's aggressiveness on that memorable occasion, Servia has freed herself from what proved to be a burdensome tutelage. An economic war was, it will be remembered, declared between Austria and Servia, with the astonishing result that the latter country, forced to find new markets, did so with such marked success that her trade returns progressed with surprising rapidity. The surprise was Austria's and the economic freedom Servia's.

***

As regards the present commercial Serbo-Bulgarian Congress, it will, even though unsuccessful in its recommendations, doubtless influence trade relations as existing between both countries. On the other hand, it may have another, and a more far-reaching effect, political rather than commercial; but even so, as long as it is defensive and not offensive (and therefore a guarantee of peace) it should be welcomed by our trade, which has everything to lose and little or nothing to gain, if war breaks out in the Balkans.

***

Concluding an article on Lord Kitchener's report, the Cairo correspondent of the *Pall Mall Gazette* hopes "that the feeling of confidence which has come over all and sundry in this country (Egypt) will also spread to financial circles in Europe, and that as a result Egypt will receive the aid and support of which she is in such great need, and without which her steady march along the road of progress and development cannot continue."

***

The reported closure of the Dardanelles caused no uneasiness either at Lloyd's or in the Baltic. As a matter of fact, no credit was attached to the rumour. A contemporary suggests that an official denial will be issued by the authorities, and, though this does not appear to have been done, it can be taken for granted that the report was a *canard*, as otherwise the Press correspondents in Constantinople and the Ottoman Embassy in London would have informed the public. I may add that if official denials were to be issued on every occasion where inaccurate news is published concerning Constantinople, we should have almost as many denials as reports.

***

Reuter's Cairo correspondent telegraphed in the course of last week that "the authorities in Upper and Lower Egypt are working well against the cotton worm, but there will be a fairly severe attack later on."

***

In the first place, the above wire says nothing. But the inference is that this year's attack will be exceptional, as otherwise it would not have been the object of a cabled message. But will it be exceptional? Judging from the reports which have reached me, I have no reason to believe so, and must therefore protest against the pessimistic impression created. It is to similar, otherwise unimportant, items of news, innocently reproduced by the London Press, that much of Egypt's recent run of bad luck is due. For the public is an adept in transforming molehills. The frequency, moreover, of these *nouvelles tendancie ses*, coming from many sources, makes one almost wish that the Egyptian Government would start a news agency of its own.

***

While on the subject of cables and wires, I should like to point out a peculiar phase in connection with the present war, and that is that the London Press reproduces invariably the Italian account of engagements, whilst generally passing over the Turkish account in silence. There are one or two exceptions, it is true, but they form an unappreciable minority. Now, I will not pretend that the Ottoman account is accurate and the Italian inaccurate—for aught I know both may be inaccurate or both accurate—but I do contend that both ought to be published—in the interests of fair play.

***

A reminder to exporters of agricultural implements:—Arable and pasture lands in the Aivali district are being turned incessantly into vineyards and olive plantations, and the introduction of agricultural machinery is *slowly but steadily increasing*.

***

And yet another contemplative reflection—from the *Quarterly Journal* of the British Chamber of Commerce of Smyrna (the best publication of its kind that has come to my notice):—Aivali, an important business centre, is, since the Mitylene Bank failed, without a bank! Surely there is an opening here for a banking establishment—for a branch office, I take it, of the Imperial Ottoman Bank. After all, the transitory effects of the war will soon pass away.

***

The ice problem in Khartum continues to vex both the public and the ice factory. The price was until recently 10 millièmes the kilo, but owing to the campaign in favour of a reduction it was reduced by 2 millièmes—an almost imperceptible reduction—and it is now claimed that it should be brought down to 5 millièmes. In this connection it is asserted that the reluctant Khartum factory is likely soon to have a rival in the field, "one of the largest houses" in Khartum being about to conclude an arrangement with a big firm in London for the erection of an ice and soda factory. On the other hand, the *Mercantile Guardian* observes that if the householder is annoyed at current prices he can "free himself from ice companies by buying his own ice-making machines." This is plausible, and ought to be an incentive to British exporters to work the Sudanese market. As a matter of fact (as I have already pointed out) the whole Near Eastern market ought to offer an excellent field for manufacturers of ice-making machines.

***

Mr. E. Whithall has, in partnership with Messrs. Yanni Sinodino and Stélio Déspéri, obtained from the Ottoman Government the concession of a term of

Digitized by Google

ninety-nine years of two mines. Both are situate in the Sandjak of Kir-Chehir, in the vilayet of Angora—the one at Keskine containing copper and silver ore, the other at Halkali argentiferous lead.

***

"British firms engaged in electrical work in Constantinople are not numerous," writes our Constantinople financial correspondent. "In view of the great advantages that German firms enjoy, and are likely to enjoy to a much greater extent in the future when electricity comes into general use, it is imperative that English firms should combine and be prepared to make sacrifices if necessary, in order to maintain a footing in this city if they do not wish to see themselves driven out of this field altogether."

***

A renaissance in the artistic sense is generally, if not always, coincident with a trade renaissance. Taking this as an axiom, the only too evident sign of a Southern Slav or Jougo-Slav art renaissance implies a corresponding commercial and industrial activity to be welcomed in the Balkans. From this point of view, the annual Southern Slav Art Exhibition—the fourth is being held with pomp and public enthusiasm at Belgrade this year—will be greeted as a favourable symptom of a general awakening of the Slav peoples and, consequently, of an increased trade between Great Britain and the Near East—that is, supposing we do something on our own initiative to "push" our goods in those quarters.

***

Malta is, and rightly too, very much to the front just now, though perhaps our interest in the island is almost exclusively political. But, apart from this aspect, there is an economic one, and in this connection THE NEAR EAST published a few weeks ago a summary of the findings of the Royal Commission appointed to investigate the situation. One of the suggestions made by the Commission is deserving of more than a cursory mention—namely, that referring to Malta as a winter pleasure resort. "The climate in winter is as sunny as, and more equable than, that of either the Riviera or Algiers." Both Malta and Gozo offer attractions not to be found elsewhere, and "Valletta is the cleanest and, in situation and architecture, one of the most beautiful of the cities of the Mediterranean."

***

Unfortunately, Valletta does not possess a large first-class hotel. The Commission ascertained, however, "that the Government are willing to surrender on advantageous terms a site in a central, beautiful, and commanding position." Such an hotel would certainly add to "the convenience and attraction of Malta as a place for winter residence," but would it bring the tourist to Malta, and would it pay? It takes years and money to build up the fame of a health or pleasure resort, and years and money to advertise it; and who is going to pay for advertising Malta?

***

French enterprise in Servia is progressing rapidly, and at the present time a French company is surveying three important railway lines in the south and south-west. The most important of these (Kraguyevats to Rachka) connects the heart of Servia with the Sandjak of Novi-Bazar and is of strategic value; the second, from Kruchevats to Toularé, is a section of the Danube-Adriatic line; and the third, from Loznitsa to Valero, will penetrate rich agricultural and mining regions.

***

"If the war continues," writes Mr. Flecker, the Acting Vice-Consul at Beyrout, "the benefit to British trade, owing to the absence of Italian competition, should be considerable. Owing to the large stock of Italian goods already in Beyrout before the war and the small demand owing to bad trade, the advantage has as yet been slight."

***

The *Financier* states that "Germany looks rather askance, from the commercial point of view, at the Italian operations in Tripoli, some decrees connected with which appear to interfere with the policy of the 'open door.' . . . . There is a strong disposition in Germany to insist on equal terms in Tripoli." Referring to the time when the war will be over and commercial business will have begun, our contemporary says that "there will no doubt be the usual struggle for commercial equality under the capitulations." What "capitulations"? Surely they will vanish with the Turk, and Italian law will rule in Tripoli. In this respect Italy has a decided advantage in Tripoli over Great Britain in Egypt. But then, she boldly "annexed" the one, whereas we merely "occupied" the other—and hung on to the capitulations.

***

I read that there is an opening for motor-cars in Palestine. Several German cars have already been ordered for traffic purposes up and down the towns of the Holy Land. In spite of the bad roads, a great sphere of activity lies before any quick vehicle of transit. Moreover, road improvement in Syria is, I understand, on the programme of the competent authorities.

***

There is an opening, I am informed, for high-class boots and shoes in Roumania, Galatz being the centre of the trade. Prices for the better-class article vary from 15 frs. to 25 frs. for men's wear and from 10 frs. to 20 frs. for women's. A traveller on the spot is advisable, and a credit of from four to six months is generally allowed.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, June 8.

Fire Insurance.

This city has been the scene of yet another disastrous conflagration in the Stambul quarter. The number of buildings which were burnt are given officially as over a thousand, covering an area of 130,000 square metres. The insurance losses are expected to reach over £50,000, and about half this sum will be borne by British companies. During the same week there was a large fire in Pera, the losses amounting to between £7,000 and £8,000, and still another in Tatavla, in which a further £2,000 was lost.

Silkworm Culture.

During the first half of May the outlook for silkworm culture in Turkey was decidedly unfavourable, as owing to the severe cold the mulberry leaves were considerably damaged in certain districts, particularly in Ada-Bazar, Gheivé, Biledjik, and Kuplu. The Broussa region was less affected, but nevertheless many worms had to be sacrificed owing to the scarcity of leaves on which to feed them. Fresh eggs were, however, put under incubation, and in the interval, with favourable weather intervening, new leaves have grown, and the present outlook is less disquieting.

It is estimated that there will still be a shortage in the output of 10 to 15 per cent. in the Ismidt, Ada-Bazar, and Gheivé districts, 25 to 30 per cent. in the Biledjik, Kuplu districts, and 30 to 40 per cent. in the Adrianople district. It is hoped that Broussa will give a normal crop; the latest information from Adrianople and neighbourhood, however, is to the effect that the damage is more serious than anticipated, and Souffli announces a shortage of at least 50 per cent.

Municipal Works.

The prefect of the city, who presided at the semestrial meeting of the General Municipal Council held on June 6, after referring to the works already accomplished and to those in hand, mentioned as shortly to be studied the preparation of the plan of the city, the municipal lottery, the establishment of toilet conveniences, and advertisement kiosks. The tenders for the building of the abattoirs, he said, were being studied by the Ministry of Public Works, and would be submitted to the council in the course of a few days.

Re-inforced Concrete.

This method of building coming daily more into use in this city, M. Auric, the chief of the technical service of the Prefecture, has just prepared regulations on the subject, which have been communicated to the various municipal circles of the capital. Architects undertaking this system of construction will be required to exhibit their qualifications in the shape of certificates of capacity in this branch of building.

Religious Emblems.

An official notice prohibits the entry into the Empire of any article bearing a religious inscription or emblem which might offend the susceptibilities of Mohammedans. Manufacturers would do well to take careful note of this resuscitation of an old regulation, and to consult an authority before marking goods for this market with emblems or inscriptions of a national or religious character (even when the latter is other than Moslem), which often have the reverse effect of that intended, and which goods they now stand the chance of having refused entry.

Government Adjudications.

Tenders are invited for the electric lighting of the Superior Military School of Pancaldi and the Idadié Military School. Those interested are invited to present themselves at the administration of the school on any day between July 4 and 7 to obtain particulars of the adjudication and the *cahier des charges* of the work to be undertaken.

The supply of 2,758 ingots of pure zinc (spelter) is put up to public adjudication by the Ministry of Marine. For details, apply to the Section de l'Intendance du 4me cercle du Ministère de la Marine.

Aeroplanes for the Army.

Following on the order recently placed for two aeroplanes to be built in England, it is now stated that H.E. Marshal Ghazi Ahmed Moukhtar Pasha, the President of the Senate, together with his son, Moukhtar Pasha, ex-Minister of Marine, have decided to purchase three aeroplanes, which they will present to the Ministry of War. It is also stated that another member of the Upper Chamber will propose that the Senators abandon one-half of their salaries during a year for the benefit of the new arm. While I have not had this news confirmed, I repeat it as showing that attention is now being turned in this direction, and in view of what has been accomplished by public subscription by the Navy League in the purchase of two battleships, four torpedo craft, and several transports, it would be well if British aeroplane makers kept the possibilities of this market before them. As bearing upon this subject it is announced that two Turkish Army officers who were in Paris studying aviation have just successfully passed the examination of the Aero Club.

Ottoman Railway Returns.

Railways in the Turkish Empire are doing well in spite of the war. The Ottoman Railway (Smyrna to Aidin) has an aggregate traffic increase of £20,846 since January 1st. The Anatolian Railways Company (German) states in its report just issued that last year was the most successful in its history, and is issuing 60 million francs of 4½ per cent. bonds for extensions. The affiliated Baghdad Railway pays 5 per cent. dividend and calls up the remaining 50 per cent. on its share capital for the purposes of the Alexandretta branch, and the Haidar Pasha Port Company pays 7 per cent. Again, a company—announces the *Financier*—has just been formed in Brussels under the name of "L'Asie Ottomane," with a capital of £160,000, to exploit lead, copper, and zinc mines in Asia Minor.

COTTON IN CARAMANIA.

Progress in Cultivation.

(From Our Own Correspondent.)

Beyrout, June 3.

A curious and apparently inexplicable fact is the rapid progress made by the Caramanian provinces in agriculture along modern lines as compared with the continuance of Syria in the old routine of primitive methods. Nevertheless, the general level of education and wealth in Syria may be considered above that of Caramania, the conditions of relative security are practically the same, while, as regards carriage and railroad communication, Syria is still more favoured. So that the only conceivable explanation is that either the Syrians are by heredity more of a commercial than an agricultural people—true descendants of their Phœnician forebears—or that they possess in a more accentuated form the Oriental conservatism of routine, the fear of complicated machinery, or the Semitic aversion to undertakings involving a comparatively large outlay with no immediate prospect of return. Possibly all these and other causes are responsible for this curious phenomenon. The plains of Homs and Hama, of the Bekaa and the Hauran, not to speak of Palestine and the fertile valley of the Jordan, are still being cultivated by the primitive plough, and the use of modern agricultural machinery, such as threshers, mowers, etc., save in certain Jewish colonies, is very restricted indeed.

But Caramania is far ahead of Syria in this respect, and imports quite a number of agricultural implements and machines. It should interest Britishers, moreover, to know that British firms, as represented by John Fowler and Ruston Proctor, are the foremost importers of such machinery.

Cultivation in Adana.

The efforts of agriculturists in the province of Adana have been concentrated on cotton cultivation, and, thanks to the initiative they have exercised in the introduction of agricultural machinery of a perfected type, and its use on a vast scale, the cotton area is now estimated at about 4,000 square kilometres. The Egyptian varieties are not cultivated, owing no doubt to climatic conditions, but within the last five years an American variety of New Orleans has been tried with a certain measure of success. It is estimated that about 3,000 bales of this variety will be produced this year. As regards the total crop, it is estimated for 1911 at 120,000 bales of 200 kilogrammes, having almost doubled since 1910. After Ottoman ports, Italy and Austria come in for the larger share of exports of cotton. The bulk, however, of the cotton shipped to Austrian ports is destined for reforwarding to German industrial centres in the south, the cheaper sea freight and regular weekly sailings to Trieste giving advantage to the latter over the North German ports. It would be interesting to know where the cotton that used to be shipped to Italy has gone since the outbreak of the war—in all likelihood to Germany. Some attempts have lately been made at finding an outlet in the English markets by trial shipments of Caramanian cotton to Liverpool, and hopes are entertained of a considerable development of this trade with England. The Imperial Ottoman Bank seems to be taking some interest in this matter.

Cotton cultivation has become so important in Adana that the well-known firm of C. Whittall and Co. has erected a mill for the making of cotton-seed cake, of which the out-turn is about 20 tons per day. So far, all the cake, about 3,500 tons, has been shipped to England.

ANCHOR LINE.
PASSENGER SERVICE:
Liverpool to Gibraltar, Egypt, and Bombay. Returning via Marseilles to Liverpool
LARGE STEAMERS. DECK CABINS FITTED WITH ELECTRIC FANS.
ANCHOR-BROCKLEBANK LINE. Liverpool to Egypt and Calcutta.

Openings for Business.

TRADE WITH ADRIANOPLE.

The *Board of Trade Journal* publishes extracts from the report of the British Consul at Adrianople, Major L. L. K. Samson, on the trade of that district in 1911, which will shortly be issued. We reproduce the following extracts :—

British Progress.

The considerable advance made by British trade during the last five years in the Adrianople district was well maintained last year. The total imports from the United Kingdom are now only 7½ per cent. less than those of Germany. The imports of both countries are, however, considerably less than those of Bulgaria and Austria-Hungary, both of which are naturally favoured by their geographical position. Trade in certain British products has shown a distinct improvement. In "Kushaks" (woollen waistbands), imports of which were at one time entirely German, the trade has passed into British hands, and there is no longer any demand for the German article. In cotton yarns also, the imports of which were formerly equally divided between the United Kingdom and Italy, there is a considerable gain to the former country, due no doubt in part to the Italo-Turkish war.

Prospects.

Although the increase in British trade is satisfactory, it is undoubtedly capable of further extension. British goods have a great reputation in the district, and their superiority to all others is recognised, but British firms and their agents in Constantinople have not yet fully grasped the possibilities of the Adrianople district as a market. There must have been a considerable influx of money into the vilayet during the last four months of the year, and in consequence its purchasing power must be materially larger than at any time for the past six years.

Those who now make an effort to establish a connection with the district will assuredly reap the fruits of their labours. Everything, however, depends on the agents employed to work up business.

Extension of Business.

This cannot be obtained by merely employing as agent a man who remains in Constantinople or even in Adrianople; it is imperative that he should travel frequently throughout the district and be in personal touch with customers. He should also be allowed considerable latitude in the matter of giving credit. To deal for cash only is practically not to deal at all so far as the Adrianople vilayet is concerned. The following British goods are amongst those the sale of which might with advantage be pushed in the district, since there is an increasing demand for them :—Threshing machines, knitting machines, typewriters, boots and shoes, cutlery and hardware, paints and varnishes.

The imports of bar iron are at present divided equally between Belgium and Germany, the latter country having improved its position considerably during the past two years.

In consequence of the increased consumption of coal for heating purposes, there is now a larger demand than in former years for stoves burning coal. Those chiefly in use are of cast iron, and will burn coal, coke or anthracite, according to the manufacturer's statements. These stoves vary in price from 3s. to 7s. 6d. f.o.b. Antwerp, the weight of the first being 19 lbs., and of the second 56 lbs.

War Office Contracts.

A smaller proportion of War Office contracts was obtained by British firms than in the previous year, the value of British-filled contracts totalling £18,965, as against £55,500 in 1910. This decrease is accounted for partly by the fact that no orders were placed for sacks, waistbands or canvas. The authorities are anxious to deal with the best possible firms, but local men are apt to send samples of the material to be adjudicated upon to the manufacturers of different countries, with a view to obtaining a slightly inferior article, on which they are prepared to accept a reduction of price should it be adjudged not up to sample. Endeavours are being made by the authorities to have as many articles as possible made in Turkey. Tenders for 20,000 knapsacks were called for with the proviso that the leather and workmanship should be local. It is stated that a contract for 100,000 of these was placed in Constantinople during September, 1911, a proportion of which are destined for the troops stationed in the Adrianople vilayet. The main material used is canvas, which was purchased from England; this was made up by a firm at Budapest, who furnished the leather fittings required.

CANDLES IN TURKEY.

According to the report of a foreign Consul at Smyrna, the Ottoman Empire imports from 1,700,000 to 1,850,000 kilos. of candles of foreign production, a quantity representing an approximate value of 2,100,000 frs. The countries participating in this trade are the Netherlands and France, which supply Turkey, about equally, with 55 per cent. of the total importation; then comes Belgium, which furnishes 17 to 18 per cent. of the whole import, and the rest of the trade is divided between Austria-Hungary, Germany, England, Italy, Greece, Roumania, etc.

The principal ports for the importation of candles into Turkey in Asia are Beyrout, Smyrna, Trébizonde, Alexandretta, Baghdad, and Djeddah.

The article which is mostly in demand at Smyrna is the white candle, small sizes selling the best. A moderate quantity of fancy candles are imported. Large candles for carriages mainly come from Austria. Candles of superior quality, the consumption of which is, however, somewhat limited, are principally of French manufacture, their prices varying from 127 to 130 frs. per 100 kilos. Candles of average quality are used much more extensively, the sale prices ranging from 100 to 108 frs. per 100 kilos. Candles of ordinary quality fetch about 92 frs. per 100 kilos., and are for the most part received from Holland.

SPRAYERS IN GREECE.

According to Mr. Cooke, the U.S. Consul in Patras, a large number of sprayers are used in Greece for spraying grape and currant vines. Those mostly in use are either imported from France or Italy. The sprayer used is a metal affair holding about three gallons of water, carried on the back of the operator. The operator works a lever as he walks about the vines driving the spray by air pressure through a small hose and nozzle upon the vines. The spray is a 2 per cent. solution of sulphate copper. For other crops, including citrus fruits and olives, no spraying seems to be done here. There appears to be no law in Greece by which foreign patents can be protected against imitation.

COTTON THREAD IN AUSTRIA.

According to the *Oesterreichisch-ungarische-Konsular-Korrespondenz*, Vienna, there is at present a brisk demand for cotton thread, especially for the numbers 6s. 3d. and 8s. 3d., in packets of 20 reels, or in packets of 60 grammes, containing 5 reels of 12 grammes.

This article is sold at the rate of 2.65 frs. to 2.75 frs. per kilo, c.i.f. Salonika, with a discount of 3 per cent. for cash. Dark colours are most in request (three-fourths are black, the balance dark blue, dark green, dark red, etc.).

CERTIFICATES OF ORIGIN.

It is important that all goods sent to Turkey should be accompanied by a certificate of origin, no matter how small or large the shipment may be. Great trouble and inconvenience is caused to the buyers when this necessary document is not forthcoming, and attention should be paid to the fact that it is not sufficient merely to have the signature of a Chamber of Commerce or Justice of the Peace. No certificate of origin is accepted by the Custom House officials (says the *Quarterly Journal* of the British Chamber of Commerce of Smyrna) unless the seal of the Chamber or public official signing it is also impressed on the certificate. Shippers should note this point, as it is a very important one.

TENDERS INVITED.

EGYPT.

Supply of Enamelled Plates for Numbering of Quays.—Tenders invited by Port of Alexandria, for the supply of numbering plates for the quays. Conditions of tender and specification, copy of which can be obtained from the Secretariat Department, against payment of 100 milliemes. Tenders should be made on a 30 milliemes stamped paper and accompanied by a provisional deposit, and sent in double sealed envelopes, the outer bearing the address of the Director-General, Administration of Ports and Lighthouses, Arsenal, Alexandria, and the inner marked : "Tender for the supply of enamelled plates for the quays of the Port of Alexandria." Date, July 1.

Supply of Petroleum.—Tenders invited by the Under-Secretary of State, Ministry of Interior, Cairo, for the supply of petroleum for lighting police markages and outposts for one year commencing on July 1, 1912, and ending on June 30, 1913. A copy of the conditions can be obtained on application at the Personnel and Equipment Department (Nizam and Shafir Office), Ministry of Interior, Cairo. Tenders must be submitted on the printed form provided for the purpose, with a covering letter on stamped paper of 30 milliemes, and should be addressed to the Under-Secretary of State, Ministry of Interior, Cairo, enclosed in sealed envelopes, marked, "Tender for the supply of petroleum." Date, June 25.

Supply of Ship's Boiler.—Tenders invited (in sealed envelopes) by Director, Coast Guard Stores, Arsenal, Alexandria, for the supply of a multitubular cylindrical boiler for H.H. cruiser "Sarea" at Port Said. Contract conditions and specification can be seen or may be had from the office of the Director of Stores, Arsenal, Alexandria, the office of the Guard Coast District at Port Said, or the office of A. M. Gordon, Esq., M.I.N.A., Baltic Chambers, Wellington Street, Glasgow. Tenders to be submitted on stamped paper, addressed to the Director, Coast Guard Stores, Arsenal, Alexandria, and marked on the envelope, "Tenders for the supply of 'Sarea's' boiler." To be accompanied by a provisional deposit as indicated in the conditions of tender. The Administration has the right to accept the whole of a part of a tender, but does not bind itself to accept the lowest or any tender. Date, August 1.

TURKEY.

Supply of Copper Plates, Tubes, and Bars.—Tenders invited by the Hedjaz Railway Administration, Constantinople, for the supply of copper plates, tubes, and bars. Estimated value, £17,500. Deposit, 10 per cent. Date, June 24-29.

Particulars of further Turkish Government adjudications will be found in our Constantinople Business Letter on page 185.

ROUMANIA.

Bridge Construction.—Tenders invited at Ministry of Public Works, Bucharest, for the construction of a bridge on the Argesh. Estimated value, 182,000 frs. Date, June 24.

Port Construction.—Tenders invited at the Direction of Ports and River Communications, Bucharest, for the prolongation of the lower platform of the Port of Calafat. Estimated value, 190,000 frs. Date, July 13.

Supply of Pig-lead and Tin.—Tenders invited by the Roumanian State Railways Administration, Bucharest, for the supply of 10,000 kg. pig-lead and 10,000 kg. tin (ingots). Date, June 18.

SERVIA.

Supply of Envelopes.—Tenders invited by the Direction of the Servian State Printing Works, Belgrade, for the supply of 2,640,000 letter envelopes. Date, July 1.

GREECE.

Army Equipment.—Sealed tenders invited by the Ministère de la Guerre (Section du Matériel, Athens) for the supply of 700,000 metres of cotton cloth for shirts and drawers. Cahier des charges (in Greek and French) may be seen at the Statistical and Information Department of the London Chamber of Commerce, where also may be obtained the name of a responsible agent in Athens, local representation being in all cases necessary. Date, June 25.

Engineering Notes.

RAILWAY ACTIVITY IN ASIATIC TURKEY.

(From Our Own Correspondent.)
Beyrout, May 31.

Medina-Mecca Extension.

The war seems now to stimulate, after having damped, the efforts of the Ottoman Government to construct railway lines. The Medina-Mecca extension, which had been almost begun and then interrupted, is to be immediately continued. The surplus material which has been lying at Caiffa—the sea transport having been negotiated before the war—has been sent inland by the Hedjaz Railway, and two battalions of soldiers are said to have been despatched thither for the preliminary works. Once this extension is made into the Yemen the periodical insurrectionary risings in Arabia may be dealt with more effectively. The growing audacity of the Mahdi of Assir must have been a primary factor in determining such prompt action on the part of a Government distracted by a slow and wearing war.

The same activity is displayed in the improvement of the existing line. An order of about 15,000 tons of sleepers is already offered for tender, and will probably be secured by German firms. These sleepers are destined to replace the wooden ones on the line between Maan and Medina. Recent arivals also include one hundred wagons and ten locomotives. Apprehending the possibility of seizure by the Italians, the Hedjaz Railway Company had the locomotive parts sent on to Damascus, and mounted there. A further order of one hundred wagons and thirty vans has been closed, and as this rolling stock is chiefly destined for the pilgrim traffic, delivery is to be effected not later than the month of October next. The ten locomotives have been supplied by German firms, while six first-class carriages have to be supplied by a Franco-Belgian concern.

Caiffa-Acre Junction.

Railway activity is also being displayed by the Government in Palestine. The laying of rails on the Caiffa-Acre junction commenced a few weeks ago, and this small line is expected to be in working order in the autumn. The works will involve the construction of two metallic bridges to span the rivers Mukattah (Sisson) and Naaman. The line crosses the village of Beled El Sheikh, where the Government intends building a barracks, and Shefa Amr. The building of the Acre station is in progress. The length of the Caiffa-Acre junction is estimated at about 18 kilometres.

Afoule-Jerusalem Branch.

The Hedjaz Railway Company was reported lately to have decided on the building of a branch line from Aloule, on the Caiffa-Damascus line, to Jerusalem. I learn now that the preliminary works have already been undertaken. This branch line will, it is estimated, be about 87 kilometres in length, and will cross Jeneen and Jebel Nablous (Samaria). Most of the material necessary is already at Caiffa. According to orders from Constantinople it is to be finished, at least as far as Jeneen, before the end of the financial year, viz., March, 1913. As the new budget has not yet been voted, orders have been passed to draw the requisite amount from the old budget of the Hedjaz Railway so as to insure the realisation of the scheme by the required date.

Caiffa Harbour.

The new scheme may be taken as an earnest of the final materialisation of the much-talked-of harbour scheme for Caiffa. Mr. Guillot, of the Société des Batignolles, has just arrived at Caiffa, with the band of engineers sent by the Schneider consortium for survey work. Meantime, the discharging and loading facilities at that port are very inadequate, and steamers are liable to serious detention. It is said that the Hedjaz railway contemplates the extension of the present jetty by about 180 metres in order to enable steamers to come alongside the furthest end of the jetty and to load and discharge. The realisation of the Caiffa harbour scheme will, in all probability, damage the chances of the Jaffa harbour scheme which has been announced lately as practically an accomplished fact. As it is, the traffic of Jaffa itself and of its hinterland, including Jerusalem, can hardly be considered sufficient to warrant the construction of a harbour which, given the topographical nature of Jaffa, cannot fail to be expensive. But once Caiffa is linked to Jerusalem by a branch line of the Hedjaz railway, the Jaffa trade is likely to be seriously reduced.

The extension to Mecca is destined to produce a radical change in the pilgrim traffic. Some of the present sea routes will be almost totally superseded, and Beyrout more than Caiffa is destined to become the chief centre of the pilgrim movement. As the majority of pilgrims visit Damascus the final embarkation at Beyrout is preferred for various reasons: first, the trip is shorter than to Caiffa; secondly, the embarkation at Beyrout is more convenient, owing to the existence of a sheltered harbour; thirdly, steamship sailings from Beyrout are more frequent, and, in any case, can be more easily arranged; fourthly, the Khan accommodation at Beyrout is better, and, lastly, there is the superior attraction of a larger town and the convenience of shopping and buying supplies.

Electric Locomotives for Canal Traction.

It is proposed to use electric locomotives for hauling ships through the Panama Canal, and it is stated in the *Railway Gazette* that forty such locomotives are to be ordered by the Canal Company. No special type is specified. Each maker is to be asked to supply a locomotive of the class he considers best, and after experimenting with these, the type to be finally adopted will be decided on. By this method of towing practically all wash and consequent damage to the canal banks is done away with.

The Cross Oil Engine.

The Cross system of oil engine construction consists in compressing the air alone on the compression stroke, a portion of this air being forced into a pocket on the side of the cylinder and the remainder compressed at the top of the cylinder in the usual manner. The fuel is sprayed by a pump into this latter portion at the end of the stroke, the heat of compression serving to ignite it. As the piston travels downwards it uncovers the pocket and allows the imprisoned air to escape and complete the combustion, which is thus made very complete. The engine is arranged to burn crude oil or paraffin, and its consumption is said to be about half-a-pint per hour per brake horse-power. It is made in various sizes by the Westinghouse Brake Co., Limited, of York Road, King's Cross, London, and runs at a speed of 650 revolutions per minute, so that dynamos, pumps, fans, and other fast running machines can be directly coupled to it. All bearings and working parts are made of ample size, and the engine is of a type that can confidently be recommended for export purposes, and for use where skilled labour is scarce or not available.

Pneumatic Motor Street-Sweeper.

A new use for motor vehicles is now being developed in the motor street cleaner. This consists of a motor and chassis, on which is mounted a 4-cylinder petrol engine of 60 horse-power, arranged to drive a set of coarse brushes, which loosen any dirt that may be adhering to the surface of the street. These brushes work under a hood of canvas with metal edges, which drag along the surface. The air from the under side of this hood is exhausted by means of a fan, and carries all dust and loose particles of dirt with it to a centrifugal separator, where the dirt is left in a chamber provided for the purpose, the current of air passing out at the centre. There are no scrapers to break up the surface of the road, and the machine is specially suitable for use where the roads are tarred or otherwise treated for the prevention of dust. According to the *Times*, the machine will clean from 1,500,000 to 1,800,000 sq. ft. of road surface per hour, and the cost of operation is far less than that of horse-drawn machines, and at the same time no damage is caused to the surface of the roads.

Oil Topics.

LONDON, June 13.

Premier Oil and Pipeline.

The Premier Oil and Pipeline meeting has been one of the events of the week in the oil world. The great Galician combine has been talked about for months past in the City, and, therefore, the speech of Mr. Boxall was eagerly awaited. On the whole, it satisfied everybody. There is no doubt that the strong feature of the business is the participation of the Deutsche Erdol Gesellschaft in the scheme. This company does an enormous business in Germany, Austria, and Roumania. It controls about 22 refineries, and its active aid in the deal will be of great consequence. It would seem to an outsider that the Premier Oil and Pipeline would require more working capital, but Mr. Boxall stated that he thought that the working capital would come out at £350,000, instead of £250,000. If he is right, then the combine will have ample funds. It will, no doubt, be able to obtain financial assistance in Berlin, for the Erdol is strongly backed. The figures work out very well, and, as we have before pointed out, the estimated profits are £562,333, which, after paying the preference dividend, and 12 per cent. on the ordinary shares, would leave a surplus of over £200,000. It has been decided to place each year to reserve a minimum of 10 per cent., and a maximum of 20 per cent. of the net profits. The company will own nearly all the pipelines in Galicia, immense storage reservoirs, and most of the important refineries. It will also have a big output of oil from its present properties, and the working capital will probably be sufficient to further develop those properties. In the Perehinsko district, the company already owns about 3,000 acres, and has prior right of selection over a further big area. The first two wells that were put down got oil at shallow depth. The Perehinsko oil has a higher percentage of benzine than the Boryslaw oil, and is consequently more valuable. It will be very interesting to note whether this district possesses further horizons of oil. But we are glad to hear that boring is cheap. It would be not much use possessing a large number of refineries unless the combine could send some big shipments of its own oil to be refined. But it looks, however, as though it will be able to do this. The whole scheme seems to have been carefully prepared, and if the working capital proves sufficient—and on this point Mr. Boxall appears to be quite confident—then Premier Oil and Pipeline will become one of the most important oil companies in the world.

Anglo-Hungarian Capital Increase.

The Anglo-Hungarian Petroleum Company held its meeting this week and agreed to increase its capital to £150,000 in order to comply with the terms of its arrangement with the British and Foreign General Securities and Investment Trust, which, as we mentioned last week, proposes to register a new company with a capital of £350,000, of which £150,000 is guaranteed for working capital. This is extremely good business for the Anglo-Hungarian Petroleum Company, who appear to have some excellent land, but have no working capital with which to develop it. Now they will be shareholders in a strong concern with ample funds. Some of the shareholders appeared to think that the trust was making too much out of the deal, but it must not be forgotten that they came in at a critical moment, and that they obtained important concessions from the Hungarian Government. In addition to this, they are finding £150,000 for the new company. Oil is a speculation at the best of times, and the trust, although it is well paid, does not appear to have been overpaid. There was some discussion at the meeting as to whether the Anglo-Hungarian should go into liquidation or not. But in the end this matter was left in the hands of the board. We certainly cannot understand why there should have been any hesitation on the part of shareholders in the Anglo-Hungarian, for they are getting shares for shares in the new company, which should be one of the strongest oil companies on the Continent. That the field contains oil has now been proved by the fact that No. 3 well has given about two tons of oil, and that No. 4 well is also giving payable oil of first-class quality. Professor Zuber considers that the Iza Valley Oilfield is a rich oil territory deserving exploitation.

Shell Transport Report.

The Shell Transport report has now been issued. It was only to be expected that, as the Royal Dutch had reduced its dividend, the Shell would follow suit, and this has occurred. Last year the distribution was 22½ per cent. for the year. This year it is only 20 per cent. But the Board point out that they have provided a sum of £922,240 for depreciation in the intermediary companies, and that this is an increase of £386,481 over last year. It is, of course, impossible for an outsider to know exactly what depreciation should be written off in an oil well. It entirely depends upon the estimate put on the life of the well. But there is no doubt that the Shell people do not err on the dangerous side. In two of the subsidiary companies nearly 3¼ millions have already been written off during the past four years. Shell is, of course, entirely a holding company. It finances the Anglo-Saxon Petroleum Company and the Bataafsche Petroleum Maatschaapij, and last year lent the Asiatic Petroleum Company £265,000. As the Anglo-Saxon Petroleum has just purchased the freehold of the old Jewish Synagogue, and proposes erecting a magnificent suite of offices on the site, we presume the Shell will have to finance this transaction. It is difficult to arrive at the exact position of Shell, for the directors follow the example of Standard Oil, and create all kinds of subsidiary companies, whose accounts are only presented in skeleton form, if at all. The market considered the Shell report very satisfactory, and took very little notice of the paragraph which stated that the Standard Oil were attempting to undermine the Shell position by means of a campaign in Holland conducted under the guise of an independent Dutch company seeking concessions from the Government in the Dutch East Indies. The Stock Exchange pointed to the statement that prices of Shell products had become normal, and that profits were most satisfactory. The Board state that they have full confidence in the future, and, as everyone has complete confidence in Sir Marcus Samuel and Mr. Deterding, it does not look as though there is room for much fall in Shell shares, in spite of the fact that they only yield about 4 per cent. at present prices.

Petroleum in Egypt.

Lord Kitchener, in his report, refers to the petroleum industry in Egypt, and says that during the year 1911 prospecting for petroleum continued steadily on the Red Sea littoral, and though no new fields were discovered and no new wells opened, progress was nevertheless satisfactory, and much was accomplished, both in the way of exploration and of financial arrangements for future working. At Jemsa, which is, so far, the only field proved to be commercially oil-bearing, the Anglo-Egyptian Oil Fields, Limited, a company floated during the last twelve months to represent the combined interests of the Red Sea Oil Fields and the Anglo-Saxon Petroleum Company, has erected a complete installation for the storage and shipment of crude oil, which can now be loaded direct into tank-steamers. In other districts the drilling of trial wells has been continuous, and experience has been gained which, it is hoped, will lead to the eventual opening up of new fields.

Oil Fuel in Roumania.

The recent official publication in connection with the Roumanian railways indicates the use of liquid fuel and its growth. The number of engines which were adapted to the use of oil fuel during 1910-11 was 595 out of a total of 691. The total quantity of oil used for this purpose on the Roumanian railways amounted to no less than 156,320 tons, compared with 138,664 tons during the preceding year. The total annual consumption on these railways may be approximately stated at 180,000 tons.

NEWS FROM ALL SOURCES.

The Bulgarian Telegraph Agency announces that, in view of the fact that the Belgrade sugar refinery has raised the price of sugar from 95 to 100 frs. per 100 kilos., with a probable further augmentation, the Ministry of Finance proposes to allow, free of Customs dues, the entry of a certain amount of foreign sugar.

A wealthy and patriotic Greek, Mr. S. Anargyros, has written to M. Venizelos, enclosing £1,600 for the purchase of two military aeroplanes for the use of the Greek Government.

As a consequence of the excellent harvest of 1911, the exports from Bulgaria during the first three months of the present year were almost double those during the same period last year, namely £2,584,000, as against £1,341,000 in 1911.

The sum of £T40,000 has at last been appropriated, states *The Orient*, for the rebuilding of that part of the Sublime Porte which was burned a year ago last February; and it is announced that the work will begin soon.

According to the *Bourse Egyptienne*, it has been decided that the Government occupy the zone between the Sobat and the Uganda, on the Abyssinian boundary, in order to put a stop to the smuggling of arms indulged in by the tribes along the frontier.

A telegram from Constantinople, received in Berlin on Tuesday, states that the Ministry of Public Works, having finally approved of the plans for the Mediterranean port of the Baghdad Railway at Alexandretta and the branch line from Toprak-Kale to Alexandretta, work was begun at Alexandretta on the previous day.

Two suspension bridges for use in Abyssinia have recently been taken in hand in Khartum. One has already been dispatched to Gambela. Mr. Walker, who has spent some years in Adis Abeba, is in charge of their erection.

The Irrigation Department of Egypt intends to increase its mobility by making use of motor-cycles. The tests with the machine they have bought on trial has shown that the radius of action per official can be doubled at a less cost and under very much pleasanter conditions than with the horse.

Near East Markets.

Special Reports.
(From Our Own Correspondents.)

Alexandria. June 7.
The gathering in of the wheat crop has commenced. The crop is of record size, and the quality is excellent. In spite of the big crop, Egypt, which was formerly the granary of Rome, is still dependent on foreign countries for its flour, cotton having largely supplanted wheat in many parts of the country.

The Dardanelles. June 4.
The export trade is at a complete standstill, all stocks being exhausted. Harvest prospects are fair. Reaping of barley and early wheat will begin to-morrow, and will be general by the middle of the month, but harvesting will be seriously impeded by the scarcity of labourers, due to the continued stream of emigration to America and to the military conscription. Frosts in the beginning of May did some injury to grain crops already in ear, but, on the other hand, were of signal benefit in destroying the bean aphis and the caterpillars, which have done so much injury to the valuable valonea crop during the past twenty-five years.

(According to the Dardanelles correspondent of the *Quarterly Journal* of the British Chamber of Commerce of Smyrna, who writes under date of May 13, copious rains at the end of April and beginning of May have greatly benefited all crops, which are now full of promise.

The valonea caterpillars appear to have been virtually exterminated by the frosts that occurred after they were hatched.

The vines have suffered considerably on account of the frosts which came when the leaves had just begun to sprout, and, in my opinion, fully 50 per cent., if not more, of the crop has been damaged, if not completely destroyed. This, however, will be made up for by other fruits which are all, without exception, doing well.)

Braila. June 8.
The weather keeps fair and warm, and crop prospects continue to be very favourable.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East :—

Damascus. June 1.
Local reports are to the effect that the wheat crop will not be satisfactory, but nothing definite is known.

Prices of barley are high at P. gold 79 to 86 the 100 kilos, owing to shortage of stocks and reduction of crop.

Predictions are not favourable as regards the fruit and nut crops.

Considerable reserve is shown in the imports of Manchester cotton goods, as the political situation is not promising.

Aleppo. May 25.
The market is calm. Almost all articles imported from Europe, such as cotton, sugar, coffee, etc., are being quoted below.

Exports are nil, but the general situation is normal.

Mitylene. June 1.
Exports are limited. About 400 barrels of oil, to the value of £T2,400, have been forwarded to Constantinople, Bulgaria, and Salonika. Further exports include 840 bags of soap to the value of £T1,600.

Five hundred bags of Rangoon rice have been imported viâ Alexandria. Complete stagnation reigns in the Manchester import trade.

Jaffa. May 27.
Three hundred quintars of soap were exported during the week at P.J. 1,200 per quintar; also 630 boxes of oranges for Constantinople.

Prices are steady for all products except flour, which shows an increase, and soap a decrease.

Basrah. May 17.
Until road communications between Baghdad and Persia improve the import market will remain dull. Local necessities are satisfied at favourable prices by the purchase of goods for Persia (viâ Baghdad) held up here.

Exports are favourable, especially as regards wheat. Eight thousands tons of cereals have been shipped—2,000 for Djedda and the remainder for London.

Constantinople. June 1.
The opening of the Dardanelles has not produced a sensible activity on the import market. Retarded shipments continue to arrive, but are not easily disposed of, which causes a certain amount of uneasiness. Payments have been regular, however, and it is hoped that, except in the case of serious political complications, all engagements will be met.

Angora. June 3.
The mohair market has improved slightly. The large exporting firms have shown a disposition to buy up the new clipping. Prices are, however, low, when compared with the prices obtaining in Bradford. Sales this week are estimated at 1,500 to 1,800 bales. Stocks of the new clipping, owing to exactions on the part of the merchants, are entirely neglected.

Wheat demand continues firm from Constantinople. Stocks of barley are estimated at 450 tons.

Crop outlooks are good, favourable rains having fallen recently.

Larnaka. May 23.
There has been no business in locust beans during the week. It is now said that, owing to recent rains, the crop will exceed that of last year by about 10 per cent.

The following shipments of old crop are now being made, viz. :—

2,000 tons for La Palisse per s.s. "Forest Holmes."

2,000 tons for London per s.s. "Cereda."

Stocks are estimated at 2,000 tons.

Beyrout. May 28.
There is no change to be reported in the market. The provincial situation is good, owing to various liquidations, which have cleared the air.

The present state of the war has reduced imports to practically nothing. Export products are being sold locally or else stored for future sales.

The new crop promises well.

It is now estimated that the gathering of dry cocoons will be 15 per cent. lower than last year.

Hailstorms in the Lebanon during the past week have damaged, it is stated, the mulberry trees, and the harvest will be disappointing. Great damage has likewise been caused to the vineyards in the plains of Damascus and Bekaa.

Sudan's Sesame Crop.

The export of sesame from the Sudan has declined, although it is estimated that the area under this crop increased from 91,000 acres in 1910 to 111,000 acres in 1911. The increase in acreage, combined with the high prices which have now prevailed for some time, if taken in conjunction with the decrease in the export, appears to indicate that production is still insufficient to meet local demands, and that any considerable increase in the export is not to be expected.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending May 31 :—

We have to report a very excited week, with sales of new 1912 opium contracted for delivery July, August, and September. These sales amount to only 1,200 tchequees, or about twelve cases of extra selected Carahissar bought by speculators at 15s., and gradually advancing to 16s. 6d. per lb. As regards business for available old opium, there has been a brisk inquiry by shippers for common goods from 9 per cent. to 11 per cent., but the 13s. to 15s. 6d. bases offered was refused by all holders, who are firmly adhering to fully 2s. per lb. higher. The news all round from growers is unsatisfactory; rain is wanted very much in the upper districts to mature the poppy, and in the low lands the harvesting produces a small yield. From all accounts, therefore, we shall have a small crop of opium this year, in which case extremely high prices will follow. The arrivals amount to-day to 1,180 cases, against 4,562 at same date last year.

PRODUCE REPORT.

London, June 13.

With a continuance of the labour troubles the markets have been generally quiet. Sugar has declined. Coffee is firm. Currants are easier. Sultanas steady. Corn slow, owing to the strike. Oils move in favour of buyers. Petroleum oil dull. Seeds are firm, but slow owing to the labour troubles.

Sugar.

Duty, 10d. to 1s. 10d. per cwt. Refined is 3d. to 6d. lower, and beet 2d. to 4d. per cwt. The speculative beet market has been in a depressed state, with pressure to sell on the favourable Continental crop reports. The European beet crops are progressing favourably. Rains have fallen, but warmer weather is desired. Closing rates are :—June, 12s. 1d.; July, 12s. 0½d.; August, 12s. 1d.; September, 11s. 7d.; October-December, 10s. 4½d., f.o.b. Hamburg. Refined English (duty paid), Tate's No. 1 cubes, spot, 22s.; July-August, 22s.; September-October, 21s. 9d. Refined foreign Say's cubes, prompt, 19s. 10½d., and second half October-November 16s. 7½d., f.o.b. Paris. Dutch cubes, prompt, 17s. 1½d. to 17s. 9d. f.o.b. Amsterdam; German and Austrian, 17s. 4½d.; November-December, 14s. 9d., f.o.b. Hamburg.

Coffee.

Duty, 14s. per cwt. Business is of small amount, owing to the strike. East Indian small to mid., 76s. to 82s. Mocha long berry, 80s. to 85s.; short berry, 82s. to 100s. Costa Rica, low to ordinary, 76s. to 80s.; Mexican, 76s. to 88s.; Brazil, 68s. to 86s.

Currants.

Duty, 2s. per cwt. Inquiries are small, and prices have an easy tendency. Provincial quarter-cases have been sold at 25s. 6d. to 26s., Amalias 27s. to 27s. 6d., Patras 28s. to 28s. 6d., Vostizza 30s. to 32s. The stock of currants in London on May 31 was 4,813 tons, against 7,250 in 1911 and 3,861 in 1910 at the same period.

Sultanas.

Duty, 7s. per cwt. Smyrna sultanas are steady in value, but sales are restricted. Prices range from 48s. upwards, and finest has been realised at 65s.; Persians, quarter-cases, 44s. to 45s. Old crop has been sold at 40s. to 41s.; Samarkand bags are selling at 45s. to 46s.

The stock of sultanas in London on May 31 was :—Greeks, 32 tons, against 262 in 1911 and 243 in 1910; Smyrna, 856 tons, against 2,301 in 1911 and 7,692 in 1910; Persian, Afghan, and Indian, 2,035 tons, against 1,415 in 1911 and 2 only in 1910 at the same period.

Figs.

Duty, 7s. per cwt. Turkey, finest eleme, are quoted 70s. to 80s.; fine, 48s. to 55s.; good layers, 38s. to 42s.; common layers, 32s. to 35s.; natural, bags, 19s. to 25s.

The stock of figs in London on May 31 was : Turkey, packages, 24,983, against 26,726 in 1911 and 12.872 in 1910; Faro, Greek, and Malaga, 3,704 packages, against 5,339 in 1911 and 1,664 in 1910, at the same period.

Seeds.

Business is on a restricted scale owing to the strike and the difficulty in obtaining delivery of goods. Prices are firm for Turkish canary seed, 52s. to 55s. per quarter : Spanish, 80s. to 90s. Linseed is quiet, but at easier quotations. Russian, 72s. to 74s. per quarter; English 72s. to 74s.

Oils.

Business is at a standstill owing to the labour troubles. Linseed oil is quoted, spot pipes, £44 5s. to £44 10s.; barrels, £45 10s. to £45 15s.; June, £42 2s. 6d.; July-August, £39 per ton. Olive oil has a limited inquiry : Spanish, £44; Levant, £42. Cotton oil is quiet and rather easier : Ordinary pale refined spot, £27 15s. to £29; sweet edible, £31 to £32.

Various.

Onions.—Egyptian onions are selling well, and prices are firmer, finest realising 7s. 6d. to 8s., with 6s. 6d. to 7s. 6d. for seconds per bag. Beans, Colonial and foreign, 34s. to 41s. per 480 lbs. Split lentils, 11s. to 13s. per 100 lbs. Haricot beans, Danubian, 65s. to 68s. per 504 lbs.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondents.)

Alexandria. June 7.

The tone of the cotton market is very firm and, in spite of the improved prospects of the American crop, there is a likelihood that the price of Egyptian will rise, owing to the scarcity of water and the appearance of worms in various localities. The recent hot spell has, however, destroyed a large number of the parasites, and the plant presents a very vigorous appearance. The "futures" market is fairly active, the bulls predominating. There is little doing in the "spot" market, owing to the shortage of cotton.

Cotton seed is on the decline.

Liverpool. Thursday.

Messrs. Reynolds and Gibson, Liverpool, report that the feature of the week has been the firmness of the raw cotton markets. Spinners and manufacturers have been compelled to raise quotations. The Near East continues to buy cloth in small proportions. Egyptian yarns meet with a moderate reception. Quotations, however, continue firm. Egyptian spot has been in good request throughout the week. All descriptions have been in demand, though fine and extra fine grades of Brown are not so much sought after as the qualities classing good and below. Nubari and Joannovich are in very fair request, but Abassi is somewhat neglected. Quotations for fine and extra brown are unchanged. Fine Upper has been advanced $\frac{1}{32}$d. a pound, and all other grades, both Brown and Upper, are raised $\frac{1}{64}$d. Estimated sales for week, 3,800 bales.

Manchester. Thursday.

The arrivals of Egyptian cotton to date represent 210,790 bales, as compared with 206,299 bales last season. The Prince liner "Soldier Prince" is now en route to Manchester from Alexandria with 5,557 bales of Egyptian cotton.

Shipping Intelligence.

FALL IN FREIGHTS.

(From Our Own Correspondent.)

Braila, June 8.

As anticipated in my last week's notes, there was a substantial fall in freights this week, that being the only condition on which business was at all possible. This in no way means that business is now brisk, but a certain movement has set in, as merchants are convinced that freights have reached their lowest limit, and are now ready to engage room at current rates.

Only a few steamers of those that arrived here since the reopening of the Dardanelles have so far been able to complete and sail, and the amount of open tonnage is being increased by those liners that had arrived with cargo, and are now discharged. As soon as the liner tonnage, which is the one most pressing the market, is cleared, a reaction for the better may safely be expected, especially if the grain markets recover, as there is still sufficient cargo from last year's crop awaiting shipment. Current rates to-day from Galatz and Braila are as follows: Antwerp, 9s. to 9s. 3d., with limited demand; Rotterdam, 8s. 9d. to 9s., with practically no demand; Marseilles, 13 francs, with some inquiry; Adriatic ports, 14 francs, with a fair demand. From Sulina 8s. 9d. to 9s. is being accepted for either Antwerp or Rotterdam, and about 12 francs for Mediterranean ports.

The depth of water in the Danube remains unchanged; vessels can load at Galatz or Braila down to 22 ft., and can cross Sulina Bar drawing 23 ft.

There are at present twenty-six steamers at Braila, twenty-one at Galatz, and twenty-eight at Sulina.

ODESSA-LONDON SAILINGS.

The South Russian Steamship Company will start its railways between Odessa and London in a few days, according to correspondence from the former port published by the *Financier*.

As already announced by us, the steamers will carry both goods and passengers. There will be three 6,000-ton combined goods and passenger steamers put on the service, and the sailings will take place every fourteen days either way. Two more will be fitted up with refrigerated chambers of 150,000 poods storage capacity. These will make sailings every three weeks. The voyage Odessa-London will include calls at Constantinople and the Piræus, and in the return voyage Rotterdam will be included.

The enterprise of this South Russian Steamship Company is not confined to the Odessa-London service, continues our contemporary. Early this month—June—it inaugurates a second line—Odessa-South America. On this service there will be seven combined goods and passenger-cum-emigrant ships to start with. Their cargo capacity will be 7,000 tons each, with accommodation for 1,500 to 2,000 emigrants. The voyages are timed to last thirty days, and the ports of call for the moment are intended to be: Constantinople, the Piræus, Genoa, Gibraltar, Santos, Rio de Janeiro, Monte Video, and Buenos Ayres.

PORT OF AIVALI.

Navigation with this port is steadily increasing, many steamers running to Constantinople, Smyrna, Salonica, and Piræus now touch at this port, and are doing very well. A direct and independent line from Smyrna, touching at Dikili and Adramitti, would greatly facilitate passenger traffic and commerce. The boat should be a fast one, travelling at the rate of eleven to twelve miles per hour, and not larger than 100 to 120 tons.

PASSENGER LIST.

Sailed from Marseilles, per Messageries Maritimes, s.s. "Orenoque," June 6, for Alexandria:—M. and Mme. de Faro, M. S. E. Soupi, M. Brener, Sœur Germaine, M. Max Salama. For Port Said:—Mme. and Mlle. Hermann. For Jaffa:—Sœurs Marie and Louise. For Beyrout:—Mlle. Jamily Daye, M. l'Abbé A. Yammine, Sœurs Collret, Capronnier, and Antoinette, M. Isaac Mansour, M. and Mme. Amddo and child, M. Sucre A. Paz.

MASSOWAH HARBOUR.

(From Our Own Correspondent.)

Port Sudan, May 29.

Messrs. Bencini and Quistas, the well-known harbour plant contractors have undertaken, under contract with the Italian Government, the construction of a quay in Massowah. The quay in question, which will be ready for use in two and a-half years, will be 450 metres long and will cost £120,000. At present Massowah has no shipping facilities at all, and the harbour is in the same condition as it was under Turkish sovereignty, some thirty years ago. The increase of produce in Eritrea induced shippers to complain continually of the serious disadvantages to loading operations in the only port of the country. This was pointed out as being an obstacle to the country's progressing further and the Italian Government have at least decided to construct the quays, which will be followed by the erection of Customs warehouses and coal yards. Deepening work in Massowah will commence in a month's time.

SMYRNA AND THE WAR.

The delegates of the International Commission for the Protection of the Smyrna trade are forwarding to the Embassies of the Great Powers at Constantinople a circular pointing out that grave injury will result to Smyrna from a blockade of the town by the Italian fleet, and urging the Powers to obtain from Italy a promise to refrain from such a measure. The next few months are the busy season of the trade, which employs 80,000 hands, whose earnings in July, August, and September practically constitute their means of livelihood for the whole year.

AUSTRIAN LLOYD.

Notwithstanding the slight check sustained owing to various adverse causes, the dividend declaration of the Austrian Lloyd S.S. Company is maintained at 6½ per cent. The report states that the Levant services were unfavourably influenced by the war, but the trade to Egypt, owing to the introduction of two new express steamers, showed a gratifying development, whilst the closing of the Dardanelles cost the company about half a million kronen during the current year, and it is stated that, if the unfavourable conditions in the Levant trade last much longer a reduction in the dividend next year may be likely.

STEAMSHIP MOVEMENTS.

Anchor Line.

"Algeria."—Calcutta for Genoa. Left Colombo June 3. "Anchoria."—At Calcutta June 2. "Assyria."—Leghorn for London. Left Gibraltar June 6. "Bavaria."—Liverpool for Calcutta. Passed Perim June 7. The s.s. "City of Corinth" (viâ Suez), for Bombay, will close for cargo at Birkenhead on June 25.

TRADE OF THE SUDAN.

In the chapter on "Trades and Customs," Lord Kitchener refers in his report on the Sudan in glowing terms to the country's future. Among other things, he considers the increasing activity of the native and his ability to take advantage of the opportunities presented to him, a most hopeful augury for the future.

Cotton Growing.

If it is remembered that cotton is only grown at present in certain favoured centres in a few provinces by a comparatively sparse and ignorant population, there can be no doubt as to the capacity of the Sudan to produce cotton and other crops in large quantities, when irrigation, education, increase of population, and various beneficial influences have had time to work their effect. Two developments of great promise are the avidity with which land is taken up by natives for cultivation and the great interest taken by them in the cattle and sheep trade, which is progressing rapidly.

Another fact of great importance is that the creation of Port Sudan and the construction of new railways have brought the Sudan within easy reach of international commerce, and it is evident that the country occupies an extremely strong strategic position.

Government Support.

The part which the Government should take in assisting to develop the resources of the country, either in conjunction with or in advance of private enterprise, is a question of great importance. If left to his own devices the native will continue to pursue his antique methods, while the middleman is concerned, as a rule, only with his immediate profit; and there can be no doubt as to the necessity of some Government intervention in regard to the cultivation of foreign markets. Striking illustrations of the success attending Government intervention in this regard are to be found in the increase in prosperity resulting from the improvement of the Tokar cotton crop, and the remarkable increase in the export of live stock.

These and numerous other matters of economic importance are engaging the attention of the Central Economic Board, and valuable assistance has been received from the Imperial Institute, London, and the Wellcome Research Laboratories of the Gordon College, while useful help in matters affecting the general welfare should be found in the Sudan Chamber of Commerce recently established at Khartoum.

Exports.

The export of gum is maintaining its rapid increase, and the value has risen to 311 piastres per 100 kilog., as compared with 243 piastres last year. A great development in the gum trade is taking place throughout the country. In regard to cotton, although the yield for 1910-11 has fallen below the average, the exports of cotton and cotton seed have risen from £E231,522 to £E267,339. The possibilities of the successful development of the cotton trade have been clearly proved. The Government are giving the question their most careful attention, and everything possible will be done to secure its extension. 17,147 tons of dhurra (millet) were exported, a decrease of 7,990 tons, as compared with 1910. It appears that the native, remembering the period of famine under the rule of the Mahdi, is afraid to part with his grain.

In regard to the cattle trade, 19,373 cattle and 83,653 sheep were exported up to the end of November, an increase over 1910 of 15,123 and 31,948 respectively. The new railway to El Obeid should be of great help in the development of the trade. The rapid growth of the cattle trade has resulted in applications to provide cold storage establishments. The development of the wheat trade depends on the possibility of finding a market in Egypt or abroad. The ostrich feather trade is still decreasing; there seems little hope of a revival until it is taken up by experts. 74,961 kilog. of ivory were exported, as compared with 64,706 kilog in 1910.

A concession has been granted for the collection of wild rubber in Bahr-el-Ghazal. Valuations made in London of samples of Sudan rubber are very encouraging.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912.)

SETTLING DAYS.

CONSOLS.
Monday, July 1.
STOCKS AND SHARES.
In Mining Shares the next carry-over is June 25.

Continuation Days.	Ticket Days.	Pay Days.
Wed., June 26.	Thurs., June 27.	Fri., June 28.
Wed., July 10.	Thurs., July 11.	Fri., July 12.

LONDON, June 13.

The markets improved after the settlement. Probably the marking up was due to a desire on the part of the jobbers to put heart into the public, who have been right away from the Stock Exchange for the past three weeks. Whether the manœuvre will succeed or not is doubtful. The new issues have gone very badly. The Danish loan and the City of Moscow loan were left with the underwriters to the extent of about 50 per cent., and the New Zealand and Algoma issues were dead failures. Money would be very plentiful if the Government would help the market. Berlin reduced its rate, and took half a million in gold from the Bank of England. There is talk of trouble in Germany at the end of June settlement. We do not think that it will get beyond talk. Consols are harder, and with cheap money the price should gradually improve.

Foreigners Better.

Foreigners are distinctly better. Bulgarian 4½ per cent. have improved to 88½. Egyptian Unified carried over at 100½, and show no change. Greek Fours have been steadied, and are now as good as 55½, which is three points higher than they were a year ago. Hungarians at 92 also show a fractional improvement, and the market has been cleared of Italians, which are now quoted 96. The bears here have been squeezed. Turkish Unified carried over at 89½, and remain at that figure.

Rails and Coppers.

In the Home Railway market, prices move up one day and fall back the next. It was expected that the transport strike would seriously injure the railways, but up to the present it has actually improved their traffics. The Yankee market has suffered from a bear raid, and rails and coppers have been attacked. But although we see no future in the railway market, we think well of copper shares. The Amalgamated report is excellent, and shows an enormous increase in the surplus.

Oil Spurt.

The rubber market continues lifeless, but oil shares have spurted again, and Urals have almost recovered from their old price. They are talked higher, but, in our opinion, should be sold. The Shell report, which we criticise in another column, was liked by the Stock Exchange, and Shells are a firm market. There have been some realisations in the Egyptian section. Probably the punters are taking their profits.

Egyptians Unchanged.

The Egyptian market does not improve. It is said that all the Salt and Sodas have now been sold. But we are doubtful as to the truth of this statement. Aboukirs carried over at 1⅛, and Agricultural Banks at 6⅛. There have been a few purchasers of this share, but the public are nervous with regard to rumours that Lord Kitchener considers Egypt over-mortgaged. Delta Lands are 15s., Abdy's 8s. 6d., Gharbieh 2½, National Bank of Egypt have improved, and are the turn harder. They carried over at 17, but cannot be purchased at this price. New Egyptians are also inquired for at 13s. The company is supposed to have had a good year. Neither Sidi Salems nor Union Foncières show any change. The movement for an Egyptian Bureau in London, which will give information with regard to Egyptian companies, has not taken any definite form as yet, but we hear that one or two of the big houses who do a large business between Cairo and London are anxious for the establishment of such a bureau. It is certainly very much wanted, for there are many securities about which the British public know very little; if they knew more, they would probably more readily invest in Egyptian shares.

NEW COMPANIES.

Anglo-Austrian Oil Industries.

Under the above title a private company has been registered, with a capital of £32,500 in 30,000 £1 ordinary and 100,000 6d. "B" shares. The objects are stated to be: To acquire any petroleum or oil-bearing lands, mines, minerals, and other properties in Austria or elsewhere.

America-Levant Line.

Under the above title a private company has been registered by Messrs. Hedley and Thompson, Sunderland, with a capital of £125,000 in £1 shares (100,000 preference). The objects are stated to be: To carry on the business of shipbrokers, owners and builders, dealers in ships and vessels, carriers of passengers and goods, bonded store merchants, coal owners, wharfingers, wherry owners, ship chandlers, etc. The first directors are to be appointed by the signatories, subject to the right of any body corporate while holding £5,000 shares to nominate one of its members to be a director. Qualification (except such nominee), one ordinary share. Remuneration, as fixed by the company. Registered office, 7, Great St. Helen's, E.C.

Keun, Lavino & Co.

We have been informed that the firms of Alfred A. Keun and Co., and of Messrs. A. Lavino and Co., of Smyrna, have been dissolved by common consent. Another company amalgamating both of the above has been formed under the style of Messrs. Keun, Lavino, and Co. in Smyrna, and Messrs. Lavino, Keun, and Co., 155, Fenchurch Street, London.

BRITISH COMPANIES IN SMYRNA.

Smyrna has forged ahead of her commercial rivals, and British capital has contributed very largely towards this progress. It will probably come as a surprise to most of our readers, says the *Quarterly Journal* of the British Chamber of Commerce of Smyrna, to learn that there are in Smyrna over a dozen British limited liability companies with a capital of something like eight million pounds.

It is therefore important that our country should have something to say in the forming of the proposed new Turkish laws on public companies, as so many millions of British capital would be affected. The British companies in Smyrna are:—

The Ottoman (Aidin) Railway Company (50 years established), £6,000,000; Oriental Carpet Manufacturers, Limited, £1,000,000; The Smyrna Fig Packers Co., Limited, £200,000; The Smyrna Bank, Limited, £170,000; British Oriental Bank, Limited, £100,000; The Ottoman Cloth Co., Limited, £81,200; Ottoman Oil Co., Limited, £60,000; Asia Minor Tobacco Company, £30,000; Anglo-Eastern Co-operative Co., Limited, £30,000; The Asia Minor Cotton Association, Limited, £20,000; M. H. Ekisler and Co., Limited, £20,000; Abbots Emery Mines, Limited, £20,000; Anglo-Oriental Trading Co., Limited, £20,000; Smyrna Lightermen's, and Barge Owners Co., Limited, £10,000; The Levant Kinematograph Co., Limited, £10,000; The Blackler Spinning Co., Limited, £10,000; Smyrna Races and Sports, Limited, £5,000.

DIVIDEND ANNOUNCEMENTS.

Compagnie d'Exploitation des Chemins de Fer Orientaux.—Dividends for 1911, 35.00 frs. per share (Coupon No. 37).

Chemin de Fer de Salonique-Monastir.—Dividends for 1911, 6 per cent. per share. Profits for 1911, 679,620 frs., as against 682,518 frs. in 1910.

Société du Pont de Haidar Pasha.—Dividends for 1911, 7 per cent. per share. Profits for 1911, 1,192,804 frs., as against 1,051,481 frs. in 1910.

Compagnie Ottomane du Port, des Quais et Entrepôts de Beyrouth.—Dividends for 1911, 15.00 frs. per share.

Mersina-Tarsus-Adana Railway Company—A dividend of 12s. on the ordinary share is payable on and after June 13.

NOTES FROM ALEXANDRIA

(FROM OUR OWN CORRESPONDENT.)
ALEXANDRIA, June 7.

After a long period of inactivity, our market has suddenly changed its aspect. A recovery has set in, and prices have in consequence hardened to some extent. The bad impression left by the recent failures is disappearing and giving place to a feeling of confidence. In spite of the fact that the summer season is not altogether favourable to business, there are signs that the present improvement will become more pronounced in the not very distant future. The upward movement which has manifested itself this week has therefore induced a number of capitalists to anticipate the purchases of stock which they had intended effecting when prices had become more depressed.

The Nile Flood.

This year's Nile flood is the worst on record. It is below that of 1908, which itself was phenomenal. If the Assuan reservoir and barrages had not been built, Egypt would this year have suffered from an irremediable drought. The crop of cotton and partly that of rice have, in fact, been saved by using the waters stored up in the Assuan reservoir. Unfortunately the next flood is late, and it is feared that there will not be sufficient water available before the arrival of the new waters. Should this critical situation continue much longer, there is a risk of the country losing its rice crop. As to cotton, there is nothing to fear, in view of the parsimony with which the water is distributed.

Oil Development.

In consequence of the favourable results obtained on their concessions in the Red Sea, the Anglo-Egyptian Oilfields, Limited, have purchased from the Egyptian Government 100 acres of land in the neighbourhood of Suez at the price of £E10 per acre, for the purpose of erecting an oil refinery on the site. At present all the oil from the Red Sea oilfields is sent to Java to be refined.

The Textile Industry.

The Egyptian Government has exempted the Filature d'Egypte (formerly the Anglo-Egyptian Spinning and Weaving Company) from the payment of Excise duty for a further period of five years. On the expiration of this period the Excise duty will be fixed at the rate of 4 per cent. instead of 8 per cent.

New Agricultural Company.

La Société Anonyme d'Entreprises Agricoles is the name of a new company which has just been formed under Egyptian laws with a capital of £E10,000, divided into 100 shares of £E100 each. The company has been formed under German auspices, the shares having been subscribed for by the following gentlemen in the proportions named:—Ulrich Andræ, 48; Otto Kahn, 47; Simon Kahn, 1; Carl Rinke, 1; Bernhard Young, 1; August Weber, 1; Ernst Herlinger, 1. The three first-named gentlemen are resident in Vienna, Munich, and Wurtsburg respectively, the others being located in Cairo. The objects of the company are to undertake the purchase, development, and sale of agricultural lands, and any other agricultural enterprises in Egypt, particularly those connected with irrigation. The first directors are Messrs. Ulrich Andræ, Otto Kahn, and Bernhard Young.

COMPANY MEETINGS.

Société Anonyme Ottomane de Fabrication de Fils et d'Etoffes en Coton et Laine.—Constantinople, June 28, at 10.30 p.m.

Société Ottomane d'Heraclée.—Paris, June 28, at 4 p.m.

Société Nationale pour le Commerce, l'Industrie et l'Agriculture dans l'Empire Ottomane.—Galata, June 28, at 10 p.m.

New Egyptian Company.—Winchester House, Old Broad Street, E.C., on June 27, at 12 noon.

Two new banks have been established at Bucharest—the Banque de la Capitale, with a capital of 500,000 frs., and the Banque Progresul, with a capital of 200,000 frs.

Company Notes and Reports.

Anatolian Railways.

The receipts of the above company in 1911 amounted to 15,100,271 frs. (as against 11,497,999 frs. in 1910), representing 17,103 frcs. per kilometre on the main Haidar-Pasha-Konia line, and 11,366 frs. and 17,358 frs. on the branch lines Eski-Shehir-Konia and Arifieh-Ada-Bazar respectively. The number of passengers was 2,709,276 on the main and 212,535 and 124,144 on the two branch lines respectively. The goods carried amounted to 425,027 tons on the main and 216,509 tons and 44,611 tons on the two branch lines respectively. The working expenses were 6,202,444 frs., leaving a net revenue of 8,621 frs. per kilometre. The receipts on the main line exceeded for the first time the amount of the kilometric guarantee, so that the Government had no prepayment to make, and even received as its share the sum of 352,467 frs. As against this the Government had to pay 1,045,205 frs. on the Eski-Shehir-Konia branch line. The report points out that the section Bulgurlu-Ulukishla has been working since June 1, 1911, and that from Dorak to the foot of the Amanus Mountains was opened on April 27 last. On January 4 of the present year the company obtained a concession for a railway, 60 kilometres long, from Ada-Bazar in the direction of Bolu for a period of ninety years. The company contemplates the raising of a loan of 60 million francs at 4½ per cent., for additional work on the existing main and branch lines. The total available surplus amounted to 3,660,094 frs., of which 2,940,160 frs. were distributed in dividends of 5 per cent. The total paid-up capital amounts to 58,803,200 frs.

Baghdad Railway Company.

The *Times* publishes from its Berlin correspondent the following summary of the above company's report, published on June 7 :—

"The net profits are 796,324 frs. (£31,852), as compared with 788,492 frs. (£31,518) in 1910, and a dividend of 5 per cent., the same rate as last year, will be paid. It is observed that the section of about 140 kilometres from Dorak, viâ Adana, to the western foot of the Amanus mountains, was opened on April 27. It is expected that in the course of the year the sections, amounting to about 100 or 150 kilometres, from Aleppo to the Amanus on one side and towards the Euphrates on the other, will be opened to traffic. Work will also be begun shortly on the section running northwards from Baghdad, and the branch line to Alexandretta is to be begun this year and finished in 1913."

Egyptian Agricultural Company.

The directors, in their first annual report, state that the agreement come to with the Egyptian Estates, Limited, under which the present company was formed, was dated April 29, 1911. None of the properties, however, were handed over until August following, and the final adjustment of accounts and other open questions was not actually reached until April 4, 1912. The accounts now presented cover, therefore, a portion of a year only. In forming the present company power was taken to raise such further capital as might be required by an issue, ahead of the debentures, up to £100,000. The directors considered such an issue undesirable in the interests of the company, if it could be avoided, and they have succeeded in arranging an advance in Egypt of £E35,000, repayable by instalments over a series of years, and secured by a charge on the Atfeh estate only.

Premier Oil and Pipe Line.

An extraordinary general meeting of the Premier Oil and Pipeline Co., Limited, was held on Wednesday for the purpose of considering a scheme for the amalgamation of various important interests connected with the oil industry in Galicia and to increase the capital of the company to £3,750,000.

Mr. E. T. Boxall, who presided, said that the negotiations had proceeded for some months, but the interests of this company had been carefully protected and the value of the properties to be acquired had been calculated on a bare and equitable basis. He had received a good many letters from shareholders expressing approval of the scheme. The first consideration that influenced them in entering into these negotiations was the introduction of adequate working capital to further develop the extensive oil territories which they held. With such a large area containing such a high grade oil the shareholders would have had reason to reproach the directors if they had been content to hold these valuable territories and make no effort to find the necessary working capital for their development on a proper scale. The amount of working capital provided under the scheme was £181,000, and in addition to that they had other resources, making the working capital at least £250,000. Another result of the scheme would be that they would have an increased profit on the crude oil. Possessing, as they would, four refineries, with a capacity of 170,000 tons of crude oil yearly, it would be seen that they would be able to realise the full market price for that quantity. In the estimate of profits they had taken an average of four kronen, so that they had only allowed for about one-third of their production at full market rate. These refineries would bring in large additional profits and were declared to be in good working order, and with an outlay of kronen 180,000 had a capacity of dealing with other 75,000 tons of crude oil yearly. The net profits were estimated £198,333. The purchase price to be paid for the refineries, producing shafts and oil territories connected with them, was the sum of £1,144,125, payable as to £869,000 partly in cash and partly in preference shares. To pay the dividend on these shares would require £80,500, so that on the basis of the estimate given it would be seen that the acquisition of the refineries would benefit the ordinary shareholders to the extent of £117,832. A director of their company had recently visited three out of four of the refineries, and had formed a favourable opinion of their efficiency and earning capacity, and strongly recommended their acquisition. In summarising the benefits of the scheme he emphasised the following points : In the first place economy in administration, which he thought should prove very considerable; secondly, the development on a large scale of the very valuable oil territories held by the company, and also those brought into combine; and, thirdly, the completeness of the organisation provided for in the amalgamation, which included the production of crude oil, control of a large number of pipelines and storage tanks, the refineries for dealing with their own oil, and obtaining profits from all the intermediate bye-products, and lastly the importance of possessing a distributing organisation such as that controlled by the Deutsche Erdol Gesellschaft.

The resolutions were declared carried.

Anglo-Hungarian Petroleum Co.

An extraordinary general meeting of this company was held on Tuesday, for the purpose of considering resolutions to increase the capital of the company to £150,000 by the creation of 50,000 new shares of £1 each, and approving and confirming an agreement made between the company and the British and Foreign General Securities and Investment Trust. Mr. Thomas J. Ive presided.

The Chairman said:—We have on the field to-day three wells fully equipped with modern machinery for deep boring. Workshops have been erected and fitted with lathes and other accessories, so that all repairs can be carried out quickly and efficiently on the spot, and many pieces of machinery made more economically than they could be purchased and transported. No. 2 Well has given considerable trouble, due to the same being spiked, and we finally had to withdraw the whole of the old casing and insert new. This well is now drilled to a depth of 655 metres. No. 3 Well is now down to 690 metres, and strong indications of gas and small quantities of oil have been continuous for the last 250 metres. On the 3rd inst. it was reported that oil had come in to the extent of two tons. No. 4 Well has been drilled to a depth of 576 metres, and we have been successful in obtaining payable oil, the various analyses of which have proved it to be of first-class quality. The report just to hand from the field states that No. 4 Well produces with great regularity.

When oil was struck in November last we were fast running short of working capital, and some of the larger shareholders, believing we had a very valuable oilfield, came forward and took up some of the unissued shares, thus providing temporary funds to continue the work. Large capital was essential for carrying on successfully the development and exploitation of our extensive field, which, as you are aware, is about thirty square miles. We therefore opened negotiations with a wealthy group, and were able to come to an arrangement whereby an option agreement was given to the British and Foreign General Securities and Investment Trust (Limited) to provide the necessary funds to carry on the work.

Briefly, the terms of the agreement are as follows:—That, if the reports were satisfactory, and the British and Foreign General Securities and Investment Trust succeeded in obtaining certain concessions and valuable support from the Hungarian Government, the Trust would undertake to provide further working capital by subscribing for 8,000 shares of the unissued capital upon the terms and commission stated in the agreement. That immediately upon the subscription of the 8,000 shares by the Trust, this company is to hand over to the Trust or its nominees the management of the commercial and technical part of this company's business. That this company should increase its nominal capital to £150,000 by the creation of 50,000 additional shares of £1 each, and that after such increase this company should allot to the Trust 45,000 of these shares as remuneration. That the Trust have further to register a new company with a nominal capital of £350,000, of which they will guarantee £150,000 for working capital and the general purposes of the company. The Anglo-Hungarian Company will receive for its shareholding in the Magyar Company (that is, the Hungarian Company) 150,000 shares of £1 each, leaving 50,000 shares in reserve for further working capital.

You will remember that this company is a holding company—that is to say, it holds all the shares in the Magyar Karpati Petroleum Company, a company registered in Hungary, the shares of which this company was formed to take over. We therefore simply carry out a share transaction by selling our entire holding in the Hungarian Company to the new company with a nominal capital of £350,000 to be formed by the Trust for a consideration of 150,000 shares of £1 each in the capital of that new company, the working capital of which I have already informed you will be £150,000 guaranteed, leaving £50,000 shares in reserve for future issue. I am pleased to be able to state that the Trust's negotiations with the Government of Hungary have resulted in a fair and equitable agreement being come to between them. The Trust under certain conditions have been able to secure for the Magyar Karpati Petroleum Company certain valuable concessions from the Government, the British and Foreign General Securities and Investment Trust (Limited), on the other hand, guaranteeing within a certain period that the capital of the Magyar Karpati Petroleum Company shall be increased from its present capital of 2,000,000 kronen to 5½ million kronen.

The resolutions, after having been duly seconded, were, after a short discussion, carried.

NOTES OF THE WEEK.

The fighting at Zanzur, recorded in our last issue, was followed by another fierce engagement which took place in the neighbourhood of Homs. An attack was made at dawn by the Turkish forces on the Italian garrison occupying rising ground at Lebda. Reinforcements from Homs took the Arabs in the rear and flank, and within a short space of time had completely routed them. They fled in two bodies, one of which was hotly pursued by the Italian troops, while the other was surrounded and practically annihilated in the oasis. According to the Italian version the Turkish losses were enormous, 421 bodies being counted in the vicinity of Lebda alone. The Turkish reports represent the engagement as a victory for their arms, although they admit that they had to retire out of range of the naval guns. Throughout the war Constantinople versions of every encounter have varied but little save in the number of the Italian casualties, and as these are invariably returned with somewhat lavish extravagance, the Italian estimates alone can be seriously considered for purposes of historical record. At an interval of another four days—on June 16—the Italians effected a fresh landing on the coast of Tripoli near Bu Sceifa, about sixty miles east of the town of Tripoli. Very little resistance appears to have been encountered, as the guns of the flagship covering the movement were able to disperse the few bodies of Arabs who attempted to oppose the debarcation of the expeditionary corps. The marabout of Bu Sceifa was occupied, and the work of equipping it as an Italian post was carried out without serious interference. Later in the afternoon a more determined attack on the part of the Arabs had to be repulsed. The place chosen for this fresh landing is some eight miles from a commercial centre of some importance known as Misurata.

While it is possible that the action of the Turco-Arab forces at Lebda and at Abdel Gelil a few days previously is no more to be vested with special significance than the latest landing of Italian troops on the Tripoli coast, the hope is being entertained in Italy that the accentuated fierceness of the attacks implies that the enemy is staking everything on a final supreme effort. To what extent the wish is father to this theory the near future may show us; but the interpretation reveals the tenacity with which the Italians cling to the idea that other forces than the prowess of their own arms are to effect for them the conquest of Tripolitania. Even the well-executed advance on Zanzur seems to have been intended to impress Italy and the rest of Europe rather than to have been part of a comprehensive plan of campaign. In the Ægean Sea, on the other hand, the Italians are credited with a more definite programme. The occupation of Chios and Mitylene is expected daily, and the Turks are making elaborate preparations to repel any attack on Smyrna. Some 60,000 troops are being concentrated near the city, while guns are being mounted not only on the mountains surrounding the Gulf, but also on the smaller eminences commanding the shore. Interest in these possible developments in the Ægean centres in their bearing on the Dardanelles question. The capture of Mitylene would doubtless have been regarded a few months ago by the Turks as sufficient justification for blocking the channel; but in view of the representations made to the Porte when the Straits were closed on April 18, it may be presumed that the fateful step will not be taken unless the Italian fleet actually appears before the mouth of the Dardanelles, or an occupation in force of one or more of the islands commanding the entrance takes place.

Seven months after the outbreak of the war both Turkey and Italy are finding that the financial strain cannot be met much longer without exceptional measures. In spite of the more serious drain on its resources, the Italian Government has not yet been obliged to impose extra taxation, but it is rumoured that a loan is now contemplated. The Porte, however, has had to formulate a comprehensive scheme of new taxes to meet the expenses of the war. Although its proposals have not been submitted to the Chamber of Deputies, it is understood that they embody an increase in numerous categories of taxation. There is to be a 25 per cent. advance in the taxes on rural and urban property and in the professional tax. The patent tax and the military exemption tax will also be raised, together with, it is conjectured, the salt, alcohol, and petroleum taxes. Until the Porte's intentions in this respect are definitely known the significance of its financial programme cannot be accurately gauged. The amount of new revenue that it is proposed to raise is stated to be between £1,500,000 and £2,000,000. The progress of the negotiations for an advance of £2,500,000 to the Turkish Government on account of the loan contract

Digitized by Google

recently signed is dealt with in our financial section. Any difficulty experienced in raising the money required for the Government's immediate needs, combined with the commercial loss that the war is necessarily causing the country, cannot fail to exercise its effect on the attitude towards the continuation of hostilities of those who are responsible for the administration of Turkish affairs. For the moment, however, it would be rash to speculate on Turkey's chances of not being able to lay hands on all the money she wants. In this connection the reports of an impending Cabinet crisis in Constantinople are not devoid of interest, although it may be premature to attach great importance to them.

The hoisting of a "flag of autonomy" at Patmos by representatives of the twelve islands in the archipelago indicates that the Greek islanders are determined not to let the grass grow under their feet. Their demand, addressed to General Ameglio, stipulates for the union of the islands with Greece; but, if that should not be possible, they ask the Powers for the complete autonomy of the archipelago. In his proclamation announcing the seizure of the islands the Italian admiral commended himself to the inhabitants by high-sounding phrases regarding their deliverance from the Turkish domination. The expression was no doubt literally correct, and will remain so as long as the Italians occupy the islands; but whether the admiral's proclamation represented the carefully considered intentions of the Italian Government regarding the future of the islands for all time may at least be open to question. Answers given in the House of Commons show that the British Government distinguishes between a military occupation and an annexation of the islands. Until the Italians have taken the latter step it must clearly be premature on the part of the islanders to decide that they have been freed for ever from even the slight degree of Turkish sovereignty that they have of late years been called upon to recognise. The friends of Greece are not indifferent to the disabilities under which her nationals labour in Turkish territory, but they cannot ignore the complex situation in the Near East. It is hardly to be supposed that other nationalities in that part of the world would consent to remain passive spectators of the grant of autonomy to the Ægean islands as the result of no effort on the part of the latter to secure this long-desired privilege.

Saturday, June 15, will not figure as one of the lucky days of the Maltese calendar. On that day the battleship squadron took leave of the island, and the significance of the new naval dispositions that have commended themselves to the Admiralty was brought home to the inhabitants. The present economic condition of Malta is unsatisfactory, and the withdrawal of the attenuated battleship squadron served not only to recall the fat years that had passed, but to emphasise the lean years now in store. We may believe, moreover, that many of those who watched the departing vessels experienced misgivings that had little connection with the commercial prosperity of the island. It is hard to eradicate the old conception of the Mediterranean as a British inland sea, and time is therefore required to adjust one's theories to a new order that does not allow the flag to be shown in these waters in the same relative strength. Malta, however, will find compensation in other directions, and in the meantime is not likely to give up all hope of welcoming back one day a full Mediterranean Fleet.

The story of the Anuak expedition, which was told in our issue of last week, and the letter that we publish on another page from our Cairo correspondent help to convey some idea of the gigantic task that still awaits Great Britain in Egypt and the Sudan. After the punitive expedition comes the work of reclaiming a lawless tribe into the ways of ordered Government, and with this end in view a large force will have to be sent next winter into the Anuak territory to discover the potentialities of the country and to enter into administrative touch with the people. Lord Kitchener's activities find the fuller scope by reason of the conspicuous success that attended Lord Cromer's efforts to place Egypt's finances on a sound basis. With more than financial equilibrium assured, the new British Agent is able to devote his time to the development of the material resources of the country at the hands of the people themselves. All the help that scientific investigation can give is placed at their disposal, but to a large extent the practical application rests with the native population. Accordingly, State enterprises must be careful not to outstrip the education of the fellaheen, and it is satisfactory to note in this connection that in his tours through the provinces Lord Kitchener devotes no little time to expounding the chief features of his schemes to the fellaheen.

The Cretan Administration has been content to stay its hand since the question of the admission of its deputies to the Greek Parliament was solved temporarily by the adjournment of the Chamber. A new Government has now been formed in the island, and its composition is held to be a good augury for the maintenance of order and financial equilibrium. The meeting of the Revolutionary Assembly has been postponed until October, and there is, therefore, some ground for the hope that the Cretans will find time to concentrate their attention on the material interests of the island and allow their political aspirations to lapse for the present. A brief respite from agitation might encourage the Powers to consider whether some means cannot be devised to prevent the assembling of the Greek Chamber becoming once more a signal for unrest in Crete.

As was to be expected, some little time will be required to allow feelings of security and mutual confidence to be restored in Cyprus as between Greeks and Turks. The deaths that occurred during, and since, the riots of last month have excited no little animosity on both sides; and as the Greek papers—which, it is needless to say, discuss at length recent events—find their way to all villages, the flame has been fanned throughout the island. Unusual excitement consequently prevails, and special precautions are called for during the forthcoming summer season, when the numerous fairs held in different parts of the island are frequented largely by both Turks and Greeks. The arrival of 120 men of the Devonshire Regiment was opportune, and it is probable that another detachment will be landed from Egypt for the preservation of peace and order in the towns. This will enable the local police to send zaptiehs to reinforce the rural police stations, the establishment of which has been one of the best measures for the prevention of crime of the administration in Cyprus. As a special precaution, a small detachment of soldiers has been patrolling the Limassol district. Meanwhile the Greek community is anxiously awaiting a further communication from the Colonial Office in reply to the various "claims" submitted through the High Commissioner, with reference to which a fresh communication from the "Central Committee" has been transmitted by the Governor to Downing Street. This committee includes the Archbishop of Cyprus and some of the leading Greeks of the capital. Among the present demands is one on which much stress is laid, for the appointment of a Royal Commission to inquire into all the claims of the Greek Cypriots. The Colonial Office is now in personal consultation with the Chief Secretary, Captain Orr, whose recent resignation has not been accepted, but who has been granted a prolonged leave. With regard to the complaints of the Greek community against the police, the High Commissioner has instructed the King's Advocate, Mr. A. Bucknill (who was about to leave for England, then to take up a new appointment at Hongkong), and Mr. Theodotou, a Greek member of the Legislative Council, to investigate the whole subject. Close inquiry will no doubt clear up, on satisfactory evidence, any points in connection with the origin and character of the recent troubles which may remain in doubt. It is greatly to be regretted that this unfortunate state of feeling should have been aroused in the island; but, in view of the measures promptly taken, there is little fear of any fresh outbreak. Nor is there the slightest cause to doubt that any reasonable claims will receive the full and impartial consideration to which they may be entitled.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 14.

War Taxation.

The Council of Ministers has taken the important decision to raise several of the principal direct taxes to meet the expenses of the war, which have increased of late owing to the necessity imposed on Turkey, by the Italian concentration at Rhodes, of mobilising three divisions of Redifs (Landwehr) for the defence of the Anatolian coast and of bringing several regular divisions to about three-fourths of their war strength by the incorporation of men of the Ikhtiat (First Reserve). As the troops stationed in European Turkey have been similarly increased, every battalion having been brought up from an average of 450 to about 600 men, Turkey has now (including the regular forces in Tripoli and Yemen and the force now stationed at the Dardanelles) about 500,000 men under arms. The Turkish soldier costs little, but the Army has to be paid, and the Government is therefore justified in imposing fresh taxation. A Bill *ad hoc* will shortly be submitted to the Chamber of Deputies. It will provide, *inter alia*, for the increase of the taxes on professional incomes, urban and rural property, by 25 per cent., and for the increase of the military exemption tax from £T50 to £T60 for men who wish to dispense with service in the Nizam (first line) and from £T30 to £T40 for those wishing to be excused reserve service. Other taxes are contemplated, and a local journal announces this morning that it is proposed to raise the duties on salt and spirits. There is reason to believe that no final decision has been arrived at on this point. The total of the revenue raised by these means is expected to amount to about £T1,750,000. There can be no doubt that Parliament will vote the new taxes, and it will be interesting to see how the population of Turkey, whose patriotic obstinacy has been made an excuse by the Young Turks for their refusal to come to terms over Tripoli, will accept the new situation. There is every reason to believe that it will pay—not cheerfully, perhaps, but with a determination to hold out as long as possible, and give the Government the moral support which it requires for the prosecution of the present campaign.

Albanian Affairs.

The insurrection in N.E. Albania seems to be practically over. The rebels vanished from the Ipek district after a few skirmishes, in which the troops had not more than fifty casualties all told. Their leaders are said to be in Montenegro or to be making for that safe asylum, from which Isa Boletin, at all events, is unlikely to return in a hurry. South Albania is quiet, but the Tosk leaders are growing restive at the Government's reluctance to distribute the school books printed in the Latin character to the schools in the districts which have opted for the European script. The character of Emrullah Bey, the present Minister of Public Instruction, a convinced partisan of the policy of Turcification, a doctrinaire to his finger tips, and the author of several works on Turkish philosophy which no one has been able to understand, explains the Government's failure to keep its promises up to date.

Arabia.

According to the latest information, the campaign against Idris and his Assir insurgents has been suspended in consequence of the excessive heat of the Tehama district. There is no change in the situation in Yemen, where the Imam's promises of aid to the Turks against Idris have not materialised. The Sherif of Mecca remains Turcophile, and has been giving useful assistance to the Government.

The War in Tripoli.

The Agence Ottomane has published a communiqué from the War Office describing the battle of Zanzur. The communiqué avers that the Italians lost "irrefutably" 1,000 killed, and that the Turco-Arabs showed a courage unmatched in human history in resisting an overwhelming Italian force. What is really remarkable in the communiqué is the fact that it is based on a telegram from the Turkish commandant at Benghazi. Now Benghazi, or rather the hinterland thereof, the town being in Italian hands, is some 400 miles from Zanzur, which lies near the town of Tripoli, and is not connected by wire with the headquarters of Fethi Bey's force in the western theatre of war. We must therefore suppose that the Turco-Arabs have made a practical application of telepathy to the transmission of news over large spaces (principally composed of uninhabited deserts), and if this is the case European general staffs will soon be sitting at their feet. Or else—— But the alternative is too obvious.

The Constitution.

A difference of opinion between the Government and the majority of the Chamber over the much-discussed Article 35 of the Constitution has terminated in the victory of the latter body. The majority of the Chamber decided that the article in question should be so modified as to give the Sultan, acting on the advice of the Government, the power to dissolve Parliament and order new elections to be held, in case of the reiterated refusal of the Chamber of Deputies to accept a proposal supported by the Cabinet, but that, after the elections, if the Chamber persisted in its point of view the Government must give way. The Government attempted to carry a further modification of the article, whereby the decision of the newly elected Parliament should not be binding on the Government, but the proposal encountered so much opposition from the Committee Parliamentary party that it has been withdrawn.

NOTES FROM SERVIA.

(From Our Own Correspondent.)

Belgrade, June 15.

Special War Credit.

The Prime Minister, Dr. Milovanovitch, in his capacity of Minister of Finance *ad interim*, asked recently for a special credit of two and a-half million francs for a political purpose, which was not, however, defined. The result was that the Finance Committee refused to sanction the demand, and the Premier was subsequently attacked by the Servian Press.

Two days later he applied for a credit of twenty million francs for military purposes and an additional million for a secret purpose, the nature of which was not divulged to the public.

After a confidential communication from the Minister of War, the Finance Committee was satisfied, and recommended the granting of an extraordinary credit for the amount demanded. The War Minister also applied for five thousand rifles and cartridges from the emergency war stores for the purpose of strengthening the frontier guard.

The effect on the Press is the publication of articles with the heading "Will there be War?" All seem to approve, however, the special grant, which, it is said, is destined to purchase more arms and ammunition. Incidentally it may be remarked that this constitutes the third large purchase of war material within a very short time.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 12.

Lord Kitchener's Provincial Tour.

Notwithstanding the heat on Monday and Tuesday, which made railway travelling and ceremonial receptions peculiarly trying, Lord Kitchener carried out in full the programme of his third provincial tour. The districts visited on this occasion lie in the western half of the Delta, and include Lake Mareotis and the adjacent low-lying country, which is ultimately to be reclaimed as the result of the great drainage scheme. Since one of the objects of the tour was an inspection of the works at Mex, the British Agent was accompanied by the Minister of Public Works, in addition to the Adviser to the Ministry of the Interior and his personal staff. Before arriving at Mex, the party was further increased by the presence of the Adviser to the Ministry of Public Works and the Under-Secretary of the same Ministry. At each of the towns where a stop was made —Merouf, Shebin-el-Kom, Damanhour—scenes were repeated similar to those enacted in the course of the previous tours. Streets were beflagged, numbers of notables and others were congregated in the tents where the receptions were held, petitions were presented, Lord Kitchener's schemes expounded, objections listened to, schools visited—in a word, as much was done as time and opportunity would allow to enable the British Agent to get into direct personal touch with the people. At one place the first thing to catch Lord Kitchener's eye was the inscription in English, "Hail, Friend of the Fellaheen!" while everywhere his arrival was greeted with the strains of the National Anthem. Monday night was spent in the train at Abu Mommos, near Damanhour, and on Tuesday morning the party motored in five taxi-cabs, which had been sent out from Alexandria, to the edge of Lake Mareotis. Along the whole distance of about twenty miles the road—the ordinary agricultural road along the canal banks—was lined with watchmen, while at intervals parties of Bedouins mounted on spirited steeds made their appearance and galloped alongside the procession of motor cars. The party then crossed the Lake to Mex, where the pumping installation was examined, and afterwards proceeded to Alexandria. Here the Industrial School was visited, and after a luncheon given at the Mohammed Ali Club by the Minister of Public Works, Lord Kitchener inspected the working of the Savings Bank system at the Post Office and returned to Cairo at seven o'clock. As on the previous occasions, one of the outstanding features of the tour was the happy manner in which a strict observance of a considerable amount of ceremonial did not prevent direct intercourse with the provincial notables and others who had gathered to welcome the British Agent. The rural population esteem it an honour to be able to discuss their affairs with the British Agent in person, but, with the Oriental love of show, the honour would not be nearly so great if Lord Kitchener were to come among them as an ordinary private person; for to the Egyptian the outward semblance of power is as important as the actual power itself.

Effects of the Annual Report.

As is always the case, the report of the British Agent has furnished the local Press, native and European, with an inexhaustible supply of matter for "copy." What with the reproduction of the text itself and the numberless subjects for comment which it offers, the report must be hailed with delight by editors at a season when the heat of summer is filling Europe-bound steamers with Egyptians and foreigners in search of lower temperatures and the pleasures of fashionable watering places, and when, consequently, a certain lack of material with which to fill the columns of newspapers is beginning to make itself felt. In the present case several factors combined to cause the publication of the report to be awaited with special interest. It was the first report of a new Agent, and, in addition, of an Agent who, as has been repeatedly pointed out in these letters, in virtue of his prestige as conqueror of the Sudan and in consequence of his obvious solicitude for the welfare of the people of the country, has aroused an especial degree of interest among Egyptians. Ever since Lord Kitchener's arrival numberless sayings have been passed from mouth to mouth as being the British Agent's opinion on such and such subjects. It was therefore natural that the public should have looked forward eagerly to reading for themselves the authentic views of Lord Kitchener upon the state of the country as he finds it after a considerable lapse of years.

Egyptian Opinion.

While for the inhabitants of Egypt it is obviously a matter of importance to know the opinion of the representative of the occupying Power, it is for British subjects likewise a matter of interest to learn the views expressed by the Egyptian Press upon the report, as being an indication of the native attitude as a whole towards the policy pursued by the British Agent. It is consequently very satisfactory to find that the comments of the vernacular newspapers are, generally speaking, thoroughly favourable. It goes without saying that in certain quarters certain points are criticised adversely, while elsewhere these very features meet with approval. The general impression gained, however, from a perusal of the mass of published comment is that in native opinion the report is considered to reflect with remarkable accuracy the situation in Egypt, that it contains incontrovertible truths, and that its contents testify to the obvious sympathy towards the people of Egypt with which the British Agent's actions are inspired. Special approval is meted out to the exposition of Lord Kitchener's ideas upon the necessity for education in general and his desire not to allow the intellectual development of the fellah to be improved at the expense of his utility as an agriculturalist in particular; while his remarks as to the attitude of self-restraint adopted by the Egyptians with regard to the war are quoted with much gratification. The observations contained in the report upon the existence and the growth of political parties are not, however, so well received, while the Nationalist *Lewa* takes Lord Kitchener's criticisms as the text for a long defence of the Nationalist party. In the words of one journal, the report leaves no room for doubt that the policy of Lord Kitchener and of Great Britain is actuated by the desire to gain the sympathies of the Egyptians, a policy which Egypt welcomes, since it provides her with a fair field for her activities and the realisation of her hopes.

BRIGANDS IN THE SUDAN.

The following *communiqué* is from the Press Bureau of the Sudan Government :—

During the month of February complaints were received by the Governor of Sennar Province that a band of brigands were robbing with violence merchants and other peaceful travellers in the neighbourhood of Hilla Nawara on the River Rahad.

Energetic measures were at once taken by the Governor to put an end to this state of lawlessness. As a result of these measures, eleven men belonging to this band of brigands were captured.

They were tried before the Mudir's Court at Singa on April 10, and four of them, by name El Nur Ahmed, Said Wad Hamed, Dafass Ahmed, and Abdel Sawi were found guilty of causing hurt in committing robbery and sentenced to ten years' imprisonment and a fine of £20, while Abdel Bassit and Rahama Mohammed, who were found guilty of attempting to rob one Abdel Ghani El Azab, were sentenced to seven years' imprisonment and a fine of £20.

It is most satisfactory to note that this gang of highwaymen have been brought to justice, and that sentences have been awarded them such as should deter others from attempting to emulate their exploits.

Since the capture of this band the neighbourhood where they perpetrated their acts of violence and robbery has become safe once more, and merchants and other law-abiding persons can go unarmed without fear of being deprived of their property, and perchance their lives.

LETTRE D'ATHENES.

(De Notre Correspondant Particulier.)

Athenes, le 14 juin 1912.

La jonction des chemins de fer greco-turcs.

La question du raccordement des chemins de fer helléniques avec le réseau ottoman par la Thessalie préoccupe particulièrement l'opinion en Grèce et on s'explique difficilement le parti pris du gouvernement ottoman de s'opposer à la réalisation d'une œuvre civilisatrice et de progrès par excellence tant pour la Grèce que pour la Turquie.

La construction de cette importante ligne, pour laquelle la Grèce s'est imposé des sacrifices considérables, est due à la maison Emile Erlanger et Cie., et à la Société de Constructions des Batignolles, qui étaient à la tête des groupes concessionnaires français et anglais respectivement, ainsi qu'aux efforts personnels de M. Georgiadès, l'un des administrateurs actuels de la compagnie et qui a été le promoteur de l'affaire. Déjà plus de trois ans se sont écoulés depuis l'achèvement du côté de la Gréce de la ligne du Pirée, par Athènes, à la frontière ottomane, aboutissant prés de la mer (à Papapouli près de Platamona) sans que du côté de la Turque il ait été encore fait le moindre effort pour arriver à la frontière grecque par voie ferrée.

Pourtant il m'a été assuré de source autorisée que le ministre Hilmi Pacha, qui immédiatement après la proclamation de la constitution en Turquie a montré le plus de sollicitude pour le développement des communications, avait conçu un programme général de tous travaux à exécuter dans l'empire et que ce programme, qui a été publié en 1909 en un volume spécial par le ministre des travaux publics ottoman, prévoyait, entre autres, la construction d'une ligne de raccordement entre Salonique et les chemins de fer helléniques par la station de Guida de la ligne Salonique-Veria (Karaférià)—Monastir, comme la seule convenant pour desservir les grands intérêts économiques et commerciaux du vilayet de Salonique.

En effet il suffit de jeter un simple coup d'œil sur la carte pour se rendre compte quel grand préjudice résulterait pour le vilayet de Salonique si, abandonnant ce tracé, qui est celui proposé par le gouvernement grec, on en adoptait un autre à l'intérieur, vers l'ouest, pour effectuer le raccordement du côté d'Elassona avec Veria-(Karaférià)-Monastir, en laissant ainsi le département de Salonique en dehors des communications internationales. C'est justement un tel projet qui est préconisé par les ministres Hakki Pacha et Saïd Pacha qui ont succédé à Hilmi, pour des raisons, dit-on, purement stratégiques qui l'emportent aujourd'hui en Turquie sur toute autre considération d'ordre économique.

En envisageant d'une telle façon cette question essentiellement économique, civilisatrice et féconde en résultats positifs et bienfaisants pour les deux pays, on méconnait sans contredit le caractère de cette œuvre destinée à amener un rapprochement plus sincère entre la Grèce et la Turquie et à servir de grands intérêts communs aux pays limitrophes. Loin d'avoir en vue des projets belliqueux, le tracé proposé par la Grèce tend à écarter toute idée d'hostilité par l'entretien de rapports commerciaux et sociaux plus intimes et plus fréquents avec l'état voisin tandis que la voie proposée par la Turquie vise exclusivement à l'envoi plus rapide de troupes turques à la frontière grecque.

De même, examiné au point de vue économique, le tracé entre Salonique et la frontière grecque par Guida est sans conteste incomparablement moins coûteux que celui par Veria-Elassona. Sa longueur étant seulement de 90 kilomètres et son coût étant évalué à environ 12,000,000 francs, les concessionnaires ne demandent aucune garantie pécuniaire pour sa construction. Le second tracé, au contraire, est non seulement plus long (157 kilomètres), mais traverse des régions montagneuses et excessivement accidentées à une altitude de 850 mètres, ce qui fait que sa construction nécessiterait une dépense de plus de 65,000,000 francs. A ce point de vue l'opération devient financièrement irréalisable sans le paiement d'une forte garantie kilométrique de la part du gouvernement ottoman, que celui-ci—la chose paraît incroyable—n'a pas hésité à demander à la Grece de prendre à sa charge, en entier ou pour la moitié. En outre ce serait une ligne dont les trains, à cause de l'abondance des neiges pendant l'hiver, seraient sujets à de fréquentes interruptions, ce qui rendrait aussi le caractère stratégique qu'on lui attribue assez illusoire.

Les négociations relatives à ce raccordement se trouvent depuis longtemps déjà complètement arrêtées à cause des préoccupations que donne au gouvernement ottoman l'état de guerre avec l'Italie et sans espoir de voir leur reprise de si tôt. La question du raccordement du chemin de fer bulgare de Kustendil avec Koumanovo, d'une longueur d'à peine 63 kilomètres, demeure dans le même état stationnaire, le gouvernement ottoman opposant le même refus catégorique, et proposant, également pour des raisons stratégiques, un tracé inacceptable beaucoup plus au sud.

Dans ces conditions il paraît probable que le gouvernement grec finira par user du droit qui lui est acquis par son contrat avec la compagnie concessionnaire, en obligeant celle-ci à prolonger la ligne jusqu'à la mer, qui est à une petite distance de 4½ kilomètres, et à établir, contre une indemnité annuelle de 100,000 francs, un service régulier entre Tsayési et Salonique par deux bateaux rapides qui feraient la traversée en deux heures environ.

Affaires cretoises.

L'assemblée crétoise révolutionnaire composée de 400 membres a été convoquée pour demain (samedi) dans le but de délibérer sur la situation créée après le résultat négatif de la mission des députés à Athènes, qui a été suivi par la mise en liberté de ceux qui étaient détenus à bord des navires des puissances. D'après les dernières nouvelles reçues de la Canée il paraît que les Vénizélistes se sont unis avec les partisans de M. Coundouros et qu'une entente paraît probable entre MM Michélidakis, Hatzi-Michalis, Giannaris et Coundouros pour abolir le système des gouvernements mensuels et former un gouvernement stable composé des notables de tous les partis.

Grâce aux députés crétois, qui ont obligé la chambre de s'ajourner, nous aurons des vacances qui sont d'autant plus agréables qu'à en juger par la température élevée que nous avons déjà depuis le commencement de ce mois, l'été s'annonce cette année d'une chaleur exceptionnelle. Tout porte à croire que rien ne viendra troubler ce calme, à moins que quelque coup décisif de la part de l'Italie dans l'Egée ne vienne compliquer la situation dans les Balcans.

Après de longues tergiversations causées par la difficulté de concilier les diverses prétentions de ses amis, M. Vénizélos a procédé hier au remaniement du cabinet qu'on attendait depuis le lendemain des élections. Les ministres MM. Bénaki et Alexandris, de l'économie nationale et de l'instruction publique respectivement, ayant, de leur propre gré, résigné leurs fonctions, ont été remplacés, le premier par M. Michalacopoulo, qui s'est fait beaucoup remarquer dans la double chambre par ses qualités parlementaires, et le second par M. Tsirimoko, actuellement président de la chambre. M. Vénizélos a, en outre, attribué à M. Stratos, ancien président de la double chambre, le portefeuille de la marine, dont il s'était chargé *ad interim* depuis son avènement au pouvoir. Quant aux départements des finances et des affaires étrangères, la question demeure en suspens, M. Vénizélos n'étant pas disposé, à ce qu'il paraît, à nommer à titre définitif aux affaires étrangères M. Coromilas, ministre des finances, chargé de l'intérim du dit département depuis le départ de M. Gryparis.

THE CYPRUS DISTURBANCES

THE BRITISH VIEW.

A significant fact in connection with the disturbances in Cyprus is that the sympathies of all the British residents in the island are clearly with the Turks, or Moslems, as opposed to the Greeks. The tone of numerous communications that we have received shows that the "Turk" is looked upon as a better and more desirable citizen than the Greek, and the general opinion seems to be that it is rather a pity that it is not possible to allow the former to give the latter a lesson of which he seems to stand in need. This point of view is well put by an English resident who is in a position to speak with authority on the subject. Writing on the 7th inst., he says:—

"The whole trouble arises from the Greeks—that is to say, twenty or thirty advocates and office-seekers, who influence the rest—having been allowed to get 'above themselves' of late years, and to think that they can, by shouting, do just as they wish and run everything without any consideration for English, Moslem, or any other inhabitants. Take two instances:—

"At Easter last, the High Commissioner proposed to make a few days' tour in the country, and, having had quite enough of the politicians in the Council, he let it be known that while he would be pleased to see any of the villagers, to talk with them about their roads, bridges, and other local needs, he did not wish to receive any demonstrations with Greek flags and petitions for 'Enosis,' *i.e.*, Union with Greece. The Greek Members of Council at once sent orders to the people of the villages through which he was to pass to turn out with all the flags they could find; and because the High Commissioner refused to receive them, they now raise a cry of 'insult to "our" (!) flag.'

"Secondly: On May 24 a party of forty-six students (from eighteen to twenty-two years old), and some professors from the Greek Gymnasium, or High School, in Nicosia, went on an excursion into the country, and on their way back they went entirely out of their road to pass through a small hamlet of about seven houses inhabited by Moslem shepherds called 'mandres' (mandra means 'sheepfold'). The party reached this place about 9.30 at night, with bugles, drums, and flags, and it is said that they even went into the enclosures of the Moslem houses—a deadly offence. The shepherds, awakened in what is to them the middle of the night, turned out in alarm, and one hit the leading professor over the head with a stick. Thereupon the whole brave Greek band ran in all directions, and, arriving at Nicosia, aroused their friends and the police with a cock and bull story of a 'Moslem attack,' etc.

"This is the incident that has led up to the recent little rows between Moslems and Greeks. A few years ago no Greek would have *dared* to approach a Moslem village in the way described—and no Englishman would think of doing so at any time, out of a proper consideration for the people's feelings. But, as I say, the Greeks are above themselves. If the English did not protect them from the Moslems they would soon be put in their place, as they have no pluck at all."

An Official Hint.

On May 5 an extraordinary number of the Cyprus *Gazette* was issued containing a despatch, dated April 18, from the High Commissioner to the Secretary of State for the Colonies, giving particulars of the events that led up to the resignation of the Greek Members of Council, and enclosing a copy of their protest. Then follow the Colonial Secretary's reply and despatches from two of his predecessors in office, one dated March 10, 1882, from Earl Kimberley, and the other, dated May 5, 1904, from Mr. Alfred Lyttelton. The republication of the last-named Minister's despatch, which plainly states that in the event of the agitators of that date pursuing their obstructionist policy, "His Majesty's Government may be forced to reconsider the whole question of the constitution of Cyprus," is not without significance at the present time. If they are wise, the Greeks will take the hint.

The figures, published in the *Gazette*, of the proportion of Christian to Moslem voters, amply justify the Colonial Secretary when he writes: "With regard to the proportion of Christian to Moslem Members of the Legislative Council, I may observe that the figures of the most recent census of the island show that the proportion of Christians to Moslems, while greater than in 1881, is not so great as to justify any revision of the composition of the unofficial element in the Council." The figures are:—In 1883: number of Moslem registered voters, 4,346; Christian registered voters, 16,727; quota per seat, 1,756, *i.e.*, 2.48 for Moslems, and 9.52 for Christians. In 1911: Moslem registered voters, 7,777; Christian ditto, 34,331; quota per seat, 3,509, *i.e.*, 2.21 for Moslems and 9.79 for Christians. The Colonial Secretary states that he is entirely unable to admit that the Christian Unofficial Members have been treated either by himself or by the High Commissioner otherwise than with the utmost courtesy and sympathy.

Our Cyprus Correspondent writes:—

The Greek-speaking Orthodox inhabitants here form four-fifths of the population. It is a pity that they deem it necessary to put Union with Greece, which seems to be, both politically and geographically, impossible, in the forefront of their political programme. This prevents their other complaints—some of them reasonable enough—from obtaining a hearing. Cyprus originally contributed nearly £100,000 per annum towards paying the interest of the Turkish debt. This has since been reduced by a yearly grant of £50,000 from the Imperial Government, but still a lot of money goes out of the island. The Greeks also complain that the annual surpluses are invested in England, not in Cyprus. Like most Greeks, the people here are over-fond of politics, and newspapers are numerous and wordy. What these latter called "the political crisis" came when, on receipt of a despatch from the Colonial Office approving the action of the High Commissioner, the Greek members of the Legislative Council resigned *en bloc*. This, however, does not affect the course of the Administration, as the Turkish and the English official members form a quorum.

After the recent troubles at Limassol, fearing more serious disturbances, the High Commissioner decided to telegraph to Egypt for troops. On June 1 a company of the Devons arrived at Famagusta in a Khedivial steamer, and entrained for Nicosia. There they camped in an empty grain store, part of the railway station buildings. Each night an officer's guard is mounted at the Konak, under the eyes of an admiring crowd of natives, to whom the smartness and "snap" of the Tommies come as a daily surprise. The expense of sending and keeping the troops will be borne by the Cyprus Government. This will solve the problem as to how this year's surplus is to be employed, and should be effective in preventing future trouble.

King's Birthday Celebrations.

On the King's Birthday the High Commissioner held a Levée in the Council Chamber. Greeks not holding official or consular appointments thought fit not to attend, though all the representative Turks were present. After the Levée the police fired a *feu de joie*, and gave three hearty cheers for the King; then there was a march past of mounted and dismounted men. A detachment of the Devons was present, and was inspected by the High Commissioner. In the evening an At Home was held at Government House, where the grounds were prettily illuminated with lamps and Chinese lanterns.

For some time business was nearly at a standstill in Nicosia. Greeks and Turks were mutually afraid of one another, and attributed to each other deep-laid and sinister plots. There was some attempt at boycotting on the part of the Greeks, but at present quietness prevails. The police, who are nearly all Turks, behaved well during the troubles, but are naturally somewhat distrusted by the Greeks. Both sides seem to have confidence in the impartiality of the British, and are reassured by the presence of the troops. The police are being strengthened by the re-enlistment of time-expired men. New elections to the Legislative Council are soon to be held, and it is to be hoped that they will pass off without further disturbances.

Visitors from Egypt intending to spend the summer on Mount Troödos should not be deterred from coming. Not the slightest risk would be run, and no animosity is shown against the English.

LETTER FROM MALTA.

(From Our Own Correspondent.)

Valletta, June 14.

The Mediterranean Question.

Seldom before—never perhaps since, a century ago, it was the stumbling block of European diplomacy—has Malta been so forcibly thrust upon the attention of the world at large as it has been lately by what has been called the "dramatic" conference of the Prime Minister, the Lords of the Admiralty, and Lord Kitchener. Both the alleged object and the place of the historic meeting, to say nothing of the comparative suddenness with which it was decided upon, contributed to invest the event with far more than ordinary significance, which not even the protestations of the Government and of the gentlemen composing the Board could in any way discount. What is the upshot of the conference? Will the famous naval reorganisation scheme be effected now? That is more than one can say—it is the point with regard to which the Board has been most reticent. It would seem that either no definite decision has so far been arrived at, or, that if it has, the Government does not deem it proper as yet to disclose it, for, whereas the *Malta Chronicle* announced on the 4th inst. that it was "officially informed that either Mr. Asquith or Mr. Churchill would make a statement in Parliament in due course," the reply of Mr. Churchill to a question in the House of Commons lately on the all-important point barred the way to further questions, for the present at all events.

The belief that the reorganisation scheme will prove only a temporary measure, far from waning, is daily gaining ground; it is even stated that during the conference stress was laid on the fact that never before has the Mediterranean been in so much need of being patrolled by a strong British fleet as it is now. The belief is strengthened by the way in which the English papers, Ministerialist and Conservative alike, have ridiculed the suggestion that England is about to entrust to France, exclusively or mainly, the safeguarding of the Mediterranean route. Indeed, if the verdict of the English Press is worth anything at all, it may be safely assumed that the scheme in question is destined to be short-lived, for, apart from every other consideration, England will never allow her prestige as the premier naval Power to suffer by any indication that she is not sufficiently strong or efficient to guard by herself her world-wide Empire, the safety of which so largely depends upon the mastery of this classic Middle Sea, where her naval supremacy may be said to have been born.

The report wired to England from Malta that Lord Kitchener is strongly opposed to the weakening of the Mediterranean fleet has so far remained unchallenged; if, as it would appear, it has any foundation at all, it will prove to be the *coup de grâce* of the scheme, for the authority of such a famous soldier would not, one may be sure, be disregarded by those who have in their keeping the safety of the British Empire.

The Royal Commission's Report.

Another factor which has attracted a good deal of attention towards this Mediterranean stronghold of the Empire has been the recent publication of the report of the Royal Commission which was appointed last August, and which sat for two months last autumn, to inquire into the economical and financial condition and the judicial procedure of Malta. Considering that a summary of the recommendations has appeared in The Near East and in most of the English papers, it will be needless here to review them. I think, however, that the attention of English financiers should be drawn to the paragraph wherein the numerous unexploited advantages of Malta as a health and winter resort are dwelt upon.

Of the special articles published by the *Times* in its last Empire Day Number one was devoted to a treatment of the same subject, and the same results were arrived at. The Commissioners find it strange that Valletta "should not possess any hotels of the first-class," and have "ascertained that the Government are willing to surrender on advantageous terms a site in a central, beautiful, and commanding position," which, coupled with the fact that there is a general desire that an English company would undertake the enterprise, ought to offer food for reflection to English capitalists.

Next Year's Prospects.

It has been ascertained that large numbers of people have signified their intention of visiting Malta next year in connection with the Eucharistic Congress, preparations for which are now proceeding apace, under the direction of a numerous and strong committee, representative of all classes on the island and including several English Catholic residents. There is also on foot a proposal to hold during the congress period an "All Malta" exhibition—that is, a general exhibition of all that Malta can show and produce, which, if effected, cannot fail to prove of the highest interest, in view of the important rôle our island has sustained in the history of mankind.

Miscellaneous.

With the approach of the hot season visitors are leaving the island in search of cooler climes, but it is expected that the exodus of the inhabitants will be less than usual, in view of the threatened reappearance of cholera on the Continent.

His Excellency the Governor left for the sister island of Gozo on the 11th inst. on his annual official visit, and returned to Malta yesterday.

THE MEDITERRANEAN COMMAND.

Reuter's Malta correspondent states that Admiral Sir Berkeley Milne arrived there last Friday and took over the command of the Mediterranean Fleet the following day.

Sir Edmund Poë, the retiring commander, issued a memorandum thanking the flag officers, captains, and officers of all ranks in the command for their loyal support and assistance, and declaring that he is firmly convinced that zeal, loyalty, and devotion to duty will continue to inspire the officers and men of the Mediterranean ships in whatever fleet they may find themselves.

LADY STRANGFORD'S HOSPITAL.

The report for 1911 of the Lady Strangford Hospital, Port Said, which has just been issued, states:—"We reported last year on the dilapidated condition of our existing building, and it is with much pleasure that the committee are able to report that good progress has been made towards the much desired object of rebuilding the hospital on modern lines. Through the kind offices of the Governor of Suez, H.E. Mohammed Mahmoud Bey, we have been given to understand that the Egyptian Government would exchange our present site for one some distance further along the coast and grant us a bonus of £E1,000. This suggestion has been very encouraging, and several sums, aggregating over £1,600, have already been subscribed this year by those who have experienced the benefits of the medical attendance and the nursing which the hospital provides. The above amounts, with the £1,305 standing to the credit of the special building fund, make a total of nearly £4,000 in hand. It is the intention of the committee shortly to issue an appeal to shipowners and travellers, and it is earnestly hoped that there will be such a liberal response that the work of the hospital may be continued in a permanent building at no distant date.

"It is with deep regret that the committee have to record the death of the Rev. W. J. Loftie, and, at the time of going to press, that of Mr. W. Royle. Both were members of the executive committee and enthusiastic workers in the cause of the hospital, the Rev. W. J. Loftie having taken a very active interest in its welfare since its inception. Their kindly co-operation will be greatly missed by their colleagues.

"In London the committee have been fortunate in securing the co-operation of three new members—Major-General du Gand Gray, Mr. W. J. Chrystal, and Mr. Alexander Campbell—all of whom have an intimate knowledge of the hospital, the two former having been patients there. They have kindly consented to serve on the executive committee. Lord Inchcape, who has for many years been a member of the committee, has also consented to join the executive committee.

AN OTTOMAN OFFICIAL.

HAZEM BEY, VALI OF BEYROUT.

(By Our Beyrout Correspondent.)

Readers of The Near East will probably be interested in a sketch of the man thanks to whose devotion to duty a massacre was averted on the occasion of the late bombardment at Beyrout.

Hazem Bey received a rather elementary education in the High School of Nigda, his native place, and at the age of fifteen had already started his career in the Civil Service. Passing through the various departments of Justice, Finance, etc., he became well fitted for the responsible post of Governor-General, which he has held successively in various vilayets of the Empire. In addition to his administrative ability and experience, he possesses literary and artistic tastes, having published translations of poets like Hugo, Hafiz, and Sadi, and is no mean artist. He is also author of some works of fiction, wherein he has embodied the great political events of his time.

Hazem Bey was not altogether a self-educated man, for, after entering the Government service, he continued his higher education under private tutors during such leisure moments as he could spare. Marshal Said Pasha, nicknamed "the English," has also contributed to the moulding of his character. While Vali of Konia he kept Hazem Bey near him, and watched with paternal interest over his education; and to Hazem Bey he is the type of a great statesman.

When Governor in Dedeagatch Hazem Bey largely contributed by his influence and popularity to the erection of many public edifices; and at the inauguration of a hospital he made a speech which a spy of Abdul Hamid used as an instrument of calumny to brand him as a Young Turk of subversive liberal ideas. Hazem Bey frequently mentions that one of the spies, in reporting him to Yildiz as a man of dangerous liberalism who committed the heresy of quoting Midhat Pasha, cited the angels as witnesses of the horrible crime! The reign of the spies was then supreme, and Hazem Bey was at once recalled from Dedeagatch. Some time after he was sent as Vali to Mosul, a kind of semi-exile. There he gave proof of his energy by suppressing the raids of the notorious Hamidié tribe that infested the region. As an instance of the extraordinary manner in which zeal was rewarded by the Hamidian Government it may here be mentioned that the official Gazette one week published an expression of the Sultan's gratification at Hazem Bey's display of zeal and energy and the following week announced the appointment of another Vali in his stead. Two and a half years of unremitting labour in such a debilitating climate compelled him to retire for nine months' rest at Constantinople. He was then called upon to fill the post of Councillor of State for one year, and subsequently of President of the Commission of Reform formed for the Vilayets of Smyrna and the Archipelago.

At that time the assassination of the Russian Consul at Monastir took place, and the Government could find no person better fitted to be entrusted with the handling of the delicate situation thus created. It was due entirely to Hazem Bey's resourcefulness and courage that a sanguinary affray between the Vlachs and Bulgars on the one hand and the Greeks on the other was averted, for thousands of excited partisans from the neighbouring villages had gathered together, armed to the teeth and fiercely excited, and the danger of the situation was intensified by a demand from the officers for arrears of pay due to them. It was during his tenure of office at Monastir that he secured the release of the British subject Philip Wills without the payment of £T6,000 ransom demanded by the brigands. This success earned for him a complimentary despatch from Lord Lansdowne.

After acting as Vali of Monastir for three years he was sent to Baghdad in the same capacity, but with greatly increased emoluments. There he was able to leave lasting monuments of his able administration. He endowed the city with a supply of pure water drawn through pipes and inaugurated the system of female census, in order to raise the status of women, who till then had been considered as a negligible quantity. Perhaps the most notable of his achievements while there, however, is his construction of the "Huwaiwa" dam at Saklawieh, on the Euphrates, which was carried out under his personal supervision and under conditions of unusual difficulty. This was done at the nominal cost of £T5,000, and in the astonishingly short space of three months, and gained for him the First Class of the Mejidieh Order in brilliants, as the success which attended his mission in Monastir had won for him the First Class of the Osmanieh in brilliants.

From Baghdad Hazem Bey was transferred to Sivas, but, being unable to withstand the rigours of the climate, he had to resign. Meantime the Constitution was proclaimed, and he was sent to Angora during the Armenian massacres. After establishing order at Cæsarea he returned to Constantinople, to be given the post of Prefect. The office, however, was not exactly to his liking, and he resigned after five months' service. He was next appointed President of the Commission charged with the preparation of an inventory of the Yildiz treasures. After spending three months' leave in England and on the Continent, he returned to Constantinople, but refused all offers of office for a year and a half, feeling the need of a long rest from his labours. Finally he was sent to the Hedjaz, whence after six months' service he was transferred to Beyrout.

In spite of adverse circumstances, Hazem Bey has already been able to show tangible results of his good administration. He has just got the Ministry of Public Works to authorise the repair of the road leading to the southern boundary of the town, through the magnificent pine forest of Ibrahim Pasha fame, after it had lain in disgraceful ruin for years. This will serve to revive one of the most beautiful drives of Beyrout.

THE IMPORTANCE OF PERSIA.

Last Friday afternoon, under the auspices of the Persia Society, Mr. H. F. B. Lynch delivered a lecture on "The Importance of Persia." The meeting was held at University College, and Sir Thomas Barclay took the chair.

The lecturer said that a lesson that had been burnt into the minds of Persians of to-day was that their hope of survival as a nation lay in the recognition by England and Russia, especially by England, of the fact that the continued existence of a neutral State on the tableland of Iran was essential to relations of confidence between those two Powers. The present generation of Persians knew that a maritime Power like England could never desire to extend her frontier into Persia unless compelled to do so in self-defence. They therefore regarded us as their natural friends, and expressed surprise that we were sometimes sufficiently blind to our own interests to hesitate in rendering our friendship effective.

He thought that less attention should be paid to the theory which, while recognising the necessity of a buffer State between us and the Russian Empire, would counsel us to retard rather than to assist its economic development. According to that view the buffer State was most useful to ourselves when no railways and as few roads as possible crossed its territory, when it offered to an invading army the scantiest supplies, so that if the scale turned against the invaders a difficult advance would be followed by a positively disastrous retreat. That doctrine involved the adoption of a purely selfish, immoral policy, and in the long run such policies were doomed to failure. Moreover, a State which was incapable of defending itself constituted at the same time a standing menace to the peace of its neighbours and a bone of contention between them.

They should also consider the eventuality of the suppression of Persian independence, whether openly or in a veiled form. In either case the result would be much the same. It was evident that if that process should be continued—it had already begun—it would end in only one way so far as England and Russia were concerned—in the drawing together and ultimately in the conterminous alignment of their respective frontiers in Asia. None of those possible frontiers coincided with any commanding natural obstacle. They had to contemplate a frontier drawn for considerable distances across elevated plains, which might be likened to the surface of a billiard table. It might not be impossible for us to defend such a frontier; but it would involve an immense expenditure of money and the conversion of this country into a military nation. Nor would the burden upon the Russian Empire be an easy one to bear. Common prudence should, therefore, restrain the diplomacy of both Powers from drifting into such a situation.

LETTERS TO THE EDITOR.

SIR WM. WILLCOCKS AND THE TURKS.

To the Editor of THE NEAR EAST.

Dear Sir,—In the *Daily Chronicle* of the 17th there is an account of an interview with Ismael Hakki Bey, in which the following sentence occurs:—"Hakki Bey was astonished at the independence of Sir W. Willcocks' character. When asked to furnish some written documents for the purposes of raising protests in Constantinople, Sir William replied that he refused to give any documents whatever, not even to the Minister of Public Works," etc. As a matter of fact I was asked by the Bey to send reports regularly to the Committee of Union and Progress on the Wali of Baghdad. I refused. Asked to send them through the Ministry of Public Works, I still refused. On my saying I would send them through the Wali, the Bey shook me by the hand and said he was glad I was working for the Turkish Government. In peace or war the Turk is hard to beat. I trust you will kindly insert this letter.—Yours truly,

W. WILLCOCKS.

London, June 19, 1912.

EGYPTIAN QUARANTINE REGULATIONS.

To the Editor of THE NEAR EAST.

Sir,—My wife and I have recently returned from Palestine. We came from Jaffa to Port Said in a Khedivial steamer, which carried a large number of third-class Syrian deck passengers, mostly consisting, as I was told, of intending emigrants to America.

The ship was delayed for the unreasonable time which is usual at Port Said for the arrival of the doctor for the medical inspection which takes place on board, but when this was completed and all had passed the doctor, the first and second class passengers naturally expected to be able to land. But they were not allowed to do so until all the third class passengers, with their luggage, had been discharged from the ship. This caused a further delay of about two hours.

I understand the necessity of keeping all passengers on board until all have passed the doctor, but why the first and second class should be delayed in leaving until all the third had been placed on lighters I could not understand. Time was of little consequence to the third class—of none to the emigrants, who were not to tranship that day—but why the first and second should be so delayed was incomprehensible to me, to my fellow passegers, and to the captain, who told me it was due to a new regulation. Some wanted to catch trains, others to see Port Said. We, who were going on to Alexandria, wanted to call on friends at Port Said. One might wish to catch the outgoing steamer bound to Europe. I once caught the Brindisi mail boat at Port Said by ten minutes. So I wrote a letter to the President of the "Conseil Sanitaire," Alexandria, respectfully calling his attention to the grievance, and asking if it could not be remedied. I received a reply in the traditional style of red tape officialism, simply informing me that the regulation was so, but not giving any reason why it should be so.

I therefore appeal to your influential paper, which is widely read by the English in Egypt and Palestine, in the hope of getting this stupid regulation amended.

The matter is of importance to all who, like my wife and myself, are accustomed frequently to travel from a Syrian port to Europe viâ Port Said.—Yours truly,

JOHN GRAY HILL.

Mere Hall, Birkenhead, June 17, 1912.

THE FUTURE OF TURKEY.

To the Editor of THE NEAR EAST.

Sir,—With no other object than to save the remaining provinces of the Ottoman Empire from invasion, we appeal to British friends. As readers of history we know that England, even when exasperated with the Porte, has never ceased to show by word and deed a sincere desire to befriend and help to better government the inhabitants of Turkey. As loyal subjects of the Sultan, we are not delegates of any party. We are in no sense politicians or members of any organisation connected with the internal conflicts which, during past years, have distracted and unsettled our countrymen.

But, sir, we plainly see that a grave situation has arisen which cannot successfully be met by smooth words or solved by contemplation and inaction. We are convinced that the situation demands resolution, courage, and the strenuous intervention of diplomacy if the dominions of the Sultan are to be preserved from further dismemberment and the Empire from extinction.

It is unnecessary to recapitulate the trials and griefs under which the entire population groaned during the reign of Sultan Abdul Hamid. We are concerned for the future, and respectfully beg to appeal through you to the British nation.

During the years that we were students in Cairo at the University of El-Azhar we came under the influence and teaching of that great Moslem jurist, Sheikh Mohammed Abdu, who before his lamented death held the important and responsible office of Grand Mufti of Egypt. From his lips and writings we learned that the true and unselfish friend of humanity, and the scrupulous protector of Islam, is the mighty Power of England. Apart from that, we have seen with our own eyes the beneficial activities of England in Egypt for the good government and well-being of all, without respect to differences of race, of rank, of colour, or of creed. What, then, is the aim of our appeal? This can be stated in a few sentences:—

1. As England has honestly regarded her treaty promises to our nation, she can, better than any other, formally propose to the Powers that the Ottoman Empire shall be territorially guaranteed by Europe, and its independence and inviolability secured by an International agreement.

2. We believe that the true interests of Turkey will best be served by the appointment for a term of years of experienced European officials, charged with the reorganisation and supervision of the administration on the lines adopted by Lord Dufferin and Lord Cromer in Egypt, which have rescued that province from bankruptcy, restored financial credit, saved its people from ruin and oppression, and established just and accessible tribunals.

3. It is obvious that if Turkey is now territorially guaranteed and the sovereignty of the Sultan and Caliph secured by International agreement, a great reduction can be made in the heavy burdens of taxation, her floating debt reduced, and her financial position retrieved. At once, the fear of invasion being removed, a much-desired reduction could be made in military and naval expenditure, and the revenues of her rich and fertile vilayets devoted to educational, social, and other much-needed reforms in the gendarmerie as well as in the departments of the Interior, of Justice, of Vakoufs, of Posts and Telegraphs, and of Public Works.

These remarks we commend to your notice in the hope that they may receive sympathetic consideration. The extreme danger of the present situation, and its threatened disastrous consequences to the Ottoman Empire, is our apology for addressing you.

With great respect, we beg to remain your most faithful servants,

SADIK, MEHMED SHURRI,
DJELAL-ED-DIN, HASSAN TAHSIN,
ALI HASSAN, MAHMOUD LOUTFI.

Stamboul, June 15, 1912.

LA PALESTINE ET LES JUIFS.

Monsieur le Redacteur du NEAR EAST.

L'article de M. Norman Bentwich sur la "Jewish Colonisation for the Ottoman Empire," publié dans votre estimable journal, en date du 16 et du 23 février, a eu le don de provoquer deux répliques, l'une signée, l'autre anonyme, d'un caractère nettement hostile au mouvement sioniste, chacune employant cependant dans la discussion des procédés divers. C'est surtout l'article anonyme de votre "correspondant occasionnel" de Palestine: "Zionism as a Practical Solution of the Jewish Question," qui mérite une réfutation, et dans ce but je viens vous demander l'hospitalité de vos colonnes.

D'abord, votre "correspondant occasionnel" palestinien semble confondre, et à dessein, la question de la colonisation juive en Palestine avec la question du sionisme comme une solution pratique de la question juive. Sioniste d'avant la lettre, c'est à dire avant l'apparition de la brochure du Dr. Herzl et avant la convocation des congrès sionistes, je puis affirmer, sans crainte d'être démenti, que la majorité écrasante du parti sioniste était toujours indifférente à l'idée d'un état autonome juif en Palestine. Le sionisme politique proprement dit, qui a eu quelque adeptes au temps d'Abdul-Hamid, n'est plus prôné aujourd'hui par personne, et les déclarations repétées des derniers congrès sionistes sont formelles à cet égard. Déjà en août 1898 j'ai pu, dans une série d'articles publiée dans le *Temps*, indiquer la préférence marquée que la grande majorité du parti sioniste manifestait toujours pour le *sionisme pratique*, c'est à dire pour l'idée du repeuplement de la Palestine par les Juifs sans conditions autres que quelques garanties de sécurité et l'abolition de toute restriction pour les Juifs venant s'établir en Palestine.

Quant aux sionistes habitant actuellement la Palestine, il est tout-à-fait inexact de dire que l'idée d'un état autonome juif est leur idée derrière la tête. Nous autres, sionistes, qui avons donné de notre personne et sommes venus nous établir ici, au lieu de rester en Europe, notre sionisme à nous est essentiellement pratique. Nous n'avons d'autre idée que celle du repeuplement de la Palestine par les Juifs. Des milliers et des milliers d'entre nous sont déjà devenus de bons et loyaux sujets ottomans; d'autres attendent l'occasion de le devenir à leur tour. Malgré les quelques défections qui se sont produites parmi les Juifs à l'époque de la promulgation de la loi militaire, défections d'ailleurs beaucoup plus nombreuses parmi les

Digitized by Google

indigènes chrétiens, on peut affirmer d'une façon absolue que l'énorme majorité des Juifs habitant la Palestine sont profondement attachés au pays et à l'empire ottoman. Si une puissance étrangère quelconque venait mettre la main sur la Palestine, les Juifs, et les Juifs sionistes surtout, considéreraient un tel événement comme une *calamité nationale*. La nationalité juive comme telle ne pourrait voir dans un tel événement que la ruine de ses aspirations. En effet, comme le dit votre "correspondant occasionnel," nous venons ici en apportant notre culture et notre langue. Nous voulons vivre notre vie culturelle à nous, parler notre langue à nous. Mais nous ne voulons rien autre chose. En d'autres termes, c'est la *nationalité culturelle* que nous voulons sauver et sauvegarder. Mais nous ne voulons nullement restaurer notre *nationalité politique*. C'est justement le mérite de l'empire ottoman de ne pas vouloir l'absorption des nationalités et l'anéantissement de leur culture et de leur langue. L'empire ottoman reconnait qu'on peut être bons sujets ottomans sans perdre le droit de conserver sa nationalité culturelle. On ne peut pas en dire autant des autres puissances européennes. Notre prédilection sera donc toujours du côté de l'empire ottoman, qui ne mettra aucune entrave à la conservation de notre nationalité culturelle, qu'il ne confond pas avec la nationalité politique.

Votre "correspondant occasionnel" s'arrête longuement sur les difficultés insurmontables de l'établissement en Palestine d'une grande portion de Juifs européens. Mais ses arguments sont absolument contredits par les faits. L'expérience de la colonisation juive en Palestine pendant trente ans est une réfutation victorieuse de la thèse soutenue par votre "correspondant occasionel." Le Juif européen a eu rélativement très peu de peine à pousser une racine profonde sur le sol de la Palestine. Son acclimatisation a été rapide et à peu près complète. C'est un fait avéré que le Juif, même celui venu des confins du Nord, supporte très facilement le climat sain de la Palestine.

Les colons juifs, il est vrai, ont souffert, dans certains endroits insalubres, de la malaria. Mais il n'est pas vrai de dire que les indigènes habitant à proximité des marécages sont indemnes de ce fléau. Pour s'en convaincre, votre correspondant occasionnel, qui prétend avoir fait une étude approfondie de la question, n'aurait eu qu'à s'adresser aux médecins juifs des colonies Sichron-Jacob, Hédera, Atlit, etc. Dans un récent article, paru dans *l'Echo sioniste* de Paris, sur la lutte contre la malaria, j'ai cité le fait curieux que parmi les indigènes de Caiffa il y a un dicton arabe qui dit que "les grandes rates sont originaires d'Atlit"—endroit réputé par la malaria et d'ailleurs actuellement assaini par les Juifs. A proximité de Hédera un village tscherkess a été décimé pendant de longues années par la malaria. Quand les Juifs ont fondés, il y a vingt ans, la colonie de Hédera, les Tscherkess comptaient déjà des dizaines de victimes. Les travaux de desséchement exécutés par les Juifs de Hédera seuls ont sauvés le village tscherkess d'une extinction complète.

Je cite ce fait parce que l'auteur de l'article dont je m'occupe oppose la faculté d'acclimatisation des Tscherkess à la nôtre.

De ce qu'il y a en Palestine plusieurs endroits insalubres, s'ensuit-il que la Palestine dans son ensemble soit un pays malsain? Rien de plus erroné. Ceux qui ont étudié la Palestine s'accordent à reconnaitre, au contraire, que le pays est généralement sain. L'insalubrité n'y est nullement inhérente à la nature du sol et au climat. Ici encore l'expérience de trente ans de colonisation juive est venue aujourd'hui confirmer ce fait, que l'insalubrité constatée dans plusieurs endroits est due uniquement à des causes passagères et elle est partout combattue avec efficacité. Ces causes sont la négligence, le relâchement, l'indolence de l'indigène, l'insuffisance de l'administration. La preuve en est dans ce fait, que partout où le Juif a mis le pied, c'est-à-dire partout où la terre a été intensement cultivée, où le reboisement s'est effectué, où le desséchement rationnel s'est fait, l'insalubrité a presque disparue. On peut citer à l'appui de ce qui précède la colonie Petach-Tikwah, où la malaria sévissait, il y a trente ans, avec une grande vigueur et d'où elle n'est encore complètement disparue que parce que les terrains marécageux environnants appartiennent au gouvernement militaire et les Juifs ne peuvent y entreprendre aucun travail de desséchement. Mais la culture intensive des terres appartenant à la colonie et le reboisement ont produit leur effet salutaire. Petach-Tikwah est aujourd'hui une colonie florissante et la malaria a perdue énormément son influence sinistre.

Plus caractéristique encore est, dans ce sens, l'histoire de la colonie de Hédera. Entourée de marécages, cette colonie a énormément souffert de paludisme. Le reboisement, et notamment la plantation de plusieurs centaines de milles d'eucalyptus, les travaux de drainage, la culture intensive des terrains et le forage d'un puits alimentant la colonie d'une eau pure, ainsi qu'un certain nombre d'autres mesures sanitaires, ont eu raison de la fièvre bilieuse, qui avait fait plusieurs dizaines de victimes. Ici encore, si les Juifs pouvaient acheter un terrain voisin de Hédera, qui est le foyer du paludisme, et y exécuter les travaux de desséchement et de reboisement qu'ils ont déjà exécuté sur les terrains leur appartenant, la malaria serait aujourd'hui, à Hédera, à l'état de souvenir. Mais, déjà maintenant, la fièvre bilieuse a disparue. Le cas de la colonie d'Atlit est encore plus probant. Cette colonie, fondé il y a à peine quatre ans, souffrait du paludisme le plus aigü. Deux ans après sa fondation, la Jewish Agricultural Experimental Station est venue s'y installer. Cette dernière institution, grâce à un ensemble de mesures aussi rationnelles qu'efficaces, a fait, en deux ans, complètement disparaitre le paludisme. Voici une petite statistique éminemment curieuse: en 1909 il y a eu, dans la colonie d'Atlit, sur 58 habitants: en août 80 cas de malaria, en septembre 180, en octobre 150, en novembre 120. En 1910 il y a eu encore, en août 80 cas de malaria, en septembre 80, en octobre 100, en novembre 120. En 1911 ces chiffres tombèrent: en août à 6, en septembre à 27, en october à 8, en novembre à 18.

Je demande à votre "correspondant occasionnel" si dans un pays où l'insalubrité tient à des causes inhérentes au sol et au climat, on pourrait obtenir des résultats pareils en deux ans!

Comme je l'ai dit, et contrairement à l'assertion de votre "correspondant occasionnel," les indigènes souffrent si peu de paludisme que les gens du village arabe Atlit sont connus dans toute la région comme ayant des rates hypertrophiées, c'est-à-dire comme étant infestés de paludisme. Ai-je besoin d'ajouter que les travaux exécutés par les Juifs à Atlit ont eu leur effet bienfaisant sur le village arabe comme les travaux exécutés à Hédera ont eu leur efficacité salutaire sur le village tscherkess voisin?

Votre "correspondant occasionnel" parle de Jérusalem. Mais il est quelque peu surprenant qu'un homme prétendant avoir fait "a considerable study of the subject on the spot," ignore ce qui est connu de tout le monde ici, que le paludisme à Jérusalem, assez peu nocif d'ailleurs, est dû uniquement à son eau de citernes, et le jour assez proche, espérons-le, où Jérusalem sera alimentée d'eau pure de source la malaria aura vite fait de disparaitre.

Passons à une autre assertion de votre "correspondant occasionnel." La Palestine, dit-il, est habitée, et il n'y a pas là des terrains sans propriétaires. On pourrait aisement objecter que la Palestine possède d'assez immenses étendues de terres ayant appartenues avant la constitution à la couronne, et dont le gouvernement ottoman a pris possession après la proclamation de la constitution. Ces terres très fertiles restent incultes faute de bras et de capitaux. Mais il y a un autre aspect de la question. Les terres appartenant aux paysans ou aux gros propriétaires sont aujourd'hui cultivées par des moyens primitifs et ne donnent qu'un rendement très médiocre. La culture intensive, et notamment l'horticulture, sont à peu près inconnues du paysan, du propriétaire, et de ses métayers. Or, la capacité productive du sol palestinien, particulièrement dans la culture intensive, est enorme, prodigieuse.

Et ici encore l'expérience de trente ans de colonisation juive et les résultats fournis par elle sont tellement probants dans ce sens, qu'il faut être aveugle ou mal intentionné pour les mettre en doute. Là où il n'y avait il y a trente ans que du sable il y a aujourd'hui, grâce à la colonisation juive, des plantations d'amandiers, d'oliviers, de vignes etc., sans parler des orangeries qui font vivre des milliers et des milliers de Juifs et de non-Juifs.

Or, la Palestine a aujourd'hui à peine vingt habitants par kilomètre carré. Mais ce chiffre avec l'exploitation rationnelle du sol pourrait facilement quintupler. De sept cent mille âmes la Palestine rationnellement cultivée pourrait voir le chiffre de sa population devenir 3 à 4 millions d'âmes. L'indigène n'aurait rien à y perdre, il n'aurait qu'à y gagner. Une partie des terres passeraient entre les mains des Juifs, à beaux deniers s'entend. Mais l'indigène, au lieu de végéter comme il le fait aujourd'hui une existence misérable en grattant la terre avec ses instruments aratoires des temps d'Abraham, suivrait le mouvement général de progrès. D'ailleurs une grande partie des terres de la Palestine appartient à des gros propriétaires qui n'en tirent pas plus de profit réel de sa terre à lui.

Bien entendu, augmenter la productivité de la Palestine et par là augmenter dans de proportions considérables sa population, n'est pas la tâche d'un jour ni d'une seule génération.

Mais l'élan est donné, l'œuvre commencée. Elle se poursuit avec opiniâtreté et les résultats obtenu pendant trente ans font bien augurer de l'avenir.

THE BALKAN COMMITTEE.

ANNUAL MEETING AND REPORT.

The annual meeting of the Balkan Committee was held on Wednesday afternoon at the Westminster Palace Hotel, Mr. Noel Buxton, M.P., presiding. Among those present were Sir Edwin Pears, Sir Arthur Evans, Archdeacon Beresford Potter, Mr. Ponsonby, M.P., and Professor Westlake. The Executive Committee reported that, in pursuance of the policy approved at last year's annual meeting, they have closely watched events in Turkey, and have availed themselves of frequent opportunities of impressing on members of the Turkish Government the effects of their actions on public opinion in this country. The report continues:—

Recognising fully the difficulties with which the new administration was faced, they continued to maintain the attitude of friendly criticism which, they had reason to believe, was still welcomed by a large and active party of reformers in the Committee of Union and Progress, as tending to strengthen their hands against the reactionary and Chauvinist section. Your Committee were prepared for delay in the carrying out of many constructive internal reforms which might well tax the abilities of administrators much more experienced than those whom the new regime could be expected to supply. . . . When the war with Italy broke out, they saw that the difficulties of the Turkish Government would be enhanced, and this was clearly stated in the remonstrance which they felt constrained to publish at the end of the year, when the accumulation of reports received from absolutely trustworthy sources in Turkey forced upon them the conclusion that in Macedonia and Albania there was a recrudescence of the old cruelty and oppression. The publication of this remonstrance attracted a gratifying measure of attention in Turkey, and the Balkan Committee was accused of unjustifiable interference with the internal affairs of a friendly nation, and was challenged both in the native Press and by individuals to produce the evidence on which the charges were based. Without disclosing the names of the informants, your Secretary drew up a detailed list of many crimes, established by European evidence, without which the Committee has never made charges of outrage. To this a general confirmation was supplied by statements made orally to the Committee by Sir Edward Boyle, Mr. H. W. Nevinson, Mr. Leland Buxton, and others who had recently visited Albania and Macedonia, all of whom bore reluctant witness to the deplorable condition of the inhabitants of those districts. In Albania, where the suppression of the insurrection of last year had been carried out with ruthless severity, the distress was so great that the old Macedonian Relief Committee opened a fund (in the collection of which members of your Committee took part), for the purpose of ameliorating the wretched conditions in which the vast bulk of the population of Northern Albania was involved. From Macedonia direct and detailed information was supplied to the Committee, not only by European residents personally known to them, but also by two delegates from the Central Committee of "L'Organisation Intérieure" of Macedonia, Professors Ghéorgov and Miletitch, whom the Committee interviewed at a special meeting.

On the evidence derived from these various sources your Committee sent in March a strong remonstrance and appeal to the leaders of the Young Turk party, calling special attention to the novel and sinister feature of the implication of Government officials in the crimes, and urging that unless early and drastic changes were made, the claims for autonomy on the part of the oppressed provinces would be held to be justified, and that not improbably there would be heard in Europe a demand for the revival of the "Reval programme," with its forcible supervision of native officials by international control, as the best if not the only possible solution of the ever-threatening problem of the relations of the Porte with its subjects of alien race and religion. . . .

To meet the complaints made by the supporters of the Turkish Government that the manifestoes of the Balkan Committee were inspired by unconditional hostility to all Turkish rule, your Committee published an open letter suggesting that the Turkish Government could, if it chose, counter the proposals for international control by the appointment, both for Albania and Macedonia, of a Special Commission—consisting of an Englishman (such as Mr. Graves), a Frenchman, and a Turk, who had not hitherto held any official post in the Balkan States, with full and autocratic powers of administration. In spite of the protests made in Constantinople newspapers against your Committee's proposals, a vindication of their action may be found both in the appointment and results of that Commission, and in the tentative suggestions recently made even in official journals for the appointment of Europeans to assist the Valis—suggestions all the more noteworthy because they have appeared on the morrow of a general election, in which the Committee of Union and Progress secured a continued lease of power by an overwhelming majority.

Lest it should appear that the work of the year has been confined to hostile criticisms of the Turkish Government, and that its failures to establish justice and security in Albania and Macedonia have wholly alienated the sympathies and destroyed the hopes formed at the time of the Revolution, it may be recorded that the practical proof of goodwill towards all races and religions in the Turkish Empire, shown by the grant made by your Committee for the spread of education, elicited grateful acknowledgment, even from Turkish journals, as also from the Minister of Education. . . .

In view of the present position of affairs in Turkey, and especially in the Balkan States, your Committee believe it to be of vital importance to maintain their organisation and continue the active work which has been the special function of the Balkan Committee in the past.

The Chairman, in moving the adoption of the report—which was seconded by Sir E. Boyle and agreed to—said they would all rather see reform from within than compulsion from without, and they did not despair of it.

Professor Westlake, K.C., moved "That this meeting regrets that recent reports from the European provinces of the Turkish Empire show that unless steps be speedily taken to remedy the misgovernment, it will become urgent that the Great Powers, in fulfilment of the obligations contracted under the Treaty of Berlin, should take concerted action in the direction of effective control." Sir Edwin Pears, in seconding, said that in the interests of the Turkish Government and of all the populations of the Balkan peninsula, he would urge the Porte to create three new provinces, with a Vali or governor to each, one for Macedonia, another for North Albania, and a third for South Albania. The Governor, as in the case of the Lebanon, should be appointed by the Sultan, with the consent of the Powers, for a term of years. The three provinces would remain parts of the Empire, and would continue to send deputies to the Chamber.

The resolution was carried unanimously.

NEAR EAST IN PARLIAMENT.

Affairs in Albania. June 13.

Mr. T. Taylor asked the Secretary of State for Foreign Affairs whether he could give any reassuring news with regard to the rising in Albania.

Sir E. Grey: The latest reports are somewhat contradictory and it is impossible for me to hazard any opinion as to the course which events will take. It is clear that serious local disturbances have occurred, but it is doubtful, so far as I am informed at present, whether these events would justify the conclusion that a general rising is to be feared.

Trans-Persian Railway. June 13.

Colonel Yate asked the Secretary of State for Foreign Affairs whether, in view of the statement that Russia was quite prepared to meet the views of India on the question of the break of gauge between the Russian and Indian systems in the construction of the proposed Trans-Persian railway, he could now give an assurance that the Indian railway system and the Indian gauge would be allowed free entry into Ispahan and Yezd, and that the Russian system and Russian gauge would not be advanced anywhere to the south of those places.

Sir E. Grey: Should a Trans-Persian railway come to be constructed, His Majesty's Government have reserved their freedom of action in the completest possible manner as regards the construction of the line, which, of course, includes the question of its gauge. It is impossible, at the present early stage of the proceedings, to give an assurance such as that asked for by the hon. and gallant member on that or any other point of detail. This particular point will require careful consideration in consultation with the Government of India.

In reply to a supplementary question by Colonel Yate,

Sir E. Grey said that, with regard to the question of gauge, he could not give a definite assurance without consulting the Government of India. Nothing irrevocable had taken place, and nothing irrevocable would take place before the Government of India had been very carefully consulted on this very important point.

Mecca Pilgrims. June 13.

Sir H. Carlile asked the Secretary for Foreign Affairs if he could obtain from the Italian Government, for the satisfaction of His Majesty's Mahomedan subjects, an undertaking that genuine pilgrims to Mecca and Medina during the approaching season would be allowed to proceed to their destination without molestation.

Sir E. Grey: The question of the pilgrim traffic in the Red Sea is one that has already occupied the serious attention of His Majesty's Government. Early in the year His Majesty's Government expressed to the Italian Government the hope that every consideration consistent with the necessities of war would be shown to pilgrim ships going to or leaving the Hedjaz, and that no measures which the Italian Government might be impelled to take in those waters would in any way hamper the pilgrim traffic. His Majesty's Government have received assurances that the Italian Government would keep carefully in view the requirements of the pilgrim traffic, and were fully conscious of the necessity of not impeding it.

THE PRESS ON THE NEAR EAST.

Islam in Egypt and India.

Apropos of Syed Rashid Raza's visit to India for the purpose of presiding at the annual Nadwah session, the *Comrade* has some interesting reflections upon the relations existing between the Moslems of India and their co-religionists in Egypt and Turkey:—

It is unfortunately true, as some of our Egyptian contemporaries have observed, that the knowledge of Arabic is confined to a few amongst the Indian Mussulmans, and consequently the number of those who can follow the developments of the Egyptian reform movement with intelligent interest is limited. Fortunately, however, it is also true that, though an overwhelming majority even of the Mussulmans who have received modern education is ignorant of the sacred language of Islam, they feel an ever-widening interest in the affairs of the whole Islamic world and try to keep themselves in touch with their brethren abroad through the contemporary literature to which the English language has given them an access. Then, again, the modern Press has brought the Islamic world nearer in every part. The views of the Egyptian and the Turkish papers on topics of general Islamic interest are translated and published by the vernacular Press throughout India. This process is growing with the growth of the interest it has helped to create. The average Indian Mussulman knows more about his co-religionists in Turkey, Arabia, Egypt, and other parts of Africa, in China, and Russia than his predecessor of the last generation, and he is already beginning to perceive the essential unity of the secular problem that the Mussulmans all over the world have got to solve.

The message of Syed Rashid Raza to the Indian Mussulmans, with its note of earnestness, sincerity, and love for Islam, was delivered in tones of passionate eloquence. They recognised in it the accents they had first begun to hear upwards of forty years ago. Sir Syed Ahmed Khan had asked the Mussulmans to get out of the ignorance and prejudice into which they had sunk, to understand the liberal spirit of Islam, to interpret it not as a bundle of shibboleths and conventions to which it had been reduced by ignorant mullahs and mullah-ridden fanatics, but as the most practical, complete, and satisfying philosophy of life and conduct, and to bring it to bear on the conditions of secular progress. The burden of Syed Rashid Raza's profoundly learned discourse was the same. It must have impressed all those who had the privilege of hearing him with the underlying unity of the Islamic renaissance throughout the world. The main lines of intellectual progress and social reconstruction are the same. It may, however, be noted that allowance shall have to be made everywhere for the differences of environment. Variations in minor features of the development of the various Moslem communities should rather be encouraged than suppressed. Insistence on the cast-iron mould must be avoided, for all such attempts, however laudable, are unscientific.

The writer concludes by expressing the hope that Syed Rashid Raza will visit India again, and the wish that there were greater and more frequent intercourse between India and Egypt.

Bulgarian Policy: a German View.

The Berlin correspondent of the *Frankfurter Zeitung*, than whom none is perhaps better initiated into the inner mysteries of the Wilhelm Strasse, assures his readers that the visit of King Ferdinand to the German Emperor was purely a matter of personal courtesy and had nothing to do with politics. He comments as follows:—

The allusions [made during the banquet] to a love of Peace, as also to the *necessity* of Peace, were words of greeting wisely chosen . . . . for the present situation in the Balkans is suffering a reaction, caused by the Turco-Italian campaign, and the difficulties thus presented must, in order to avert any warlike troubles, be surely and wisely guided, else the inevitable results are bound to be far-reaching.

"Bulgaria," he continues, with a touch of irony excusable enough in face of the recent Weimar speeches, "Bulgaria has, as far as we are aware, no *Flotten verein;* but the elements which play a part here arrogated to themselves by the Pan-Germans find a fruitful soil for their activities in the Macedonian question and the temptation to compare both leaps to the mind when the men who guide the destinies of Bulgaria hold converse with German statesmen. There, however, they have a more drastic way of dealing with such matters, when necessary, than are any applied to the Pan-Germans. . . ."

The value of Peace (he concludes) was emphasised in the speeches of both monarchs with a certain circumspection (mit Bedacht gewissen Vorsicht), and we are ready to believe that our Bulgarian guest may have accentuated the peaceable tendency of his home policy somewhat more strongly in view of the fact that so active a policy here exempt from taking into account those elements in whose opinion a wise and peaceful policy is neither "national" nor "brave" enough.

Italy and the Greek Islands.

The Rome correspondent of the *Times*, under date of the 13th inst., forwards some extracts from a despatch published by the *Messaggero* of that date, emanating from its Athens correspondent and giving an account of a visit to Rhodes. The writer describes the measures taken by the Italians for the administration of the island at some length. But perhaps the most interesting part of the article is the last paragraph, which runs:

The correspondent gives an animated account of a visit paid to Kalimnos last Sunday, June 9, by Admiral Viale. The admiral and his staff attended a *Te Deum* in the Metropolitan Church, and after the ceremony listened to an address which had been drawn up by the two chief island authorities.. This address, after expressing gratification at the admiral's visit, continued, according to the *Messaggero*, in these words:—"Our desire, cherished for long centuries past, has been to unite ourselves with our great mother, Greece. Gratitude towards our Italian brothers does not prevent us from revealing our sentiments, and even prompts us to declare our wishes and hopes. We know that your mission aims only at the liberty, and not at the conquest of these lands. If our desire for union with Greece should, for political reasons, not be capable of immediate realisation, we none the less feel the liveliest satisfaction at finding ourselves under the protection of our Italian brothers. For this situation means at least for us the removal of the barbarous dominion which has made barren the fertile lands of Asia Minor, the fair Ionic shores, and the picturesque islands of the Ægean." Admiral Viale seems to have answered appropriately, assuring the islanders of his sympathy and promising to make their wishes known in Rome. In spite of the diplomatic reticence of Italian admirals, and even of Roman newspapers, it is evident enough that any idea of a restitution to Turkey at the end of the war of the islands now occupied will have to be abandoned. Not that Italy at all contemplates their permanent occupation. Though Italian newspapers find pleasure in recalling historical and legendary ties between their country and the South Ægean, there is no popular aspiration for dominion in those seas. On the other hand, the use of the islands for bartering purposes in the negotiation of terms of peace has in popular sentiment become impossible. At the most, Italy could bring herself to hand over her conquests to the other European Powers, and only then because she will feel the assurance that those Powers will recognise the same impossibility of restoring them to Turkish rule.

Articles to Note.

TURKEY AND ITS PEOPLE.
By SIR EDWIN PEARS. 12s. 6d. net.
"Full of interesting analyses of national character (notably the Greek), and suggestive thoughts on the many curious survivals of ancient faiths, and on the various religions represented in the Turkish Empire."—*The Times.*
"The names which one encounters throughout the book bear witness to the wide range of experience gleaned from contact with people of divers races, creeds, and conditions during a residence in the land of over thirty years, some of them fraught with weighty events."—*Pall Mall Gazette.*

TURKEY OF THE OTTOMANS.
By LUCY M. GARNETT. With numerous illustrations. Cloth, 6s. net.
"A useful and handy book, which gives a mass of really valuable information in convenient form. . . . Not only those who have no personal knowledge of Turkey and its peoples, but also those who have, will find it thoroughly interesting."—*The Near East.*

NEAR EAST BOOKSHELF.

A JOURNALIST IN EGYPT.*

The potential attraction which the name of Egypt carries to the general public is proved by the number of books which have been published concerning the country during recent years. To the student of Egyptology her interest is inexhaustible, for the treasures beneath her soil must, as one by one they come to light, present new and absorbing problems to the savants who devote their lives to the unravelling of her history. But the majority of books which have recently made their appearance on Egypt deal entirely with questions of present-day importance and studiously avoid all reference to her past. Mr. Alfred Cunningham, who already holds an honourable position among writers on the Far East, is the latest author to succumb to the fascination which Egypt presents to the writer. As editor of an English newspaper—now, unhappily, defunct—he spent a few years in Cairo, and the present volume is the result of observations made during that period. We glanced through the preface with some misgivings. "The impressions are those which concern chiefly the resident," we read, "whose view of the country, its people, and its future is naturally different from that of the tourist. . . ." This did not seem to promise much scope for originality, as it has formed the text upon which most authors have compiled their work, from Lord Cromer downwards. But we were mistaken. Mr. Cunningham's views are interesting, and though he has of necessity covered much ground which has been beaten to powder by former writers, there is no suggestion of plagiarism in his book, while the shrewdness and sincerity of some of his criticisms make it a work to be reckoned with.

As we have intimated, the main purpose of the work is political, but the author begins with a general survey of the country, in which the principal towns are described, with their inhabitants, amusements, and chief buildings. The material included in the volume would indeed have justified a division into two parts—General and Administrative or Political. As it stands it lacks coherency; the chapter dealing with the people of Egypt is certainly misplaced, and should have been included in the beginning. One of the pleasantest features of the book is the strong Imperial feeling which dominates the author's every chapter. Although he is unsparing in his criticisms of the Government when dealing with questions where he considers the action, or inaction, of the Government to be at fault, it is the criticism of one who considers the prestige of England too great a thing to be belittled by its representatives abroad. Especially severe is Mr. Cunningham upon the Government for its alleged inclination to take shelter behind the Capitulations in cases where financial or other difficulties stand in the way of much-needed reforms. ". . . We are asked to believe," he writes, "that the want of an efficient and effective public health department in Egypt is due to the absence of the necessary authority from the fifteen Powers concerned, which the Government of Egypt is still unable to secure." He then proceeds to analyse the possibilities of such a reason being the true cause of Government apathy, and it must be admitted that the ridicule which he throws upon the suggestion seems to be perfectly justified in the light of his arguments.

In the recapitulation of the various absurdities committed by the parties which sprang up in the wake of Mustapha Pasha Kamel, the author is inclined to be tedious. He covers no new ground, nor does he offer any comment likely to be of benefit to the reader, and the entire chapter "Parties and Politics" might have been omitted without any detraction from the value of the work as a whole. The chapter on the Sudan is interesting, but it is quite out of place in this book, which professes to deal with Egypt. The Sudan is a different country, and the fact that the Agent-General of Egypt also holds a position of authority over the Sudan is insufficient to justify its inclusion here. In certain instances, too, Mr. Cunningham is inclined to be careless and contradictory in his statements, as when in one paragraph he urges the necessity for the passing of an Arms Act by the Government, "which will make it an offence for any person to carry or possess any kind of deadly weapon without a licence," and in the next few lines announces that "The law of Egypt says now that no man can carry arms without a licence." All through this same chapter the author appears to have ignored the fact that the Capitulations, though possibly abused on some occasions, are a very real obstacle to effective reform in this instance, since quite a quarter of the most disreputable ruffians in Egypt are foreign subjects. In a later chapter of the book, however, we find a reference to the matter in the following words:—

> The worst feature of the Capitulations is that their existence is exploited by so many European races, their one purpose being to obtain personal advantages and wealth by the evasion of reasonable and just laws. In civilised countries Europeans are amenable to all the laws; in Egypt, if they are so minded, they are amenable to few. The Capitulations were never introduced to promote lawlessness, but are frequently so interpreted by those Europeans whose temperament, cupidity, and nationality render them impatient of restraint. The law courts daily provide evidence of this, and the bulk of the aggressors cheerfully ignore their jurisdiction.

What "nationality" is referred to by Mr. Cunningham he does not explain, and inuendoes of this description do not serve any useful purpose. But the book, taken as a whole, is both interesting and instructive, and although the writer is inclined to be distinctly careless on some occasions, we can recommend it to our readers as an honest and straightforward expression of opinion and fact regarding Egypt and the Egyptians. It is profusely illustrated.

* "To-day in Egypt." By Alfred Cunningham. (London: Hurst and Blackett. 10s. 6d. net.)

NEAR EAST BOOK NOTES.

In "Poems by Carmen Sylva," published by Messrs. Jarrold, A. H. Exner has translated into English some of the most beautiful of the Queen of Roumania's verses.

The paper, "Hittite Problems and the Excavation of Carchemish," read by Mr. D. G. Hogarth before the British Academy, has been reprinted from the Proceedings and published (for the Academy) by Mr. Henry Frowde, the price being only one shilling net.

That veteran theologian, Dr. T. K. Cheyne, whose literary activity is little short of marvellous, has another new book in Messrs. Black's list. It is entitled "The Mines of Isaiah Re-explored," and shows that the current views of the "Liberation" of the Jewish exiles needs much rectification. Among other results is the discovery that the Israelites worshipped a small divine company under a supreme director. This has been long certain to the author, and has now been confirmed by the Jewish papyri found at Elephantine.

The Clarendon Press recently published "The Greek Genius and its Meaning to Us," by R. W. Livingstone, Fellow and Tutor of Corpus Christi College, Oxford.

Messrs. Constable and Co. published at the end of last month "The Egyptian Conception of Immortality," by G. A. Reisner, at 2s. 6d. net.

Another cheap little book on the Near East is "The Legal Position of Women in Islam," by Ameer Ali Syed. This is issued by Messrs. Hodder and Stoughton at 1s. 6d. net.

"The Legacy of Greece and Rome," by W. G. de Burgh, Professor of Philosophy, University of Reading, has just been published by Messrs. Macdonald and Evans at 2s. 6d. net.

BOOK RECEIVED.

Tales of a Greek Island. By Julia D. Dragoumis. With illustrations. (Constable and Co., 5s. net.)

CURRENT COMMENTS.

Recently an Italian was arrested in Cairo for having put up a motor-car, valued at £E30, for a lottery, which brought him in the tidy sum of £300. The tickets were sold at P.T.5 each. It seems well-nigh incredible that six thousand tickets should have been taken up for such a small prize, but this result is, indeed, nothing out of the ordinary for Egypt. It affords further substantial proof of the tight hold which the gambling spirit has on the dwellers on the banks of the Nile. Lotteries are the bane of the country, and so fascinating has the game of "spotting a gros lot" become that, however poor a man may be, he always manages to hold one or more of the coloured pieces of paper which carry the right of participation in one or other of the countless weekly lotteries.

***

Over 800,000 lottery tickets are sold weekly in the Delta, and about half of this number is distributed in Cairo alone. The Egyptian Government has in the past done its best to stop the abuse to which this system gave rise, but so far it has not proved successful. In 1905 a decree was issued prohibiting the sale of lottery tickets unless the object was a genuine charity. But, as in the case of the octroi duties, the suppression of which was expected to reduce market prices, but in reality caused them to rise considerably, the number of public lotteries increased at a furious pace. Last year, again, the Egyptian authorities, alarmed at the manner in which the benevolent public was being imposed upon—many of the objects of the lotteries bore but the merest resemblance to a charity—set on foot a movement which endeavoured to restrict the extent to which the gambling instincts of the local element were being pandered to.

***

But very little improvement is to be noticed beyond the fact that the "camelots" are now garbed in a distinctive red dress. One is still ceaselessly importuned at the cafés and street corners by the insistent ticket hawkers. It is now announced that the Government intends introducing a new system from next January, and, given the solicitude which the British Agent has evinced for the material welfare of the Egyptians, it may be expected—and certainly it is to be hoped—that some wide-sweeping innovations will be introduced—and will be adhered to! After all, great efforts have been made to encourage thrift amongst the fellaheen, and there is no reason why attention should not be directed towards the town Arabs, a considerable portion of whose earnings is wasted in the purchase of lottery tickets.

***

Lord Kitchener in his report gave it as his opinion that the prevention of crime could be largely effected by the action of the Assize Court judges, the severity of whose sentences might do much to reduce serious crime. The result of a notorious murder case at Dessuk certainly shows that there is something seriously wrong somewhere, and adds point to the British Agent's remarks. Here a most dastardly murder and assault had been committed; the suspected murderers had been arrested; but no conclusive evidence, such as is required by Egyptian law, of their guilt was obtainable. At last the Parquet ran to earth an "arbuggi," who, it was suspected, had had something to do with the murder. He admitted he was an accomplice, and, turning, so to speak, "King's evidence," gave the authorities all the proofs which were necessary to inculpate the suspected murderers and which bore out the circumstantial evidence already pieced together. The trial took place, and lo! and behold, the Assize Court acquits the chief accused, and sentences the poor unfortunate "arbuggi" to penal servitude for life!

***

No grosser mis-appreciation of facts has so far been perpetrated by the Egyptian tribunals. The guilt of the accused murderers was as clear as daylight. The one unfortunate result of this case will surely be that it will be more difficult than ever to obtain evidence in criminal cases. Hitherto the disinclination of the native to give evidence in such cases has been the great obstacle in the way of bringing suspected criminals to book. Little by little the authorities have made a breach in this brick-wall of silence, but now all their good work has been undone at one fell swoop. Henceforward no one will ever turn "King's evidence," for the fate of the unfortunate Dessuk "arbuggi" will ever stare the native in the face; and he will fear that instead of obtaining a lighter sentence in return for his disclosures, those very disclosures will call upon his (the accomplice's) head the direct penalty, whilst the prime offenders, whose guilt is indisputable, get off scot free. It is to be noted that the Assize Court in question was entirely composed of natives, and from this fact it is plainly evident that there exists but one remedy. Each Assize Court should have at least one English judge on its bench. His presence would give backbone to the native judges, and whilst it would ensure the infliction of adequate sentences, the number of instances of miscarriage of justice and misappreciation of facts would be reduced to the barest minimum—all of which features are influential factors in the prevention and restriction of crime.

***

In the celebrated medical libel action which was concluded last week the defendant under examination produced some photographs of Dinkas, and gravely termed them "Arabs" and a vegetarian race! Apparently to his mind meat eating is an attribute of civilisation, and because a man stands on one leg like a stork and wears nothing more than a somewhat elaborate coiffure, he must, *ipso facto*, be a vegetarian. As a matter of fact, the Dinkas are not, and have never been, vegetarians. From time immemorial they have indeed relied almost entirely upon their spear and upon their cunning in trapping animals for their daily food. They are also a fish-eating race, and organised "fish-drives" form a regular item of their daily routine. A number of Dinkas enter the river together, and walking until they are chest-high in the water they line up, leaving the space of a spear's thrust between each man. The river swarms with fish, and these they drive in towards the bank, spearing with remarkable accuracy the bigger specimens as they attempt to elude the cordon. Before civilisation came to regulate their sporting methods the inhabitants of the southern regions of the Nile were experts in the pitting of animals. Thus in those days meat was very much more plentiful than it is to-day.

***

But the savage is not particular as to what meat he eats, provided that he can procure any at all. The writer has known the uncivilised natives of the Bahr-el-Ghazal to retrieve and entirely consume a camel which had died on the journey south and had been cast into the river by a passing steamer. They will also devour crocodile flesh with eagerness, and organised hippopotamus hunts are a common feature of their lives. So great is their lust for flesh food that they think it no degradation to eat after a lion, while an elephant which has died as the result of old wounds forms the principal and most popular item of the menu for many days to come. Newspaper reports are not always, unfortunately, strictly accurate, but if Dr. Bashford was correctly reported he certainly went very wide of the mark in his evidence on this occasion. The real Arab races of Egypt are frequently occasional vegetarians, but this is from necessity rather than choice, and it is by no means sustained. But to select the Dinkas out of all the races of Africa as examples of vegetarianism is to display an ignorance of prevailing conditions which is lamentable.

***

The news that the Egyptian Government is bent upon preventing the commercial exploitation of the antiquities of the Nile Valley is welcome indeed, and the proposal to inflict heavier punishments upon the *antica* smuggler is a move in the right direction. There are, of course, vast quantities of spurious "antiques" manufactured in Egypt, and the export of such things can do no harm whatever—except to the purse of the luckless purchaser of the forged scarab, charm, figurine, or what not. But too many genuine treasures have already found their way out of the country into the cabinet of the private collector, and have thereby been lost to the scientific world. And any move that will tend to put a stop to such a state of affairs is to be encouraged.

***

It is not only the mere collector who indulges in the smuggling of antiquities. The scientist and archæologist, it is to be feared, has quite often fallen a victim to temptation also. The European and American museums contain hundreds of specimens which have found their way out of the East by devious routes, and doubtless at the present moment there are hundreds more such specimens lying hidden away in museum store-rooms until the day arrives when it will be "safe" for them to be put on exhibition. Considering the generous way in which the excavator is usually treated by the Department of Antiquities in Cairo, and in Constantinople, too, this state of affairs is, it must be admitted, hardly creditable to Europe and America.

***

Sometimes the antiquity smuggler finds his lapse from virtue land him in a strange predicament. A case in point occurred some years ago to a certain well-known scholar who had been wintering in Egypt and had acquired, partly by excavating, partly by purchase, a very valuable collection of papyri. As the time for his departure from the country drew near, the thought of passing his treasures through the Gizeh Museum became more and more distasteful to him, and eventually, alas! he succumbed to temptation. The bulk of the papyrus was packed in cases and duly forwarded to Gizeh, but some dozen of the choicest specimens were kept back, and, carefully pressed, were stowed away in his writing-case. The museum authorities treated him remarkably liberally; hardly any of his specimens were retained. His cases were soon all sealed up and handed over to the forwarding agents, and he set off for Alexandria—it is to be feared with a light heart and conscience!—carrying his precious burden with him.

***

Justice, however, was upon the smuggler's track, though in somewhat strange garb. Arrived safely at Alexandria, he hastened on board his steamer, and there, at last, with a sigh of relief, he deposited the writing-case on the cabin table with much other hand baggage. Leaving it there for a few minutes while he went off with a steward to see his state-room, he failed to find it on his return. And he has never seen it since. Indeed, he never cared to inquire after it too closely, fearing, not unnaturally, that he might be called upon to describe its contents!

PERSONAL & SOCIAL

Sir Reginald Wingate has arrived at Carlsbad.

The Aga Khan has arrived at the Ritz Hotel from Paris.

Baron Marschall von Bieberstein arrived in London on Tuesday, and called at the Foreign Office in the afternoon to see Sir Edward Grey and Sir Arthur Nicholson.

Admiral Sir Edmund Poë, G.C.V.O., K.C.B., left Malta last Saturday, on relinquishing the Mediterranean command. Lady Poë left the previous day for England on board the P. and O. s.s. "Persia."

During his brief visit to Malta Lord Kitchener purchased several old paintings and other relics of the past.

Our Malta correspondent writes: "On Saturday, the 1st inst., Lord Kitchener paid a visit to Colonel Count Bernard and his family at their residence at Valletta Colonel Bernard (retired), late commanding the Royal Malta Artillery, is the father of El Lewa Bernard Pasha, Financial Secretary to the Sudan Government. Bernard Pasha is shortly expected here on a visit to his family.

Mr. J. R. Holmes, President, District Court, Nicosia, Cyprus, is at present in England on leave of absence.

Mr. W. H. H. Thorne, President of the District Court, Larnaca, Cyprus, has assumed the duties of King's Advocate during the leave of absence of Mr. J. A. S. Bucknill.

The Turkish Ambassador called at the Foreign Office on Wednesday afternoon.

On Sunday his Royal Highness Prince Christopher of Greece honoured the Greek Minister and Madame Gennadius by his company at dinner at the Legation. Last Friday his Royal Highness was present at Mrs. Scaramanga Ralli's musical At Home.

Prince Christopher of Greece was present at the Opera Royal Covent Garden on Tuesday evening with Princess Henry of Battenberg, Princess Victoria, and the Grand Duchess George of Russia..

Major E. C. Seaman, R.E., who is relieving Colonel W. G. Lawrie at Malta, has been gazetted Lieutenant-Colonel.

Colonel F. W. McT. Bunny, Assistant Director of Ordnance Stores, Malta, has been granted leave of absence from July 8 to August 31. During that period his duties will be performed by Lieut.-Col. M. Spencer, A.O.D.

Amongst those present at the dinner given by the Secretary of State for Foreign Affairs in honour of the King's birthday were the Turkish Ambassador, the Greek Minister, the Persian Minister, the Bulgarian Minister, the Roumanian Minister, the Servian Chargé d'Affaires, the Earl of Cromer, Sir Mortimer Durand, Sir George Barclay, and Sir Henry Bax Ironside.

The *Corriere della Sera* states that among the Italians expelled from Turkey is Mr. Badetti, who was British Vice-Consul at Dedeagatch. This gentleman was not only expelled at three days' notice, but was also ordered to descend at a roadside station, and only released by the intervention of the German authorities.

Reuter's Agency learns that Sir George Barclay, British Minister to Roumania, accompanied by Lady Barclay, will leave for Bucharest in August to assume his new post.

Mr. Bertram T. Watts has been appointed on probation Assistant Director of Surveys in Cyprus.

The Mudirs of Egypt have presented to Mr. Ronald Graham, Adviser to the Ministry of the Interior, an illuminated album, containing their photographs, and a silver card tray with an inscription, as souvenirs of his marriage.

Maître Carton de Wiart has left Egypt for his summer residence in Surrey.

Mr. and Mrs. George B. Alderson left Alexandria on the 1st inst. for Norway and Lapland. They will later visit Munich and Carlsbad and thence come on to London, returning to Alexandria in November.

Before leaving for England, Turner Bey, Director of Posts and Telegraphs, Sudan, who is retiring from the service of the Sudan Government, gave a farewell reception to his friends in the Post Office Gardens, Khartum.

Mr. Trevithick, late chief mechanical engineer of the Egyptian State Railways, has arrived in England.

The King has been graciously pleased to approve the appointment of Mr. Muhammad Rafiq, Barrister-at-Law, to be a Puisne Judge of the High Court of Allahabad, in place of Mr. Justice Karamat Husain, who is about to retire from the Bench.

A marriage has been arranged between John Dawson Shepherd, Egyptian Civil Service, son of the late Rev. Alexander Shepherd, of Ecclesmachan, and Margaret (Gretchen), elder daughter of Mr. Hanbury-Davies, of Bryn Towy, Carmarthenshire, and Kenmore, Double Bay, Sydney, New South Wales.

Prince Yousef Pasha Kamel, who has recently been shooting in East Africa, had a most unfortunate experience with a man-eating lion. The animal penetrated the camp when the Prince was at Simba and dragged off a native porter. Upon being followed by Prince Yousef and Mr. Boileau, the beast dropped its prey, only, however, to lie in wait and retrieve it, while the Prince with guns was, as he thought, following it into the jungle. Nothing more was seen of the lion, although its unfortunate victim was evidently devoured in close proximity to the camp.

It is reported that the Khedive has decided on converting the spot where Mohammed Ali Pasha, his great ancestor, was born, into a public garden for the benefit of the inhabitants of Cavalla, Albania, his native town. His Highness, it is further stated, will buy up all the land surrounding the house where the founder of the Khedivial Dynasty first saw the light.

The Ligertwood Memorial Fund being closed, Miss Clay desires to thank old friends and comrades of her stepfather, Surgeon-Colonel T. Ligertwood, who have kindly subscribed, and to say that the memorial tablet has been fixed in the Royal Hospital, Chelsea. In addition to this a clock with inscription has been placed in the Union Jack Club.

BIRTHDAY HONOURS.

Many of the recipients of Birthday Honours are, or have been, connected with the Near East.

Field-Marshal Sir W. G. Nicholson, one of the four new peers, took part in the Egyptian War of 1882, was present at Tel el Kebir, and received the Fourth Class of the Osmanieh.

Lieutenant-Colonel William Hutcheson Pöe, R.M.L.I., who receives a baronetcy, saw much service in Egypt. In 1884 he was Adjutant R.M. Battalion in the East Sudan, was Garrison Adjutant at Suakim for six months, took part in the Nile Expedition of 1884-85, and was twice wounded—at El Teb and at Metemmah.

Mr. Frederick Green, one of the new knights, is a director of the Suez Canal Company and of the Orient Steam Navigation Company.

Mr. W. B. Peat, who has also been created a knight, is head of a well-known firm of chartered accountants of London and Cairo.

Mr. J. Bland Sutton, F.R.C.S., is well known as a student of Egyptology and an author. 'Man and Beast in Ethiopia" is, perhaps, his best-known book.

Other honours conferred include:—

To be Hon. Knight Grand Cross Order of St. Michael and St. George: Mohammed Said Pasha, President of Council and Minister of the Interior, Egypt.

To be K.C.M.G.: Colonel George Bohun Macauley, R.E., C.M.G., Director-General of the Egyptian State Railways.

To be C.M.G.: Andrew Balfour, Esq., M.D., Director of Government Research Laboratories, Gordon Memorial College, Khartum; Andrew Percy Bennett, Esq., Commercial Attaché to his Majesty's Embassies at Vienna and Rome, and to his Majesty's Legation at Athens; Francis Edward Crow, Esq., his Majesty's Consul at Basrah; James Currie, Esq., Principal of the Gordon Memorial College, Khartum; Lieutenant-Colonel Thomas Wolseley Haig, Indian Army, his Majesty's Consul at Kerman; Captain George Gillett Hunter, Director-General of the Coastguard Administration in Egypt; Captain Macdougall Ralston Kennedy, late R.E., D.S.O., Director of the Public Works Department of the Sudan Government; Lieutenant Arnold Talbot Wilson, Indian Army, recently Acting British Consul at Mohammerah.

DOMESTIC ANNOUNCEMENTS

The charge for Announcements under this Heading is 2s. for three lines and 1s. per line afterwards. Minimum charge, 3s. All announcements must be authenticated with the name and address of sender.

BIRTHS.

EUMORFOPOULOS.—On the 14th inst., at Bullswater Lodge, Pirbright, the wife of E. Eumorfopoulos, of a daughter.

KEOWN-BOYD.—On June 13, at 15, Henrietta Street, Cavendish Spuare, W., the wife of Alexander W. Keown-Boyd (Sudan Civil Service)—a son.

MARRIAGES.

BOND—ABBOTT.—On June 13, at St. Margaret's, Westminster, by the Right Reverend the Bishop of Willesden, assisted by the Rev. Robert Brandon, cousin of the bridegroom, Lambert Bond, barrister-at-law, Middle Temple and British Columbia, of Gortin House, County Tyrone, Ireland, and Vancouver, B.C., to Maud, youngest daughter of the late Keith Abbott, H.B.M. Consul-General in Persia, and of Mrs. Keith Abbott, of Berkhampsted, and granddaughter of the late Sir Samuel Osborne Gibbes, Bart.

TOMBAZIS—STYLIANIDES.—On the 12th inst., at 6, Bute Gardens, Glasgow, by the Rev. Matthew Gardner, Hyndland Parish Church, and afterwards, on the 15th inst., at the Greek Church, Liverpool, by the Very Rev. Archimandrite N. L. Yannulis, George Anderson Tombazis, Consul for Greece, Glasgow, to Helène Stylianides, daughter of the late Captain Aristos Stylianides, Island of Samos.

FRIDAY, JUNE 21, 1912.

THE TRANS-PERSIAN RAILWAY SCHEME.

It is satisfactory to note that the proposed Trans-Persian Railway is attracting more and more attention, but it can hardly be said that this country as a whole has yet been sufficiently aroused to the significance of the scheme. Upon all those whose duty it is to keep public opinion informed upon the affairs of the Middle East it is incumbent to see that the project is not allowed to be well under way before the British people are able to decide with some knowledge of the question whether the railway ought to be built. No excuse, therefore, is needed for returning to the subject in these columns. We now have the Société d'Etudes at work in Paris, and, more significant still, we are informed that conversations on the subject between the Russian and British Ministers and the Persian Minister of Foreign Affairs had already been begun in Teheran in May. The assistance of the two Legations had been bespoken by the Société d'Etudes in the work of securing an option for the survey and construction of the Trans-Persian line, and there is little doubt that the necessary permission to begin operations in Persia will be duly received from the Teheran Government. As we do not see our way to support the Trans-Persian Railway scheme, and as we believe that means will ultimately be found to block the project, we are unwilling to acquiesce in a conspiracy of silence that would allow a considerable amount of British capital, which might be employed to better purpose in another direction, to be wasted in the attempt to force a railway upon two countries which stand to benefit very little from it. To the British financiers who are pushing forward the construction of the line it must be apparent that the prejudice existing against it is capable in certain circumstances of giving the scheme its *coup de grâce*. The attitude of the British Government certainly suggests that, while anxious to thwart the proposal, it is being compelled against its better judgment to lend its moral support. At each stage of the negotiations certain demands have been made, which were calculated to checkmate any undertaking of this nature, if the Russian promoters had not been so eager to carry it through on any terms. Thus the route originally suggested for the railway, *viâ* Kerman and Robat, was vetoed, only to meet with ready acquiescence on the part of the principal promoters in an alternative route along the Persian Gulf. Again, the representation on the Société d'Etudes was successfully challenged by the British Government, but once more it found the Russians eager to fall in with its views. From which quarter the steady pressure that is being applied to the British Cabinet emanates can only be a matter for conjecture. But the circumstances in which it is placed must seem very compelling to the British financiers if they can satisfy themselves that this scheme, which arouses no enthusiasm from a Government ostensibly supporting it and is distasteful to a very large section of British opinion, is bound to be carried to a successful issue.

The names of the British directors of the Société d'Etudes are a guarantee that the financial aspect of the Trans-Persian railway scheme will be subjected to the most careful scrutiny, and it may be that a way out of the present difficulty will be found in a decision of the international body that the project does not offer an adequate return on the outlay. In such circumstances no harm will have been done, although, as we have already pointed out, an economy of British capital might have been effected by other tactics. It is not the case that a British Government or the British public can ever be indifferent to railway enterprise in Persia. Railways are badly needed in that country; they are about to be built in the Russian zone, and it is necessary that construction in the south should keep pace with developments in the north. Present objections are confined to the proposal for a line that would merely link India and Russia together without adequate consideration paid to the more urgent requirements of Persia and to British interests in Persia. One good purpose will have been served by the publicity given to the Trans-Persian line if it has caused interest to be revived in the openings for railway construction in other parts of Persia. Simultaneously with the support given to the larger project the British Legation in Teheran is said to be asking the Persian Government on behalf of a strong English syndicate for an option on a line from Khora Musa, near Mohammerah, to Khoramabad. At the present moment British trade in Persia is seriously handicapped. Owing to the disturbed state of the country the trade routes of the south are closed, and it is clear that so long as the central authority in Teheran is weak the elements of unrest will batten on the impunity offered them in these southern districts, while owing to the stronger hold maintained by Russia the trade in the north suffers merely a minimum of interruption. Railways from one or more points on the Persian Gulf converging on Teheran offer the only practical substitute for a control by Great Britain in the south similar to that enforced by Russia in the north. Here, then, is abundance of scope for capital, with far better chances of an adequate return, even if high finance must for ever remain divorced from sentiment and patriotism.

Railway construction between the head of the Persian Gulf and Teheran fortunately does not call for the preliminary installation of such elaborate machinery as the more ambitious scheme, which would carry the steel rails over the deserts that guard our Indian borders. If a start can be made both from Mohammerah to Khoramabad, and from Bushire to Shiraz, there will be the less likelihood of the Trans-Persian project maturing in the immediate future. Apart from the political objections to it, this latter enterprise suffers from certain inherent drawbacks, among which is the cost of construction over a difficult country. If we do not elaborate the reasons that prompt the opposition to the scheme, it is because they have been set forth so frequently. To the contentions that the line, if built, must materially modify the conditions of Indian defence, must affect our carrying trade and the profits of the Suez Canal, must aggravate the military risks of India without conferring any military advantages, no answer has been returned, nor has anyone stopped to point out how Persia is to benefit from the railway. Indeed, not the least strange aspect of the whole project is the silence in which its advocates have carried on their work, avoiding any attempt to justify their policy and leaving to the British Cabinet the task of extricating itself from embarrassing questions on the subject. When the scheme clearly threatens the security of our Indian Empire, and offers little attraction other than the prospect of a shorter journey to India, which might even now be secured by arrangement with the shipping companies concerned, the British public is entitled to have laid before it in the fullest possible manner the arguments for and against the enterprise. There would seem no reason why the Government should not take the country into its confidence; and if there are grounds for its reserve it can overcome the difficulty by entrusting the whole subject to a Commission.

EL AZHAR UNIVERSITY.

A FAMOUS FOUNDATION.

El Azhar is the greatest and oldest Moslem religious and educational centre in the world. It is said to have derived its name from the supposed foundress of the Fatimide line, who is always referred to as El Zahra. It was erected in 972 A.D. by Jouhar, the Fatimide general (who conquered Egypt), and took two years to complete. Very little of the original building remains to-day, most of the present structure having been added or rebuilt at different periods. Erected to serve as a mosque—which in those days was as much a meeting-place for local literary and social lights as it was a place of prayer—El Azhar owed its early transformation into a university to political exigencies, and the man who was mainly instrumental in carrying out that extension was one Jacob Ibn Killis, who had suggested to the Fatimide Caliph Moizz that the conquest of Egypt might be profitably undertaken, and who, as a reward for his sound advice, had been appointed Vizier.

Jacob Ibn Killis was a remarkable man. He was originally a Jew, but had been converted to Islam in 967. He was a far-seeing and brilliant politician, as well as a most able scholar. As Professor Margoliouth points out in his book on Cairo, Jerusalem, and Damascus, he realised that "since the Fatimide dynasty had succeeded in virtue of its religious claims, it was necessary to provide for its maintenance by a body of literature comparable with that which the supporters of the rival Caliph could display, and which enjoyed widespread respect and authority owing to the long series of venerated names concerned with its composition and perpetuation. The authoritative books once provided and arrangements being made whereby their study could be encouraged and maintained, no mean dam would be provided against inundation from without."

With this political object in view Ibn Killis obtained the consent of the Caliph Aziz to the conversion of El Azhar into a university by the provision of a grant for the maintenance of thirty-five students, for whose instruction the Vizier himself wrote the books. Such was the beginning of the institution which, from before the Norman Conquest right down to the present day, has retained an unequalled reputation in, and has exerted a most powerful influence on, the Moslem world. Its size in this year of grace can be gauged by the fact that there are about nine thousand students and two hundred and fifty masters, who work, feed, and sleep within its portals; while the diversity of their nationalities—they hail from such far distant parts as India, Morocco, the West Coast of Africa, the Malay States, Somaliland—testifies to its world-wide reputation. But it must not for one moment be supposed that, like the other great universities of the world, El Azhar has moved with the times, or that its curriculum has received that extension which modern civilisation would demand. As some well-known publicists have expressed it, the university is an "Eastern Oxford of the Middle Ages"; for just as El Azhar was a thousand years ago so it is to-day.

Course of Instruction.

From three to six years is the time spent by the students at El Azhar—some of them remain studying there nearly all their lifetime. Tuition is free, so also are board and lodging. Instruction is given in Moslem law, rhetoric, the correct reading of the Koran, religious science, the attributes of God and the Prophet, the art of poetry, Arabic grammar and logic; but beyond that no useful information is imparted. When a student knows a book by heart, his master gives him a certificate to that effect, and he is thereby authorised to lecture in that particular subject. The only proficiency that is acquired is intimate knowledge of the Arabic language, and one must admit that the Azharites are renowned for that.

As a result of this peculiar method of instruction the students of El Azhar are characterised by their narrow-minded views, their inability to apply the religious knowledge they have acquired to present-day conditions, and their ignorance of the most elementary facts outside religion, in addition to their sheer incapacity for independent thought. One can therefore understand Lord Cromer's remark that "it was clear to the British reformer that the education imparted at the famous university of El Azhar could not be utilised to raise the general standard of education in Egypt." Seeing that El Azhar supplies Egypt with her army of religious instructors, it is a thousand pities that up to now the influence which these men exercise over the masses has not been serviceable to the work of reform that has been carried out in Egypt during the past three decades. There are, of course, many brilliant exceptions to this rule of uselessness and inefficiency. Sheikh Mohammed Abdou and Saad Pasha Zaghlul are the two that occur to one's mind at once—but the general run of men who go out into the world from El Azhar are quite incapable of taking their part in any civilising movement.

For years the British authorities left El Azhar severely alone because they did not wish to wound Moslem susceptibilities; but at length matters got to such a bad pass, that the Egyptian Government had to intervene. During the past four years commissions have inquired into the inner working, and from time to time reforms have been introduced at the instigation of the Khedive. Thousands of pounds are annually wasted in maintaining many students who make no use of the time spent by them in the university, and who apparently avail themselves of this opportunity to live free of all expense. Every reform has been followed by agitations and strikes on the part of the students who are affected thereby. From time to time bloodshed has ensued, and the police have had to be called in to restore order. The Nationalists have on more than one occasion been at the back of the troubles, and at least twice of late the classes have had to be stopped pending inquiry into the alleged grievances.

Reformers' Difficulties.

One can quite understand that reform of any sort is distasteful to the Ulema and students. They have been so accustomed to do the minimum of work in return for the maximum of rations and allowances, and have so constantly received promotion without reference to merit, that they naturally resent new regulations which make the grant of supplies contingent on their doing serious work. The latest agitation has been caused by the introduction of a system of examinations. Under a new scheme the university comes under the inspection of the educational authorities, and in pursuance of this arrangement, no student can move into another class until he has passed the final examination of his present class, and the "imams" or preachers in the mosques will not be appointed unless they can pass an examination. Hitherto students have been moved from one class to another on the basis of the time spent in the lower class, and the "imams" were appointed on the candidates possessing certain certificates, which were in nowise any proof of their aptitude.

The new regulations are certainly most praiseworthy, for they will assuredly result in a raising of the standard of the emissaries of El Azhar, who, in one capacity or another, are scattered over Egypt. At the same time, if they are rigorously enforced, they should have for effect the expulsion from the university of the many hundreds of hangers-on, who swell the classes and waste the rich endowments that stand to the credit of El Azhar; for the logical sequence of the institution of promotion examinations is the fixing of a time-limit for a student to remain in any particular class. That the new regulations will be adhered to goes without saying, for the Khedive, who is titular head, is whole-heartedly in favour of the movement for reform. Indeed, without his co-operation it is to be doubted whether the Egyptian Government would have ventured to interfere to such an extent in the internal administration of El Azhar. In course of time, therefore, the stigma which has become attached to the students of this institution will disappear and Islam's Alma Mater will take her proper share in the civilisation and education of her sons. It is, however, to be feared that the date of that consummation is not near. It will require considerable firmness on the part of the authorities to break down the stone wall of opposition which the Ulema and students set up against all idea of reform. There are so many factions at work that it is quite to be expected that now and again the more turbulent spirits will break out and that trouble will ensue.

NATIONAL BANK OF TURKEY

ESTABLISHED 1909 BY IMPERIAL FIRMAN.

CAPITAL - - £1,000,000 Sterling.

BOARD OF DIRECTORS.

CONSTANTINOPLE.

SIR HENRY BABINGTON SMITH, K.C.B., C.S.I., Chairman.
SIR ADAM BLOCK, K.C.M.G.
F. EDWIN WHITTALL.
H.E. AHMED DJEMAL BEY.
HUSSEIN DJAHID BEY.
RECHID SADI BEY.

LONDON.

HON. SIDNEY PEEL, Chairman of London Committee.
HON. HUGO BARING.
HENRY BIRCHENOUGH, C.M.G.
C. S. GULBENKIAN.
R. H. MACAULAY.
E. N. MEYER.

Head Office: CONSTANTINOPLE (KENADJIAN HAN, STAMBOUL).
MANAGER - - H. P. KINGHAM.

London Agency: 50, CORNHILL, E.C.
MANAGER - - - R. HECHT.

The National Bank of Turkey undertakes every description of Banking business. It opens current accounts according to the custom of Bankers. Customers have the facility of discounting approved bills and of obtaining advances upon negotiable securities. The Bank will undertake the purchase and sale of bonds, shares, etc., on the London Stock Exchange, on the local and on all Continental Bourses, the safe custody of customers' securities and valuables, and the collection of drawn bonds and coupons when due. The Bank issues drafts and telegraphic transfers payable in all principal towns in the world. Letters of credit for the use of travellers are also issued. Advances made on merchandise. The purchase and sale of coupons, foreign bank notes, coin and bullion are undertaken. Bills negotiated or sent for collection. Mercantile credits opened.

Deposits received for fixed periods at rates of interest which can be ascertained on application.

BANK OF ROUMANIA, Ltd.

Head Office: 7, GREAT WINCHESTER STREET, LONDON, E.C.
Branch: 94, STRADA LIPSCANI, BUCHAREST.

CAPITAL (fully paid), £300,000. RESERVE FUNDS, £169,688.

DIRECTORS:

THE EARL OF BESSBOROUGH, C.V.O., C.B.
SIR R. HAMILTON LANG, K.C.M.G.
THE VISCOUNT GOSCHEN
E. W. H. BARRY, ESQ.
P. NAVILLE, ESQ.

The Bank was originally incorporated in 1869 under Roumanian law, but in 1903 was transformed into an English Company under the Companies Acts. It is the oldest bank in Roumania, and the only one with a London office.

A general banking business is carried on. Correspondence is invited from those doing business with Roumania, and should be addressed to THE MANAGER in LONDON or BUCHAREST.

ANGLO-EGYPTIAN BANK, LIMITED,

LONDON, PARIS, ALEXANDRIA, CAIRO, MALTA, GIBRALTAR, TANTAH, MANSURA, BENI-SUEF, ZAGAZIG, and PORT-SAID.

Subscribed Capital - - £1,500,000.
Paid up Capital - - 500,000.
Reserve - - - - - 640,000.

The Bank undertakes every description of Banking Business on most favourable conditions.

BANK OF ATHENS.

(Incorporated in Greece.)
CAPITAL FULLY PAID - - Dr60,000,000
RESERVE FUNDS - - Dr10,480,000
Head Office: ATHENS.
London Office: 22, Fenchurch Street, E.C.
Branches:

GREECE: Pirœus, Patras, Syra, Calamata, Tripolitza, Volo, Larissa, Agrinion and Carditza.

COMMERCIAL & FINANCIAL SECTION.

NOTES AND NEWS.

Devonshire Square,
London, E.C.

The placing of Ottoman Treasury Bills last week has given rise to various comments. The facts of the case, as I have been able to gather them, are as follows:—Djavid Bey, in his capacity of Minister of Finance, approached the Ottoman Bank with a view of ascertaining whether they would make an advance of £2,500,000 on account of the option on the loan of £10,000,000. Receiving a negative reply, the Minister asked whether the bank could dispose in the Paris and London market of Treasury Bills to the amount required. The bank, as the agent of the Government, decided to undertake the placing of a first series amounting to £1,250,000—an operation which took place last Friday. The amount placed on the London market was, roughly, about £250.000, the remaining £1,000.000 having been allotted to Paris. The terms are 7 per cent., the bills running for six months, with renewal up to April. The demand in the London market was very good, in excess of the amount allotted. As regards the further placing of a second series of bills to the amount of £1,250,000 nothing definite is known, but in view of Turkey's pressing need for money, I should think that the operation will be carried out at no very distant date.

***

The exact date of the issue of the bills has not been fixed, but I have reason to believe that they will be delivered in the latter days of this month. The bills, I may add, are guaranteed by taxes (Customs surtax) collected by the Administration of the Council of the Debt.

***

The Imperial Ottoman Bank has decided to open in the near future a branch establishment in Sokia, in the vilayet of Aidin. I have already pointed out on a previous occasion how these branch offices, scattered throughout the Ottoman Empire, gave an impulse to trade by offering the necessary banking facilities, and it is therefore with pleasure that I announce this new addition to the Ottoman Bank's succursals.

***

Bulgaria is coming into the finance market as a borrower. Reuter informs us that M. Théodoroff, the Minister of Finance, has presented to the Council of Ministers his report regarding the negotiations he has been carrying on for concluding a loan of £8,000,000. The contemplated conditions are quite advantageous—as they ought to be, considering Bulgaria's stable economic position—but it will be impossible to conclude the loan before the autumn. Further details are given in the *Correspondance d'Orient*. The loan has been concluded in Paris, to bo issued at 88, at an interest of 4½ per cent; £3,200,000 are for the conversion of the loan of 1892, and the remainder for public works, etc.

***

On one point M. Théodoroff must be congratulated, and that is on not having concluded the loan in Vienna. Whatever France's conditions may have been (and France is in the habit of making awkward conditions that favour her own industries), anything almost is better than for Bulgaria to risk losing her economic independence by increasing her indebtedness to Austria. The attempts at an "Austrification" of the Southern Slav Balkan states are being run on economic lines: in the case of Bulgaria loans are willingly granted, Austrian export firms offer Bulgarian consumers exceptional terms of payment, and Austrian-Lloyd boats make a point of calling on Bulgarian ports with urbane regularity This affability on the part of Austria masks deep intention, to thwart which must be the duty of all patriotic Serbs and Bulgars. To do otherwise would be to pursue a suicidal policy, equivalent to the repetition of Esau's folly.

***

Apropos of the "Austrification" of the Balkans, the economic development of Austria in Bosnia-Herzegovina is in itself an indication of the aggressive policy that is being pursued. Under the auspices of the Oesterreichische Laenderbank, steps are being taken towards the formation in Sarajevo of a Moslem banking concern. If successful, the influence of the bank will extend to Novi Bazar, even to Uskub, and there is no reason why, backed by Austrian capital, the bank should not succeed—an avant-garde of Austria's economic penetration of the Balkan States.

***

The Egyptian Government's fight against the cotton worm is worthy of unstinted praise. Not a stone—or, I should say, weed—is being left unturned to destroy the dread insect, and the bersim fields in the affected provinces are receiving the special attention of the mamours who have been advised to that effect by the Government. Labour supply is still one of the problems, and, with a view to increase it, the destruction of the cotton worm has been added to the list of works which a prisoner condemned to hard labour is liable to perform.

***

One of the most recent measures taken by Lord Kitchener to improve cotton growing in Egypt is an investigation to determine what conditions of subsoil water are favourable to the growth of cotton, and what are the existing conditions of subsoil water. These investigations will doubtless be arduous and lengthy, but they cannot be postponed. Beyond theories of varying vagueness we know little about the subsoil in the valley of the Nile (and the Libyan oasis). Had we known more, it is possible that certain attempts at desert transformation would never have matured into failures. That is a chapter apart, however. What concerns us more immediately is cotton growing, and I can only state that the Egyptian Government, under Lord Kitchener's direction, is, willy-nilly, blossoming out into an exemplary, vigorous, and practical Government, with a decided taste for agriculture, and—what is even more wonderful—for rapidity of action.

***

Asiatic Turkey will sooner or later be one of the most important markets for the manufacturer of agricultural implements, and I do not think I err much in predicting that Baghdad will be one of the distributing centres for the import trade. Its situation is excellent, and German activity will give a decided pro-German impulse to the movement. As it is, there is already a movement on foot to give greater extension to modern agricultural methods, and though the committee of notables called together by the Vali recently did not succeed in forming a local syndicate with a capital of £2,000 for propaganda purposes and for the purposes of advancing small sums to agriculturists for the purchase of modern implements. I learn that a company, English in name, even if German in reality, has the intention of performing this Samaritan act off its own bat, and doubtless to the greater benefit of the Fatherland and its industries.

***

The idea is certainly an excellent one, almost as good as inspiring in children a thirst for knowledge. It has, moreover, this advantage, namely, that it is tantamount to lending money (at a respectable interest, I presume) and then obliging the debtor to buy his goods from you—on the hire system, of course—which means, I take it, another convenient rate of interest. At the same time, this generosity keeps the foreigner literally "off the grass."

***

It might be timely, in view of the latest development of the Trans-Persian railway scheme, referred to elsewhere, to reprint from THE NEAR EAST of February, 1912, the opinion of Mr. Shuster as expressed in a special interview granted to this journal. Whatever our opinion of the Shuster incident, we must admit that the ex-Treasurer-General of Persia knew something more about the country and its conditions than many a political writer who has never left these isles.

***

"The proposed Trans-Persian railway," he said, "if forced upon Persia by the Russians, backed by a Persian guarantee, will absolutely cripple Persia financially for the next one hundred years. For by no means could such a railway be expected to pay expenses within a shorter period, and in the meantime the guarantee, or the interest on the bonds, would have to be paid. In addition to this, if we may judge by other similar cases, Russian railroad construction materials would be forced on the Persian Government at inflated prices, at least for the entire portion of the railway lying within the so-called Russian sphere. Therefore, even if the railway is only built as far as Isfahan, the advantage to Russian influence and selfish interests will be enormous, and, if built through to Bushire or to the Indian frontier, to the above would have to be added a most important strategical advantage for Russia. The railway would, most emphatically, not pay as an investment. Its *raison d'être* is purely political and strategical, and favours Russian policy only."

***

On May 24 I pointed out with reference to Great Britain's imports into Egypt during the month of March that they had substantially decreased as compared with 1911, whereas German imports showed a substantial increase. I have now received the returns for April, 1912. Our imports to Egypt in April, 1911, were valued at £E590.000, and in the same month in 1912 at £E564.000, or a *decrease of* £E126,000. And Germany? The figures for the corresponding periods are £E104.000 and £E121,000, or an *increase* of £E15.000. Having said which, I leave it to others to moralise.

COMMENTATOR.

Ottoman State Finance.

(From Our Financial Correspondent.)

Constantinople, June 12.

Resignation of Nail Bey.

The resignation of Nail Bey, the late Minister of Finance, has given rise to many comments, but it appears that one of the causes for his retirement was the fact that he was in conflict with the other members of the Cabinet over the question of the prolongation of the Tobacco Régie Company's concession. The Régie Company was prepared to advance £T1,000,000 to the Government in return for a favourable consideration of its proposals. It is not, however, likely that the Cabinet as at present constituted will look favourably on any scheme which involves the collection of this important revenue by a subsidiary company. The Government still holds to its view that it would be more advantageous to the State to make the tobacco monopoly a State monopoly, and to leave it in the hands of the Council of the Debt, to whom the tobacco revenue belongs.

At the time of Nail Bey's retirement the Government was in want of ready money. The Ministry of War was spending considerable sums for war material, which, under the circumstances, it appears difficult to check or criticise. The operations of the Italian fleet had led to a state of comparative stagnation in commerce, with the natural results that the Customs receipts in the big centres, such as Smyrna, Salonika, and Beyrout, as well as in the Black Sea and Red Sea ports, showed a considerable falling off, amounting to hundreds of thousands of pounds.

Advances to the Treasury.

Since the return of Djavid Bey to office the situation appears a little easier, but it is believed that he will require some £T4,000,000 between now and the end of the financial year (February 13, 1913), in addition to the ordinary receipts of the Treasury. The present Minister has been successful in obtaining the assurance of another advance from the Ottoman Bank of £T1,250,000, and it is hoped that the Ottoman Bank will consent to further advances on account of the proceeds of the recently signed loan contract for £T10,000,000. The Tobacco Régie Company has also advanced £T200,000.

War Tax.

The Government is considering the advisability of imposing a war tax for three years. The increased taxation will, it is estimated, yield about £T2,000,000 a year. With this annuity it will be possible to obtain further advances on Treasury Bills pending the issue of the loans already contracted for on foreign money markets. This measure, if carried out, will provide ample funds for the ordinary and extraordinary budgets to the end of the year. The details of the proposal are not as yet complete, but among the taxes it is proposed to increase may be mentioned the rural and urban property tax, the "temettu," or income-tax, and the military exemption tax. The execution of the measure will have more than a purely financial result. It will show the people of Turkey that if they are determined to carry on the war they must be prepared to pay for it, and, should this proposal meet with the response in the Chamber and throughout the country which it is reasonable to suppose it will, it should show Italy that Turkey is determined to make considerable sacrifices rather than submit to impossible demands.

Short Term Advances.

It is much to be regretted that the Ministry of Finance finds itself under the necessity of reverting to the old unsatisfactory system of short term advances to meet current expenditure, but the conditions to-day are exceptional, and in wartime these urgent measures cannot be looked upon so severely as might otherwise be the case. It must be remembered that Turkey has contracted several loans which she must await the conclusion of peace before putting on the market.

Revenue.

It is not as yet possible to ascertain the loss of revenue to the Ottoman Government through the seizure of Rhodes and the other smaller islands. It does not, however, amount to a considerable sum. The Public Debt revenues from those islands only averaged £T7,546 for the last five years, and the Government revenues may be estimated at about £T40,000. The Customs receipts which were arrested during the closing of the Dardanelles are again coming in with regularity, although the sudden arrival at the same time of so many cargoes and the unwillingness of the consignees to withdraw their goods on account of the extra charges imposed by the shipping companies, and the want of confidence in commercial circles as to the general situation, have led to some delay and accumulation of goods in the Customs depots. Sir Richard Crawford may be trusted, however, to relieve the pressure, and the Government, on his advice, has wisely decided not to demand Customs duties on the increased freight charges.

As far as the other revenues are concerned, there is not as yet any marked reduction in the returns from the provinces. The crops, of which great things were hoped at the beginning of the year, are suffering in certain districts from want of rain. Turkey is so vast a country that while one district suffers compensation is forthcoming from other districts, but on the whole, owing to the lack of rain in May, the yield of the crops will be 40 per cent. perhaps below that of last year, which was an exceptionally good one. This does not necessarily mean that the Government taxes will fall, although indirectly it has an effect on the wealth of the population, and therefore on its power of consumption of foreign goods. The people of Turkey have so few wants, and are so accustomed to bear with so much patience the ups and downs caused by climatic conditons, that the direct effects of a harvest under the average do not weigh upon this country as they would on other countries.

Effects of the War.

All those, however, who are interested in the prosperity of this country cannot but deplore the continuation of hostilities with Italy at a moment when Turkey was showing herself desirous of linking up communication in the interior by roads and railways and carrying out works of public utility and improving her administration. A state of war makes it almost impossible for the Government to find the ways and means for economic development, for coming to terms with the Powers of Europe for the increase of the Customs duties, and other measures necessary to provide for the equilibrium in the Budget.

Constantinople Business Letter

(From Our Special Trade Correspondent.)

Constantinople, June 14.

Mesopotamia Irrigation Works.

Contrary to rumour of a fresh adjudication, the Ministry of Public Works has not yet taken any decision in the matter of the Mesopotamia irrigation works of which Messrs. Sir John Jackson, Limited, were declared provisionally to be the successful tenderers.

Great Britain's Trade with Turkey.

As was to be expected, with one solitary exception, cotton yarns, the enumerated exports to Turkey during the month of May, according to the Board of Trade returns, show a further decline.

The total enumerated exports during May, 1912, are £513,565, as compared with £643,818 and £504,939 for the same months in 1911 and 1910 respectively. The enumerated exports from Turkey during the same month in 1912 hold their own and amount to £101,877, compared with £92,498 in 1911 and £51,450 in 1910.

The enumerated exports for the five months ended May 31 are £2,357,148 in 1912, as against £2,909,131 in 1911, and £2,324,184 in 1910. Here again all articles show a decrease, with the exception of cotton yarns and bags and sacks. The increase in cotton yarns is significant, the totals being £249,098 in 1912, against £185,333 in 1911 and £156,703 in 1910, and would appear to be due to the stoppage of Italian yarns. Importers have turned to Austria for their short-reeled yarns, but that country being unable to meet the demand in certain qualities, the orders have gone to Great Britain. The present stocks are nil, and the deliveries forward are likely to further swell the increase in this one line.

The most important decreases are in coals and coke, cotton piece goods, and woollen and worsted tissues. As regards cotton piece goods the explanation is simple. Importers held back their orders in the hope that with the bumper cotton crop in America prices would still further droop, but in this they were wholly mistaken, as large orders for India have kept the manufacturers busy, and orders not only had to be placed at higher prices, but also with deliveries over very long dates, in some cases as far ahead as the commencement of next year. On the whole, the total exchanges between the two countries as we now know them show a decrease in exports to Turkey to May, 1912, amounting to just over half a million, compared with the same period in 1911, which was a record year, but hold their own when compared with 1910, in itself a record year. Of this decrease almost a quarter of a million is recovered in imports from Turkey as compared with the same period in 1911, so that the total decrease in the exchanges between the two countries, compared with 1911, is a little over a quarter of a million only, and on the other hand is £400,000 in excess of 1910 to the same date. This, considering the many set-backs, the iniquitous war, our own coal strike, and the closing of the Dardanelles, is really anything but a bad showing.

The total exports of the produce and manufactures of the United Kingdom to Turkey in 1911 amounted to £9,457,444 (uncorrected totals) as compared with £8,636,666 in 1910, £7,564,281 in 1909, and £7,493,737 in 1907, over a period of five years. A study of the detailed figures of Great Britain's exports for 1911, just to hand, if comparison be made with the principal exports to Turkey for the same period of five years, is interesting as showing the particular lines in which remarkable and steady increases have occurred. The figures appear below in tabular form.

	1907.		1909.		1911.
Apparel, Waterproofed	9,242	...	13,257	...	13,599

BULGARIA'S FOREIGN TRADE

(From Our Own Correspondent.)

Odessa, June 16.

The commercial agent attached to the administration of the South-Western Railway, M. Tolli, was recently instructed to draw up a report on Bulgaria's foreign trade with the special purpose of showing whether this country's commercial relations with the Balkan State were expanding or retrogressing.

According to M. Tolli's official statement, Bulgaria's imports from various foreign countries were, last year, as follows:—From Austria-Hungary, 47,572,000 frs.; from Germany, 34,120,000 frs.; from the United Kingdom, 22,682,000 frs.; from Turkey, 21,024,000 frs.; from France, 8,507,000 frs.; from Russia, 6,850,000 frs.; and from Italy, 6,343,000 frs. Russia takes one of the two lowest places, therefore, in the foreign trade with Bulgaria. All her efforts to increase her commerce with her Balkan ally have failed, notwithstanding privileges and subsidies accorded to the Black Sea and Danube Shipping Company trading with the Danubian ports from Odessa, and the Russian Steam Navigation Company, whose liners call twice a week at Varna and Burgas. Her chief article of export to Bulgaria is sugar, but in this she is being driven out of the market by Austria-Hungary. In metal industries Bulgaria, last year, drew her supplies from abroad in the following proportions, ad valorem:—From Germany, 7,577,841 frs.; from Belgium, 3,939,359 frs.; from Austria, 6,120,129 frs.; from France, 945,189 frs.; from the United Kingdom, 2,673,076 frs., and from Russia, 916,950 frs. M. Tolli thinks it remarkable that Russia's trade with Bulgaria should be dwindling rather than increasing, in spite of the fact that the two countries are geographically such close neighbours. He allows nothing for the nature of the competition opposed to Russian exporters, but recommends a shortening of rail communication between the South-Western system at Kieff and Trajan's Wall; that is, a new branch line running to Ismail, as the sea communication between Odessa and the ports of Reni and Ismail is too roundabout and slow. M. Tolli was one of the leaders of the commission recently appointed to study the means of improving and enlarging Russia's trade with the Near East. As a matter of fact, similar commissions have been many times appointed during the last fifteen years, but they do not appear to have led to any practical result, and it is doubtful whether M. Tolli's recommendation, if adopted, will prove more fruitful.

TRADE OF JEDDAH.

Mr. Consul Monahan, reporting on the trade of Jeddah for the years 1908-10, says :—

No official statistics are obtainable, and hardly any information from local merchants. It seems certain that in 1910 about £90,000 was paid as import duties, which would give a little less than £1,000,000 worth (invoice value) of dutiable imports. There may perhaps be three-quarters as much again not dutiable—that is, imported from Ottoman ports—so that the total yearly imports may perhaps be about £1,750,000. Exports being trifling, the imports are for the most part paid for by money of pilgrims, as the inhabitants of Mecca, Medina, Jeddah, and Yambo, and also the Bedouin camel drivers, live directly or indirectly on pilgrims. Jeddah imports for the needs of pilgrims and of the fixed population of the Hejaz, including until lately at least the greater part of the needs of Medina, which town to some extent now imports by railway. Jeddah also imports for much of Central Arabia. The Hejaz grows practically nothing except a small quantity of vegetables and grapes, and has no minerals and practically no manufactures. Specie amounting, it appears, to over £1,000,000 a year is the great export.

WHY PAY RENT?
The City Life, nder its "IDEAL" policy plan, enables Policyholders to reap the benefit of their inves ment DURING THEIR OWN LIFE-TIME, and in the event of premature death to leave their legal representative in possession of a comfortable house, free from any mortgage charge or encumbrance.

Openings for Business.

TRADE COMPETITION.

Foreign Sample Exhibits.

The Board of Trade, on the recommendation of their Advisory Committee on Commercial Intelligence, have arranged for the formation by the Trade Commissioners in the self-governing dominions of extensive collections of samples of hardware, hollow-ware, tools, etc., of foreign manufacture, which compete on a large scale in those dominions with similar goods of United Kingdom origin. The samples will be accompanied in all cases by detailed information as to the country of manufacture, price, rates of Customs duty, and other matters affecting the trade. Arrangements have also been made for the exhibition of such samples in London, Sheffield, and Birmingham.

We believe that the idea could be successfully extended to other industrial cities, and at a comparatively small expenditure. It would suffice to collect samples of hardware, tools, agricultural implements, etc., of foreign manufacture that compete with our articles abroad, and place them on show where our manufacturers can easily have them studied.

We would suggest, moreover, that the British Chambers of Commerce in the Near East should contribute to this demonstration by collecting and sending to some distributing office (to be designated) at home such foreign articles as compete successfully with our own articles. As an experiment, the articles could be limited, as above, to the hardware trade.

The matter is essentially one of organisation, and we refer to it here in the hope that some of our readers will come forward with suggestions that will facilitate the realisation of a project which we consider of interest to British exporters.

MACHINERY FOR ASIA MINOR.

The *Nachrichten fuer Handel und Industrie* publishes an extract from a report by the German Consul at Aleppo to the effect that, owing partly to the construction of the Baghdad railway, there is likely to be in the near future an increased demand in the Aleppo district for machinery, such as stationary motors, mills, pumps, agricultural machinery and appliances, etc. As regards terms of business, it is usual for the sellers to grant credit. Buyers pay one-fifth to one-eighth of the amount, according to the extent and value of the order, before delivery, a like amount on receipt of shipping documents, and the remainder in instalments, within eighteen months of the arrival of the goods in Tripoli (Syria).

TRADE IN CORFU.

The following particulars are taken from the report on the trade of Corfu for 1911 by Mr. Consul G. Raymond :—The total value of exports during 1911 amounted to £76,304, which shows a decrease of £353,231 compared with 1910, due to the small sale of the new olive oil. There still remains unsold a small quantity of last year's stock, which amounted to about 3,800 tuns. The new crop of 1911-12 is estimated at about 12,000 tuns. The greater part of the extra fine quality of Corfu oil is exported to the French and Italian Riviera, where it is bottled, etc., and sold as Lucca oil. Great improvement has been made in the manufacture and quality of olive oil by the introduction of new hydraulic machinery. The total value of imports from foreign countries during 1911 amounted to £246,206; this shows a slight decrease in comparison with 1910, but there is still a large quantity of oil unsold, and the imports are generally governed by the exportation of olive oil.

FERTILISERS FOR PALESTINE.

According to the *Oesterreichische Monatschrift für den Orient*, there has been a considerable increase in the import of fertilisers into Palestine within recent years. This demand is due to Jewish and German colonists, whose modern agricultural methods are being imitated by the native inhabitants.

TRIPOLI: GENERAL CUSTOMS REGIME.

From information published in the *Bollettino di Notizie Commerciali*, for May 22, it appears that a duty of 11 per cent. ad valorem is imposed on goods of any origin on importation into Tripoli and Cyrenaica, except barley, wheat, flour, macaroni, rice, dried fish, sugar, coffee, tea, and petroleum, which pay only 4 per cent. ad valorem. An additional duty is levied on spirits and beer.

Raw gold and silver are admitted free of import duty.

The temporary importation is permitted, free of duty, through the Customs house of Tripoli, of crude ostrich feathers to be washed, sorted and re-exported, and also of tanned goatskins to be sorted and re-exported —in both cases within a period of six months.

The importation of manufactured tobacco for the personal use of the importer is permitted in a quantity not exceeding two kilogrammes, and subject to the payment of a duty of 30 lire per kilog. for Havana cigars and cigarettes, and 15 lire per kilog. for other manufactured tobacco.

The following articles, says the *Board of Trade Journal*, are exempt from Customs duty on importation into the Province of Libya:—Unworked stones and earths for building purposes; lime, common, quick or calcined; crude graphite; coal; firewood and charcoal; and wheat straw for forage and litter.

EGYPTIAN PUBLIC WORKS.

The Public Works Ministry have decided to suppress the list of contractors authorised to tender, will give henceforth free access to its adjudications to all contractors, and application need not be made for inclusion on the said list in future.

It is well understood, however, that in the case of tenders submitted by a contractor unknown to the Ministry, such tenders will only be considered in so far as the contractor proves, by actual documents, his professional and financial capabilities.

GREEK TEXTILES.

In a Vice-Consular report from Zante it is stated that the total value of Manchester and Yorkshire goods imported during 1911 was below that of the preceding year. This is due to the competition of the Greek textile fabrics and yarns in general. The competition in yarns especially is keener than formerly; consequently the imports were the lowest on record. Formerly Greek mills only spun yarn up to No. 14, but lately the majority of them spin from American cotton up to No. 24.

The Greek manufactures are undoubtedly inferior in point of quality and still behind in variety of pattern, but they are gaining ground on account of the heavy duties imposed on all foreign articles.

The goods mostly competing with British articles are coarse numbers of cotton yarns (4 to 14), and lower qualities of T-cloths, supplied by the Piræus mills on much lower terms than could be obtained for foreign imported goods.

TOBACCO CRISIS IN CAVALLA.

The Consul-General at Salonika reports that merchants still hold large stacks of 1910 tobacco (says the *Board of Trade Journal*), especially of the higher grades, which were bought last year at unprecedentedly high prices. This fact makes it difficult for cultivators to dispose of their produce, such demand as there is at present being mainly for the lower grades of the leaf. Another effect of the war is that the Italian Régie, which is usually one of the largest customers for Cavalla tobacco, is not a direct buyer this year. The situation, therefore, is distinctly critical from the point of view of the tobacco growers, who, it is stated, are being advised by the local Turkish authorities not to sell their tobaccos under last year's prices; it is, however, evident that these prices will not again be reached in the near future, and the necessity of restricting cultivation by legislative means is already discussed.

TENDERS INVITED.

EGYPT.

Supply of Sail Canvas.—Tenders invited by the Egyptian War Office for the supply of 15,000 metres of native sail canvas. Tenders received at Financial Secretary's Office. Delivery to Stores Depart., Citadel. Date, July 17 (11 a.m.).

Supply of Chevrons and Badges.—Tenders invited by the War Office for supply of chevrons and badges. Tender forms and all particulars may be obtained at the offices of Mr. A. L. Webb, C.M.G., Queen Anne's Chambers, Broadway, Westminster, where also tenders will be received. Firms who have not previously held a contract in the Egyptian War Office must give two references, one to a bank. Date, July 10 (noon).

Construction of a Bridge.—Tenders will be received at the Office of the Asyut Barrage Circle, Asyut, for the construction of a fixed steel pile and girder bridge, 7 metres wide and 56 metres long, between abutments over the Ibrahimia Canal at Mallawi. The tender is to be submitted as a lump sum offer, including everything as per specification. Plans and specification can be seen at and obtained from the offices of the Inspector-General of Irrigation, Upper Egypt, Public Works Ministry, Cairo, and at the office of the Inspector of Irrigation, Asyut Barrage Circle, Asyut. Tenders must be submitted on stamped paper. They should be addressed to the Inspector of Irrigation, Asyut Barrage Circle, Asyut, in a sealed envelope bearing the inscription: "Tender for the construction of a fixed steel pile and girder bridge at Mallawi."—Date, August 1 (10 a.m.).

ROUMANIA.

Supply of Cigarette Paper.—Tenders invited at the State Monopoly Offices, Bucharest, for the supply of cigarette paper. Date, July 18.

Erection of Incinerator.—Tenders invited by the Municipality of Turnu-Severin for the erection of an incinerator. Conditions, etc., from office of the Mayor, Turnu-Severin. Date, July 5.

BULGARIA.

Supply of Ironwork and Concrete.—Tenders invited by the Financial Administration of the District, Sofia, for the supply of ironwork and reinforced concrete for two sheds. Estimated value, 195,000 frs. Date, June 29.

Supply of Rolling-Stock.—Tenders invited by the District Finance Board, Sofia, for the supply of 450 (various) wagons and two four-axle luggage vans and spare parts. Estimated value £72,000. Deposit, 5 per cent. Date, July 2.

SERVIA.

Supply of Rails, etc.—Tenders invited by the Direction of Servian State Railways for the supply of 865 tons of rails, 42 tons of fish-plates, and 102 tons of brasing plates for narrow-gauge line. Date, July 18.

Supply of Nails and Screws.—Tenders invited by the Direction of Servian State Railways for the supply of 23 tons of nails, 7,260 tons of screws, and 33,000 washers. Date, July 20.

Supply of Railway Points.—Tenders invited by the Direction of Servian State Railways for the supply of 45 sets of points l.h. and 45 ditto a.h., with fittings. Date, July 22.

MALTA MAIL STEAMER SERVICE.

Tenders are invited by the Government of Malta for the conveyance of mails between Malta and Syracuse for a period of six years from August 19, 1913. The contract will provide for a daily voyage each way at a speed of not less than 11 knots per hour.

Particulars and copy of the proposed contract may be obtained from the Crown Agents for the Colonies, Whitehall Gardens, London, S.W. Tenders must reach the office of the Receiver-General and Director of Contracts, Malta, by 11 a.m., on Thursday, December 5, 1912.

The Berlin correspondent of the *Financial News* states that the Steaua Romana is reported to have recently formed a new subsidiary, the Aktiengesellschaft Nafta, with an authorised capital of 1,000,000 lei, with a view to the opening up of a new market for its produce in Bulgaria.

Engineering Notes.

Harbour Works at Constantinople.

The German Consul-General at Constantinople is responsible for the statement that the Turkish Government have made important additions to the plans which were originally drawn up for the re-organisation of the naval arsenal at Constantinople. The original proposal to grant a concession to a private company to carry on the business of the arsenal has fallen through (says the *Nachrichten fuer Handel und Industrie*), and it is now reported that the Government will no longer confine themselves to developing and modernising the Golden Horn establishments, but will construct a new naval harbour and arsenal. For this purpose the Gulf of Ismidt and the Asia-Minor bank of the Sea of Marmora, between Djirmen-Dere and Kazikli, have been suggested.

To supplement the naval harbour at Ismidt it is proposed to establish another harbour for torpedo boats at Laz-Bournou, a strip of land on the Asia-Minor bank, opposite Stamboul, and in this connection the Ministry of Marine recently published a notice inviting contractors for quay works, etc., to send in estimates. In addition to a quay, it is said that a breakwater will be erected there, as well as stores for ammunition, coal, and drinking water.

Railway Construction in Smyrna.

The one bright spot at present, writes the *Quarterly Journal* of the British Chamber of Commerce of Smyrna, is the progress being made in railway extension. Both the British and French companies radiating from Smyrna are pushing on their extensions, and the former's last section to Egherdir will be opened towards the end of this year, while the Soma to Panderma line has now three stations open to traffic. The British line, known as the Ottoman (Aidin) Company, has a total number of 365 miles open, and employs in its service 1,673 men.

Wireless Telegraphy as a Life Saver.

The advantages of wireless telegraphy at sea are now being recognised, and it will presumably be only a short time before the fitting of wireless apparatus on all seagoing ships will be made compulsory. Since 1909, or during a period of just three years, it is stated that no less than twenty-two shipwrecked vessels have called for assistance by the aid of wireless telegraphy, and it is to the circumstances that these ships were fitted with the necessary apparatus that the passengers owe their lives. This fact should certainly make its use compulsory on all shipowners.

Advantages of Lightning Conductors.

The protection of buildings by properly constructed lightning conductors is not given as much consideration as the subject deserves, especially in those tropical and semi-tropical countries where thunderstorms are of frequent occurrence, though their utility in preventing loss of life and damage to buildings has been amply proved. In England alone, according to *The Engineer*, some 400 buildings are struck by lightning each year, and it is found that out of this number only about 2 per cent. have been fitted with conductors, and in these cases the cause of the damage is usually to be found either to be due to the defective condition of these conductors or to there being an insufficient number for the size of the building. Like every other safeguard, the conductors should be examined from time to time to see that they are in good condition and have not been accidentally damaged or broken; but with this exception they entail no extra cost after having once been fixed. It is a curious fact that although there are many cases of loss of life by lightning in unprotected buildings, there has not, so far as can be ascertained, been any loss of life from this cause in the last ten years in buildings which have been properly protected.

Oil Engines for Baku.

The British Consul for Baku states in his report for 1911, says the *Times*, that a great demand exists locally for internal combustion engines to work on crude oil, as most of the oil producers are dismantling their steam plant, and are adopting oil engines and electricity for power purposes. The best internal combustion engines at present on the Baku market are those of British make, but their cost is high and often disproportionate to their advantages, while foreign makers, by having the heavier parts manufactured in Russia, thus saving freight and duty, are able to supply the engines at lower prices. Oil engines would also sell well in the agricultural districts, where they are used to drive cotton machinery, mills, and irrigation plant. It is recommended that British manufacturers who propose to do business with these engines should make tests and trials with crude oil actually received from the Baku fields.

Motor Yacht.

A full-powered cruiser has just been constructed by John I. Thornycroft and Co., Ltd., for service in the Near East, says the *Journal of Commerce*. The vessel was required to possess first-class sea-going qualities, and she has been built 45ft. in length, with 9ft. beam, and extreme draft 2ft. 9in. The propelling equipment consists of a "Thornycroft" M6 type motor, using paraffin as fuel, and starting directly on petrol. The boat has attained a speed of 9.7 knots over the measured course. The hull is built of teak on frames of American elm, and, to 3in. above water line, is sheathed with copper. In the fore peak a 100 gallon fuel tank is stowed, and a chain locker is arranged above it. The accommodation comprises, forward, a sleeping cabin, and a ladder and hatch provide access to upper deck. Aft of this is a very roomy saloon, ventilated by overhead skylight, and divided from the sleeping cabin by curtains. Following this is the toilet room and usual fittings. On the port side is a well-arranged pantry. Aft of this again is the motor room, containing the engine and reversing gear, two folding cots for crew, cooking stove, fresh water tanks, etc. The engine case is built with a flat tray top to serve as a table. A cockpit with steering gear occupies the stern of the vessel. An excellent promenade deck is formed by building up the topsides to about three-quarters of the length of the vessel.

Egyptian One-Design Class.

Under the above heading the *Yachting World and Marine Motor Journal* says that "the Société Nautique d'Ismailia has ordered a series of one-design boats from the well-known French naval architect, M. J. Guedon. The class rules stipulate a length of some 17ft. (5½ metres), with a beam of over 6ft. (1 metre 92), and boats must be half decked. They will be shallow vessels, the moulded depth being just over two feet. Iron keels of 330 lb. weight are also stipulated, the centre plate to be of sheet iron. The total sail area amounts to 230 square feet about, and it has been decided to put all the cloth in one sail of the balance lug type. The total order given to the builder is for 16 boats, to be delivered in monthly batches of three or four boats at a time. There are several very healthy sailing clubs in Egypt and Algeria, most of which own strong classes. Two at least of the clubs are strong enough to have secured representation in the French Federation of Mediterranean Yacht and Sailing Clubs.

SOCIÉTÉ D'ETUDES.

Last Friday the Société d'Etudes for the proposed Trans-Persian railway was formally constituted and registered. The directors number twenty-four, eight representing Britain, and an equal number Russia and France.

The British directors are: Sir William Garstin (vice-president); Sir Arthur Lawley, formerly Governor of Madras; Sir William Bissett; Hon. Hugo Baring, representing Parr's Bank; Viscount Errington, representing Messrs. Baring; Mr. C. F. Campbell, representing Forbes, Forbes, Campbell, and Co., of London and Karachi; Mr. J. S. Haskell, of Messrs. E. D. Sassoon and Co.; Mr. V. A. C. Hawkins, of the Imperial Bank of Persia.

The directors representing Russia are: M. Homiakoff (vice-president), ex-President of the Duma; M. Bunge, the eminent Russian engineer; M. Lvoff, Discount Bank of Persia; M. Mookhin, Volga Kama Bank; M. Poutiloff, Russo-Asiatic Bank; M. Vyshnegradski, Bank of St. Petersburg; M. Dymsha, Maltzof Company; M. Zvegintzeff, member of the Duma.

The French directors are: M. Raindre (president), Ambassadeur de France; M. Benac, Banque de Paris; M. Chapuy, Banque de Paris; Baron Marais, Crédit Lyonnais; M. Fourton, Société Générale; M. Fischer, Comptoir National d'Escompte; M. Lyon, Banque l'Union Parisienne; Count d'Arnoux, representing a French group.

According to the *Vossische Zeitung* the financial syndicate which proposes to build a trans-Persian railway is negotiating with the Persian Government for the making of a loan of 30,000,000 tomans.

ON ADMIRALTY LISTS.

The "Lamrig" Washer.

An Absolutely Reliable Washer.

MECHANICALLY SOUND.
SELF FIXING. CHEAP.

Oil Topics.

LONDON, June 20.

Carpathian Oil Combine.

The various meetings in connection with the big Carpathian oil combine are now being held, and Mr. Boxall may be congratulated upon the manner in which he handles these meetings. He has a very important scheme to explain, and he explains it in a very lucid manner, and gives the shareholders of the various companies all the explanations that they ask for. There is no necessity for us to dilate further on the Premier Oil and Pipe Line combine, as we have given every detail in our previous issues. It is one of the biggest things attempted in oil for many years, and we wish it every success.

Astra Romana.

The Astra Romana report has now been issued. It is the first report that has been made since the Regatul Romana and the Astra combined businesses. The joint concern had a production for the year ending December 31, 1911, of 520,590 tons, or a third of the total production of the whole of Roumania. This big concern turns out 1,426 tons of oil a day and the production has largely increased during the year, for the daily average for 1910 was only 931 tons. The principal output is from Moreni. The prospecting work at Filipesti has given very favourable results, but the Astra is not pushing on with the development here, as there is no means at present of getting the oil away. It will be two years before the pipe lines to Constantza are finished, and the railways are quite unable to handle more traffic. The lease of the works at Baicoi will expire at the end of 1912, and the Astra has decided to enlarge its refinery at Ploesti, and bring it up to a capacity of about 1,400 tons a day. The export trade has grown so large that an installation of reservoirs at Constantza has been begun. In spite of the largely increased production, the profits earned by the Astra do not show as good result as was expected. This is mainly owing to the low prices at which residues were sold. Now, however, the price of crude has gone up, and there is a constant demand for it for steamers. Petrol has also risen, and even the burning oils are being sold at a better price.

Roumanian Reports.

The Vega, a well-known Roumanian refinery, has issued its balance-sheet for the year ending December 31, and shows a gross profit of 994,445 francs. 350,979 francs was written off for depreciation, and the net profits of the Vega for the year are 464,942 francs. This is not bad on a called-up capital of 3,750,000 francs, and compares favourably with the Credit Petrolifer, whose called-up capital is 5 million francs, but whose net profit for the year is only 407,746 francs. The Concordia, another well-known Roumanian company, has issued its balance-sheet. This big company has a capital of 25 million francs, and has made a gross profit of 2,265,392 francs. But, as it writes off 2,790,761 francs for depreciation, and has 1,604,083 debit balance, it has to carry forward a loss to 1912 of 2,698,599 francs. These various figures show how the Roumanian oil trade varies, for whereas one company does well, another company makes a heavy loss.

Spies Petroleum.

The Spies report has been issued, and the market is dissatisfied. The production is 19,715,127 poods, which is down 2,366,215 poods on the year. The crude oil sold at an average of 20.8 copecks per pood, as compared with last year's average of 14.834 copecks per pood. £28,176, or nearly double as much as last year, has been charged to revenue, cost of deepening wells, and the maintenance of machinery and plant, and the net profit is £191,624. This is £12,621 better than the previous year. The advance in prices has more than counter-balanced the falling off in production. The dividend is maintained at 20 per cent. for the year, and £19,076 is carried forward. The water troubles in the Western part of Grosny still continue; all the various producers have joined together to try and solve the difficulty. The latest report is that the position has slightly improved. But it cannot be said that the trouble has vanished. We are very glad to see that the company has not carried further its negotiations for the joint erection of a refinery. We certainly think that the building of such a refinery might have proved not only expensive but probably unprofitable. With crude at its present price, it certainly pays much better to sell the oil in Russia than to run the risk of refining it. The first five months of the present year show a falling off in the production, but the actual amount of money realised from the oil sold to the end of May has amounted to a little more than last year, and the directors report that if the high prices continue the revenue of the company should show a large increase for the current year. The company holds a big interest in Maikop Spies, but it is worth noting that it has sold a good many shares, and has made a profit of £5,700 on the deal. On the whole, we do not agree with the market view of the balance-sheet. We think that Spies has a good prospect in front of it. If the Western field can get rid of the water, then we shall see a big rise in the shares.

Maikop Spies.

The Maikop Spies report shows that the net production for the year was 366,315 poods. No less than 150,750 poods was used for fuel. This is an exorbitant amount, and shows to what heavy expenses a new company is subject. But, of course, Maikop Spies is very busy drilling, and during the year drilled 3,657 ft. It sold its oil at an average price of 19.474 copecks, which is slightly less than the Grosny Spies sold at. During the first four months of the present year the production has largely increased, and to the end of April 577,042 poods were baled, and the average selling price was 22.74 copecks. It is disappointing to find that the board still remain doubtful as to the future of the Maikop field. Their whole energies are now concentrated on plots bordering 488, from which they are getting their best production. Well No. 2 on this plot has produced over half a million poods to date. No profit and loss account is issued with the Maikop Spies report. The company has very little cash in hand, but it has invested £24,500 in the Maikop Mutual Transport Company. It looks very much as though Maikop Spies would have to call upon the shareholders to find more money, for it certainly cannot go on without working capital.

CENTRAL CARPATHIAN OIL.

An extraordinary general meeting of the above company was held on Monday to consider a resolution for the sale of the company's holding and shares in the Carpathian Petroleum Gesellschaft to the Premier Oil and Pipe Line Company.

Mr. E. T. Boxall presided, and, in moving the resolution, said in the opinion of those competent to judge the Galician Oilfields compared very favourably with other very well-known oilfields in the world. One fact stood out prominently—viz., the vast possibilities of this field, the progress of which in the past had been retarded by the apparent lack of organisation and united policy. Before the advent of the Producers' Union there was no united policy among the producers, the bulk of the wells being owned by individuals who made no effort to work together, with the result that oil which in most other markets was worked £1 per ton and upwards was being sold for some time as low as 7s. 6d. to 10s. Such a price was not sufficient to make any proper returns, and the whole of the industry was languishing until the Austrian Government stepped in and the Union of Crude Oil Producers was formed, and from that time on the price has steadily advanced, until it was now equivalent to £1 18s. 4d. per ton. The same lack of organisation might have been seen in the pipe lines, which until recently were each working on a more or less isolated policy. A similar unsatisfactory state of things existed in regard to the refineries, which until the end of last year were competing against each other, both in regard to inland sales in Austria-Hungary and also the export markets.

One object of the present arrangement was to make such a strong amalgamation, excluding producing wells, undeveloped land, piping, storage, and reservoirs, that would make them very largely independent of almost any combination of adverse circumstances. The object of that meeting was to pass a resolution authorising the directors of this company to enter into an agreement with the Premier Oil and Pipe Line Company, Limited, for the sale of the share capital of the Carpathian Petroleum Gesellschaft for the sum of £500,000, payable in fully-paid ordinary shares of £1 in the Premier Oil and Pipe Line Company, and the directors strongly recommended the passing of the resolution. The capital of the Premier Company, to allow of the purchase of the various interests detailed in the circular, would be increased to £3,750,000, divided into 1,250,000 7 per cent. non-cumulative preference shares, and 2,500,000 ordinary shares. The share capital would be divided as follows: 869,000 preference shares, to be issued in part-payment of the refineries and oil lands to be acquired from the various Austrian and German proprietors; working capital, £181,000; and in reserve, £100,000.

The present arrangement offered a unique opportunity of placing this company's interest on a sound industrial basis. The benefits that would accrue might be summarised as follows: The acquisition of a large and adequate working capital for development work of this company's own lands, as well as those to be brought into the combine. The acquisition of refineries which would not only give this company a proportionate benefit of the large profit now being earned by the refineries, but also an increased price for the good oil now being produced. In addition to this must be reckoned the benefit of controlling nearly all the pipe lines in Galicia, and a very large quantity of storage accommodation. Finally, it must be borne in mind the very important benefit that would arise from the association of the combined companies with the Deutsche Erdol Gesellschaft of Berlin, which practically controlled the whole of the export of refined oil from Austria-Hungary. Controlling, as this company would, about one-third of the present production of Galicia, owning four of the most important refineries in Austria, together with the control of pipe lines and storage of the distributing agencies at their disposal, it seems difficult to over-estimate the possibilities of this company for the future.

The resolution was unanimously agreed to.

"SUN" PATENT SUPERHEATERS & EVAPORATORS
give controlled superheating of steam, economise fuel and safeguard the plant.
"ALBION" PATENT CO_2 RECORDERS & FLUE GAS ANALYSERS
check the products of combustion and indicate preventable waste.

Near East Markets.

Special Reports.

(From Our Own Correspondent.)

Odessa.

There is not for the moment a large stock of grain of the last crop in hand. The prospects for the new crop are very encouraging. Copious rains have fallen during the last week over the greater area of Southern and South-western Russia, and, according to a consensus of official reports received here, a good middling general harvest is now practically assured. It is, however, never safe to make anything in the shape of an absolutely confident forecast of harvest results; a Russian harvest may only be accounted safe when it is garnered, so uncertain are the weather vagaries which may ensue at the eleventh hour. It must, therefore, suffice to say that at present all cereals are in excellent condition, there is a sufficiency of moisture in the soil, and the hot ripening weather has set in.

The following information is compiled from the weekly bulletins received at the London offices of the Imperial Ottoman Bank from its correspondents in the Near East:—

Constantinople. June 8.

Wheat prices were firm until Friday, when they dropped ½ to 1 paras. Operations in mohairs during the week showed a reduction of 6 per cent. in the prices estimated.

Mitylene. June 8.

Five hundred barrels of oil, valued at £T3,000, were loaded during the past week, principally for Syria and Roumania; 900 bags of soap, valued at £T1,800, were likewise exported.

Imports are restricted, being limited to two cars of Russian sugar and two cars of alcohol for Odessa. There have been no imports from the United Kingdom.

The blossoming of the olive trees has begun under most favourable conditions.

Janina. June 5.

The war and the tariff on goods of Italian sources have combined to stop our important trade with Italy.

The great want for manufactured articles will become acute in August and September. British manufacturers, owing not only to strikes, but to excessive demands, are refusing all new orders, especially for prompt delivery. There is an important stock on hand, it is true, but no variety, and recourse is being had to Germany, Austria, Belgium, and Switzerland.

There is a demand for white calico, cotton cloths, and madapolams.

The following are extracts from local reports published in the *Quarterly Journal* of the British Chamber of Commerce of Smyrna:—

Chio. May 8.

Imports generally have been reduced considerably this quarter, owing to the political situation; many orders, particularly for hides, have been cancelled, most of them being of Indian and Egyptian origin.

Aivali. May 10.

The general outlook is anything but encouraging or satisfactory. Trade and manufacturing are particularly at a standstill.

The actual state of all the crops, with the exception of beans, which have been damaged by frost to the amount of 15 to 20 per cent., and vineyards to 80 per cent., is looking excellent.

The late rains, followed by mild and cool weather, have vastly benefited the olive plantations. We are also expecting to see very good summer crops, viz., sesame, maize, cotton, and pea-nuts.

Adalia. May 10.

The general trend of imports is for inferior qualities and low prices.

As a general rule, in most localities throughout the district, land being abundant, the same fields are not cultivated twice in succession. Primitive methods still prevail, though during the two last years two small threshing machines and some mowers of Austro-Hungarian manufacture and a few ploughs have been introduced.

The outlook for this year's crops is most promising; the wheat has uniformly formed good roots, principally in our highlands, where excellent hard wheat is produced. The crops both in high and low lands will be very abundant, and are calculated to give a yield of about 30 to 35 per cent. above those of 1911

Wide secular forests exist here of many thousands of cubic metres of oak, fir and pine. Areas of 10,000 cubic metres on Mellon Dagh and of another 10,000 cubic metres on Safron Dagh (in the Nahié of Manavgat) could be exploited very advantageously. The timber is brought to the coast by the rivers Ak Sou and Kipru, and by cheaply freighted Egyptian sailing crafts is disposed of in Syrian and Egyptian ports, and hence to the Sudan by the river Nile.

As regards British interests, what is required is greater enterprise on the part of British traders and merchants. Catalogues and price lists should be translated into Greek and Turkish as well as in French, and it is advisable to quote prices c.i.f. delivered at this port. Longer periods for credit should be given when satisfied as to the honesty and reliability of local merchants.

A parcel post service with Europe will be of enormous advantage in promoting exchange of goods, and, strange to say, of the forty odd ports in Turkey which were granted this facility, Adalia, the most important port of this coast, was forgotten, and it is desirable that the postal administration should be asked to extend the privileges to this port.

Smyrna. May 25.

We have had a fine spring for the tobacco crop, and if the season is going to be a wet one—in other words, favourable—we will have a big crop again equal to last crop, though the area planted is 35 per cent. less than last year, but there is every probability of the crop being small owing to the scarcity of money and on account of the locusts, which are beginning to be felt in the districts of Odemish, Ligda, Alasheir, etc. There is fear now of a scarcity of labour for the gathering of the crop, as the Government is calling on all the recruits, which will have a disastrous effect. Wages have jumped up until we are paying 50 to 70 per cent. more than last year, and strikes are the order of the day.

The sultana outlook for the coming season is favourable, but it is no easy matter as yet to arrive at any reliable forecast of the extent of the yield. Should conditions continue favourable into the summer, it is believed that a production of 30,000 to 33,000 tons should eventually be obtained.

The fig trees present a satisfactory appearance, and estimates presently assess the probable yield at about 110,000 loads against 95,000 loads last autumn.

In connection with all crops this summer, a sound of warning should be given with the appearance of locusts in the country. As the warm weather approaches, the locusts will develop their wings and strength, and will commence flying in their swarms of millions through the cultivated districts.

Since the last month we have had small fluctuations in the oil market, according to the arrivals from the interior. Prices to-day are firm at from £37 10s. for best Aidin oils. As last quotations from Spain indicate a sharp rise, we are afraid that we shall soon follow the lead. Some of our olive oil districts have ceased sending oils to the town deposits, but others have still large quantities of olives not yet crushed, which will keep us fairly supplied for some months to come. The weather continues favourable, but accounts from the Aidin districts, where the last large crop has tried the trees, are far from encouraging.

Salonika. June 8.

In this country, whatever the condition of the crops may be in April, May is the critical month that mends or mars them. This season, after a favourable winter, everything went exceedingly well with us until within five or six weeks ago, and at the end of April we had hopes of harvesting record crops. Unfortunately, owing to May having been very dry, the present outlook is not by any means so encouraging, and it is now feared the yield will fall far short of what was anticipated a month or so ago.

PRODUCE REPORT.

London, June 20.

Although more favourable conditions prevailed this past week in the matter of deliveries, and further improvement is expected, things have not been brought yet to a normal condition in the markets. The strikers maintain their attitude of dogged refusal to return to work, while, on the other hand, work is proceeding at the docks with new men, though, of course, at a slower rate.

Sugar.

Business is seriously hampered by the strike, and although there has been a better inquiry, deliveries are still difficult to obtain.

Beet Sugar.—The market is inactive. Closing rates are: June, 11s. 9½d.; August, 11s. 10½d.; September, 11s. 4¾d.; October, 10s. 3¼d., f.o.b. Hamburg.

Refined Sugar.—English, Tate's No. 1 cubes, prompt and July-August, 22s.; September-October, 21s. 9d.; November-December, 18s. 9d. Dutch cubes, 17s. 7½d., f.o.b. Amsterdam. German and Austrian cubes, 17s. 6d., f.o.b. Hamburg. French cubes, 19s. 10½d., f.o.b. Paris.

Coffee.

The demand has been very moderate. Santos, quoted for July at 64s. 6d.; September, 64s. 6d.; December, 63s. 7½d.; and March, 63s. 6d.

Currants.

Business has been restricted, as, owing to the strike, there is no inducement to buy fruit lying at public wharves. There has been an improved demand from the country, which has resulted in a fair business at slightly higher prices. The s.s. "Stefania" has arrived with 450 tons of currants, but samples are not expected until the end of this week. Provincial is quoted 26s. to 26s. 6d.; Amalias, 27s. to 27s. 6d.; Patras, 28s. 6d. to 29s.; Vostizza, 30s. to 32s. The Board of Trade Returns, published at the end of last week, give the total clearances of currants in the United Kingdom for the first five months of the year as 13,973 tons, against 17,110 tons in 1911 and 17,096 tons in 1910, and exports in the same period as 330 tons against 338 tons in 1911 and 308 tons in 1910.

Sultanas.

The demand for the better grades of sultanas has not been so good, while cheaper qualities have received very little attention. A large quantity of Samarkand fruit in 1¼ cwt. bags has been sold in one deal at 40s., which shows a reduction of 2s. per cwt. This sale has had a weakening effect on the general market, which now remains at about 39s. per cwt. The growing crop in Smyrna it is estimated will be about 40,000 to 45,000 tons.

Oil Cakes.

Linseed oil-cakes are in very small demand for spot, but with more inquiry for summer and autumn delivery. Quotations are:—Hull-made, 95 per cent. purity, £8 17s. 6d. to £9; 98 per cent. purity, £9 15s.; ordinary, £7 10s. to £7 12s. 6d. American, to arrive, are offering at £9 5s.; Russian, none. Cotton-cakes are worth £6 2s. 6d.; seconds, £5 10s. to £5 12s. 6d. Egyptian, both on the spot and forward, is steady at £6 7s. 6d. Bombay cotton-cakes, £5 5s. to £5 7s. 6d.; decorticated meal £7 15s. Soya cakes are at £7 2s. 6d.

Petroleum Oil.

The demand is slow, and prices are barely maintained. American, 8½d.; water white, 9½d.; Russian and Roumanian, 8d.

Various.

Egyptian Onions.—Stocks are now very light, and the advantage in condition this variety has over others has created a better feeling, which has led to an advance. Prices for bags, best, are 8s. to 8s. 6d. Lentils.—Egyptian, flour, in 2-cwt. sacks, 18s. per cwt. Haricot Beans—Hungarian, etc., per quarter (504 lbs.), 65s. Cream of Tartar (including Greek).—Casks about 5 cwt., kegs about 1 cwt., 98 per cent., 87s. 6d. per cwt.

EGYPTIAN COTTON MARKET.

(From Our Own Correspondent.)

Alexandria. June 14.

Prices of cotton keep firm, and there is even an advance on last week's quotations. The appearance of cotton worm has been the cause of this advance, but so far the worm has not caused any damage to speak of. The recent warm weather has destroyed the parasite in the south of the Delta. A good deal of business has been done with producers in cotton of the next crop, and it seems likely that a large part of the latter will be sold before coming to maturity.

Liverpool. Thursday.

Messrs. Reynolds and Gibson report that, although times are quiet, the trade generally is very busy on old orders. The increased business in cotton at Liverpool points to a certain amount of shortage among spinners, and this, coupled with a probable short interest among manufacturers, is proving the underlying strength of the market. Yarns.—In Egyptian spinnings business is hard to find, Egyptian cotton being in very fair demand, and Nubari continues to claim a great proportion of sales.

Prices have advanced for all grades, fair to full good, fair brown and upper being ¼d. dearer, good and fine 3-16d., extra fine brown ⅛d. Estimated sales, 3,000 bales.

Official Report.

The Department of Agriculture issued on June 1 a report according to which the coming cotton crop is regarded as an average one. "The advantage gained by earlier sowing has been lost owing to the unfavourable cold weather in May. Cotton worm is reported in slight quantities all over the Delta, and the boll worm in Sharqia. The plants are healthy.

"On the other hand, the state of the Nile s now similar to, even if not worse than, that of the year 1908. It should therefore be realised by the whole community that the utmost economy should be practised. The prospects for the next six weeks are not good."

EGYPTIAN COTTON FIGURES.

For 41st week, ending June 14.

Supplied by Reynolds and Gibson.

NEWS FROM ALL SOURCES.

Great numbers of troops are being drafted into the Smyrna district by the Turkish authorities. There are 45,000 already, and 15,000 more are due to arrive in the next few days. Abdullah Pasha will take the supreme command.

A committee of experts have recently valued the Shah's cutlery and kitchen utensils at £5,000,000, says the *Pall Mall Gazette*. It is probable that no other Court, not even that of Spain, has such elaborate pots and pans as the Persian. They are all gilt on the inside, and the plainest that are in use in the kitchen are of silver only. The kitchen salt and sugar canisters are of massive silver, but the spoons and forks, plates and dishes are of solid gold, while the majority of the knives have handles encrusted with precious stones.

A contemporary has been informed that a society for the training of natives in the art of chimney-sweeping has just been formed in Constantinople. This profession has hitherto belonged exclusively to the descendants of the Jews, who, on being expelled from Spain, found refuge in Constantinople.

The National Theatre of Belgrade was the scene of a remarkable ovation to a young composer, M. Stevan Christitch, at the performance of his oratorio "The Resurrection," last week. After the manner of Strauss's "Salomé," the composition deals in a powerful and descriptive manner with the dramatic incidents of the Christian Resurrection. It is a striking departure from the traditional style of Servian national music, which is of the nature of light opera. The brilliant Wagnerian orchestration in the bursting open of the tomb was, in the words of the *Pall Mall Gazette*, effectively rendered.

M. Mornard, whose salary has been increased, will combine the functions of Treasurer-General to the Persian Government and Administrator of Customs. He will probably receive a new contract as Treasurer-General for a period of five years.

In the Athenæum Hall, Manchester, the Palestine Exhibition, consisting of the exhibits of the Bezalel School of Arts and Crafts and the Evelina de Rothschild School of Jerusalem, was opened last Monday. The Rothschild School, which is maintained by the Anglo-Jewish Association and the Rothschild family, educates more than five hundred girls a year, and is usefully engaged in teaching trades such as tailoring and needlework to the pupils in Jerusalem. The School of Arts and Crafts is devoted to teaching handicrafts to Jewish youths, and is especially designed to check the pauperisation which has unhappily been fostered by well-meant philanthropy.

Gimsah, of the Red Sea Littoral, has been attached to the Gouvernorat of Suez.

A forest fire broke out on June 13, on the slope of Mount Hymettus, Greece, caused by the explosion of a shell during artillery practice. Other destructive conflagrations are reported at Pikermi, near Marathon, and Kravassara, in Acarnania.

The opium crop in Turkey reached 2,500 cases in 1911, against 1,600 in 1910.

The Greek steamer "Eleni Strathatos" is being repaired by Messrs. Swan, Hunter and Wigham Richardson, Ltd., Wallsend-on-Tyne, following the extensive damage sustained by her recent collision and grounding.

We have received a copy of the Annual Returns of Shipping, Cargo, and Passenger Traffic in the Ports of Egypt and Suez Canal Transits, 1911, published by the Ports and Lighthouses Administration of the Egyptian Government.

The Egyptian Government has appointed a Commission of Inquiry, of which the Director of the Laboratories is a member, to consider the question of the flash point of mineral illuminating oil with a view to fixing a legal minimum.

The King and Queen of Greece visited, on June 16, the exhibition of the silkworm and silk industry, which was opened in Athens on the same day. Their Majesties expressed their surprise at the rapid progress made by the industry during the past few years.

Messrs. J. Compton and Sons, Thos. Hinshelwood and Co., J. Meredith Austin, and F. Ratcliffe were the successful tenderers recently to the Egyptian Government (Ministry of Education) for the supply of raw materials, pupils' clothing, etc., to the model workshops at Bulak and Assiut.

Noteworthy has been during the past few months, an increased migration of Turks from Old Servia (now under Ottoman rule) to Servia, their places having been taken by emigrants from Bosnia and Bulgaria.

The Montenegrin Government has resigned and a new Ministry has been formed, with General Martinovitch as Prime Minister, Minister of War, and Acting Minister for Foreign Affairs.

H.M. Consul-General at Beirut, Mr. H. A. Cumberbatch, C.M.G., reports that owing to heavy and unusual rains in the spring of 1911, the olive crops for that year in the Beirut and Mount Lebanon districts did not ripen till late in October. Consequently, there was a shortage of about 15 per cent., and the total yield of oil amounted to only about 10,000 tons. The prices quoted in the market are 6d. per lb. for good edible oil, and 4½d. per lb. for inferior and soap oil.

The British Consul at Jeddah reports that the price of good drinking-water from the wells varies down to about 10s. per ton, including transport. It is now at the extraordinarily high rate of about £1 per ton. Of rain water from cisterns there has been practically none for the last two years; its price, when there is any, is generally about 18s. per ton, including transport.

A Turco-Hungarian company has been granted by the Ottoman Government 20,000 hectares of land in the vilayet of Konia (Asia Minor) for the cultivation of flax.

A Belgian syndicate has applied to the Bulgarian Government for a concession to erect a sugar factory in the Plevna district.

At the meeting of the directors of the Manchester Chamber of Commerce on Wednesday, a reassuring message, in reply to representations of the Chamber, was received from Sir Edward Grey, who had caused instructions to be sent to His Majesty's Consul General at Smyrna to do everything in his power to protect British interests, should they be endangered by any naval or military action, and to keep the Foreign Office informed of any new developments of the situation.

The Commercial and Agency Company of Egypt, Ltd., has been appointed sole agent for Egypt and the Sudan for Messrs. John Knight, Ltd., soap manufacturers, Silvertown, London, E.

OPIUM MARKET.

Messrs. Barker Brothers, Smyrna, report as follows for the week ending June 7:—We have had a very excited and rather an active week in opium. Our holders have been daily receiving news from all their interior clients reporting drought and a material deficit in the flow of gum from the incised poppy bulbs. Some of our native dealers have gone so far as to predict a crop of only 4,000 cases, which, if it turns out to be the case, we may expect prices to jump up to 30s. Anyway, if we even have a total of 5,500 cases, prices will be maintained throughout the season at 20s. to 25s., according to quality and demand. The sales this week amount to 43 cases, commencing at 16s. 6d. and ending at 23s. 3d. per lb., 22 of which are for America and the balance for account of interior speculators. Our market closes strong with a firm upward tendency prevailing all round. The new arrivals (1912 crop) begin this week, and amount to five cases, against nil at same date last year.

Shipping Intelligence.

DARDANELLES RUMOURS.

(From Our Own Correspondent.)

Odessa, June 16.

From day to day disquieting reports reach us from various sources of the probable re-closing of the Dardanelles. In regular course these statements are duly contradicted, but their persistent reiteration has a very disturbing effect upon international shipping in these waters. They harass the shippers and cause insurance rates to fluctuate abnormally. A local British shipbroker told me to-day that none of these alarmist reports from Constantinople any longer troubled him or his neighbours; they disregard them, and trust only to telegrams received from their London houses. The one authoritative source in Constantinople, he said, was Lloyd's agent, who daily reported the position, present and prospective, to headquarters.

CORFU'S SHIPPING SERVICES.

Mr. Consul George Raymond, reporting on the trade of Corfu, says:—From the beginning of the year the Cunard and Ellerman steamers have ceased calling at Corfu, which has much displeased the merchants here, as their goods are now transhipped at Patras from the United Kingdom, and are naturally more liable to be damaged and delayed. The Adria Steamship Company (Hungarian) still continues running weekly, touching at Corfu, Malta, etc., or during the exportation of olive oil (December to June). During 1911 forty-one British vessels entered the port of Corfu, including two colliers with coal from Cardiff and two Peninsular and Oriental Company's vessels with tourists.

The Consul also warns merchants and others against sending goods to Corfu or the Ionian Islands unless payment is guaranteed by one of the banks or by some responsible person against bill of lading.

SUBSIDISED ITALIAN LINES.

Practically without any opposition the Italian Chamber of Deputies has passed a Bill granting State subventions to the amount of about 16,000,000 lire for the Italian mercantile marine. The new Bill does not differ very much from the previous enactment. Various changes in detail have, however, been introduced which show the effect of the war in North Africa on the national shipping policy. Thus certain new lines between the Continent and the new colonies are to be established at a cost of 2,000,000 lire. Another important change is the creation of four new mail services in the "Adriatic," thus largely increasing Italian competition against Austrian shipping. A fast service between Brindisi and Alexandria is also provided.

For tendering purposes the lines are divided into four groups—the North and South Tyrhennian, the Adriatic, and the Egyptian. No tenders will be accepted except those submitted by Italians or Italian companies whose shareholders are Italians.

NEW STRICK STEAMER.

The trial trip has taken place of the steel screw steamer "Arabistan," built by Messrs. William Gray and Co., Ltd., for Messrs. Frank C. Strick and Co., Ltd., London. Her dimensions are: Length, over all, 412 ft. 6 ins.; breadth, 53 ft. 6 ins.; depth, 29 ft. 6½ ins. The results of the trial were highly satisfactory, an average speed of fourteen knots being attained.

PASSENGER LIST.

Sailed from Marseilles, per Messageries Maritimes s.s. "Congo," June 13, for Alexandria:—M. Khahar Canaan, M. Maggiar, M. H. A. Boys, M. Anagnos, Miss Gaby Raymond, Mrs. Wolff, Mme. Spreng, Mme. Gronefeld, M. Edgard Maffioli. For Beyrout:—M. Mesbaher Suttay, Mmes. Beaubouchet and Mlle. Malpertuy, M. Emilio Morua, Mr. Thomas Georges, M. l'Abbé Louis Taiah, M. Dubois, M. Moussalli, Soeurs Meglin, Boulanger, Antoinette, Louise and Jeanne, M. N. Asses, Mme. Farrah.

STEAMSHIP MOVEMENTS.

Prince Line.

"Corsican Prince.—Left Alexandria for Syrian Coast June 4. "Creole Prince."—Left Antwerp for Alexandria June 5. "Egyptian Prince."—Taganrog for Rotterdam. Left Galata June 14. "Imperial Prince."—At Alexandria May 28. "Italian Prince."—At Alexandria June 8. "Merchant Prince."—Eastham for Alexandria. Passed Gibraltar June 15. "Sailor Prince."—At Taganrog June 9. "Saxon Prince."—At Middlesbro. "Soldier Prince."—At Manchester. "Trojan Prince."—At Alexandria June 11. The s.s. "Kaffir Prince," for Egypt and Syria, calling at Tunis and Malta, will close for cargo at Liverpool on June 24, and at Manchester on June 25.

Moss Line.

"Busiris."—Barry for Alexandria. Passed Gibraltar May 27. "Esneh."—Arrived Constantinople June 13. "Karnak."—At Pera en route for Galatz. "Khephren."—At Port Sudan June 14. "Menes."—Left Liverpool for Alexandria June 15. "Meroe."—Alexandria for Liverpool. Passed Gibraltar June 16. "Moeris."—At Odessa June 16. "Seti."—Left Alexandria for Liverpool June 9. "Siptah."—At Liverpool. The s.s. "Siptah," for Gibraltar, Malta, Syra, Smyrna, Constantinople, Odessa, Samsoun, Trebizonde, Batoum, and Poti, will close for cargo at Liverpool on June 29.

Anchor Line.

"Algeria."—Calcutta for Genoa. Left Perim June 13. "Calabria."—New York for Naples. June 8. "Massilia."—Bombay for Marseilles. Left Port Said June 15. "Media."—At London. The s.s. "Castalia," for Bombay (via Gibraltar and Suez Canal), will close for cargo at Birkenhead on June 29.

Johnston Line.

"Arranmore."—Left Volo for Salonica June 14. "Barnesmoret."—Left Liverpool for Piræus June 14. "Barrowmore."—At Varna June 12. "Blairmore."—Sulina for Antwerp. Passed Pera June 11. "Cranmore."—At Galatz June 4. "Dromore."—At Galatz June 2. "Edenmore."—At Galatz May 30. "Fenmore."—At Galatz June 4. "Foylemore."—At Galatz June 4. "Incemore."—At Galatz June 1.

The s.s. "Foylemore," for Piraeus, Safrom Liverpool on June 24.
from Liverpool on the 24th inst.

Bibby Line.

"Herefordshire."—At Rangoon June 16. "Leicestershire."—Liverpool for Rangoon. Passed Perim June 17. "Staffordshire."—Rangoon for London. At Colombo June 17. "Warwickshire."—Rangoon for London. Left Suez June 17. The s.s. "Derbyshire," for Egypt, Colombo and Rangoon, will close for cargo at Birkenhead on June 26.

Cunard Line.

"Brescia."—At Smyrna for Pera, June 15. "Caria."—At Odessa June 13. "Carpathia."—Left New York for Mediterannean June 4. Left Gibraltar June 14. "Lycia."—At Poti for Liverpool June 16. "Pavia."—Left Poti for Manchester June 14. "Phrygia."—At Liverpool for Fiume.

The s.s. "Tyria," for Oran, Algiers, Philippeville, Boma, Gibraltar, Malta, Corfu, Patras, Syra, Smyrna, Constantinople, Odessa, Batoum, Trebizonde, Samsoun, and Poti will close for cargo at Liverpool on June 22.

P. & O. Steam Navigation.

"Arabia."—At London. "Devanha."—At Bombay June 10. "India."—At Bombay June 14. "Mooltan."—Left Bombay for London June 15. "Oriental."—Left Bombay for Shanghai June 2. "Persia."—Bombay for London. At Marseilles June 16. "Salsette."—At Aden June 13. "Sicilia."—London for Calcutta. Left Malta June 17. "Socotra."—At Calcutta June 13.

The s.s. "Persia," for Bombay and Karachi (via Suez), will leave London on July 5 and Marseilles on July 12.

Westcott and Laurance.

"Barcelona."—At Malta June 15. "Belgravian."—At Pera June 12. "Bosnian."—Left Alexandria for Malta June 15. "Eden Hall."—At Pera June 13. "Egyptian."—Left London for Odessa June 15. "Favonian."—At Odessa June 12. "Joshua Nicholson."—At Galatz June 6. "Orchis."—At Malta June 12.

Ellerman Line.

"Andalusian."—Alexandria for Liverpool. Passed Gibraltar June 14. "Arabian."—At Poti June 15. "Assiout."—At Pera June 10. "Bulgarian."—Left Pera for Panderma June 15. "Castillian."—At Liverpool. "Fabian."—At Liverpool. "Venetian."—Left Liverpool for Alexandria, June 14.

The s.s. "City of Khios," for Gibraltar, Malta, Syra, Smyrna, and Constantinople, taking cargo for Odessa and Batoum, will close for cargo at Liverpool on July 13.

Papayanni Line.

"Alexandria."—At Liverpool. "Britannia."—Gibraltar for Alexandria. Left Malta June 12. "City of Cambridge."—Left Liverpool for Pera June 13. "City of Oxford."—At Alexandria June 4.

The s.s. "Andalusian," for Tangier, Algiers, Malta, and Alexandria, will close for cargo at Liverpool on June 27.

City Line.

"City of Athens."—Left Bombay for Liverpool June 15. "City of Benares."—At Calcutta May 31. "City of Calcutta."—At Calcutta June 7. "City of Delhi."—Karachi for Birkenhead. Passed Port Said June 15. "City of Edinburgh."—Left Colombo for Calcutta June 13. "City of Glasgow."—Bombay for Liverpool. Left Marseilles June 17. "City of Madrid."—At Karachi June 4. "City of Manchester."—Left Liverpool for Karachi June 12. "City of Sparta."—Liverpool for Calcutta. Left Colombo June 16.

The s.s. "City of Glasgow," for Bombay and Karachi, will close for cargo at Birkenhead on July 26.

Hall Line.

"Anatolia."—Eastham for Persian Gulf. Left Muscat June 18. "City of Birmingham."—Left Liverpool for Calcutta June 9. Passed Gilbraltar June 13. "City of Bombay."—At Sourabaya en route for Bombay June 7. "City of Colombo."—Calcutta for London. Left Port Said June 14. "City of Lahore."—At Bombay June 16. "City of Naples."—Karatsu for Port Said. Left Colombo June 10. "Knowsley Hall."—At Sourabaya June 18. "Locksley Hall."—Karachi for Liverpool. Left Port Said June 15. "Persian."—At Karachi June 18. "Sandon Hall."—Calcutta for Boston. Left Port Said June 12. "Trafford Hall."—Karachi for Liverpool. Passed Perim June 15.

The s.s. "City of Corinth" (via Suez) for Bombay will close for cargo at Birkenhead on June 25.

Strick Line.

"Arabistan."—At London. "Armanistan."—At London. "Avristan."—Left Henjan for Karachi June 14. "Baluchistan."—At Muscat June 8. "Bardistan."—At Bombay May 30. "Djerissa."—Left Bunderabbas for Suez June 11. "Gorjistan."—At Bombay June 7. "Lurristan."—Oran for Antwerp. Left Vigo June 14. "Nigaristan."—Madras for London. Left Port Said June 14. "Serbistan."—Left Bombay for Dunkirk May 31. "Tabaristan."—Left Brisbane for Karachi June 14. "Tangistan."—At Busreh June 10. "Turkistan."—Left Hartlepool for Glasgow June 14.

The s.s. "Turkistan," for Port Sudan and the Persian Gulf, will close for cargo at Manchester on June 24.

British India Steam Navigation.

"Aronda."—Greenock for Calcutta. Left Suez May 30. "Barala."—Greenock for Calcutta. Left Suez April 5. "Colaba."—Left Calcutta for London June 15. "Golconda."—At Calcutta June 7. "Jelunga." London for Calcutta. Left Malta June 16. "Mombasa."—At Middlesbrough. "Rewa."—At Southampton. "Robilla."—At Southampton.

The s.s. "Chupra," for Kurrachee, Bombay, and Persian Gulf, will sail from London on July 7.

Stock and Share Markets.

Bank Rate 3 per cent. (May 9, 1912.)

SETTLING DAYS.

CONSOLS.
Monday, July 1.
STOCKS AND SHARES.
In Mining Shares the next carry-over is June 25.

Continuation Days.	Ticket Days.	Pay Days.
Wed., June 26.	Thurs., June 27.	Fri., June 28.
Wed., July 10.	Thurs., July 11.	Fri., July 12.

LONDON, June 20.

The improvement we noted last week did not last. Our readers will have been prepared for this. The Stock Exchange declares that the liquidation has ended. We can find no grounds for this assertion. As a proof that we are right, the principal falls of the past week have been in the shares in which there has been the most gambling. New issues attract no attention. The public has indigestion and subscribes nothing. The Patents Insurance Company is an ingenious scheme, but whether it will pay not even the promoters can say. It appears that the end of June settlement will now pass off peaceably, all arrangements having been made. Money will be tight until the 30th, after which date we shall revel in cheap money again.

Internationals Idle.

The foreign market has again lapsed into idleness. The negotiations with regard to the Chinese Loan are hung up through the intrigues of Russia and Japan and the curious obstinacy of the Americans. Egyptian Unified at 100½ show no change. Greek Fours are strong at 56. Hungarians remain steady at 92. Italians are well supported and strong at 96. A new loan is talked about. All sorts of rumours are in the air with regard to the troubles in Japan. But they do not affect the price of Japanese. Tintos continue to be bought, and are talked to 90. The big Russian Railway Loan is being discussed in Paris, and an issue of at least a portion of it will be made in the autumn. Turkish Unified at 89½ are steady.

Railways Weak.

In the Home Railway market Metropolitans, Districts, and all the other speculative counters have been weak. It would appear to be the psychological moment at which to buy the Heavies. They are now fat with dividend. It is useless to discuss Yankee Rails; no business will be done until the elections are over. The quotations are being supported by the bankers, but we repeat our advice to buy copper shares. Rubber is weak, but oil shares are steady, and Sir Marcus Samuel made a bull speech at the Shell meeting. Nevertheless there is a large account open, and we anticipate a steady drop in the price. Not even prophesies of vast wealth can inspire the tired bull. The jobbers mark down Urals and Egyptians, as they do not wish to be saddled with stock.

Pushing Egyptians.

Some attention has been called to the Egyptian market in a new quarter, a well-known firm of stockbrokers who have hitherto devoted their energies to oil having declared that the Egyptian market called for the attention of the investor. We are glad to see one more big firm in the House engaged in an Egyptian campaign. Those who know Egypt best are well aware that most of the shares in the good companies are very much undervalued. The crop prospects for the current year are excellent. The plants look well, and although we may get a much lower Nile than usual, perhaps the unusual dryness of the soil will keep away the fog. Fog is quite as dangerous to the cotton plant as too much water or even semi-drought. Aboukirs are unchanged on the week. Agricultural Banks still remain at 6¼. They look cheap, but there are few buyers. Behera are 14¼, Delta Lands 15s. The Delta Light Railways dividend was good, and the shares rose to 8¼. They are worth buying at this price. Abdys at 8s. 6d. show no change. The report will be issued next week. The New Egyptian report did not please the market, and the shares dropped 1s. 3d. to 11s. It was hoped that the dividend would have been better than 6d. per share. The company shows a net profit of £15,074, and there is a further unrealised profit of £9,467. Since the date of the last report the company has sold the transport assets of the Sudan Development and Exploration Company to the Sudan Government. The debentures and shares in this company were taken into the balance-sheet on June 30, 1910, at £73,093. In the present balance-sheet dated December 31, 1911, they are taken in at £27,500. It is understood that the company sold for £60,000. Perhaps the chairman will have something to say on the matter at the meeting. National Banks have been a shade weaker, and are now quoted 17¾. There is no change in Sidi Salem, Union Foncière, or United Lands.

Fils de G. A. Errera and Co.

Under the above title a private company has been registered in London with a capital of £120,000 in 300 £40 founders' shares. The objects are stated to be:—To carry on in the Ottoman Empire and elsewhere the business of wholesale and retail hardware dealers, iron-founders, haberdashers, hosiers, lace and embroidery dealers, milliners, tailors, dressmakers, makers of and dealers in textile fabrics, hatters, clothiers, outfitters, glovers, feather-dressers, boot and shoemakers, manufacturers and importers of and wholesale and retail dealers in leather goods, household furniture, ornaments, etc., and to acquire the business carried on in Salonica, Smyrna, and elsewhere by A. G. Errera and D. G. Errera, as Fils de G. A. Errera and Co. The first directors are A. G. Errera and D. G. Errera (permanent governing directors). The qualification is fifty ordinary shares. Remuneration of the governing directors is £6,000 per annum, divisible (£4,500 per annum when only one). The registered offices of the company are 6, Hall Street, Manchester.

The Kazan Carpet Company.

A limited liability company has been formed, says the *Gazette Financière*, by an important group to take over the Oriental carpet business of Kazan and Co. The capital of the new concern is £125,000, divided into 20,000 preference shares at £1, 100,000 ordinary shares at £1, and 5,000 deferred shares at 1s. The distribution of profits is said to be as follows:—After payment of 9 per cent. to the preference and 6 per cent. to the ordinary shares, and after allowing for reserve and remuneration of the board, three-fifths of the net profits will be allotted to the ordinary and two-fifths to the deferred shares.

FINANCIAL NEWS IN BRIEF.

Coupon No. 20 of the Five per Cent. First Mortgage Debentures of the Egyptian Salt and Soda, due on June 30, will be paid on and after July 1 by the National Bank of Egypt, 4 and 5, King William Street, E.C. The talons attached to the bonds will be exchanged for a further issue of coupons, numbered 21 to 40, inclusive, on presentation to the bank on and after the date mentioned.

The half-year's interest to June 30 on the Four and a Half per Cent. First Charge Debentures of the Mortgage Company of Egypt will be payable on and after July 1, at the Banking House of Messrs. Glyn, Mills, Currie and Co., 67, Lombard Street, E.C.

With regard to the twelfth drawing of the Piræus, Athens, and Peloponnesus Railway 3 per Cent. Bonds, the numbers are announced of bonds drawn for repayment at par on 15th prox., at the offices of Messrs. R. Raphael and Sons, Austinfriars House.

The receipts of the Egyptian Markets for the week ending June 13 were £696, or a decrease of £178.

The receipts of the Alexandrian Tramways for May last amounted to 205,413 frs., as compared with 208,811 frs. in May, 1911, showing a decrease of 3,398 frs.

The net profits of the Credit Franco-Egyptien for the year 1911-12 amounted to 832.506 frs., as compared with 723,888 frs. in 1910-11. The dividend proposed is 10 frs. per share, against 12.50 frs. for the previous year.

NOTES FROM ALEXANDRIA

(FROM OUR OWN CORRESPONDENT.)

ALEXANDRIA, June 14.

The improvement which manifested itself on the market last week has become more marked during the last few days. There has been an increased inquiry for shares, and the volume of business is much larger. It is inevitable that there should be a hardening of prices during the coming summer, but I think that a serious recovery will meet with some big obstacles. These obstacles are the large packets of shares emanating from the recent auctions, which have not yet been definitely placed. At the slightest sign of a recovery, the holders of these shares will dispose of their holdings, and I doubt very much whether the market is in a position to absorb such a large quantity of stock without feeling the effects. Still, should the present demand continue, it is probable that the whole of the floating stock will be disposed of before the end of the year. A large number of Egyptian capitalists are now engaged in discreetly picking up bargains, and it is to be hoped that English investors will profit by the opportunities which our market offers.

Agricultural Credit.

Most of the projects attributed to Lord Kitchener, and especially the proposed drainage works, have been welcomed by the public with enthusiastic satisfaction. There is one, however, which does not seem to meet with universal favour. I refer to the project submitted to the Mixed Court of Appeal for its sanction, which aims at the non-expropriation of estates the area of which is under five feddans. The object is to protect the fellah against the usurer by declaring properties under five feddans in extent as inalienable. This law may be a useful one in other countries, but in Egypt it is certainly premature. In the first place, it is proved that usurers scarcely ever expropriate the fellaheen. The latter generally arrange matters in such a way that the fellah retains his land. The chief sufferers by the new law, should it come into force, will be the Agricultural Bank of Egypt, who will thus lose the greater part of their clientèle; and after them the fellaheen, who will no longer be able to borrow money at 8 per cent. (the official rate of the Agricultural Bank). They will have still further recourse to usurers, who, in their turn, will become more exacting and will make the fellah pay more interest, to counterbalance the risks incurred by the fact that small holdings are not subject to seizure. It will thus be seen that the law defeats the very object for which it has been created. Moreover, there is nothing to justify such a law, statistics going to show that small holdings have no need of protection, since they are daily being extended, while the larger properties are being parcelled out. The new law, instead of helping the fellaheen, will make it difficult for him to procure the money necessary for his needs at a reasonable rate of interest, and the Agricultural Bank will no longer be able to come to his assistance. The large number of expropriations made by this bank last year alarmed a certain number of people, but the latter evidently overlooked the fact that the buyers of the properties thus expropriated were also fellaheen, and that these expropriations simply form part of the process of the evolution of property; the cultivable lands pass from the hands of weak holders to stronger ones, for the greater good of the country's production.

Enterprises in Syria.

M. Miriel, managing director of the Crédit Foncier Egyptien, has returned from a business tour in Syria. He has formed the conviction that there is a great deal to be done in the way of agricultural enterprises in that country, but unfortunately Turkish legislation and the uncertainty of the political situation stand in the way of the acquisition and development of land there.

The receipts of the Delta, Helouan and Cairo Quarry lines of the Egyptian Delta Light Railways amounted to £E7,190 for the eleven days ended May 31, as against £E7,159 for the corresponding period last year.

Company Notes and Reports.

Egyptian Agricultural.

At the meeting of the Egyptian Agricultural Company, Limited., on June 17, Mr. H. J. Wenham (chairman), who presided, reminded the shareholders that the company had risen out of the ashes of the Egyptian Estates, Limited, which came to grief some four years ago. The estates and other properties having been in hand for such a short time, and the circumstances of the year having been quite abnormal, no attempt had been made on this occasion to draw up a statement of profit and loss. The matter to which the board were giving their most earnest attention at the moment was the rapid and at the same time economical development of the three agricultural estates —the Chaba, the Atfeh, and the Dekerness, for on these the success or otherwise of the company mainly hung. There was good ground for encouragement in this matter, inasmuch as Lord Kitchener, who was undoubtedly one of Egypt's chief assets at the present time, was giving his characteristically intelligent and energetic attention to the agricultural problems of that country. According to latest estimates, something like £20,000 would be laid out in developing the work of the three estates this year, and eventually a large net profit was anticipated.

Baghdad Railway Company.

At the meeting of the above company, held in Berlin on June 12, the Chairman stated, with regard to the progress made on the section from Bulgurlu to Baghdad, that of the 1,450 kilomètres, 40 kilomètres are completed, and have been opened to traffic. In the course of the current year a further 50 kilomètres north of the Taurus, as well as 100 to 150 kilomètres starting from Aleppo in both directions to the Amanus Mountains and the Euphrates, will be ready for traffic. The completion of the tunnels in the Taurus and the Amanus will, owing to the difficulties encountered, not be possible for about three years.

New Egypt Company.

The report of the above company for the eighteen months ended December 31 last stated that, after providing for debenture interest, there was a net profit of £15,074, and a further unrealised profit of £9,467 in respect of further sales of land. From the realised profit the directors recommend the payment of a dividend of 6d. per share. Effect has been given to the resolutions of the shareholders dealing with the reduction of the nominal value of the shares of the company from 20s. to 15s. Satisfactory realisations have been made since the last published accounts, and, since the closing of the books at December 31 last, further sales have been made at remunerative prices. Negotiations are in progress with the Egyptian Government for a river training concession, but the question is one of a highly technical nature, and the directors—before committing themselves to any outlany of capital—will have to satisfy themselves that the project is a safe and profitable one for the company.

Greek Loans.

The coupons falling due on July 1 of the Five per Cent. Greek Loans of 1881 and 1884 should be presented at Messrs. C. J. Hambro and Son for payment of 68 per cent. in gold of their face value, being 32 per cent. ordinary interest and 18 per cent. per annum augmentation, payable on the coupon of the first half-year. The coupons of the Four per Cent. Monopoly Loan of 1887 should be presented for payment of 75 per cent. in gold of their face value, being 43 per cent. ordinary interest and 16 per cent. per annum augmentation, payable on the coupon of the first half-year. The coupons of the Five per Cent. Funding Loan of 1893 should be presented for payment of 32 per cent. in gold of their face value, and the coupons of the Greek Government Four per Cent. Loan of 1902 (Railways Loan) should be presented for payment.

COMPAGNIE IMMOBILIERE D'EGYPTE.

L'assemblée générale ordinaire des actionnaires de la Compagnie Immobilière d'Egypte sera tenue à Bruxelles le vendredi, 28 juin prochain.

Messieurs,—Conformément aux status, nous avons l'honneur de vous présenter notre rapport annuel sur la situation des affaires sociales et de soumettre à votre approbation le bilan et le compte de profits et pertes pour notre douzième exercice qui a pris fin le 31 décembre 1911. L'amélioration très légère du marché urbain au commencement de 1911, dont nous vous annoncions déjà les signes précurseurs dans notre précédent rapport, facilita la rentrée d'une bonne partie de nos créances. A la suite de ces rentrées, notre compte débiteurs hypothécaires diminua d'environ frs. 1.132.000 au profit du compte caisse, le premier passant de frs. 4.581.182 à frs. 3.449.180; le second ayant passé de frs. 171.750 à frs. 1.352.668. Ce changement a consolidé la situation de notre société en renforçant d'une manière sensible nos disponibilités. Malheureusement deux grosses faillites bancaires qui marquèrent la fin de cette année, arrêtèrent ce mouvement avant qu'il eût pu aboutir à la reprise des transactions immobilières que l'on avait déjà escomptées. Il a été expliqué de source officielle et autorisée que ces faillites ne sont qu'une dernière suite de la crise de 1907. "En réalité, écrivait le Conseiller financier du gouvernement égyptien dans son rapport sur le budget de 1912, "ces faillites sont dues à des causes bien antérieures à l'année en cours, et c'est à tort que l'on en tirerait des conclusions défavorables à la situation économique de l'Egypte dans son ensemble."

Néanmoins le resserrement des crédits qui en fut la suite, s'opposa à une reprise des prix, de sorte que nous sommes obligés de maintenir les prévisions de moins-values introduites dans le bilan de l'année passée. Mais si les prix n'ont pu se relever, la construction d'immeubles de rapport continue à présenter en Egypte, et particulièrement au Caire, un placement avantageux.

C'est en nous inspirant de ce dernier fait que nous avons, ainsi que nous vous le faisions prévoir dans notre rapport de l'année précédente, élaboré une combinasion que nous avons l'honneur de vous exposer à grands traits. Nous avons décidé la constitution d'une société spéciale à laquelle notre société apportera une partie de ses terrains propres à la construction de maisons de rapport. Trios millions de francs sont mis à la disposition de cette société spéciale par des groupes amis. Notre société aura droit à 75 pour cent du bénéfice de cette société spéciale après rémunération à 6 pour cent de capitaux nouveaux. La forme à donner à cette combinaison est également arrêtée et la réalisation s'en opère en ce moment. Comme nous avons lié tous les intéressés par des actes provisoires, les premières constructions ont déjà été adjugées et pourront être mises en location pour la fin de l'année. Nous mettons ainsi non seulement en valeur les terrains que nous cédons, mais nous amorçons les blocks dont nous restons propriétaires. Par cette combinaison, nous espérons donc arriver à augmenter dans une mesure sensible nos revenus, tout en constituant un sérieux élément de plus-value à une partie de notre actif immobilier.

Les revenus des propriétés se sont élevés à	Frs. 38.218.18	£E. 1.474,265
Les intérêts hypothécaires (dont env. £E. 5,000 ont été effectivement encaissées) à.....	316.698,22	12.216,626
Les intérêts divers à	29.207,04	1.126,667
Le compte change et commissions à	701,95	27,192
	£E. 384.828,39	£E. 14,844,75$_0$
Les frais généraux, etc., s'élèvent à.....	Frs. 79.857,97	£E 3.080,516
Les Intérêts sur obligations à	228.763,35	8.824,546
Total des dépenses	308.621,32	11.905,062
Total des recettes.....	384.828,39	14.844,750
Excédent des recettes....	76.207,07	2.939,688
à déduire du solde du compte Profits et Pertes au 31 décembre, 1910 ..	2.290,057,05	88.338,951
Solde débiteur du compte Profits et Pertes au 31 décembre, 1911	2.213,849,98	85.399,263

Immeubles.—Notre actif immobilier est resté tel que l'année dernière, sauf une légère augmentation du fait des impôts et autres charges. Nos propriétés comprennent principalement des terrains à bâtir et quelques maisons de rapport, suivant tableau annexé. Elles sont libres de toutes charges et figurent au bilan pour leur prix de revient; la moins-value éventuelle est compensée par une somme égale figurant dans le compte "prévision" formé l'année passée.

Participations: Titres et Immeubles.—Ce compte n'a subi qu'un changement insignifiant.

Débiteurs hypothécaires.—Ce compte représente les soldes dus en capital au 31 décembre, 1911, par nos divers acheteurs; les intérêts ont été portés sous deux rubriques comprenant l'une, les intérêts contractuels, l'autre, les intérêts moratoires, Nous conservons sur les immeubles vendus le privilège du vendeur jusqu'à paiement intégral de notre créance. Nous venons de mentionner plus haut les rentrées importantes de l'année 1911 qui ont permis de ramener ce compte à frcs. 4.165.000.

Débiteurs divers.—Ce chapitre présente un solde qui a encore été réduit sur le chiffre de l'année dernière par suite de quelques paiements.

Cautionnementes statutaires.—Ce poste, qui trouve sa contre-valeur au passif sous la rubrique "Déposants Statutaires" représente tes 620 actions déposées par nos administrateurs et commissaires en garantie de leur gestion, conformément à l'article 16 de nos statuts.

Créditeurs divers.—Ce compte tend à disparaître presque entièrement; sur un montant de £E4389, £E4000 représentent le solde du prix d'un terrain dont l'acquisition n'avait pu jusqu'ici être régularisée que partiellement; depuis la clôture de l'exercice, le litige a été complètement réglé.

Frais généraux.—La stricte économie de notre gestion nous a permis de maintenir les frais généraux au même niveau que l'année passée.

Elections statutaires.—Les mandats de M. Th. M. Hegener, administrateurs, et de MM. Léon Rolin et Charles Verbeke, commissaires, prennent fin à cette assemblée; ces messieurs sont rééligibles.

LE CONSEIL D'ADMINISTRATION.

COMPANY MEETINGS.

Société Anonyme Agricole et Industrielle d'Egypte.—Cairo, July 1, at 5 p.m.

Compagnie Immobilière d'Egypte.—Cairo, June 28, at 11.30 a.m.

Société Anonyme Ottomane d'Agriculture et d'Amélioration.—Salonika, July 10, at 3 p.m.

Société Anonyme Ottomane Arslan.—Galta, July 10, at 2 p.m.

New Egyptian Company.—London, Winchester House, Old Broad Street, on June 27, at 12 noon.

DIVIDEND ANNOUNCEMENTS.

Egyptian Delta Light Railway.—Dividend of 4¾ per cent. (subject to tax) on the preference shares for the year ended March 31.

Banque Franco-Serbe.—Payment in Paris of dividends, for the past financial year, of 9,375 francs per share.

Etablissements Orosdi-Back.—The dividend payment for 1911 is maintained at 12 francs per share.

A sum of £10,000 in sovereigns was received by the Bank of England from Egypt on Wednesday.

CITY LIFE ASSURANCE COMPANY.

The industrial branch recently formed by the above company is making fair progress. In the words of the chairman, speaking at the recent general meeting, the effects of the labour troubles are being satisfactorily overcome, and, with the view of minimising, as far as possible, the loss sustained by the policy-holders, in consequence of their policies lapsing through non-payment of premiums, the directors favourably consider every application made for reinstatement in respect of policies lapsed in consequence of strikes, lock-outs, etc., crediting the premiums paid, and granting full immediate benefit in respect of all policies that were in full benefit prior to lapsing. This concession is greatly appreciated by those concerned.

NOTES OF THE WEEK.

Signs are multiplying that the prolongation of hostilities is making itself felt in the economic conditions of Turkey. In the Smyrna district, where troops to the number of 60,000 have been concentrated with a view to repelling the anticipated invasion of the Italians, the military authorities are stated to be no longer in funds, and it has proved more economical to provide the soldiers with fourpence a day in the place of rations. The change could hardly fail to affect the morale of the soldiery, with the result that relations between the army and the civilian population have become strained. It has also been found necessary to enforce the terms of the new Military Law, which imposes service in the army upon all Turkish subjects between the ages of twenty-seven and forty-five years. Hitherto Christians and Jews have been able to secure exemption from military service. Not the least objectionable feature of the new measure is that it has no respect for payments already made for permanent exemption. One of the first results of the enforcement or threatened application of the law has been to promote a steady tide of emigration both from Asia Minor and from Macedonia. The numbers concerned may not be relatively large, but the tendency illustrates one of the difficulties with which the Turkish Government will be confronted through an indefinite continuation of the war.

The news from Albania this week is most unsatisfactory. A battalion of the 49th regiment in Monastir, including the officers, has mutinied, and after taking all the arms, ammunition, and money on which it could lay hands, has fallen back on Kolonia, in the Grammos Mountains, south of Koritza. Another serious outbreak is reported from western Albania, where the Malissori have taken up arms. Heavy fighting is said to have occurred at Alessio, and the rebels have cut the telegraphic communications with Scutari, and are threatening the depôt of arms. Earlier in the week an official *communiqué* from Constantinople admitted that twelve officers and seventy-one Albanian soldiers had deserted with their arms from the garrisons of Monastir, Prilip, and Debra, but later reports indicate that the defections are on a much larger scale. Messages have been received from the insurgents to the effect that their quarrel is against the Committee of Union and Progress, and not against the Empire. As far as can be gathered at present, no national movement of revolt has been organised; but the presence of military officers and regular troops justifies the belief that the Government forces will have far more trouble in suppressing the outbreak than if they had to deal with merely isolated tribes. Moreover, the danger of concerted action among the different bodies of insurgents becomes more threatening.

Last week an outbreak in the Mirdite district was announced, and the tribesmen were credited with having received considerable additions to their supply of arms. Negotiations, however, it was said, were being continued at Ipek between the Albanians and representatives of the Turkish Government, and such degree of amenability as was being shown by the former was attributed to lack of provisions and ammunition. Meanwhile a raid on Vuchitrn, south of Mitrovitza, might have warned the Turks that the work of pacification would probably entail stronger measures than the ratification of paper agreements. Unrest has also manifested itself in the navy, for, although the particulars are wanting, there would seem to be no doubt from the nature of the disciplinary measures taken that the mutiny in the small fleet was of a serious character. A reason for these several disturbances has been sought in the action of the Committee of Union and Progress at the recent elections. If there should be any foundation for the supposition, the Committee must be beginning to rue its policy on that occasion, as it will have antagonised the country without necessarily securing an implicitly obedient Chamber.

The anxiety of the Turkish Government over its domestic troubles can hardly fail to be increased by uncertainty regarding the issue of the recent diplomatic activity displayed by the Balkan States. Apart from any possible understanding between the Bulgarian and Servian Governments, with or without the full consent of Greece, the visit of King Nicholas to Vienna has given rise to the suspicion that the Montenegrin Government has also been seeking powerful support for the realisation of certain territorial aspirations. Whatever degree of probability may be found in reports of this nature, the knowledge of them may well encourage the Porte to hasten on the introduction of reforms in its provincial administration. Thus we ha[illegible] the information conveyed by Hadji Adil Bey, Min[illegible] re-

Digitized by Google

of the Interior, that the Government is contemplating the establishment of a corps of inspectors in Macedonia under the orders of a foreign adviser, and the appointment of independent inspectors in each vilayet, who will control all officials of the provincial administration. The post of chief inspector, it was added, would be given to an Englishman knowing the country, who would be assisted by one or two fellow-countrymen among his subordinates. As the proposed scheme has to be submitted to the Chamber of Deputies when the estimates of the Ministry of the Interior are voted, it will be time then to discuss it in greater detail. The appointment of the officials indicated would certainly serve to increase the interest that Great Britain has always shown in every response on the part of Young Turkey to the expectations first formed of the new régime.

It will be seen from our correspondence columns that the Ægean islanders will not allow any doubt to be cast on their liberation for all time from allegiance to Turkey. The only possible answer to the contentions of some of our correspondents is "Wait and see." We must, however, be acquitted of any lack of sympathy with the aspirations of the Greek inhabitants of the Ægean islands, for our object in urging their more enthusiastic representatives to proceed warily was to save them, if possible, from a worse disappointment than has befallen Crete up to the present moment. Any movement for the restoration of former privileges that have been taken away under the Young Turkish régime, in the belief that the new order in Constantinople would remove the necessity for any privileged treatment of the non-Turkish subjects of the Empire, would certainly command the widest support. But the islanders' claims go far beyond this. It would be a normal procedure on the part of the Italians to retain the territory that they have seized in the war; but it does not follow that if they have no wish to extend their empire permanently over these islands they can with any justification dispose of them at the bidding of the islanders themselves to a third Power that has so far expressed no definite wish to receive them. The situation is undoubtedly complex, but premature action on the part of the islanders is not calculated to promote the solution of the problem. Italy has seized the islands with the object of bringing pressure to bear upon Turkey in regard to the settlement of the dispute between the two countries. She has not extended the theatre of the war to the Ægean Sea in order to satisfy the aspirations, however legitimate, of the Greek inhabitants of a number of Turkish islands. According to the latest information, the Congress of delegates from the islands which assembled at Patmos last week elected a committee to proceed to Rome for the purpose of expressing gratitude to Italy for the liberation of the islands, and to invoke her aid in the settlement of their political future. Among the resolutions passed by the delegates is one recording the firm determination never to fall back under the Turkish yoke. They proclaim the complete autonomy of the islands under the name of "The Ægean State," with a special flag. A decision in regard to the mode of election of the head of the State and of the legislative body is considerately postponed.

In another column we publish extracts from a carefully reasoned letter written by Sir Valentine Chirol to the *Times* on the subject of the Trans-Persian Railway. Sir Valentine Chirol pleads for friendly consideration of a scheme that he condemned some ten years ago, on the ground that the arguments that could be adduced in the past are no longer applicable to the present case. The former project, he points out, entailed a line of a purely strategical character, which would have been a distinct menace to Afghanistan, while the railway now contemplated is "designed to provide, primarily at least, for pacific purposes, a rapid and easy means of communication between Europe and India, and (is to be) constructed *ex hypothesi* by the friendly co-operation of the two European Powers that have the greatest interests in Asia." In regard to India, Sir V. Chirol does not think it desirable to perpetuate the idea that India can go on living in a water-tight compartment shut off from the rest of the world, and he would like to see the question of communication with Europe taken in hand "when we have an opportunity of exercising by friendly means a decisive influence upon the solution of the problem." He considers that the construction of a great line of railway from the north-west to the extreme south-east of Persia would serve both to strengthen the central authority and to pacify, by its civilising influence, the turbulent regions through which it would pass; and he concludes with the significant assumption that one of the conditions of any British support to be ultimately given to the Trans-Persian Railway will be that the construction of the railway from the head of the Persian Gulf northwards through western Persia should meet with no obstruction. Sir Valentine Chirol is too great an authority on Middle Eastern affairs to urge his point in vain, and it is unlikely that any serious effort will be made to prejudge the case against the proposed Trans-Persian Railway. There is, however, some justification for the protest against any attempt being made to commit Great Britain to the project before the nation has been given an opportunity to discuss the line in all its bearings. We welcome the assumption that the line northwards from the head of the Persian Gulf must necessarily accompany any concession for a Trans-Persian railway, but we should prefer to see its construction precede by many years the first earthworks of the great trunk line. If railways could be had for the asking, there would be little need to limit the railway programme of any country. Persia, however, is not in a position to embark upon an ambitious scheme of railway construction, and those who would plead Persian interests may well hope that the lines which are likely to prove the most remunerative to Persia, and possibly to the British capital involved, will be built first.

FOREIGN POLICY COMMITTEE.

A meeting of the Liberal foreign group and the Foreign Policy Committee was held on Thursday, 20th inst., the members present being Mr. Dickinson, Mr. Noel Buxton, Mr. Ponsonby, Mr. Needham, Mr. D. Mason, Mr. King, and Mr. MacCallum Scott. An address was given by Mr. H. F. B. Lynch on the question of railway schemes in Persia. It was agreed that on grounds of British interest, strategic and commercial, and of the needs of internal government in Persia, the conditions of British support should be clearly defined without delay.

CONSTANTINOPLE LETTER.

(From Our Own Correspondent.)

Constantinople, June 21.

War News.

The war remains, as far as we can see, at a standstill. In Tripoli the Italians seem to be making some headway in the eastern theatre of the war, but on the western flank they appear to be able to do little or nothing. On the other hand, it must be admitted that the Turko-Arabs seem to have been rather badly mauled at both Zanzur and Lebda, though the Italian deduction that the Turks are near the end of their tether and are making a desperate effort to give their Arab allies the encouragement of victory is not necessarily correct.

In the islands nothing happens. The garrisons of Chios and Mitylene announce from time to time that all is well. So do the Governors of various ports. Italian ships now and again appear off the Anatolian coast, and after "making observations" disappear into the unknown. On the other hand, something—no one seems to know what—has happened to the Turkish Naval Staff. As far as one can judge from the multitudes of contradictory reports now current, the publication of a rather derisive article concerning the inaction of the fleet by the *Hakk*, an extremist journal, caused a movement among the officers of the squadron now at the Dardanelles. Some of them were for going out with at least the torpedo craft and coming to a glorious end. Others, more cautious, threatened to resign their commissions if the Government gave any such orders. Quarrels ensued, and finally there was something very like mutiny. The Commodore, Tahir Bey, so it is averred, was obliged to quiet some of the more ardent spirits among the junior officers by felling them with a chair. However this may be, it is certain that there were scenes of a character not conducive to naval discipline. The Minister of Marine paid a visit to the Fleet, and ordered a court-martial to try certain officers. The court-martial presently resigned, and was replaced by another court presided over by a military officer. Rassim Pasha replaced Tahir Bey, and a Lieutenant-Colonel was appointed Chief of the Staff of the Fleet. As for the sentences passed by the court-martial, rumour has it that they were very severe.

The Provinces.

The outbreak in North Albania is gradually dying out, the bulk of the peasantry who turned out at the beginning of the rising having returned to their villages. Isa Boletin is reported to be in the Rugova country quite near the Montenegrin frontier, and to contemplate paying a visit to Cettinje. The Scutari tribes remain quiet if not enthusiastically loyalist.

From Arabia comes the news that Izzet Pasha, the Commander of the Yemen Field Force, is demanding reinforcements. His army of some 60,000 strong a year ago has greatly decreased owing to sickness and casualties, and does not now number more than 40,000 effectives. Idris continues, so the Turks assert, to receive rifles and ammunition from the Italians, and the heat of the Tehama has made offensive operations against him quite impossible. It will, however, be too much to expect reinforcements to be sent by land. The march from Medina to Assir and Yemen would be impossible for any number of troops, and the sea route, of course, is closed.

SALONIKA LETTER.

(From Our Own Correspondent.)

Salonika, June 22.

Mention was made in your last letter from Salonika of the divergent views of the more enlightened higher officials, and of the Union and Progress Committee here, regarding the expulsion of the Italians, more especially of the doctors. At the very last moment, the recommendations of the German and French Ambassadors in Constantinople having prevailed, two doctors, the one attached to the French and the other to the Russian hospital in this town, and a well-known oculist, were allowed to remain; but many were of the opinion that their stay would not be a long one, and the sequel has justified this view. Within ten days a pretext has been found for their expulsion, and two of them are preparing to leave to-morrow. The one attached to the French hospital—on an Italian woman, in an apparently critical condition, being admitted as a patient—diagnosed that she was suffering from an acute spasmodic attack of the heart, treated her accordingly, and declared she was not in a condition to be expelled. Thereupon the official commission of five doctors was sent to examine her, and it reported that she was perfectly sound and fit to travel. Now, the penalty for making a false medical declaration being a term of imprisonment, and the Capitulations as far as Italians are concerned being at present suspended, the doctor was summoned to the court to show cause why judgment should not be passed upon him, and he awaits the result. Meanwhile, the authorities said: "If this is the way in which these Italian doctors are going to act in spite of our clemency towards them they had better go," and the order for their expulsion was made accordingly; while the woman is now petitioning to be allowed to become an Ottoman subject!

The Cost of the War.

Hitherto it has been the boast that the war did not financially affect this country to any great degree, but that the cost was a heavy one for Italy. If such is the case, why all the extra taxation which is now to be imposed on the top of the much-increased taxes all round of the last two or three years? The proposed additions are a further 25 per cent. on the Property and Patent taxes, a deduction from official salaries, an increase of 20 per cent. for exemption from active military service and of 33 per cent. for exemption from the Reserve, a small increase on some other general taxes, while the Minister of Finance is studying what new tax can be created. If this is the result of a war said to cost practically nothing, where should we be if really at war? Of course, the pacifying of Albania is some expense, so it is not very encouraging to learn that the Commander of the 7th Army Corps and the Vali of Kossovo, recently in Upper Albania, have informed the Central Government that the insurrection is by no means quashed, and may entail much more serious measures later on. To us who are outside the pale of official optimism it necessarily seems that the country is in a most unsettled state, and that a whole army of foreign advisers would find it a hard task to put things in order. And here it may be remarked, with due deference to Mr. Noel Buxton, that nothing whatever has as yet been "proved" with regard to the plans of the "Young Turks," and that no "effective" appeal has yet been made by any section of the Turkish Press for the appointment of European advisers. In fact, it is not mere "European goodwill" and "sympathy" upon which reliance is placed, and for which the more Chauvinistic section of the Young Turkey party craves, but material financial help and a strong backing to enable them to govern the country in their own fashion and according to their own ideas. If they can secure these by appointing foreigners as departmental ornaments they may, though even then unwillingly, bring themselves to do so; but that such foreigners will ever be voluntarily given any real authority in the work of the country's administration is quite another story. Should that day ever come, your correspondent will be the first to acknowledge that Mr. Noel Buxton gauged the situation the more correctly, and he will most heartily rejoice accordingly.

LETTER FROM CAIRO.

(From Our Own Correspondent.)

Cairo, June 19.

Post Office Savings Banks.

Up to the end of last month the total number of deposits since the extension to rural districts of the Post Office Savings Banks was 58,720, amounting in all to about £E16,430. The system is now working in five moudiriehs—Sharkieh, Gharbieh, Behera, Menoufieh, and Qalioubieh. Some 2,000 withdrawals, giving a total value of about £E1,155, have also been effected, leaving a balance at the end of May of about £E15,275. In those provinces in which the system was in force in April—thus providing figures for comparison—although the great bulk of the deposits were effected at the time of the inauguration of the scheme, the deposits have been slightly increased since. This is, of course, the only real test of the utility of the system, and until more months have gone by and more figures are available it is impossible to pronounce an opinion. It is, however, a hopeful sign that a certain number of withdrawals have been effected, since this proves that, at any rate to some extent, the real nature of a savings bank has been understood, and that the misconception as to its being some new form of taxation has been partially removed at all events. By far the greatest number of depositors are Moslems, the proportion of them to Christians in Gharbieh and Sharkieh—the only provinces for which an analysis of the depositors is available—being roughly as three to one. Of Christian races the largest number of depositors are Greeks, though they only number eighty-two. It is of interest to note that quite a large number of women and girls have opened accounts. Out of the 50,016 depositors analysed in this way 12,718 fall under the heading of "peasants" and 10,491 are classed as "farmers." Of other classified professions "pupils" account for 3,835 accounts, "clergy" for 2,464, and "gaffirs" (watchmen) for 3,180. With regard to the amounts deposited, they range from one penny to £50, but the favourite sum appears to be 5 piastres (1s.).

A "Homestead" Law.

Supplementing the Usury Law and the extension of the Post Office Savings Banks to rural districts, a further law of the same category is now in process of elaboration. The object of this latest legislation is to render unseizable for debt an area of five feddans (acres) out of every property. In the case of the Usury Law the question was attacked from the native side first, with the hope of its ultimate extension to foreigners in Egypt; in this case the project has been submitted in the first place to the Mixed Courts, the Legislative Assembly of which body has approved it with amendments. It now remains for the Egyptian Government to consider whether they will accept the law as amended. If so, a similar project will presumably be drafted for the approval of the Council of Ministers and the Legislative Council, in order that it may be made applicable to natives. The idea underlying the proposed legislation appears to be similar to that upon which the Homestead Law in America is based, and to that which has given good results in those parts of India where it is in force. Until the text of the law has been made public discussion of it is hardly possible, besides which, as has been already pointed out, the Government has three months in which to consider whether it will accept the law as drafted by the Mixed Courts. The object of the project is, it need hardly be said, the protection of the fellah from the usurer, though whether the fellah will be as grateful as he doubtless properly should be when he finds that his principal security on which to raise money has gone remains to be seen. The views of the mortgage banks and similar institutions will likewise be of interest.

Alexandria Municipality.

At the meeting of the Alexandria Municipality on Monday the councillors agreed to the Government proposal that the post of Administrator should be abolished and its place taken by that of a Director-General. They further agreed, with some reservations, to the appointment to this post of Dr. Granville, who has hitherto been Director of the Municipalities and Local Commissions Department in the Ministry of the Interior. At present it is not known whether the Government and Dr. Granville will accept the amendments proposed by the Council, which refer to the power possessed by the Director-General with regard to the promotion of municipal employees. Mr. Chataway, hitherto Administrator of the Municipality, has been compensated for the loss of his post by the grant of an annual pension from the Municipality.

KHEDIVE'S VISIT TO LONDON.

The Khedive arrived in London on Thursday of last week on a private visit, and proceeded to Claridge's Hotel. On Friday he paid a number of courtesy calls during the day, and in the evening witnessed the kinemacolor reproduction of the Coronation Durbar at the Scala Theatre. On Sunday he left London for Windsor, attended by H.E. Youssef Sadik Pasha, Major Watson, A.D.C., and Mr. H. L. Verney, Groom-in-Waiting to the King, specially attached. The Hon. Sir Derek Keppel was in attendance at the railway station.

The guests invited to meet the Khedive at Windsor Castle included Field-Marshal Lord Grenfell, the Hereditary Grand Duke of Mecklenburg-Strelitz, the Bishop of Winchester and the Hon. Mrs. Talbot, and Sir Vincent Corbett. Viscount Milner also had the honour of being invited, but was unavoidably prevented from obeying their Majesties' command.
